

Configuring Access Control for Communities (C-Web Interface)

To configure community strings:

1. Click **Configure > SNMP**.
2. From the Create new list, select **Community**.
3. Enter a name for the new Community in the dialog box, and click **OK**.
4. From the side pane, expand the name of the community, enter information as described in the Help text in the main pane, and then click **Apply**.
