

Configuration Statements for the Web Application Server

Use the following configuration statements to configure the operating properties for the Web application server at the [edit] hierarchy level.

```
slot number application-server {  
    java-garbage-collection-options java-garbage-collection-options;  
    java-heap-size java-heap-size;  
}
```

```
slot number application-server web http {  
    port port;  
    interface interface;  
}
```

```
slot number application-server web https {  
    local-certificate local-certificate;  
    port port;  
    interface interface;  
}
```

```
slot number application-server web virtual-host host-name {  
    alias alias;  
    allow-address allow-address;  
    allow-host allow-host;  
    deny-address deny-address;  
    deny-host deny-host;  
}
```

```
shared application-server user name
```

```
shared application-server user name authentication {  
    encrypted-password encrypted-password;  
    plain-text-password;  
}
```
