

Allowing Multiple Subscriptions to the Same Service per Subscriber

To allow a subscriber to have multiple subscriptions to the same service, each subscription:

- Must have its own parameter substitutions.
- Can be activated or deactivated independently.

An object for each subscription is created in the directory. The name of the object has the following format:

`<ServiceName>%<SubscriptionId>`

- `<ServiceName>` —Name of the service
- `<SubscriptionId>` —Name of the subscription

Other than the naming convention, multiple subscriptions are identical to regular subscriptions.
