

Configuring Service Class Name Actions (C-Web Interface)

You can configure service class name actions for PCMM policy rules.

To configure a service class name action:

1. In the side pane, select a PCMM policy rule.
2. From the Create new list, select **Service Class Name**. Type a name for the action, and click **OK**.
3. Enter information as described in the Help text in the main pane, and click **Apply**.
