

Viewing Information About Subscriber Sessions in the Edge Network

Purpose Display information about the subscriber session.

Action To display information about the current subscriber sessions in memory:

```
user@host> show acp edge subscriber
```

To display information about specific subscriber sessions:

```
user@host> show acp edge subscriber session-id session-id
```

Enter all or part of the subscriber session ID to list all matching subscriber sessions.

To display information about the subscriber sessions from a specific virtual router:

```
user@host> show acp edge subscriber virtual-router-name virtual-router-name
```

Enter a virtual router name to list subscriber sessions from a particular virtual router.

To display subscriber session attributes for the current subscriber sessions:

```
user@host> show acp edge subscriber brief
```

By default, information about the subscriber session attributes, service sessions, and associated congestion points is displayed.
