

Configuration Statements for Adding VPNs and Extranet Clients

Use the following configuration statements to add VPNs and extranet clients at the [edit] hierarchy level.

```
subscribers retailer name vpn vpn-id {  
    description description ;  
    display-name display-name ;  
    extranet-client [ extranet-client ... ];  
    imported-extranet [ imported-extrane t...];  
}  
subscribers retailer name subscriber-folder folder-name enterprise name vpn vpn-id  
    {  
        description description ;  
        display-name display-name ;  
        extranet-client [ extranet-client ... ];  
        imported-extranet [ imported-extrane t...];  
    }
```

For detailed information about each configuration statement, see the *SRC-PE CLI Command Reference*.
