

Overview of the Policies, Services, and Subscribers Management Subtasks in the C-Web Interface

The Policies, Services, and Subscribers subtasks in the C-Web interface require separate configuration. Before you can configure policies, services, and subscribers from the C-Web interface, you need to configure and enable access to the Policies, Services, and Subscribers subtasks.

When you configure policies, services, and subscribers in the C-Web interface, ensure that only one user makes changes to the data at one time. If more than one user makes changes to the same configuration information for policies, services, or subscriptions, the software stores the first change to the data; subsequent changes are discarded.
