

Shutting Down the Device Drivers

To shut down the specified router or device instance:

1. Issue the **show sae drivers brief** command to view the router or device instances.
2. Issue the **request sae shutdown device** command to shut down all device drivers.
 - To shut down specific drivers managing a virtual router, use the **filter** option and specify all or part of the name of the virtual router.

```
user@host> request sae shutdown device filter filter
```

- To specify that no confirmation is requested before the software shuts down the device drivers, use the **force** option.

```
user@host> request sae shutdown device force
user@host> request sae shutdown device filter filter force
```
