

Viewing Action Congestion Point Information by Service

Purpose View action congestion point information by service.

Action To display information about services that SRC-ACP manages in the backbone network:

```
user@host> show acp backbone service
```

To display information about specific backbone services used to generate congestion points:

```
user@host> show acp backbone service service-name service-name
```

Enter a partial service name to list all matching backbone services.

To display information about the backbone services from a specific virtual router:

```
user@host> show acp backbone service virtual-router-name virtual-router-name
```

To display backbone service attributes:

```
user@host> show acp backbone service brief
```

By default, information about the backbone service attributes, service sessions, and associated congestion points is displayed.
