

## Configuring License Server Alarms (SRC CLI)

---

You can configure the license server to send alarms to system administrators through SNMP and e-mail messages.

Use the following configuration statements to configure the license server alarms:

```
shared license-server alarm {  
    threshold threshold;  
    report-server report-server;  
}  
  
shared license-server email {  
    server server;  
    alarm-report-address alarm-report-address;
```

**NOTE:** In most cases, you do not need to change the configuration for the license server. If you change the configuration, do so with care. The software needs to be able to communicate with the license server to operate correctly.

---

To configure license server alarms:

1. From configuration mode, access the configuration statement that configures alarms.

```
[edit]  
user@host# edit shared license-server alarm
```

2. Specify the threshold as a percentage of the licensed capacity that, when exceeded, sends SNMP minor traps and initiates e-mail alerts to the system administrator.

```
[edit shared license-server alarm]  
user@host# set threshold threshold
```

3. Specify the report server to receive warning traps.

```
[edit shared license-server alarm]  
user@host# set report-server report-server
```

To configure an e-mail notification:

1. Access the configuration statement that configures e-mail notification.

```
[edit shared license-server alarm]  
user@host# up
```

```
[edit shared license-server]  
user@host# edit email
```

2. Specify the SMTP e-mail server to receive alarms and usage reports.

```
[edit shared license-server email]
```

```
user@host# set server server;
```

3. Specify an e-mail address of the system administrator to receive warning e-mail messages.

```
[edit shared license-server alarm]  
user@host# set alarm-report-address alarm-report-address;
```
