

## Viewing Information About the System (C-Web Interface)

**Purpose** View system information.

You can view information about the SRC software, including system identification and the system time. You can also view information about the environment of the C-series controller, including memory, temperature, and fan speeds.

**Action** ■ Click **Monitor > System > Information**.

The Information pane displays the system information.

The screenshot displays the C-Web Interface with the 'Monitor' tab selected. The left sidebar contains a menu with 'System' highlighted. The main content area shows the 'System Information' page, which is divided into several sections: 'System Identification', 'System Time', 'Memory', and 'CPU Info'. Each section contains a table of system details.

System Identification	
Hostname	gaspode
Manufacturer	Juniper Networks
Product Name	SDX-2000
Version	1.0
Serial Number	0207082006000003
UUID	48384441-5254-0030-4859-003048595D02
Hostid	e30a2f07
Software version	SDX-300 Release . [A.MAIN-110] (January 22, 2007 02:20)

System Time	
Current time	2007-08-24 14:07:16 EDT
Uptime	76 days, 18:35
Number of active users	3
Load Averages (1m/5m/15m)	0.27/0.06/0.02

Memory	
Total	15G
Free	13G

CPU Info	
Number of CPU	4
CPU Model	Dual Core AMD Opteron(tm) Processor 265
