

Enabling the Juniper Networks Database to Run in Standalone Mode (SRC CLI)

When you run a Juniper Networks database in standalone mode, the database does not communicate with other Juniper Networks databases.

Use the following configuration statements to enable the Juniper Networks database on a C-series Controller in standalone mode:

```
system ldap server {  
    stand-alone;  
}
```

To enable a Juniper Networks database to run in standalone mode:

1. From configuration mode, access the configuration statement that configures the Juniper Networks database.

```
user@host# edit system ldap server
```

2. Enable standalone mode.

```
[edit system ldap server]  
user@host# set stand-alone
```
