

## Configuring Logging

To configure logging for the Threat Mitigation Application:

- Edit or accept the default values for the fields in the Loggers tab.

The screenshot shows the 'ConfMagic - Threat Mitigation Portal (etc/config.properties)' window with the 'Loggers' tab selected. The window contains several configuration sections for logging, each with a checkbox, a filter text field, and file/size fields with 'Browse...' buttons.

| Log Type     | Filter (e.g. 'error-')   | Log File                       | Rollover File  | Rollover Size |
|--------------|--|--------------------------------|----------------|---------------|
| Error Log    | <input checked="" type="checkbox"/> Error Log Filter (e.g. 'error-') | thma_error.log                 | thma_error.alt | 1000000       |
| Info Log     | <input checked="" type="checkbox"/> Info Log Filter (e.g. 'info-')   | thma_info.log                  | thma_info.alt  | 1000000       |
| Debug Log    | <input type="checkbox"/> Debug Log Filter (e.g. 'debug-')            | thma_debug.log                 | thma_debug.alt | 1000000       |
| Audit Log    | <input type="checkbox"/> Audit Log Filter (e.g. 'Audit/info-')       | thma_audit.log                 | thma_audit.alt | 1000000       |
| Error Syslog | <input type="checkbox"/> Error Syslog Filter (e.g. 'error-')         | Error Syslog Hostname: loghost |                |               |
| Info Syslog  | <input type="checkbox"/> Info Syslog Filter (e.g. 'info-warning')    | Info Syslog Hostname: loghost  |                |               |

Buttons: OK, Cancel

For more information about logging, see the *SRC-PE Monitoring and Troubleshooting Guide*.
