

Reviewing the Information Collected from a JUNOS Routing Platform

Purpose Review information that the network publisher collects from a JUNOS routing platform.

- Action**
1. Enable an output file to collect information from all routers or for a specific router.

Sample syntax for all routers:

```
[edit slot 0 network-publisher routers test-mode]  
user@host# set enable-file-output
```

Sample syntax to collect information for a router named my-router:

```
[edit slot 0 network-publisher routers router my-router test-mode]  
user@host# set enable-file-output
```

2. Run the network publisher.

user@host> **request network-publisher execute**
3. Use FTP to transfer the file from the C-series Controller to another system; then open the file on the remote system and examine the file content.
