

Adding a Normal Service (C-Web Interface)

To add a normal service:

1. Click **Configure**, and expand **Services**.
2. You can add a normal service to the global service scope or to a service scope.
 - To add a normal service to the global service scope, click **Global**.
 - To add a normal service to the service scope, click the specified scope.
3. In the Create new list, select **Service**.
4. In the dialog box, type a name for the new Service. and click **OK**.

The Service: *<name>* pane appears.

5. Enter information as described in the Help text in the main pane, and click **Apply**.
