

Enabling Expansion of JUNOSe Classify-Traffic Conditions (C-Web Interface)

For information about expanded classifiers, see Policy Management Overview.

To specify whether or not the SAE expands the JUNOSe classify-traffic conditions into multiple classifiers before it installs the policy on the router:

1. Select **Configure**, and expand **Shared > SAE > Configuration > Policy Management Configuration**.
2. Check or clear the **Enable JUNOSe Classifier Expansion** box, and click **Apply**.
