

## Configuring Logging Destinations for the SDX SNMP Agent

---

Use the following configuration statement to configure logging destinations for the SDX SNMP agent:

```
snmp agent logger name ...
```

To configure logging destinations:

1. From configuration mode, access the configuration statement that configures the SDX SNMP agent.

```
[edit]  
user@host# edit snmp agent
```

2. Specify the name and type of logging destination.

For file-based logging:

```
[edit snmp agent]  
user@host# set logger name file
```

For syslog-based logging:

```
[edit snmp agent]  
user@host# set logger name syslog
```
