

Enabling the Juniper Networks Database to Run in Standalone Mode with the C-Web Interface

When you run a Juniper Networks database in standalone mode, the database does not communicate with other Juniper Networks databases.

To enable a Juniper Networks database to run in standalone mode:

1. Click **Configure**, expand **System > LDAP**, and then click **Server**.

The Server pane appears.

2. In the Server pane, select the **Standalone** check box, and then click **Apply**.
