

Viewing JPS AM Connections with the C-Web Interface

Purpose View information about the current JPS network connections for the application manager.

Action 1. Click **JPS > Statistics > AM > Connections**.

The Statistics/AM/Connections pane appears.

The screenshot shows the Juniper C-Web Interface. The top navigation bar includes 'Monitor', 'Configure', 'Diagnose', and 'Manage'. The user is logged in as 'admin'. The left sidebar lists various system components: ACP, CLI, Component, Date, Disk, Interfaces..., Iptables..., JPS (highlighted), NIC, NTP, Redirect Server, Route..., SAE, Security, and System. The main content area is titled 'JPS Statistics / AM / Connections'. It features an 'Ip Address' input box with 'OK' and 'Reset' buttons. A help text box on the right explains the IP address filter: 'IP address for the application manager. Value: All or part of the IP address. If the IP address filter is not specified, all application managers are selected. Default: No value'. The footer contains copyright information for Juniper Networks, Inc. (2007) and the slogan 'Juniper your Net.'

2. In the IP Address box, enter the IP address, or leave the box blank to display all AM connections.
3. Click **OK**.

The Statistics/AM/Connections pane displays the AM connection statistics.
