

## Adding Objects for Policy Servers to the Directory (C-Web Interface)

---

To communicate with policy servers, the SAE creates and manages pseudointerfaces that it associates with a policy decision point object in the directory. Each policy server in the SRC network must appear in the directory as a policy decision point object.

To add a policy server to the directory:

1. Click **Configure**, expand **Shared**, and then click **Network**.

The Network pane appears.

2. From the Create new list, select **Policy Decision Point**.
3. In the dialog box, enter a name for the new Policy Decision Point, and click **OK**.

The Policy Decision Point: <name> pane appears.

4. Enter the information in the main pane as described in the Help text, and click **Apply**.
