

Configuring Protocol Conditions (C-Web Interface)

The procedure in this sections shows how to configure general protocol conditions.

- If your condition includes port numbers, use the procedure in Configuring Protocol Conditions with Ports (C-Web Interface).
- If your condition consists of a protocol that is assigned with a parameter value, use the procedure in Configuring Protocol Conditions with Parameters (C-Web Interface).

To configure general protocol conditions in a classify-traffic condition:

1. In the side pane, expand a traffic condition, and select **Protocol Condition**.
2. Click **Create**, enter information as described in the Help text in the main pane, and click **Apply**.
