

Configuring Source Grouped Networks (C-Web Interface)

You can configure source networks in grouped format. For JUNOS ASP policy rules, you must enter source networks in grouped format.

To configure a grouped source network in a classify-traffic condition:

1. In the side pane, expand a traffic condition, expand **Source Network**, and select **Group Network**.
2. Click **Create**, enter information as described in the Help text in the main pane, and click **Apply**.
