

## Configuration Statements for SRC CLI Directory Access

---

Use the following configuration statements to change the connection to the directory that stores SRC configuration information. You enter the system ldap client statement at the [edit] hierarchy level:

```
system ldap client {  
    base-dn base-dn ;  
    url url ;  
    backup-urls backup-urls ;  
    authentication-dn authentication-dn ;  
    credentials credentials ;  
    connect-timeout connect-timeout ;  
    time-limit time-limit ;  
    eventing;  
    polling-interval polling-interval ;  
    connection-manager-id connection-manager-id ;  
    dispatcher-pool-size dispatcher-pool-size ;  
    event-base-dn event-base-dn ;  
    signature-dn signature-dn ;  
    blacklist;  
}
```

**NOTE:** Do not change the value for the `enable-eventing`, `polling-interval`, `connection-manager-id`, `dispatcher-pool-size`, or `event-base-dn` statements unless instructed to do so by Juniper Networks.

The `eventing` statement is enabled by default.
