

## Configuring Internal Plug-Ins

---

Use the following configuration statements to configure internal plug-ins:

```
shared sae configuration plug-ins name name internal {  
    plug-in-class plug-in-class ;  
}  
shared sae configuration plug-ins name name internal properties name {  
    value ;  
}
```

To configure an internal plug-in:

1. From configuration mode, access the internal plug-in configuration.

```
user@host# edit shared sae configuration plug-ins name intnl internal
```

2. Configure the Java class name of the plug-in.

```
[edit shared sae configuration plug-ins name intnl internal]  
user@host# set plug-in-class plug-in-class
```

3. Access the internal plug-in property configuration.

```
[edit shared sae configuration plug-ins name intnl internal]  
user@host# edit properties prop
```

4. Configure properties that define the plug-in. Enter values in the format property name = expression.

```
[edit shared sae configuration plug-ins name internalPlugin internal properties  
prop]  
user@host# set value
```
