

Starting the Policies, Services, and Subscribers CLI

Before you start the Policies, Services, and Subscribers CLI, configure access to it.

See [Configuring Access to the Policies, Services, and Subscribers CLI](#).

The Policies, Services, and Subscribers CLI lets you modify data shared by the instances of the SRC software that are running on a C Series Controller across the network.

To start the Policies, Services, and Subscribers CLI:

- Enter the `enable component` command.

```
user@host> enable component editor
```
