

## Viewing Information About Subscriber Sessions by Service Name

**Purpose** View information about subscriber sessions by service name.

**Action** 1. Click **Monitor > SAE > Subscribers > Service Name**.

The Subscribers/Service Name pane appears.

The screenshot shows the Juniper SAE configuration interface. On the left is a navigation menu with categories: ACP, CLI, Component, Date, Disk, Interfaces..., Iptables..., JPS, NIC, NTP, Redirect Server, Route..., SAE (highlighted), Security, and System. The main area is titled 'Subscribers / Service Name'. It contains a table with five rows of configuration options: Service Name (text input), Maximum Results (text input), Secret (checkbox), Slot (text input), and Style (dropdown menu). Each row has a description and default value on the right. At the bottom of the configuration area are 'OK' and 'Reset' buttons. The footer of the interface includes copyright information for Juniper Networks, Inc. (© 2007) and the slogan 'Juniper your Net.'

Field	Description	Default
Service Name	Service name of subscriber sessions.	No value
Maximum Results	Number of results to be displayed.	25
Secret	Display subscriber sessions and service sessions for hidden services.	Disabled
Slot	Display SAE information for a specified slot.	0
Style	Output style	Detail

2. In the Service Name box, enter a full or partial service name for which you want to display information, or leave the box blank to display all subscriber sessions.
3. In the Maximum Results box, enter the maximum number of results that you want to receive.
4. Select the **Secret** check box to set a flag indicating that subscriptions and service sessions from hidden services are displayed.
5. In the Slot box, enter the number of the slot for which you want to display subscriber session information.
6. Select an output style from the Style list.
7. Click **OK**.

The Subscribers/Service Name pane displays information about subscriber sessions.
