

## Modifying the VTA Renaming Rules

---

To modify the rules used to rename a VTA, edit the `/opt/UMC/conf/vta/rules.xml` file. For example, you can substitute different `oldString` and `newString` attributes for the `<replace>` element values and save the new values to a new file that you specify as the renaming rules file for the **rename** command.

For information about modifying the renaming rules, see the `/opt/UMC/conf/vta/rules.xml` file. This file contains details about the replacement values for the VTA names.
