

Configuring Subscribers and Subscriptions to VTA Services

You need to add retailers and subscribers to the directory. If you are using the SRC-VTA for testing or demonstration purposes, you can use the retailers and subscribers that are provided in the sample data. (For information about loading sample data, see [Installing the SRC-VTA and Running the Configuration Script](#) .) If you do not load the sample data, you need to create at least one shared subscriber.

To configure subscribers to VTA services:

1. Add a retailer and at least one shared subscriber.

See [Adding Retailers \(SRC CLI\)](#).

2. For all subscribers managed by the SRC-VTA, create an individual or a group subscription to services for which a VTA monitors and manages usage.

See [Configuring Subscriptions \(SRC CLI\)](#).

3. For the service, configure the subscriptions to automatically activate the service when the subscribers log in.
