

Creating Plug-In Instances (C-Web Interface)

You can use the C-Web interface to create a plug-in instance and choose the type of plug-in that you want to create. You can create plug-ins for all SAE configurations or for groups.

NOTE: When you create a plug-in instance and specify a plug-in type, all the other available types are removed from the side pane when you commit the configuration. To change the type, create a new plug-in.
