

## Testing the Web Application Gateway Client

---

The SRC software includes a Web application gateway client that you can use to test Dynamic Service Activator's ability to invoke methods and scripts for:

- Dynamic Service Activator services

For more information about the methods for these services, see [Methods for the Dynamic Service Activator Web Service Interface](#).

- PCMM services

For more information about the methods for these services, see [SRC PCMM Web Service Interface Methods](#).
