

Configuring Next-Rule Actions (C-Web Interface)

You can configure next-rule actions for JUNOS filter policy rules. If a packet matches the classify-traffic condition, the next-rule action causes the router to continue to the next rule in the policy list for evaluation.

To configure a next-rule action:

1. In the side pane, select a JUNOS filter policy rule.
2. From the Create new list, select **Next Rule**. Type a name for the action, and click **OK**.
3. Enter information as described in the Help text in the main pane, and click **Apply**.
