

Configuring Forward Actions (C-Web Interface)

Use this action to forward packets, such as packets that are sent by means of a routing table. You can configure forward actions for JUNOS filters and JUNOS policy rules.

To configure a forward action:

1. In the side pane, select a JUNOS filter or JUNOS policy rule.
2. From the Create new list, select Forward. Type a name for the action, and click **OK**.
3. Enter information as described in the Help text in the main pane, and click **Apply**.
