

## Viewing Information About Services in the Backbone Network

---

**Purpose** View information about services in the backbone network.

**Action** To display information about services that SRC-ACP manages in the backbone network:

```
user@host> show acp backbone service
```

To display information about specific backbone service used to generate congestion points:

```
user@host> show acp backbone service service-name service-name
```

Enter a partial service name to list all matching backbone services.

To display information about the backbone services from a specific virtual router:

```
user@host> show acp backbone service virtual-router-name virtual-router-name
```

Enter a virtual router name to list backbone services from a particular virtual router.

To display backbone service attributes:

```
user@host> show acp backbone service brief
```

By default, information about the backbone service attributes, service sessions, and associated congestion points is displayed.
