

Entering Configuration Mode

To enter configuration mode:

- Use the `configure` command.

```
user@host> configure  
Entering configuration mode.
```

When you enter configuration mode, the following configuration mode commands are available:

```
[edit]  
user@host# ?  
Possible completions:  
  
commit          Commit a set of changes  
delete          Delete a configuration statement or identifier  
edit            Specify edit level in hierarchy  
exit            Exit from this level  
help            Display help about commands and statements  
history          Display command history  
insert          Insert an identifier  
load            Load configuration from an ASCII file  
rename          Rename a statement or identifier  
rollback        Discard current set of changes  
run             Run an operational mode command  
save            Save configuration to file  
set             Set a configuration property  
show            Display configuration information  
top             Return to top level of configuration mode  
up             Move up one level in hierarchy
```

To enter configuration mode and lock the configuration to prevent other CLI or C-Web sessions from modifying the configuration in the database:

- Use the `configure exclusive` command.

```
user@host> configure exclusive  
Entering configuration mode.
```
