

Configuring the Juniper Networks Database to Run in Community Mode with the C-Web Interface

You configure a Juniper Networks database in community mode to setup redundancy with other Juniper Networks databases.

To configure the Juniper Networks database to run in community mode:

1. Click **Configure**, expand **System > LDAP**, and then click **Server**.

The Server pane appears.

2. In the Server pane, clear the **Standalone** check box, and click **Apply**.
3. In the side pane, click **Commit**.
4. Expand **Server**, and click **Community**.

The Community pane appears.

5. Click **Create**, enter information as described in the Help text in the main pane, and then click **Apply**.
