

Configuring Next-Interface Actions (C-Web Interface)

Use this action to forward packets to a particular interface and/or a next-hop address. You can configure next-interface actions for JUNOS filters and JUNOS policy rules. On JUNOS routers, you can use this action for both ingress and egress parts of the interface.

To configure a next-interface action:

1. In the side pane, select a JUNOS filter or JUNOS policy rule.
2. From the Create new list, select **Next Interface**. Type a name for the action, and click **OK**.
3. Enter information as described in the Help text in the main pane, and click **Apply**.
