

Configuring NAT Actions (C-Web Interface)

You can configure NAT actions for JUNOS ASP policy rules. To configure a NAT action:

1. In the side pane, select a JUNOS ASP policy rule.
2. From the Create new list, select **NAT**. Type a name for the action, and click **OK**.
3. Enter information as described in the Help text in the main pane, and click **Apply**.
4. To configure the port range to restrict port translation when the NAT translation type is configured in dynamic-source mode:
 - a. In the side pane, select **Port**.
 - b. Click create, and enter information as described in the Help text in the main pane, and click **Apply**.
5. To configure the IP address ranges.
 - a. In the side pane, select **IP Network**.
 - b. In the main pane, click **Create**.
 - c. In the side pane, expand **IP Network**, and select **Group Network**.
 - d. Click **Create**, enter information as described in the Help text in the main pane, and click **Apply**.
