

## Configuring the JUNOS Routing Platform to Apply Changes It Receives from the SAE

---

To configure the JUNOS routing platform to receive configuration statements from the SAE and apply those statements to the configuration:

1. Create a configuration group called `sdx` that contains the configuration statements that the SAE sends to the JUNOS routing platform. To do so, include the `groups` statement at the `[edit]` level, and specify the name `sdx`.

```
[edit]
groups {
  sdx;
}
```

2. Configure the JUNOS routing platform to apply these statements to the configuration. To do so, include the `apply-groups` statement at the `[edit]` level.

```
[edit]
set apply-groups sdx;
```
