

## Viewing Information About Edge Congestion Points by DN (C-Web Interface)

**Purpose** View information about edge congestion points by DN.

**Action** To view information about edge congestion points:

1. Click **ACP > Edge > Congestion Point > DN**.

The Edge/Congestion Point/DN pane appears.

The screenshot shows the Juniper C-Web Interface. The top navigation bar includes 'Monitor', 'Configure', 'Diagnose', and 'Manage'. The user is logged in as 'admin'. On the left, a sidebar lists various configuration categories: ACP, CLI, Component, Date, Disk, Interfaces..., Iptables..., JPS, NIC, NTP, Redirect Server, Route..., SAE, Security, and System. The main content area is titled 'ACP' and 'Edge / Congestion Point / DN'. It contains four input fields: 'Congestion Point Dn', 'Slot', 'Style' (a dropdown menu), and 'Virtual Router Name'. Each field has a description and default value. Below the fields are 'OK' and 'Reset' buttons. The footer shows the copyright notice for Juniper Networks, Inc. and the 'Juniper Your Net.' logo.

Field	Description	Value	Default
Congestion Point Dn	DN of congestion point for which you want to list all matching congestion points.	All or part of the congestion point DN.	No value
Slot	Number of the slot for which you want to configure values.	Currently, the chassis has only one slot. The valid value is 0.	0
Style	Output style.	Choices: brief: Display congestion point DN	detail
Virtual Router Name	Name of virtual router from which to list congestion points.	Virtual router name	No value

2. In the Congestion Point DN box, enter a congestion point DN, or leave the box blank to view information for all DNs.
3. In the Slot box, enter the number of the slot for which you want to display congestion point information.
4. Select an output style from the Style list.
5. In the Virtual Router Name box, enter a virtual router name to display information about a specific virtual router, or leave the box empty to display information about all virtual routers.
6. Click **OK**.

The Edge/Congestion Point/DN pane displays a list of congestion points.
