CHAPTER 4

DTD for Accounting Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-accounting.dtd`, which lists the Junos XML tags that contain information about accounting. To review reference pages for the tags, see “Summary of Operational Response Tag Elements” on page 733.

CHAPTER 5

DTD for Adaptive Services Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-adaptive-services.dtd`, which lists the Junos XML tags that contain information about adaptive services. To review reference pages for the tags, see “Summary of Operational Response Tag Elements” on page 733.

CHAPTER 13

DTD for CFM Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-cfm.dtd`, which lists the Junos XML tags that contain information about CFM. To review reference pages for the tags, see “Summary of Operational Response Tag Elements” on page 733.

CHAPTER 14

DTD for Chassis Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-chassis.dtd`, which lists the Junos XML tags that contain information about chassis. To review reference pages for the tags, see “Summary of Operational Response Tag Elements” on page 733.

DTD for Clock Synchronization Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-clksyncd.dtd`, which lists the Junos XML tags that contain information about clock synchronization. To review reference pages for the tags, see “Summary of Operational Response Tag Elements” on page 733.

DTD for Database Replication Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-database-replication.dtd`, which lists the Junos XML tags that contain information about database replication. To review reference pages for the tags, see “Summary of Operational Response Tag Elements” on page 733.

DTD for Interface Metadata Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-interface-metadata.dtd`, which lists the Junos XML tags that contain information about Interface Metadata. To review reference pages for the tags, see “Summary of Operational Response Tag Elements” on page 733.

CHAPTER 32

DTD for IPSec Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-ipsec.dtd`, which lists the Junos XML tags that contain information about IPSec. To review reference pages for the tags, see “Summary of Operational Response Tag Elements” on page 733.

DTD for IPv6 Neighbor Discovery Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-ipv6-nd.dtd`, which lists the Junos XML tags that contain information about IPv6 Neighbor Discovery. To review reference pages for the tags, see “Summary of Operational Response Tag Elements” on page 733.

DTD for L2CP Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-l2cp.dtd`, which lists the Junos XML tags that contain information about L2CP. To review reference pages for the tags, see “Summary of Operational Response Tag Elements” on page 733.

DTD for Static Subscribers Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-static-subscribers.dtd`, which lists the Junos XML tags that contain information about static subscribers. To review reference pages for the tags, see “Summary of Operational Response Tag Elements” on page 733.

DTD for X.509 Certificate Response Tags

This chapter contains the Extensible Markup Language (XML) document type definition (DTD) called `junos-x509-certificate.dtd`, which lists the Junos XML tags that contain information about X.509 certificates. To review reference pages for the tags, see “Summary of Operational Response Tag Elements” on page 733.
