

Overview of Commands to Troubleshoot Connections to Remote Hosts

If you are troubleshooting problems with the SRC software that might be caused by connectivity problems to remote hosts, you can use the following commands:

- `ping`—Test connectivity to a remote host.
- `tracert`—Display the route from the local host to a remote host and back.
- `show interfaces`—Display information about system interfaces.
- `show route`—Display information from the system routing table.
