

Configuring QoS Conditions with the C-Web Interface

You can create QoS conditions within JUNOS scheduler policy rules.

To create a QoS condition:

1. In the side pane, select a JUNOS scheduler policy rule.
2. From the Create new list, select **Qos Condition**. Type a name for the QoS condition, and click **OK**.
3. Enter information as described in the Help text in the main pane, and click **Apply**.
