

Displaying Output That Matches a Regular Expression

If the regular expression contains any spaces, operators, or wildcard characters, enclose it in quotation marks.

For information about common regular expression operators, see [\[Unresolved xref\]](#).

To display output that matches a regular expression:

- Enter `match regular-expression` after the pipe symbol.

The following example matches all Ethernet interfaces in the interface configuration:

```
user@host> show configuration interfaces | match eth
eth0 {
```
