

## Viewing Information About the Routing Table (C-Web Interface)

**Purpose** View information about the route from the local system to a remote host.

**Action** 1. Click **Monitor > Route**.

The Route pane appears.

The screenshot shows the Juniper C-Web Interface. At the top, there is a navigation bar with tabs: Monitor, Configure, Diagnose, and Manage. The 'Monitor' tab is selected. On the right side of the navigation bar, it says 'Logged in as: admin' and has links for 'Refresh', 'Preferences', 'About', and 'Logout'. On the left side, there is a vertical menu with various system components: ACP, CLI, Component, Date, Disk, Interfaces..., Iptables..., JPS, NIC, NTP, Redirect Server, Route... (highlighted in orange), SAE, Security, and System. The main content area is titled 'Route' in orange. It contains two checkboxes: 'Detail' and 'No Resolve', both of which are currently unchecked. Below these checkboxes are 'OK' and 'Reset' buttons. At the bottom of the interface, there is a footer with copyright information: 'Copyright © 2007, Juniper Networks, Inc. All Rights Reserved. Trademark Notice. Privacy.' and the Juniper logo with the tagline 'Juniper your Net.'

2. To suppress symbolic addressing, select the **No Resolve** box.
3. To display detailed output, select the **Detail** box.
4. Click **OK**.

The Route pane displays the information about the route.
