

Viewing JPS AM Statistics with the C-Web Interface

Purpose View information about recent performance statistics for the application manager-to-policy server interface.

Action Click **JPS > Statistics > AM**.

The Statistics/AM pane displays performance statistics for the application manager-to-policy server interface.

The screenshot displays the Juniper C-Web Interface. At the top, there is a navigation bar with tabs: Monitor (highlighted), Configure, Diagnose, and Manage. To the right of these tabs, it says "Logged in as: admin" and provides links for Refresh, Preferences, About, and Logout. On the left side, there is a vertical menu with various system components: CLI, Component, Date, Disk, Interfaces..., JPS (highlighted), NIC, NTP, Redirect Server, Route..., SAE, Security, and System. The main content area shows the "JPS" section expanded, displaying "Statistics / AM". Below this, it shows "JPS AM Interface (PKT-MM-3)" with two statistics: "Connections opened" and "Connections closed", both with a value of 0. At the bottom of the interface, there is a footer with copyright information: "Copyright © 2007, Juniper Networks, Inc. All Rights Reserved. Trademark Notice. Privacy." and the Juniper logo with the tagline "Juniper your Net."
