

Using Shortcuts to Create a Configuration

You can navigate through the configuration hierarchy to enter statements, or you can use **set** commands to configure statements at the **[edit]** hierarchy level. The following list of commands creates the same configuration as the procedure:

```
user@host# set shared sae configuration aggregate-services keepalive-time 172800
```

```
user@host# set shared sae configuration aggregate-services  
keepalive-retry-time 900
```

```
[edit]
```

```
user@host# set shared sae configuration aggregate-services  
activation-deactivation-time 900
```

```
[edit]
```

```
user@host# set shared sae configuration aggregate-services  
failed-notification-retry-time 92000
```
