

Adding JUNOS Routers Individually

To add a router:

1. Click **Configure**, expand **Shared**, and then click **Network**.

The Shared Network pane appears.

2. From the Create new list, select **Device**.
3. Type a name for the new device in the dialog box, and click **OK**.

The Device pane appears.

4. From the Device Type list, select **JUNOS**.
5. Enter information as described in the Help text in the main pane, and click **Apply**.
