

Configuring DOCSIS Actions for Dynamic Service Activator

You can use a DOCSIS action to specify the priority and bandwidth in the traffic profile in CommitResource messages. Table 1 on page 1 lists the fields that you can use for PCMM policies that will be used with PCMM Web service interface. It also provides the parameter names that you must use if you configure parameter substitutions for the DOCSIS action.

Table 1: Parameter Names for DOCSIS Actions

Field	Parameter Name
Traffic Priority	priority
Maximum Sustained Traffic Rate	bandwidth
Maximum Traffic Burst	bandwidth
Minimum Reserved Traffic Rate	bandwidth
