This product includes the Envoy SNMP Engine, developed by Epilogue Technology, an Integrated Systems Company. Copyright © 1986-1997, Epilogue Technology Corporation. All rights reserved. This program and its documentation were developed at private expense, and no part of them is in the public domain.

This product includes memory allocation software developed by Mark Moraes, copyright © 1988, 1989, 1993, University of Toronto.

This product includes FreeBSD software developed by the University of California, Berkeley, and its contributors. All of the documentation and software included in the 4.4BSD and 4.4BSD-Lite Releases is copyrighted by the Regents of the University of California. Copyright © 1979, 1980, 1983, 1986, 1988, 1989, 1991, 1992, 1993, 1994. The Regents of the University of California. All rights reserved.

GateD software copyright © 1995, the Regents of the University. All rights reserved. Gate Daemon was originated and developed through release 3.0 by Cornell University and its collaborators. Gated is based on Kirton's EGP, UC Berkeley's routing daemon (routed), and DCN's HELLO routing protocol. Development of Gated has been supported in part by the National Science Foundation. Portions of the GateD software copyright © 1988, Regents of the University of California. All rights reserved. Portions of the GateD software copyright © 1991, D. L. S. Associates.

This product includes software developed by Maker Communications, Inc., copyright © 1996, 1997, Maker Communications, Inc.

Juniper Networks, Junos, Steel-Belted Radius, NetScreen, and ScreenOS are registered trademarks of Juniper Networks, Inc. in the United States and other countries. Revision History

October 2010—R1 Junos 10.4

The information in this document is current as of the date listed in the revision history.

YEAR 2000 NOTICE

Juniper Networks hardware and software products are Year 2000 compliant. The Junos OS has no known time-related limitations through the year 2038. However, the NTP application is known to have some difficulty in the year 2036.

END USER LICENSE AGREEMENT

READ THIS END USER LICENSE AGREEMENT ("AGREEMENT") BEFORE DOWNLOADING, INSTALLING, OR USING THE SOFTWARE.

BY DOWNLOADING, INSTALLING, OR USING THE SOFTWARE OR OTHERWISE EXPRESSING YOUR AGREEMENT TO THE TERMS CONTAINED HEREIN, YOU (AS CUSTOMER OR IF YOU ARE NOT THE CUSTOMER, AS A REPRESENTATIVE/AGENT AUTHORIZED TO BIND THE CUSTOMER) CONSENT TO BE BOUND BY THIS AGREEMENT. IF YOU DO NOT OR CANNOT AGREE TO THE TERMS CONTAINED HEREIN, THEN (A) DO NOT DOWNLOAD, INSTALL, OR USE THE SOFTWARE, AND (B) YOU MAY CONTACT JUNIPER NETWORKS REGARDING LICENSE TERMS.

1. **The Parties.** The parties to this Agreement are (i) Juniper Networks, Inc. (if the Customer's principal office is located in the Americas) or Juniper Networks (Cayman) Limited (if the Customer's principal office is located outside the Americas) (such applicable entity being referred to herein as "Juniper"), and (ii) the person or organization that originally purchased from Juniper or an authorized Juniper reseller the applicable license(s) for use of the Software ("Customer") (collectively, the "Parties").

2. **The Software.** In this Agreement, "Software" means the program modules and features of the Juniper or Juniper-supplied software, for which Customer has paid the applicable license or support fees to Juniper or an authorized Juniper reseller, or which was embedded by Juniper in equipment which Customer purchased from Juniper or an authorized Juniper reseller. "Software" also includes updates, upgrades and new releases of such software. "Embedded Software" means Software which Juniper has embedded in or loaded onto the Juniper equipment and any updates, upgrades, additions or replacements which are subsequently embedded in or loaded onto the equipment.

3. **License Grant.** Subject to payment of the applicable fees and the limitations and restrictions set forth herein, Juniper grants to Customer a non-exclusive and non-transferable license, without right to sublicense, to use the Software, in executable form only, subject to the following use restrictions:

- a. Customer shall use Embedded Software solely as embedded in, and for execution on, Juniper equipment originally purchased by Customer from Juniper or an authorized Juniper reseller.
- b. Customer shall use the Software on a single hardware chassis having a single processing unit, or as many chassis or processing units for which Customer has paid the applicable license fees; provided, however, with respect to the Steel-Belted Radius or Odyssey Access Client software only, Customer shall use such Software on a single computer containing a single physical random access memory space and containing any number of processors. Use of the Steel-Belted Radius or IMS AAA software on multiple computers or virtual machines (e.g., Solaris zones) requires multiple licenses, regardless of whether such computers or virtualizations are physically contained on a single chassis.
- c. Product purchase documents, paper or electronic user documentation, and/or the particular licenses purchased by Customer may specify limits to Customer's use of the Software. Such limits may restrict use to a maximum number of seats, registered endpoints, concurrent users, sessions, calls, connections, subscribers, clusters, nodes, realms, devices, links, ports or transactions, or require the purchase of separate licenses to use particular features, functionalities, services, applications, operations, or capabilities, or provide throughput, performance, configuration, bandwidth, interface, processing, temporal, or geographical limits. In addition, such limits may restrict the use of the Software to managing certain kinds of networks or require the Software to be used only in conjunction with other specific Software. Customer's use of the Software shall be subject to all such limitations and purchase of all applicable licenses.
- d. For any trial copy of the Software, Customer's right to use the Software expires 30 days after download, installation or use of the Software. Customer may operate the Software after the 30-day trial period only if Customer pays for a license to do so. Customer may not extend or create an additional trial period by re-installing the Software after the 30-day trial period.
- e. The Global Enterprise Edition of the Steel-Belted Radius software may be used by Customer only to manage access to Customer's enterprise network. Specifically, service provider customers are expressly prohibited from using the Global Enterprise Edition of the Steel-Belted Radius software to support any commercial network access services.

The foregoing license is not transferable or assignable by Customer. No license is granted herein to any user who did not originally purchase the applicable license(s) for the Software from Juniper or an authorized Juniper reseller.

4. **Use Prohibitions.** Notwithstanding the foregoing, the license provided herein does not permit the Customer to, and Customer agrees not to and shall not: (a) modify, unbundle, reverse engineer, or create derivative works based on the Software; (b) make unauthorized copies of the Software (except as necessary for backup purposes); (c) rent, sell, transfer, or grant any rights in and to any copy of the Software, in any form, to any third party; (d) remove any proprietary notices, labels, or marks on or in any copy of the Software or any product in which the Software is embedded; (e) distribute any copy of the Software to any third party, including as may be embedded in Juniper equipment sold in the secondhand market; (f) use any 'locked' or key-restricted feature, function, service, application, operation, or capability without first purchasing the applicable license(s) and obtaining a valid key from Juniper, even if such feature, function, service, application, operation, or capability is enabled without a key; (g) distribute any key for the Software provided by Juniper to any third party; (h) use the

Software in any manner that extends or is broader than the uses purchased by Customer from Juniper or an authorized Juniper reseller; (i) use Embedded Software on non-Juniper equipment; (j) use Embedded Software (or make it available for use) on Juniper equipment that the Customer did not originally purchase from Juniper or an authorized Juniper reseller; (k) disclose the results of testing or benchmarking of the Software to any third party without the prior written consent of Juniper; or (l) use the Software in any manner other than as expressly provided herein.

5. **Audit.** Customer shall maintain accurate records as necessary to verify compliance with this Agreement. Upon request by Juniper, Customer shall furnish such records to Juniper and certify its compliance with this Agreement.

6. **Confidentiality.** The Parties agree that aspects of the Software and associated documentation are the confidential property of Juniper. As such, Customer shall exercise all reasonable commercial efforts to maintain the Software and associated documentation in confidence, which at a minimum includes restricting access to the Software to Customer employees and contractors having a need to use the Software for Customer's internal business purposes.

7. **Ownership.** Juniper and Juniper's licensors, respectively, retain ownership of all right, title, and interest (including copyright) in and to the Software, associated documentation, and all copies of the Software. Nothing in this Agreement constitutes a transfer or conveyance of any right, title, or interest in the Software or associated documentation, or a sale of the Software, associated documentation, or copies of the Software.

8. **Warranty, Limitation of Liability, Disclaimer of Warranty.** The warranty applicable to the Software shall be as set forth in the warranty statement that accompanies the Software (the "Warranty Statement"). Nothing in this Agreement shall give rise to any obligation to support the Software. Support services may be purchased separately. Any such support shall be governed by a separate, written support services agreement. TO THE MAXIMUM EXTENT PERMITTED BY LAW, JUNIPER SHALL NOT BE LIABLE FOR ANY LOST PROFITS, LOSS OF DATA, OR COSTS OR PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES, OR FOR ANY SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES ARISING OUT OF THIS AGREEMENT, THE SOFTWARE, OR ANY JUNIPER OR JUNIPER-SUPPLIED SOFTWARE. IN NO EVENT SHALL JUNIPER BE LIABLE FOR DAMAGES ARISING FROM UNAUTHORIZED OR IMPROPER USE OF ANY JUNIPER OR JUNIPER-SUPPLIED SOFTWARE. EXCEPT AS EXPRESSLY PROVIDED IN THE WARRANTY STATEMENT TO THE EXTENT PERMITTED BY LAW, JUNIPER DISCLAIMS ANY AND ALL WARRANTIES IN AND TO THE SOFTWARE (WHETHER EXPRESS, IMPLIED, STATUTORY, OR OTHERWISE), INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NON-INFRINGEMENT. IN NO EVENT DOES JUNIPER WARRANT THAT THE SOFTWARE, OR ANY EQUIPMENT OR NETWORK RUNNING THE SOFTWARE, WILL OPERATE WITHOUT ERROR OR INTERRUPTION, OR WILL BE FREE OF VULNERABILITY TO INTRUSION OR ATTACK. In no event shall Juniper's or its suppliers' or licensors' liability to Customer, whether in contract, tort (including negligence), breach of warranty, or otherwise, exceed the price paid by Customer for the Software that gave rise to the claim, or if the Software is embedded in another Juniper product, the price paid by Customer for such other product. Customer acknowledges and agrees that Juniper has set its prices and entered into this Agreement in reliance upon the disclaimers of warranty and the limitations of liability set forth herein, that the same reflect an allocation of risk between the Parties (including the risk that a contract remedy may fail of its essential purpose and cause consequential loss), and that the same form an essential basis of the bargain between the Parties.

9. **Termination.** Any breach of this Agreement or failure by Customer to pay any applicable fees due shall result in automatic termination of the license granted herein. Upon such termination, Customer shall destroy or return to Juniper all copies of the Software and related documentation in Customer's possession or control.

10. **Taxes.** All license fees payable under this agreement are exclusive of tax. Customer shall be responsible for paying Taxes arising from the purchase of the license, or importation or use of the Software. If applicable, valid exemption documentation for each taxing jurisdiction shall be provided to Juniper prior to invoicing, and Customer shall promptly notify Juniper if their exemption is revoked or modified. All payments made by Customer shall be net of any applicable withholding tax. Customer will provide reasonable assistance to Juniper in connection with such withholding taxes by promptly: providing Juniper with valid tax receipts and other required documentation showing Customer's payment of any withholding taxes; completing appropriate applications that would reduce the amount of withholding tax to be paid; and notifying and assisting Juniper in any audit or tax proceeding related to transactions hereunder. Customer shall comply with all applicable tax laws and regulations, and Customer will promptly pay or reimburse Juniper for all costs and damages related to any liability incurred by Juniper as a result of Customer's non-compliance or delay with its responsibilities herein. Customer's obligations under this Section shall survive termination or expiration of this Agreement.

11. **Export.** Customer agrees to comply with all applicable export laws and restrictions and regulations of any United States and any applicable foreign agency or authority, and not to export or re-export the Software or any direct product thereof in violation of any such restrictions, laws or regulations, or without all necessary approvals. Customer shall be liable for any such violations. The version of the Software supplied to Customer may contain encryption or other capabilities restricting Customer's ability to export the Software without an export license.

12. **Commercial Computer Software.** The Software is "commercial computer software" and is provided with restricted rights. Use, duplication, or disclosure by the United States government is subject to restrictions set forth in this Agreement and as provided in DFARS 227.7201 through 227.7202-4, FAR 12.212, FAR 27.405(b)(2), FAR 52.227-19, or FAR 52.227-14 (ALT III) as applicable.

13. **Interface Information.** To the extent required by applicable law, and at Customer's written request, Juniper shall provide Customer with the interface information needed to achieve interoperability between the Software and another independently created program, on payment of applicable fee, if any. Customer shall observe strict obligations of confidentiality with respect to such information and shall use such information in compliance with any applicable terms and conditions upon which Juniper makes such information available.

14. **Third Party Software.** Any licensor of Juniper whose software is embedded in the Software and any supplier of Juniper whose products or technology are embedded in (or services are accessed by) the Software shall be a third party beneficiary with respect to this Agreement, and such licensor or vendor shall have the right to enforce this Agreement in its own name as if it were Juniper. In addition, certain third party software may be provided with the Software and is subject to the accompanying license(s), if any, of its respective owner(s). To the extent portions of the Software are distributed under and subject to open source licenses obligating Juniper to make the source code for such portions publicly available (such as the GNU General Public License ("GPL") or the GNU Library General Public License ("LGPL")), Juniper will make such source code portions (including Juniper modifications, as appropriate) available upon request for a period of up to three years from the date of distribution. Such request can be made in writing to Juniper Networks, Inc., 1194 N. Mathilda Ave., Sunnyvale, CA 94089, ATTN: General Counsel. You may obtain a copy of the GPL at <http://www.gnu.org/licenses/gpl.html>, and a copy of the LGPL at <http://www.gnu.org/licenses/lgpl.html>.

15. **Miscellaneous.** This Agreement shall be governed by the laws of the State of California without reference to its conflicts of laws principles. The provisions of the U.N. Convention for the International Sale of Goods shall not apply to this Agreement. For any disputes arising under this Agreement, the Parties hereby consent to the personal and exclusive jurisdiction of, and venue in, the state and federal courts within Santa Clara County, California. This Agreement constitutes the entire and sole agreement between Juniper and the Customer with respect to the Software, and supersedes all prior and contemporaneous agreements relating to the Software, whether oral or written (including any inconsistent terms contained in a purchase order), except that the terms of a separate written agreement executed by an authorized Juniper representative and Customer shall govern to the extent such terms are inconsistent or conflict with terms contained herein. No modification to this Agreement nor any waiver of any rights hereunder shall be effective unless expressly assented to in writing by the party to be charged. If any portion of this Agreement is held invalid, the Parties agree that such invalidity shall not affect the validity of the remainder of this Agreement. This Agreement and associated documentation has been written in the English language, and the Parties agree that the English version will govern. (For Canada: Les parties aux présentes confirment leur volonté que cette convention de même que tous les documents y compris tout avis qui s'y rattache, soient rédigés en langue anglaise. (Translation: The parties confirm that this Agreement and all related documentation is and will be in the English language)).

About This Guide

This preface provides the following guidelines for using the *Junos[®] OS XML API Operational Reference*:

- JUNOS Documentation and Release Notes on page ccxxix
- Objectives on page ccxxix
- Audience on page ccxxx
- Supported Platforms on page ccxxxi
- Using the Examples in This Manual on page ccxxxi
- Documentation Conventions on page ccxxxii
- Documentation Feedback on page ccxxxiv
- Requesting Technical Support on page ccxxxiv

JUNOS Documentation and Release Notes

For a list of related JUNOS documentation, see
<http://www.juniper.net/techpubs/software/junos/>.

If the information in the latest release notes differs from the information in the documentation, follow the *JUNOS Release Notes*.

To obtain the most current version of all Juniper Networks[®] technical documentation, see the product documentation page on the Juniper Networks website at
<http://www.juniper.net/techpubs/>.

Juniper Networks supports a technical book program to publish books by Juniper Networks engineers and subject matter experts with book publishers around the world. These books go beyond the technical documentation to explore the nuances of network architecture, deployment, and administration using the Junos operating system (Junos OS) and Juniper Networks devices. In addition, the Juniper Networks Technical Library, published in conjunction with O'Reilly Media, explores improving network security, reliability, and availability using Junos OS configuration techniques. All the books are for sale at technical bookstores and book outlets around the world. The current list can be viewed at <http://www.juniper.net/books>.

Objectives

This reference provides complete information about the tag elements in the Junos Extensible Markup Language (XML) application programming interface (API) that the

Junos XML management protocol and NETCONF XML Management protocol client applications can use to request information about the operational status of a router. The tag elements are equivalent to operational mode commands in the Junos OS command-line interface (CLI).

NOTE: For additional information about the Junos XML API software—either corrections to or information that might have been omitted from this guide—see the software release notes at <http://www.juniper.net/>.

Audience

This reference is designed for Juniper Networks customers who want to write custom applications for monitoring routing platforms that run the Junos OS. It assumes that you are familiar with basic terminology and concepts of XML, with XML-parsing utilities such as the Document Object Model (DOM) or Simple API for XML (SAX), and with the Junos OS command-line interface (CLI).

In addition, you need a broad understanding of networks in general, the Internet in particular, networking principles, and network configuration. You must also be familiar with one or more of the following Internet routing protocols:

- Border Gateway Protocol (BGP)
- Distance Vector Multicast Routing Protocol (DVMRP)
- Intermediate System-to-Intermediate System (IS-IS)
- Internet Control Message Protocol (ICMP) router discovery
- Internet Group Management Protocol (IGMP)
- Multiprotocol Label Switching (MPLS)
- Open Shortest Path First (OSPF)
- Protocol-Independent Multicast (PIM)
- Resource Reservation Protocol (RSVP)
- Routing Information Protocol (RIP)
- Simple Network Management Protocol (SNMP)

Personnel operating the equipment must be trained and competent; must not conduct themselves in a careless, willfully negligent, or hostile manner; and must abide by the instructions provided by the documentation.

Supported Platforms

For the features described in this manual, Junos OS currently supports the following platforms:

- J Series
- M Series
- MX Series
- T Series
- EX Series

Using the Examples in This Manual

If you want to use the examples in this manual, you can use the **load merge** or the **load merge relative** command. These commands cause the software to merge the incoming configuration into the current candidate configuration. If the example configuration contains the top level of the hierarchy (or multiple hierarchies), the example is a *full example*. In this case, use the **load merge** command.

If the example configuration does not start at the top level of the hierarchy, the example is a *snippet*. In this case, use the **load merge relative** command. These procedures are described in the following sections.

Merging a Full Example

To merge a full example, follow these steps:

1. From the HTML or PDF version of the manual, copy a configuration example into a text file, save the file with a name, and copy the file to a directory on your routing platform.

For example, copy the following configuration to a file and name the file **ex-script.conf**. Copy the **ex-script.conf** file to the **/var/tmp** directory on your routing platform.

```
system {
  scripts {
    commit {
      file ex-script.xsl;
    }
  }
}
interfaces {
  fxp0 {
    disable;
    unit 0 {
      family inet {
        address 10.0.0.1/24;
      }
    }
  }
}
```

```
}
```

2. Merge the contents of the file into your routing platform configuration by issuing the **load merge** configuration mode command:

```
[edit]
user@host# load merge /var/tmp/ex-script.conf
load complete
```

Merging a Snippet

To merge a snippet, follow these steps:

1. From the HTML or PDF version of the manual, copy a configuration snippet into a text file, save the file with a name, and copy the file to a directory on your routing platform.

For example, copy the following snippet to a file and name the file **ex-script-snippet.conf**. Copy the **ex-script-snippet.conf** file to the **/var/tmp** directory on your routing platform.

```
commit {
  file ex-script-snippet.xml; }
```

2. Move to the hierarchy level that is relevant for this snippet by issuing the following configuration mode command:

```
[edit]
user@host# edit system scripts
[edit system scripts]
```

3. Merge the contents of the file into your routing platform configuration by issuing the **load merge relative** configuration mode command:

```
[edit system scripts]
user@host# load merge relative /var/tmp/ex-script-snippet.conf
load complete
```

For more information about the **load** command, see the *Junos OS CLI User Guide*.

Documentation Conventions

Table 1 on page ccxxxiii defines notice icons used in this guide.

Table 1: Notice Icons

Icon	Meaning	Description
	Informational note	Indicates important features or instructions.
	Caution	Indicates a situation that might result in loss of data or hardware damage.
	Warning	Alerts you to the risk of personal injury or death.
	Laser warning	Alerts you to the risk of personal injury from a laser.

Table 2 on page ccxxxiii defines the text and syntax conventions used in this guide.

Table 2: Text and Syntax Conventions

Convention	Description	Examples
Bold text like this	Represents text that you type.	To enter configuration mode, type the configure command: user@host> configure
Fixed-width text like this	Represents output that appears on the terminal screen.	user@host> show chassis alarms No alarms currently active
<i>Italic text like this</i>	<ul style="list-style-type: none"> Introduces important new terms. Identifies book names. Identifies RFC and Internet draft titles. 	<ul style="list-style-type: none"> A policy <i>term</i> is a named structure that defines match conditions and actions. <i>Junos System Basics Configuration Guide</i> RFC 1997, <i>BGP Communities Attribute</i>
<i>Italic text like this</i>	Represents variables (options for which you substitute a value) in commands or configuration statements.	Configure the machine's domain name: [edit] root@# set system domain-name <i>domain-name</i>
Text like this	Represents names of configuration statements, commands, files, and directories; IP addresses; configuration hierarchy levels; or labels on routing platform components.	<ul style="list-style-type: none"> To configure a stub area, include the stub statement at the [edit protocols ospf area area-id] hierarchy level. The console port is labeled CONSOLE.
< > (angle brackets)	Enclose optional keywords or variables.	stub <default-metric <i>metric</i> >;

Table 2: Text and Syntax Conventions (*continued*)

Convention	Description	Examples
(pipe symbol)	Indicates a choice between the mutually exclusive keywords or variables on either side of the symbol. The set of choices is often enclosed in parentheses for clarity.	broadcast multicast (string1 string2 string3)
# (pound sign)	Indicates a comment specified on the same line as the configuration statement to which it applies.	rsvp { # Required for dynamic MPLS only
[] (square brackets)	Enclose a variable for which you can substitute one or more values.	community name members [community-ids]
Indentation and braces ({ })	Identify a level in the configuration hierarchy.	[edit] routing-options { static { route default { nexthop address; retain; } } }
;(semicolon)	Identifies a leaf statement at a configuration hierarchy level.	
J-Web GUI Conventions		
Bold text like this	Represents J-Web graphical user interface (GUI) items you click or select.	<ul style="list-style-type: none"> In the Logical Interfaces box, select All Interfaces. To cancel the configuration, click Cancel.
> (bold right angle bracket)	Separates levels in a hierarchy of J-Web selections.	In the configuration editor hierarchy, select Protocols>Ospf .

Documentation Feedback

We encourage you to provide feedback, comments, and suggestions so that we can improve the documentation. You can send your comments to techpubs-comments@juniper.net, or fill out the documentation feedback form at <https://www.juniper.net/cgi-bin/docbugreport/>. If you are using e-mail, be sure to include the following information with your comments:

- Document or topic name
- URL or page number
- Software release version (if applicable)

Requesting Technical Support

Technical product support is available through the Juniper Networks Technical Assistance Center (JTAC). If you are a customer with an active J-Care or JNASC support contract,

or are covered under warranty, and need postsales technical support, you can access our tools and resources online or open a case with JTAC.

- JTAC policies—For a complete understanding of our JTAC procedures and policies, review the JTAC User Guide located at <http://www.juniper.net/us/en/local/pdf/resource-guides/7100059-en.pdf> .
- Product warranties—For product warranty information, visit <http://www.juniper.net/support/warranty/> .
- JTAC Hours of Operation —The JTAC centers have resources available 24 hours a day, 7 days a week, 365 days a year.

Self-Help Online Tools and Resources

For quick and easy problem resolution, Juniper Networks has designed an online self-service portal called the Customer Support Center (CSC) that provides you with the following features:

- Find CSC offerings: <http://www.juniper.net/customers/support/>
- Find product documentation: <http://www.juniper.net/techpubs/>
- Find solutions and answer questions using our Knowledge Base: <http://kb.juniper.net/>
- Download the latest versions of software and review release notes: <http://www.juniper.net/customers/csc/software/>
- Search technical bulletins for relevant hardware and software notifications: <https://www.juniper.net/alerts/>
- Join and participate in the Juniper Networks Community Forum: <http://www.juniper.net/company/communities/>
- Open a case online in the CSC Case Management tool: <http://www.juniper.net/cm/>

To verify service entitlement by product serial number, use our Serial Number Entitlement (SNE) Tool: <https://tools.juniper.net/SerialNumberEntitlementSearch/>

Opening a Case with JTAC

You can open a case with JTAC on the Web or by telephone.

- Use the Case Management tool in the CSC at <http://www.juniper.net/cm/> .
- Call 1-888-314-JTAC (1-888-314-5822 toll-free in the USA, Canada, and Mexico).

For international or direct-dial options in countries without toll-free numbers, visit us at <http://www.juniper.net/support/requesting-support.html>

PART 1

Junos XML Operational Tag Elements

- Mapping Between Operational Tag Elements, Perl Methods, and CLI Commands on page 3
- Summary of Operational Request Tag Elements on page 69
- Summary of Operational Response Tag Elements on page 733

CHAPTER 1

Mapping Between Operational Tag Elements, Perl Methods, and CLI Commands

Table 3: Mapping of CLI Commands to Junos XML Operational Tag Elements and Perl Methods

CLI Command	Request Tag Element and Perl Method	Response Tag Element
clear ancp neighbor	<clear-ancp-neighbor-connection>	<ancp-neighbor-information>
clear ancp subscriber identifier	<clear-ancp-subscriber-identifier-information>	<ancp-subscriber-identifier-information>

Table 3: Mapping of CLI Commands to Junos XML Operational Tag Elements and Perl Methods (*continued*)

CLI Command	Request Tag Element and Perl Method	Response Tag Element
show wlan clusters	<get-wlan-clusters-list>	<wlan-clusters-list>
test access profile	<get-radius-profile-access-test-result>	<radius-profile-access-test-result>
test access radius-server	<get-radius-server-access-test-result>	<radius-access-server-test-result>
test security utm anti-spam	<test-anti-spam-profile>	<anti-spam-test>
test security utm anti-virus	<test-anti-virus-profile>	<anti-virus-test>
test security utm web-filtering	<test-web-filtering-profile>	<web-filtering-test>
traceroute	<traceroute>	<NONE>
traceroute ethernet	<request-traceroute-ethernet>	<ethtraceroute-results>

CHAPTER 2

Summary of Operational Request Tag Elements

This chapter lists the Junos Extensible Markup Language (XML) tag elements that a client of the Junos XML protocol or NETCONF server uses to request operational information. The tag names are in alphabetical order. For information about the notation used in this chapter, see Table 2 on page ccxxxiii.

<abort-in-service-upgrade>

Usage

```
<rpc>
  <abort-in-service-upgrade/>
</rpc>
```

Description Abort in-service software upgrade

<all-routing-engines>

Usage

```
<rpc>
  <all-routing-engines/>
</rpc>
```

Description Execute command on all routing-engines

<check-in-service-upgrade>

Usage

```
<rpc>
  <check-in-service-upgrade>
    <package-name>package-name</package-name> <!-- mandatory -->
  </check-in-service-upgrade>
</rpc>
```

Description Check in-service software upgrade

Contents <package-name>—URL or path of package

<clear-aaa-statistics-table>

Usage

```
<rpc>
  <clear-aaa-statistics-table>
    <authentication/>
    <accounting/>
    <dynamic-requests/>
    <re-authentication/>
  </clear-aaa-statistics-table>
</rpc>
```

Description Statistics on subscriber events

Contents <authentication>—Authentication statistics

<accounting>—Accounting statistics

<dynamic-requests>—Dynamic requests statistics

<re-authentication>—Re-authentication statistics

<address-assignment>—Statistics for address assignments

<clear-aaa-subscriber-table>

Usage

```
<rpc>
  <clear-aaa-subscriber-table>
    <username>username</username> <!-- mandatory -->
  </clear-aaa-subscriber-table>
</rpc>
```

Description Logout the subscriber and clear the session entry

Contents <username>—Subscriber session identifier

<clear-aaa-subscriber-table-specific-statistics>—Clear subscriber statistics

<clear-aaa-subscriber-table-specific-statistics>

Usage

```
<rpc>
  <clear-aaa-subscriber-table-specific-statistics>
    <username>username</username> <!-- mandatory -->
  </clear-aaa-subscriber-table-specific-statistics>
```

`</rpc>`

Description Clear subscriber statistics

Contents `<username>`—Subscriber session identifier

`<clear-alg-h323-counters>`

Usage

```
<rpc>
  <clear-alg-h323-counters/>
</rpc>
```

Description Clear H323 counters

`<clear-alg-ike-esp-state>`

Usage

```
<rpc>
  <clear-alg-ike-esp-state/>
</rpc>
```

Description Clear all IKE-ESP ALG state information

`<clear-alg-mgcp-calls-information>`

Usage

```
<rpc>
  <clear-alg-mgcp-calls-information/>
</rpc>
```

Description Clear MGCP calls

`<clear-alg-mgcp-counter-information>`

Usage

```
<rpc>
  <clear-alg-mgcp-counter-information/>
</rpc>
```

Description Clear MGCP counters

<clear-alg-sccp-calls-information>

Usage

```
<rpc>  
  <clear-alg-sccp-calls-information/>  
</rpc>
```

Description Clear SCCP calls

<clear-alg-sccp-counters>

Usage

```
<rpc>  
  <clear-alg-sccp-counters/>  
</rpc>
```

Description Clear SCCP counters

<clear-alg-sip-calls>

Usage

```
<rpc>  
  <clear-alg-sip-calls/>  
</rpc>
```

Description Clear SIP calls

<clear-alg-sip-counters>

Usage

```
<rpc>  
  <clear-alg-sip-counters/>  
</rpc>
```

Description Clear SIP counters

<clear-all-dvpn-user-connections>

Usage

```
<rpc>  
  <clear-all-dvpn-user-connections/>  
</rpc>
```

Description Clear all dynamic VPN user connections

<clear-ancp-neighbor-connection>

Usage

```
<rpc>
  <clear-ancp-neighbor-connection>
    <ip-address>ip-address</ip-address>
    <system-name>system-name</system-name>
  </clear-ancp-neighbor-connection>
</rpc>
```

Description Clear neighbor connection

Contents <ip-address>—IP address of the neighbor
 <system-name>—MAC address of the neighbor

<clear-ancp-subscriber-identifier-information>

Usage

```
<rpc>
  <clear-ancp-subscriber-identifier-information>
    <identifier-name>identifier-name</identifier-name> <!-- mandatory -->
    <neighbor>neighbor</neighbor>
  </clear-ancp-subscriber-identifier-information>
</rpc>
```

Description Access loop identifier

Contents <identifier-name>—Identifier
 <neighbor>—Subscriber information from a neighbor

<clear-anti-spam-clear>

Usage

```
<rpc>
  <clear-anti-spam-clear/>
</rpc>
```

Description Clear anti-spam statistics information

<clear-anti-virus>

Usage

```
<rpc>
  <clear-anti-virus/>
```

```
</rpc>
```

Description Clear anti-virus statistics information

<clear-appid-application-system-cache>

Usage

```
<rpc>  
  <clear-appid-application-system-cache/>  
</rpc>
```

Description Clear application system cache

<clear-appid-counter>

Usage

```
<rpc>  
  <clear-appid-counter/>  
</rpc>
```

Description Clear the application identification counters

<clear-arp-inspection-statistics>

Usage

```
<rpc>  
  <clear-arp-inspection-statistics>  
    <interface>interface</interface>  
  </clear-arp-inspection-statistics>  
</rpc>
```

Description Clear ARP inspection statistics

Contents <interface>—Interface for which statistics are to be cleared

<clear-arp-table>

Usage

```
<rpc>  
  <clear-arp-table>  
    <hostname>hostname</hostname>  
    <vpn>vpn</vpn>  
    <logical-system>logical-system</logical-system>  
  </clear-arp-table>  
</rpc>
```

Description Clear address resolution information

Contents <hostname>—Name of host
<vpn>—Name of VPN routing table
<logical-system>—Name of logical system

<clear-authentication-pending-table>

Usage

```
<rpc>  
  <clear-authentication-pending-table>  
    <clear-authentication-pending-table-specific> <clear-authentication-pending-table-specific> <clear-authentication-pending-table-specific>  
  </clear-authentication-pending-table>  
</rpc>
```

Description Clear pending authentication requests

Contents <clear-authentication-pending-table-specific>—Clear information for a specific request

<clear-authentication-statistics>

Usage

```
<rpc>  
  <clear-authentication-statistics/>  
</rpc>
```

Description Clear general authentication statistics

<clear-avt-counters>

Usage

```
<rpc>  
  <clear-avt-counters/>  
</rpc>
```

Description Clear Application tracking counters

<clear-bgp-damping>

Usage

```
<rpc>  
  <clear-bgp-damping>
```

```
<daemon-select>daemon-select</daemon-select>
<logical-system>logical-system</logical-system>
<fabric/>
<prefix>prefix</prefix>
</clear-bgp-damping>
</rpc>
```

Description Clear damping information

Contents <logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<prefix>—Destination prefix and prefix length

<clear-bgp-neighbor>

Usage

```
<rpc>
<clear-bgp-neighbor>
<daemon-select>daemon-select</daemon-select>
<logical-system>logical-system</logical-system>
<fabric/>
<soft/>
<soft-minimum-igp/>
<soft-inbound/>
<instance>instance</instance>
<as>as</as>
<neighbor>neighbor</neighbor>
</clear-bgp-neighbor>
</rpc>
```

Description Clear BGP neighbors

Contents <logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<soft>—Soft reset outbound state

<soft-minimum-igp>—Soft reset outbound state with refresh of minimum igp MED

<soft-inbound>—Soft reset inbound state by issuing Refresh

<instance>—Name of BGP instance

<as>— Autonomous system number in plain number or 'higher 16bits'. 'Lower 16 bits' (asdot notation) format

<neighbor>—Particular BGP neighbor to clear

<clear-bgp-table>

Usage

```

<rpc>
  <clear-bgp-table>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <table>table</table>
  </clear-bgp-table>
</rpc>

```

Description Refresh routes in a routing table

Contents <logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<table>—Name of table to clear

<clear-binding-all>

Usage

```

<rpc>
  <clear-binding-all>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </clear-binding-all>
</rpc>

```

Description Clear all bindings

Contents <routing-instance>—Name of routing instance

<logical-system>—Name of logical system

<clear-binding-ip>

Usage

```

<rpc>
  <clear-binding-ip>
    <ip-address>ip-address</ip-address> <!-- mandatory -->
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </clear-binding-ip>
</rpc>

```

Description Clear binding entry based on IP address

Contents <ip-address>—Enter IP Address
<routing-instance>—Name of routing instance
<logical-system>—Name of logical system

<clear-binding-nai>

Usage

```
<rpc>  
  <clear-binding-nai>  
    <nai>nai</nai> <!-- mandatory -->  
    <routing-instance>routing-instance</routing-instance>  
    <logical-system>logical-system</logical-system>  
  </clear-binding-nai>  
</rpc>
```

Description Clear binding entry based on nai

Contents <nai>—Enter nai
<routing-instance>—Name of routing instance
<logical-system>—Name of logical system

<clear-bridge-interface-mac-table>

Usage

```
<rpc>  
  <clear-bridge-interface-mac-table>  
    <interface-name>interface-name</interface-name> <!-- mandatory -->  
    <remote-beb-mac-address>remote-beb-mac-address</remote-beb-mac-address>  
  
    <vlan-id>vlan-id</vlan-id>  
    <isid>isid</isid>  
  </clear-bridge-interface-mac-table>  
</rpc>
```

Description Clear media access control table for specified interface

Contents <interface-name>—Name of interface for which to clear table

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<remote-beb-mac-address>—Remote backbone edge bridge MAC address

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<vlan-id>—Clear MAC address learned on a specified VLAN

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<isid>—Clear MAC address learned on a specified ISID

- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<clear-bridge-mac-table>

Usage

```
<rpc>
  <clear-bridge-mac-table>
    <instance>instance</instance>
    <bridge-domain>bridge-domain</bridge-domain>
    <logical-system>logical-system</logical-system>
    <vlan-id>vlan-id</vlan-id>
    <isid>isid</isid>
    <address>address</address>
  </clear-bridge-mac-table>
</rpc>
```

Description Clear all learned media access control addresses

Contents <clear-bridge-interface-mac-table>—Clear media access control table for specified interface

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<instance>—Display information for a specified instance

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<bridge-domain>—Name of bridging domain, or 'all'

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<logical-system>—Name of logical system, or 'all'

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<vlan-id>—Clear MAC address learned on a specified VLAN

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<isid>—Clear MAC address learned on a specified ISID

- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<address>—MAC address

<clear-captive-portal-firewall>

Usage

```
<rpc>
  <clear-captive-portal-firewall>
    <counter-name>counter-name</counter-name>
  </clear-captive-portal-firewall>
</rpc>
```

Description Clear captive-portal firewall statistics for a counter

Contents <counter-name>—Clear firewall statistics for this counter

<clear-captive-portal-interface-session>

Usage

```
<rpc>
  <clear-captive-portal-interface-session>
    <interface-name>interface-name</interface-name>
  </clear-captive-portal-interface-session>
</rpc>
```

Description Clear 802.1X session on an interface

Contents <interface-name>—Name of interface

<clear-captive-portal-mac-session>

Usage

```
<rpc>
  <clear-captive-portal-mac-session>
    <session-mac-addr>session-mac-addr</session-mac-addr>
  </clear-captive-portal-mac-session>
</rpc>
```

Description Clear 802.1X session on a MAC address

Contents <session-mac-addr>—MAC address to clear

<clear-cfm-delay-statistics>

Usage

```
<rpc>
  <clear-cfm-delay-statistics>
    <one-way/>
    <two-way/>
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
    <maintenance-association>maintenance-association</maintenance-association>
  <!-- mandatory -->
    <logical-system>logical-system</logical-system>
  </clear-cfm-delay-statistics>
</rpc>
```

Description Clear Ethernet OAM delay statistics

Contents <one-way>—One-way delay measurement

<two-way>—Two-way delay measurement

<maintenance-domain>—Name of maintenance domain

<maintenance-association>—Name of maintenance association

<logical-system>—Name of logical system

<clear-cfm-linktrace-path-database>

Usage

```
<rpc>
  <clear-cfm-linktrace-path-database>
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
    <maintenance-association>maintenance-association</maintenance-association>
  <!-- mandatory -->
    <host>host</host> <!-- mandatory -->
    <logical-system>logical-system</logical-system>
  </clear-cfm-linktrace-path-database>
</rpc>
```

Description Clear linktrace path-database entries of a remote host

Contents <maintenance-domain>—Name of maintenance domain

<maintenance-association>—Name of maintenance association

<host>—MAC address of remote host in xx:xx:xx:xx:xx:xx format

<logical-system>—Name of logical system

<clear-cfm-statistics>

Usage

```
<rpc>
  <clear-cfm-statistics>
    <interface>interface</interface>
    <level>level</level>
    <logical-system>logical-system</logical-system>
  </clear-cfm-statistics>
</rpc>
```

Description Clear connectivity-fault-management statistics

Contents <interface>—Clear the statistics on an interface

<level>—The maintenance-domain level

<logical-system>—Name of logical system

<clear-chassis-cluster-control-plane-statistics>

Usage

```
<rpc>  
  <clear-chassis-cluster-control-plane-statistics/>  
</rpc>
```

Description Clear control-plane statistics

<clear-chassis-cluster-data-plane-statistics>

Usage

```
<rpc>  
  <clear-chassis-cluster-data-plane-statistics/>  
</rpc>
```

Description Clear data-plane statistics

<clear-chassis-cluster-failover-count>

Usage

```
<rpc>  
  <clear-chassis-cluster-failover-count/>  
</rpc>
```

Description Clear failover-count for all redundancy-groups

<clear-chassis-cluster-ip-monitoring-failure-count>

Usage

```
<rpc>  
  <clear-chassis-cluster-ip-monitoring-failure-count>  
  </clear-chassis-cluster-ip-monitoring-failure-count>  
</rpc>
```

Description Clear IP monitoring failure-count

Contents <clear-chassis-cluster-ip-monitoring-failure-count-ip-address>—Clear IP monitoring failure-count for a specific IP address

<clear-chassis-cluster-ip-monitoring-failure-count-ip-address>

Usage

```
<rpc>
```

```
<clear-chassis-cluster-ip-monitoring-failure-count-ip-address>
  <ip-address-identifier>ip-address-identifier</ip-address-identifier> <!-- mandatory
-->
</clear-chassis-cluster-ip-monitoring-failure-count-ip-address>
</rpc>
```

Description Clear IP monitoring failure-count for a specific IP address

Contents <ip-address-identifier>—Clear failure-count of an IP address

<clear-chassis-cluster-statistics>

Usage

```
<rpc>
  <clear-chassis-cluster-statistics/>
</rpc>
```

Description Clear all statistics

<clear-content-filter>

Usage

```
<rpc>
  <clear-content-filter/>
</rpc>
```

Description Clear content-filtering statistics information

<clear-database-replication-statistics-information>

Usage

```
<rpc>
  <clear-database-replication-statistics-information/>
</rpc>
```

Description Clear database replication statistics

<clear-dhcp-binding-information>

Usage

```
<rpc>
  <clear-dhcp-binding-information>
    <address>address</address>
  </clear-dhcp-binding-information>
</rpc>
```

Description Clear DHCP client binding information

Contents <address>—Address of DHCP client binding

<clear-dhcp-conflict-information>

Usage

```
<rpc>
  <clear-dhcp-conflict-information>
    <address>address</address>
  </clear-dhcp-conflict-information>
</rpc>
```

Description Clear DHCP address conflict

Contents <address>—DHCP conflict address

<clear-dhcp-relay-binding-information>

Usage

```
<rpc>
  <clear-dhcp-relay-binding-information>
    <binding-clear-choice>binding-clear-choice</binding-clear-choice> <!-- mandatory
-->
    <address>address</address>
    <all/>
    <routing-instance>routing-instance</routing-instance>
    <bridge-domain>bridge-domain</bridge-domain>
    <logical-system>logical-system</logical-system>
  </clear-dhcp-relay-binding-information>
</rpc>
```

Description Clear DHCP client binding information

Contents <address>—IP address or MAC address or Session Id of DHCP client binding

<all>—Clear all bindings

<interface>—Name of interface on which to clear bindings

<routing-instance>—Name of routing instance

<bridge-domain>—Name of bridge domain

<logical-system>—Name of logical system

<clear-dhcp-relay-statistics-information>

Usage

```
<rpc>
  <clear-dhcp-relay-statistics-information>
    <routing-instance>routing-instance</routing-instance>
    <bridge-domain>bridge-domain</bridge-domain>
    <logical-system>logical-system</logical-system>
  </clear-dhcp-relay-statistics-information>
</rpc>
```

Description Clear DHCP statistics

Contents <routing-instance>—Name of routing instance

<bridge-domain>—Name of bridge domain

<logical-system>—Name of logical system

<clear-dhcp-server-binding-information>

Usage

```
<rpc>
  <clear-dhcp-server-binding-information>
    <binding-clear-choice>binding-clear-choice</binding-clear-choice> <!-- mandatory
-->
    <address>address</address>
    <all/>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </clear-dhcp-server-binding-information>
</rpc>
```

Description Clear DHCP client binding information

Contents <address>—IP address or MAC address or Session Id of DHCP client binding

<all>—Clear all bindings

<interface>—Name of interface on which to clear bindings

<routing-instance>—Name of routing instance

<logical-system>—Name of logical system

<clear-dhcp-snooping>

Usage

```
<rpc>
```

```

<clear-dhcp-snooping>
  <vlan>vlan</vlan>
  <mac>mac</mac>
</clear-dhcp-snooping>
</rpc>

```

Description Clear DHCP snooping database

Contents <vlan>—Name of VLAN
 <mac>—MAC address

<clear-dhcp-snooping-statistics>

Usage

```

<rpc>
  <clear-dhcp-snooping-statistics/>
</rpc>

```

Description Clear DHCP snooping statistics

<clear-dhcp-statistics-information>

Usage

```

<rpc>
  <clear-dhcp-statistics-information/>
</rpc>

```

Description Clear DHCP statistics

<clear-dhcpv6-server-binding-information>

Usage

```

<rpc>
  <clear-dhcpv6-server-binding-information>
    <binding-clear-choice>binding-clear-choice</binding-clear-choice> <!-- mandatory
-->
    <address>address</address>
    <all/>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </clear-dhcpv6-server-binding-information>
</rpc>

```

Description Clear DHCPv6 client binding information

Contents <address>—IPv6 Prefix or session-id or CID <cid-len/0x.../0x...> of DHCPv6 client binding

 <all>—Clear all bindings

 <interface>—Name of interface on which to clear bindings

 <routing-instance>—Name of routing instance

 <logical-system>—Name of logical system

<clear-dhcpv6-server-statistics-information>

Usage

```
<rpc>
  <clear-dhcpv6-server-statistics-information>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </clear-dhcpv6-server-statistics-information>
</rpc>
```

Description Clear DHCPv6 server statistics

Contents <routing-instance>—Name of routing instance

 <logical-system>—Name of logical system

<clear-diameter-function>

Usage

```
<rpc>
  <clear-diameter-function>
    <statistics/>
    <jsrc/>
    <charging-gw/>
    <packet-triggered-subscribers/>
  </clear-diameter-function>
</rpc>
```

Description Clear diameter function information

Contents <statistics>—Clear diameter function statistics

 <jsrc>—Function to use SRC application

 <charging-gw>—Function to use CHARGING application

 <packet-triggered-subscribers>—Function to use PACKET-TRIGGERED-SUBSCRIBERS application

<clear-diameter-peer>

Usage

```

<rpc>
  <clear-diameter-peer>
    <connection/>
    <statistics/>

    <clear-diameter-peer-name>clear-diameter-peer-name</clear-diameter-peer-name>
    <!-- mandatory -->
  </clear-diameter-peer>
</rpc>

```

Description Clear diameter peer information

Contents <connection>—Clear diameter peer connection(default)

<statistics>—Clear diameter peer statistics

<clear-diameter-peer-name>—Peer name

<clear-dot1x-firewall>

Usage

```

<rpc>
  <clear-dot1x-firewall>
    <counter-name>counter-name</counter-name>
  </clear-dot1x-firewall>
</rpc>

```

Description Clear dot1x firewall statistics for a counter

Contents <counter-name>—Clear firewall statistics for this counter

<clear-dot1x-interface-session>

Usage

```

<rpc>
  <clear-dot1x-interface-session>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </clear-dot1x-interface-session>
</rpc>

```

Description Clear 802.1X session on an interface

Contents <interface-name>—Name of interface

<clear-dot1x-interface-session>

Usage

```
<rpc>
  <clear-dot1x-interface-session>
    <interface-name>interface-name</interface-name>
  </clear-dot1x-interface-session>
</rpc>
```

Description Clear 802.1X session on an interface

Contents <interface-name>—Name of interface

<clear-dot1x-mac-session>

Usage

```
<rpc>
  <clear-dot1x-mac-session>
    <static-mac-addr>static-mac-addr</static-mac-addr>
  </clear-dot1x-mac-session>
</rpc>
```

Description Clear 802.1X session on a MAC address

Contents <static-mac-addr>—MAC address to clear

<clear-dot1x-statistics>

Usage

```
<rpc>
  <clear-dot1x-statistics>
</clear-dot1x-statistics>
</rpc>
```

Description Clear 802.1X statistics on an interface

Contents <clear-dot1x-statistics-interface>—Clear 802.1X statistics on this interface

<clear-dot1x-statistics-interface>

Usage

```
<rpc>
  <clear-dot1x-statistics-interface>
    <interface-name>interface-name</interface-name>
  </clear-dot1x-statistics-interface>
</rpc>
```

`</rpc>`

Description Clear 802.1X statistics on this interface

Contents `<interface-name>`—Name of interface

`<clear-dvpn-user-connection-by-username>`

Usage

```
<rpc>
  <clear-dvpn-user-connection-by-username>
    <username>username</username> <!-- mandatory -->
    <ike-id>ike-id</ike-id> <!-- mandatory -->
  </clear-dvpn-user-connection-by-username>
</rpc>
```

Description Clear Dynamic VPN user connection with specified username

Contents `<username>`—Name of user for the connection

`<ike-id>`—The IKE ID of this user connection

`<clear-eedebg-counters>`

Usage

```
<rpc>
  <clear-eedebg-counters/>
</rpc>
```

Description Clear datapath debug counters

`<clear-elmi-statistics>`

Usage

```
<rpc>
  <clear-elmi-statistics>
    <interface>interface</interface>
  </clear-elmi-statistics>
</rpc>
```

Description Clear ethernet local management statistics

Contents `<interface>`—Name of interface

<clear-ethernet-switching-l2pt-statistics>

Usage

```
<rpc>  
  <clear-ethernet-switching-l2pt-statistics>  
  </clear-ethernet-switching-l2pt-statistics>  
</rpc>
```

Description Clear layer2 protocol tunneling statistics

Contents <interface>—Clear Layer2 protocol tunneling statistics for interface
<vlan>—Clear Layer2 protocol tunneling statistics for vlans

<clear-ethernet-switching-mac-learning-log>

Usage

```
<rpc>  
  <clear-ethernet-switching-mac-learning-log/>  
</rpc>
```

Description Clear all MAC address learning log

<clear-ethernet-switching-statistics-mac-learning>

Usage

```
<rpc>  
  <clear-ethernet-switching-statistics-mac-learning>  
    <interface>interface</interface>  
  </clear-ethernet-switching-statistics-mac-learning>  
</rpc>
```

Description Clear media access control learning statistics

Contents <interface>—Clear MAC learning statistics for a specified interface

<clear-ethernet-switching-table>

Usage

```
<rpc>  
  <clear-ethernet-switching-table>  
    <interface>interface</interface>  
    <vlan>vlan</vlan>  
    <mac>mac</mac>  
  </clear-ethernet-switching-table>
```

</rpc>

Description Clear all learned MAC addresses

Contents <interface>—Name of interface

<vlan>—Name of VLAN

<mac>—MAC address

<clear-ethernet-switching-table-management-vlan>—Management VLAN

<clear-ethernet-switching-table-management-vlan>

Usage

```
<rpc>
  <clear-ethernet-switching-table-management-vlan/>
</rpc>
```

Description Management VLAN

<clear-fip-snooping-enode>

Usage

```
<rpc>
  <clear-fip-snooping-enode>
    <mac>mac</mac> <!-- mandatory -->
    <vlan>vlan</vlan>
  </clear-fip-snooping-enode>
</rpc>
```

Description Clear all FIP snooping session for this Enode

Contents <mac>—Enode MAC address

<vlan>—Name of VLAN

<clear-fip-snooping-statistics>

Usage

```
<rpc>
  <clear-fip-snooping-statistics>
    <vlan>vlan</vlan>
  </clear-fip-snooping-statistics>
</rpc>
```

Description Clear FIP snooping statistics

Contents <vlan>—Name of VLAN

<clear-fip-snooping-vlan>

Usage

```
<rpc>
  <clear-fip-snooping-vlan>
    <vlan>vlan</vlan> <!-- mandatory -->
  </clear-fip-snooping-vlan>
</rpc>
```

Description Clear FIP snooping database for this VLAN

Contents <vlan>—Name of VLAN

<clear-flow-ipaction-all>

Usage

```
<rpc>
  <clear-flow-ipaction-all/>
</rpc>
```

Description Clear all ip-action entries

<clear-flow-session-all>

Usage

```
<rpc>
  <clear-flow-session-all/>
</rpc>
```

Description Clear all sessions

<clear-flow-session-by-application>

Usage

```
<rpc>
  <clear-flow-session-by-application>
    <dns/>
    <ftp/>
    <ignore/>
    <mgcp-ca/>
    <mgcp-ua/>
    <ms-rpc/>
  </clear-flow-session-by-application>
</rpc>
```

```

    <pptp/>
    <sun-rpc/>
    <q931/>
    <ras/>
    <realaudio/>
    <rsh/>
    <rtsp/>
    <sccp/>
    <sip/>
    <sqlnet-v2/>
    <talk/>
    <tftp/>
    <http/>
    <https/>
    <smtp/>
    <imap/>
    <ssh/>
    <telnet/>
    </clear-flow-session-by-application>
  </rpc>

```

Description Clear session for specified application or application set

Contents

- <dns>—Domain Name Service
- <ftp>—File Transfer Protocol
- <ignore>—Ignore application type
- <mgcp-ca>—MGCP-CA
- <mgcp-ua>—MGCP-UA
- <ms-rpc>—Microsoft RPC
- <pptp>—Point-to-Point Tunneling Protocol
- <sun-rpc>—Sun Microsystems RPC
- <q931>—Q.931
- <ras>—RAS
- <realaudio>—RealAudio
- <rsh>—Remote Shell
- <rtsp>—Real Time Streaming Protocol
- <sccp>—Skinny Client Control Protocol
- <sip>—Session Initiation Protocol
- <sqlnet-v2>—Oracle SQL*Net Version 2

<talk>—Talk program

<tftp>—Trivial File Transfer Protocol

<http>—Hyper Text transfer protocol

<https>—Secure HyperText Transfer Protocol

<smtp>—Simple Mail Transfer Protocol

<imap>—Internet Message Access Protocol

<ssh>—Secure Shell

<telnet>—Telnet Terminal Emulation Protocol

<clear-flow-session-by-destination-port>

Usage

```
<rpc>
  <clear-flow-session-by-destination-port>
    <destination-port>destination-port</destination-port> <!-- mandatory -->
  </clear-flow-session-by-destination-port>
</rpc>
```

Description Clear each session that uses specified destination port

Contents <destination-port>—Destination port

<clear-flow-session-by-destination-prefix>

Usage

```
<rpc>
  <clear-flow-session-by-destination-prefix>
    <destination-prefix>destination-prefix</destination-prefix> <!-- mandatory -->
  </clear-flow-session-by-destination-prefix>
</rpc>
```

Description Clear each session that matches destination prefix

Contents <destination-prefix>—Destination IP prefix or address

<clear-flow-session-by-family>

Usage

```
<rpc>
  <clear-flow-session-by-family>
    <inet/>
    <inet6/>
  </clear-flow-session-by-family>
</rpc>
```

```

    </clear-flow-session-by-family>
  </rpc>

```

Description Clear sessions by family

Contents <inet>—Clear IPv4 sessions
 <inet6>—Clear IPv6/IPv6-NATPT sessions

<clear-flow-session-by-interface>

Usage

```

<rpc>
  <clear-flow-session-by-interface>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </clear-flow-session-by-interface>
</rpc>

```

Description Clear each session that uses specified interface

Contents <interface-name>—Name of incoming or outgoing interface

<clear-flow-session-by-protocol>

Usage

```

<rpc>
  <clear-flow-session-by-protocol>
    <icmp/>
    <igmp/>
    <ipip/>
    <tcp/>
    <egp/>
    <udp/>
    <rsvp/>
    <gre/>
    <esp/>
    <ah/>
    <icmp6/>
    <ospf/>
    <pim/>
    <sctp/>
    <protocol-number/>
  </clear-flow-session-by-protocol>
</rpc>

```

Description Clear each session that uses specified IP protocol

Contents <icmp>—Internet Control Message Protocol

<igmp>—Internet Group Management Protocol

<ipip>—IP in IP

<tcp>—Transmission Control Protocol

<egp>—Exterior gateway protocol

<udp>—User Datagram Protocol

<rsvp>—Resource Reservation Protocol

<gre>—Generic routing encapsulation

<esp>—IPSec Encapsulating Security Payload

<ah>—IP Security authentication header

<icmp6>—Internet Control Message Protocol Version 6

<ospf>—Open Shortest Path First

<pim>—Protocol Independent Multicast

<sctp>—Stream Control Transmission Protocol

<protocol-number>—Numeric protocol value (0 .. 255)

<clear-flow-session-by-resource-manager>

Usage

```
<rpc>
  <clear-flow-session-by-resource-manager/>
</rpc>
```

Description Clear resource-manager sessions

<clear-flow-session-by-session-identifier>

Usage

```
<rpc>
  <clear-flow-session-by-session-identifier>
    <session-identifier>session-identifier</session-identifier> <!-- mandatory -->
  </clear-flow-session-by-session-identifier>
</rpc>
```

Description Clear session with specified session identifier

Contents <session-identifier>—Session identifier

<clear-flow-session-by-source-port>

Usage

```

<rpc>
  <clear-flow-session-by-source-port>
    <source-port>source-port</source-port> <!-- mandatory -->
  </clear-flow-session-by-source-port>
</rpc>

```

Description Clear each session that uses specified source port

Contents <source-port>—Source port

<clear-flow-session-by-source-prefix>

Usage

```

<rpc>
  <clear-flow-session-by-source-prefix>
    <source-prefix>source-prefix</source-prefix> <!-- mandatory -->
  </clear-flow-session-by-source-prefix>
</rpc>

```

Description Clear each session that matches source prefix

Contents <source-prefix>—Source IP prefix or address

<clear-group-vpn-ike-security-associations>

Usage

```

<rpc>
  <clear-group-vpn-ike-security-associations>
    <fpc>fpc</fpc>
    <pic>pic</pic>
    <kmd-instance>kmd-instance</kmd-instance>
    <peer-address>peer-address</peer-address>
    <index>index</index>
  </clear-group-vpn-ike-security-associations>
</rpc>

```

Description Clear group VPN IKE security associations

Contents <fpc>—FPC slot number

<pic>—PIC slot number

<kmd-instance>—Name of KMD instance or 'all'

<peer-address>—IP address of the peer

<index>—Index of security association

<clear-group-vpn-kek-security-associations>

Usage

```
<rpc>
  <clear-group-vpn-kek-security-associations>
    <fpc>fpc</fpc>
    <pic>pic</pic>
    <kmd-instance>kmd-instance</kmd-instance>
    <index>index</index>
  </clear-group-vpn-kek-security-associations>
</rpc>
```

Description Clear group VPN KEK security associations

Contents <fpc>—FPC slot number

<pic>—PIC slot number

<kmd-instance>—Name of KMD instance or 'all'

<index>—Index of security association

<clear-gvpn-ipsec-security-association>

Usage

```
<rpc>
  <clear-gvpn-ipsec-security-association>
    <fpc>fpc</fpc>
    <pic>pic</pic>
    <kmd-instance>kmd-instance</kmd-instance>
    <index>index</index>
  </clear-gvpn-ipsec-security-association>
</rpc>
```

Description Clear IPSec dynamic security associations

Contents <fpc>—FPC slot number

<pic>—PIC slot number

<kmd-instance>—Name of KMD instance or 'all'

<index>—Index of security association

<clear-gvpn-ipsec-statistics>

Usage

```
<rpc>  
  <clear-gvpn-ipsec-statistics>  
    <fpc>fpc</fpc>  
    <pic>pic</pic>  
    <index>index</index>  
  </clear-gvpn-ipsec-statistics>  
</rpc>
```

Description Clear Group VPN IPSec statistics

Contents <fpc>—FPC slot number

<pic>—PIC slot number

<index>—Index of security association

<clear-helper-statistics-information>

Usage

```
<rpc>  
  <clear-helper-statistics-information/>  
</rpc>
```

Description Clear helper statistics

<clear-idp-appddos-cache>

Usage

```
<rpc>  
  <clear-idp-appddos-cache/>  
</rpc>
```

Description Clear IDP Application DDoS cache

<clear-idp-application-system-cache>

Usage

```
<rpc>  
  <clear-idp-application-system-cache/>  
</rpc>
```

Description Clear IDP application system cache

<clear-idp-applications-information>

Usage

```
<rpc>
  <clear-idp-applications-information/>
</rpc>
```

Description Clear IDP application statistics

<clear-idp-attack-table>

Usage

```
<rpc>
  <clear-idp-attack-table/>
</rpc>
```

Description Clear IDP attack table

<clear-idp-counters-by-counter-class>

Usage

```
<rpc>
  <clear-idp-counters-by-counter-class>
    <counter-class>counter-class</counter-class> <!-- mandatory -->
  </clear-idp-counters-by-counter-class>
</rpc>
```

Description Clear IDP counters

Contents <counter-class>—

<clear-idp-ssl-session-cache-information>

Usage

```
<rpc>
  <clear-idp-ssl-session-cache-information/>
</rpc>
```

Description Session ID cache

<clear-idp-status-information>

Usage

```
<rpc>
```

```
<clear-idp-status-information/>
</rpc>
```

Description Clear IDP status

<clear-igmp-snooping>

Usage

```
<rpc>
  <clear-igmp-snooping>
</clear-igmp-snooping>
</rpc>
```

Description Clear IGMP snooping information

Contents <clear-igmp-snooping-membership>—Clear IGMP snooping database
 <clear-igmp-snooping-statistics>—Clear IGMP snooping statistics

<clear-igmp-snooping-membership>

Usage

```
<rpc>
  <clear-igmp-snooping-membership>
    <vlan>vlan</vlan>
  </clear-igmp-snooping-membership>
</rpc>
```

Description Clear IGMP snooping database

Contents <vlan>—Name of VLAN

<clear-igmp-snooping-statistics>

Usage

```
<rpc>
  <clear-igmp-snooping-statistics/>
</rpc>
```

Description Clear IGMP snooping statistics

<clear-ike-respond-bad-spi-count>

Usage

```
<rpc>
```

```
<clear-ike-respond-bad-spi-count>
  <gw-name>gw-name</gw-name>
</clear-ike-respond-bad-spi-count>
</rpc>
```

Description Clear IKE bad SPI count

Contents <gw-name>—Name of the gateway

<clear-ike-security-association>

Usage

```
<rpc>
  <clear-ike-security-association>
    <fpc>fpc</fpc>
    <pic>pic</pic>
    <kmd-instance>kmd-instance</kmd-instance>
    <peer-address>peer-address</peer-address>
    <index>index</index>
    <port>port</port>
  </clear-ike-security-association>
</rpc>
```

Description Clear IKE security associations

Contents <fpc>—FPC slot number

<pic>—PIC slot number

<kmd-instance>—Name of KMD instance or 'all'

<peer-address>—Name of security association

<index>—Index of security association

<port>—Port number of security association

<clear-incoming-table-information>

Usage

```
<rpc>
  <clear-incoming-table-information/>
</rpc>
```

Description Clear incoming table information

<clear-interfaces-statistics>

Usage

```

<rpc>
  <clear-interfaces-statistics>
    <switch-port>switch-port</switch-port>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </clear-interfaces-statistics>
</rpc>

```

Description Clear interface statistics

Contents <clear-interfaces-statistics-all>—Clear statistics for all interfaces

<switch-port>—Front end port number

<interface-name>—Name of physical or logical interface

<clear-interfaces-statistics-all>

Usage

```

<rpc>
  <clear-interfaces-statistics-all/>
</rpc>

```

Description Clear statistics for all interfaces

<clear-ipsec-security-association>

Usage

```

<rpc>
  <clear-ipsec-security-association>
    <fpc>fpc</fpc>
    <pic>pic</pic>
    <kmd-instance>kmd-instance</kmd-instance>
    <index>index</index>
  </clear-ipsec-security-association>
</rpc>

```

Description Clear IPSec dynamic security associations

Contents <fpc>—FPC slot number

<pic>—PIC slot number

<kmd-instance>—Name of KMD instance or 'all'

<index>—Index of security association

<clear-ipsec-statistics>

Usage

```
<rpc>
  <clear-ipsec-statistics>
    <fpc>fpc</fpc>
    <pic>pic</pic>
    <index>index</index>
  </clear-ipsec-statistics>
</rpc>
```

Description Clear IPSec statistics

Contents <fpc>—FPC slot number

<pic>—PIC slot number

<index>—Index of security association

<clear-ipv6-nd-information>

Usage

```
<rpc>
  <clear-ipv6-nd-information>
    <host>host</host>
  </clear-ipv6-nd-information>
</rpc>
```

Description Clear IPv6 neighbor cache information

Contents <host>—Name of neighbor

<all>—Clear all neighbors

<clear-isis-adjacency-information>

Usage

```
<rpc>
  <clear-isis-adjacency-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <interface>interface</interface>
    <neighbor>neighbor</neighbor>
  </clear-isis-adjacency-information>
</rpc>
```

Description	Clear IS-IS adjacencies
Contents	<p><logical-system>—Name of logical system, or 'all'</p> <p><instance>—Name of IS-IS instance</p> <p><interface>—Name of interface</p> <p><neighbor>—Name of neighbor</p>

<clear-isis-database-information>

Usage

```
<rpc>
  <clear-isis-database-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <purge/>
    <entries>entries</entries>
  </clear-isis-database-information>
</rpc>
```

Description	Clear IS-IS database entries
Contents	<p><logical-system>—Name of logical system, or 'all'</p> <p><instance>—Name of IS-IS instance</p> <p><purge>—Purge database entries instead of deleting them</p> <p><entries>—Name of database entry</p>

<clear-isis-overload-information>

Usage

```
<rpc>
  <clear-isis-overload-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </clear-isis-overload-information>
</rpc>
```

Description	Clear overload bit and regenerate LSPs
Contents	<p><logical-system>—Name of logical system, or 'all'</p> <p><instance>—Name of IS-IS instance</p>

<clear-isis-statistics-information>

Usage

```
<rpc>
  <clear-isis-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </clear-isis-statistics-information>
</rpc>
```

Description Clear IS-IS statistics

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of IS-IS instance

<clear-lacp-interface-statistics>

Usage

```
<rpc>
  <clear-lacp-interface-statistics>
    <interface-name>interface-name</interface-name>
  </clear-lacp-interface-statistics>
</rpc>
```

Description Clear LACP interface statistics

Contents <interface-name>—Name of interface

<clear-mpls-lsp-information>

Usage

```
<rpc>
  <clear-mpls-lsp-information>
    <logical-system>logical-system</logical-system>
    <optimize/>
    <optimize-aggressive/>
    <statistics/>
    <autobandwidth/>
    <regex>regex</regex>
    <path>path</path>
  </clear-mpls-lsp-information>
</rpc>
```

Description Reset nontransit or egress LSPs originating on this router

Contents <logical-system>—Name of logical system, or 'all'

<optimize>—Perform nonpreemptive optimization computation now

<optimize-aggressive>—Perform aggressive optimization computation now

<statistics>—Clear LSP statistics

<autobandwidth>—Clear LSP autobandwidth counters

<regex>—Regular expression for LSP names to match

<path>—Regular expression for LSP path to match

<clear-mpls-static-lsp-information>

Usage

```
<rpc>
  <clear-mpls-static-lsp-information>
    <logical-system>logical-system</logical-system>
    <statistics/>
    <regex>regex</regex>
  </clear-mpls-static-lsp-information>
</rpc>
```

Description Reset static LSP statistics

Contents <logical-system>—Name of logical system, or 'all'

<statistics>—Clear LSP statistics

<regex>—Regular expression for LSP names to match

<clear-mvrp-interface-statistics>

Usage

```
<rpc>
  <clear-mvrp-interface-statistics>
    <logical-system>logical-system</logical-system>
    <routing-instance>routing-instance</routing-instance>
    <interface>interface</interface>
  </clear-mvrp-interface-statistics>
</rpc>
```

Description Clear MVRP interface statistics

Contents <logical-system>—Name of logical system

<routing-instance>—Name of routing instance

<interface>—Name of interface

<clear-mvrp-statistics>

Usage

```
<rpc>
  <clear-mvrp-statistics>
</clear-mvrp-statistics>
</rpc>
```

Description Clear MVRP statistics on an interface

Contents <clear-mvrp-statistics-interface>—Clear MVRP statistics on this interface

<clear-mvrp-statistics-interface>

Usage

```
<rpc>
  <clear-mvrp-statistics-interface>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </clear-mvrp-statistics-interface>
</rpc>
```

Description Clear MVRP statistics on this interface

Contents <interface-name>—Name of interface

<clear-node-secret-file>

Usage

```
<rpc>
  <clear-node-secret-file/>
</rpc>
```

Description Delete SecurID authentication node secret file

<clear-ospf-database-information>

Usage

```
<rpc>
  <clear-ospf-database-information>
    <logical-system>logical-system</logical-system>
    <purge/>
    <router/>
    <network/>
    <netsummary/>
    <asbrsummary/>
    <external/>
```

```

<nssa/>
<link-local/>
<opaque-area/>
<area>area</area>
<lsa-id>lsa-id</lsa-id>
<advertising-router>advertising-router</advertising-router>
<instance>instance</instance>
</clear-ospf-database-information>
</rpc>

```

Description Clear OSPF database entries

Contents <logical-system>—Name of logical system, or 'all'

- self - Router ID of this router
- router-id - Router ID of advertising router

<purge>—Purge database entries instead of deleting them

- self - Router ID of this router
- router-id - Router ID of advertising router

<router>—Router link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<network>—Network link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<netsummary>—Summary network link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<asbrsummary>—Summary AS boundary router link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<external>—External link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<nssa>—Not-so-stubby area link-state advertisements

- self - Router ID of this router

- router-id - Router ID of advertising router

<link-local>—Link local link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<opaque-area>—Opaque area-scope link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<area>—OSPF area ID

- self - Router ID of this router
- router-id - Router ID of advertising router

<lsa-id>—Link-state advertisement ID

- self - Router ID of this router
- router-id - Router ID of advertising router

<advertising-router>—Router ID of advertising router

- self - Router ID of this router
- router-id - Router ID of advertising router

<instance>—Name of OSPF instance

<clear-ospf-io-statistics-information>

Usage

```
<rpc>
  <clear-ospf-io-statistics-information>
    <logical-system>logical-system</logical-system>
  </clear-ospf-io-statistics-information>
</rpc>
```

Description Clear OSPF I/O statistics

Contents <logical-system>—Name of logical system, or 'all'

<clear-ospf-neighbor-information>

Usage

```
<rpc>
  <clear-ospf-neighbor-information>
    <logical-system>logical-system</logical-system>
```

```

    <interface>interface</interface>
    <neighbor>neighbor</neighbor>
    <area>area</area>
    <instance>instance</instance>
    </clear-ospf-neighbor-information>
  </rpc>

```

Description Clear OSPF neighbors

Contents <logical-system>—Name of logical system, or 'all'

<interface>—Name of logical interface

<neighbor>—Name of neighbor

<area>—OSPF area ID

<instance>—Name of OSPF instance

<clear-ospf-overload-information>

Usage

```

  <rpc>
    <clear-ospf-overload-information>
      <logical-system>logical-system</logical-system>
      <instance>instance</instance>
    </clear-ospf-overload-information>
  </rpc>

```

Description Clear overload bit and rebuild LSAs

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of OSPF instance

<clear-ospf-statistics-information>

Usage

```

  <rpc>
    <clear-ospf-statistics-information>
      <logical-system>logical-system</logical-system>
      <instance>instance</instance>
    </clear-ospf-statistics-information>
  </rpc>

```

Description Clear OSPF statistics

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of OSPF instance

<clear-ospf3-database-information>

Usage

```
<rpc>
  <clear-ospf3-database-information>
    <logical-system>logical-system</logical-system>
    <purge/>
    <router/>
    <network/>
    <inter-area-prefix/>
    <inter-area-router/>
    <external/>
    <nssa/>
    <link/>
    <link-local/>
    <intra-area-prefix/>
    <area>area</area>
    <lsa-id>lsa-id</lsa-id>
    <advertising-router>advertising-router</advertising-router>
    <instance>instance</instance>
    <realm>realm</realm>
  </clear-ospf3-database-information>
</rpc>
```

Description Clear OSPFv3 database entries

Contents <logical-system>—Name of logical system, or 'all'

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<purge>—Purge database entries instead of deleting them

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<router>—Router LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<network>—Network LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<inter-area-prefix>—Inter-area-prefix LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<inter-area-router>—Inter-area-router LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<external>—External LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<nssa>—NSSA LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<link>—Link LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<link-local>—Link-local LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<intra-area-prefix>—Intra-area-prefix LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<area>—Area ID of OSPFv3 area

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<lsa-id>—ID of link-state advertisement

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<advertising-router>—Router ID of advertising router

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<clear-ospf3-io-statistics-information>

Usage

```
<rpc>
  <clear-ospf3-io-statistics-information>
    <logical-system>logical-system</logical-system>
  </clear-ospf3-io-statistics-information>
</rpc>
```

Description Clear OSPFv3 I/O statistics

Contents <logical-system>—Name of logical system, or 'all'

<clear-ospf3-neighbor-information>

Usage

```
<rpc>
```

```
<clear-ospf3-neighbor-information>
  <logical-system>logical-system</logical-system>
  <interface>interface</interface>
  <neighbor>neighbor</neighbor>
  <area>area</area>
  <instance>instance</instance>
  <realm>realm</realm>
</clear-ospf3-neighbor-information>
</rpc>
```

Description Clear OSPFv3 neighbors

Contents <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<interface>—Name of logical interface

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<neighbor>—Name of OSPFv3 neighbor

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<area>—OSPF area ID

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm

- ipv4-multicast - IPv4 multicast realm

<clear-ospf3-overload-information>

Usage

```
<rpc>
  <clear-ospf3-overload-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <realm>realm</realm>
  </clear-ospf3-overload-information>
</rpc>
```

Description Clear overload bit and rebuild LSAs

Contents <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<clear-ospf3-statistics-information>

Usage

```
<rpc>
  <clear-ospf3-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <realm>realm</realm>
  </clear-ospf3-statistics-information>
</rpc>
```

Description Clear OSPFv3 statistics

- Contents** <logical-system>—Name of logical system, or 'all'
- ipv6-multicast - IPv6 multicast realm
 - ipv4-unicast - IPv4 unicast realm
 - ipv4-multicast - IPv4 multicast realm
- <instance>—Name of OSPFv3 instance
- ipv6-multicast - IPv6 multicast realm
 - ipv4-unicast - IPv4 unicast realm
 - ipv4-multicast - IPv4 multicast realm
- <realm>—Name of realm
- ipv6-multicast - IPv6 multicast realm
 - ipv4-unicast - IPv4 unicast realm
 - ipv4-multicast - IPv4 multicast realm

<clear-passive-monitoring>

Usage

```
<rpc>
  <clear-passive-monitoring>
</clear-passive-monitoring>
</rpc>
```

Description Clear passive monitoring statistics

Contents <clear-passive-monitoring-statistics>—Clear statistics

<clear-passive-monitoring-statistics>

Usage

```
<rpc>
  <clear-passive-monitoring-statistics>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </clear-passive-monitoring-statistics>
</rpc>
```

Description Clear statistics

Contents <interface-name>—Name of monitoring interface, wildcard, or 'all'

<clear-persist-nat-all>

Usage

```
<rpc>
  <clear-persist-nat-all/>
</rpc>
```

Description Clear all persistent NAT information

<clear-persist-nat-interface-information>

Usage

```
<rpc>
  <clear-persist-nat-interface-information/>
</rpc>
```

Description Clear persistent NAT information of this interface

<clear-persist-nat-ip-port-information>

Usage

```
<rpc>
  <clear-persist-nat-ip-port-information>
    <ip>ip</ip> <!-- mandatory -->
    <internal-port>internal-port</internal-port>
  </clear-persist-nat-ip-port-information>
</rpc>
```

Description Clear persistent NAT information of internal IP and port

Contents <ip>—Internal IP address
 <internal-port>—Internal port

<clear-persist-nat-pool-information>

Usage

```
<rpc>
  <clear-persist-nat-pool-information>
    <pool-name>pool-name</pool-name> <!-- mandatory -->
  </clear-persist-nat-pool-information>
</rpc>
```

Description Clear persistent NAT information of this pool

Contents <pool-name>—Source NAT pool name

<clear-pki-ca-certificate>

Usage

```
<rpc>
  <clear-pki-ca-certificate>
    <ca-choice>ca-choice</ca-choice> <!-- mandatory -->
    <ca-profile>ca-profile</ca-profile>
  </clear-pki-ca-certificate>
</rpc>
```

Description Clear CA/RA certificate

Contents <ca-profile>—Certificate authority profile
 <all>—Clear all CA certificates

<clear-pki-certificate-request>

Usage

```
<rpc>
  <clear-pki-certificate-request>
    <certificate-request-choice>certificate-request-choice</certificate-request-choice>
  <!-- mandatory -->
    <certificate-id>certificate-id</certificate-id>
  </clear-pki-certificate-request>
</rpc>
```

Description Clear router certificate request

Contents <certificate-id>—Certificate identifier
 <all>—Clear all certificate requests

<clear-pki-crl>

Usage

```
<rpc>
  <clear-pki-crl>
    <ca-choice>ca-choice</ca-choice> <!-- mandatory -->
    <ca-profile>ca-profile</ca-profile>
  </clear-pki-crl>
</rpc>
```

- Description** Clear certificate revocation list
- Contents** <ca-profile>—Certificate authority profile
<all>—Clear all CRLs

<clear-pki-key-pair>

Usage

```
<rpc>
  <clear-pki-key-pair>
    <certificate-choice>certificate-choice</certificate-choice> <!-- mandatory -->
    <certificate-id>certificate-id</certificate-id>
    <all/>
  </clear-pki-key-pair>
</rpc>
```

- Description** Clear key pair
- Contents** <certificate-id>—Certificate identifier
<all>—Clear all local certificates

<clear-pki-local-certificate>

Usage

```
<rpc>
  <clear-pki-local-certificate>
    <certificate-choice>certificate-choice</certificate-choice> <!-- mandatory -->
    <certificate-id>certificate-id</certificate-id>
    <system-generated/>
    <all/>
  </clear-pki-local-certificate>
</rpc>
```

- Description** Clear local certificate
- Contents** <certificate-id>—Certificate identifier
<system-generated>—Clear autogenerated self-signed certificate
<all>—Clear all local certificates

<clear-ppp-statistics-information>

Usage

```
<rpc>
  <clear-ppp-statistics-information>
```

```
<memory/>
</clear-ppp-statistics-information>
</rpc>
```

Description Clear PPP statistics

Contents <memory>—Clear PPP process memory statistics

<clear-reboot>

Usage

```
<rpc>
<clear-reboot>
<both-routing-engines/>
</clear-reboot>
</rpc>
```

Description Clear all pending halt or reboot requests

Contents <both-routing-engines>—Clear halt or reboot on both Routing Engines

<clear-retag-statistics>

Usage

```
<rpc>
<clear-retag-statistics>
<filter>filter</filter> <!-- mandatory -->
<interface>interface</interface>
<vlan-id>vlan-id</vlan-id>
<clear-all/>
</clear-retag-statistics>
</rpc>
```

Description Clear L2 vlan rewrite statistics information

Contents <interface>—Rewrite statistics interface

<vlan-id>—Rewrite statistics on vlan-id

<clear-all>—Clear all statistics

<clear-rsvp-counters-information>

Usage

```
<rpc>
<clear-rsvp-counters-information>
<logical-system>logical-system</logical-system>
```

```

    </clear-rsvp-counters-information>
  </rpc>

```

Description Clear RSVP counters

Contents <logical-system>—Name of logical system, or 'all'

<clear-rsvp-session-information>

Usage

```

<rpc>
  <clear-rsvp-session-information>
    <logical-system>logical-system</logical-system>
    <session-name>session-name</session-name>
    <lsp-id>lsp-id</lsp-id>
    <tunnel-id>tunnel-id</tunnel-id>
    <gracefully/>
    <connection-source>connection-source</connection-source>
    <connection-destination>connection-destination</connection-destination>
    <optimize-fast-reroute/>
  </clear-rsvp-session-information>
</rpc>

```

Description Preempt RSVP session

Contents <logical-system>—Name of logical system, or 'all'

<session-name>—Name of session

<lsp-id>—LSP ID of the RSVP sender

<tunnel-id>—Tunnel ID of the RSVP session

<gracefully>—Gracefully tear down RSVP sessions

<connection-source>—Source of the label-switched path

<connection-destination>—Destination of the label-switched path

<optimize-fast-reroute>—Perform fast-reroute optimization computation now

<clear-screen-statistics>

Usage

```

<rpc>
  <clear-screen-statistics>
    <filter>filter</filter> <!-- mandatory -->
    <zone>zone</zone>
    <interface>interface</interface>
  </clear-screen-statistics>

```

```
</rpc>
```

Description Clear screen attack statistics information

Contents <zone>—IDS statistics zone
<interface>—IDS statistics interface

<clear-security-dynamic-policies-statistics>

Usage

```
<rpc>  
  <clear-security-dynamic-policies-statistics/>  
</rpc>
```

Description Clear statistics about the dynamic policies

<clear-security-firewall-authentication-history>

Usage

```
<rpc>  
  <clear-security-firewall-authentication-history>  
    <filter>filter</filter>  
    <identifier>identifier</identifier>  
    <address>address</address>  
  </clear-security-firewall-authentication-history>  
</rpc>
```

Description Clear firewall authentication history

Contents <identifier>—Clear authentication history by id
<address>—Clear authentication history by ip address

<clear-security-firewall-authentication-users>

Usage

```
<rpc>  
  <clear-security-firewall-authentication-users>  
    <filter>filter</filter>  
    <identifier>identifier</identifier>  
    <address>address</address>  
  </clear-security-firewall-authentication-users>  
</rpc>
```

Description Clear current firewall authentication user data

Contents <identifier>—Clear authentication entry by id
 <address>—Clear authentication entry by ip address

<clear-security-group-vpn-server>

Usage

```
<rpc>
  <clear-security-group-vpn-server>
    <group_choice>group_choice</group_choice>

    <clear-security-group-vpn-server-group-name>clear-security-group-vpn-server-group-name</clear-security-group-vpn-server-group-name>

    <clear-security-group-vpn-server-group-id>clear-security-group-vpn-server-group-id</clear-security-group-vpn-server-group-id>

    <clear-security-group-vpn-server-now/>
  </clear-security-group-vpn-server>
</rpc>
```

Description Clear group VPN server security information

Contents <clear-security-group-vpn-server-group-name>—Clear specified group name
 <clear-security-group-vpn-server-group-id>—Clear specified group id
 <clear-security-group-vpn-server-now>—Clear group immediately

<clear-security-policies-statistics>

Usage

```
<rpc>
  <clear-security-policies-statistics/>
</rpc>
```

Description Clear statistics about the policies

<clear-server-statistics-information>

Usage

```
<rpc>
  <clear-server-statistics-information>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </clear-server-statistics-information>
</rpc>
```

Description Clear DHCP server statistics

Contents <routing-instance>—Name of routing instance
<logical-system>—Name of logical system

<clear-service-border-signaling-gateway-name-resolution-cache>

Usage

```
<rpc>  
  <clear-service-border-signaling-gateway-name-resolution-cache>  
    <gateway>gateway</gateway> <!-- mandatory -->  
    <master/>  
    <backup/>  
  </clear-service-border-signaling-gateway-name-resolution-cache>  
</rpc>
```

Description Clear border signaling gateway name resolution cache content

Contents <by-fqdn>—Clear cash records of the Fully Qualified Domain Name
<clear-service-border-signaling-gateway-name-resolution-cache-all>—Clear contents of the cache
<gateway>—Name of border signaling gateway
<master>—Query the master border signaling gateway (default)
<backup>—Query the backup border signaling gateway

<clear-service-border-signaling-gateway-name-resolution-cache-all>

Usage

```
<rpc>  
  <clear-service-border-signaling-gateway-name-resolution-cache-all>  
    <gateway>gateway</gateway> <!-- mandatory -->  
    <master/>  
    <backup/>  
  </clear-service-border-signaling-gateway-name-resolution-cache-all>  
</rpc>
```

Description Clear contents of the cache

Contents <gateway>—Name of border signaling gateway
<master>—Query the master border signaling gateway (default)
<backup>—Query the backup border signaling gateway

<clear-service-border-signaling-gateway-statistics>

Usage

```
<rpc>
  <clear-service-border-signaling-gateway-statistics>
    <gateway>gateway</gateway> <!-- mandatory -->
    <master/>
    <backup/>
  </clear-service-border-signaling-gateway-statistics>
</rpc>
```

Description Clear BSG statistics counters

Contents <gateway>—Name of border signaling gateway

<master>—Query the master border signaling gateway (default)

<backup>—Query the backup border signaling gateway

<clear-service-bsg-denied-messages>

Usage

```
<rpc>
  <clear-service-bsg-denied-messages>
    <gateway>gateway</gateway> <!-- mandatory -->
    <master/>
    <backup/>
  </clear-service-bsg-denied-messages>
</rpc>
```

Description Clear BSG denied messages information

Contents <gateway>—Name of border signaling gateway

<master>—Query the master border signaling gateway (default)

<backup>—Query the backup border signaling gateway

<clear-service-bsg-registrations>

Usage

```
<rpc>
  <clear-service-bsg-registrations>
  </clear-service-bsg-registrations>
</rpc>
```

Description Clear border signaling gateway registrations

Contents <clear-service-bsg-registrations-statistics>—Clear border signaling gateway registrations statistics

 <clear-services-bsg-registrations-subscription>—Clear border signaling gateway registrations subscription

<clear-service-bsg-registrations-statistics>

Usage

```
<rpc>
  <clear-service-bsg-registrations-statistics>
    <gateway>gateway</gateway> <!-- mandatory -->
    <master/>
    <backup/>
  </clear-service-bsg-registrations-statistics>
</rpc>
```

Description Clear border signaling gateway registrations statistics

Contents <gateway>—Name of border signaling gateway

 <master>—Query the master border signaling gateway (default)

 <backup>—Query the backup border signaling gateway

<clear-service-msp-flow-ipaction-table>

Usage

```
<rpc>
  <clear-service-msp-flow-ipaction-table>
    <filter>filter</filter> <!-- mandatory -->
  </clear-service-msp-flow-ipaction-table>
</rpc>
```

Description Clear ip-action table

Contents

<clear-service-msp-flow-table-information>

Usage

```
<rpc>
  <clear-service-msp-flow-table-information>
    <source-prefix>source-prefix</source-prefix>
    <destination-prefix>destination-prefix</destination-prefix>
    <source-port>source-port</source-port>
    <destination-port>destination-port</destination-port>
    <protocol>protocol</protocol>
    <service-set>service-set</service-set>
  </clear-service-msp-flow-table-information>
</rpc>
```

```
<interface>interface</interface>
</clear-service-msp-flow-table-information>
</rpc>
```

Description Remove established flows from flow table

Contents <source-prefix>—Source prefix to use as filter

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<destination-prefix>—Destination prefix to use as filter

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol

- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<service-set>—Name of service set

<interface>—Name of extension provider interface

<clear-service-msp-flow-ipaction-table>—Clear ip-action table

<clear-service-pgcp-gates>

Usage

```
<rpc>
  <clear-service-pgcp-gates>
</clear-service-pgcp-gates>
</rpc>
```

Description Clear gates table

Contents <clear-service-pgcp-gates-gateway>—Clear gate table for gateway

<clear-service-pgcp-gates-gateway>

Usage

```
<rpc>
  <clear-service-pgcp-gates-gateway>
    <gateway-name>gateway-name</gateway-name> <!-- mandatory -->
  </clear-service-pgcp-gates-gateway>
</rpc>
```

Description Clear gate table for gateway

Contents <gateway-name>—Gateway name

<clear-service-pgcp-statistics>

Usage

```
<rpc>
  <clear-service-pgcp-statistics>
</clear-service-pgcp-statistics>
</rpc>
```

Description Clear statistics information

Contents <clear-service-pgcp-statistics-gateway>—Clear gate table for gateway

<clear-service-pgcp-statistics-gateway>

Usage

```
<rpc>
  <clear-service-pgcp-statistics-gateway>
    <gateway-name>gateway-name</gateway-name> <!-- mandatory -->
  </clear-service-pgcp-statistics-gateway>
</rpc>
```

Description Clear gate table for gateway

Contents <gateway-name>—Gateway name

<clear-service-set-packet-drop-statistics>

Usage

```
<rpc>
  <clear-service-set-packet-drop-statistics>
    <interface>interface</interface>
  </clear-service-set-packet-drop-statistics>
</rpc>
```

```
</rpc>
```

Description Clear service set packet drop statistics

Contents <interface>—Name of adaptive services interface

<clear-service-sfw-flow-table-information>

Usage

```
<rpc>
  <clear-service-sfw-flow-table-information>
    <source-prefix>source-prefix</source-prefix>
    <destination-prefix>destination-prefix</destination-prefix>
    <source-port>source-port</source-port>
    <destination-port>destination-port</destination-port>
    <protocol>protocol</protocol>
    <application-protocol>application-protocol</application-protocol>
    <service-set>service-set</service-set>
    <interface>interface</interface>
  </clear-service-sfw-flow-table-information>
</rpc>
```

Description Remove established flows from flow table

<service-set>—Name of service set

<interface>—Name of adaptive services interface

<clear-services-bsg-registrations-subscription>

Usage

```
<rpc>
  <clear-services-bsg-registrations-subscription>
    <gateway>gateway</gateway> <!-- mandatory -->
    <master/>
    <backup/>
    <address-of-record>address-of-record</address-of-record>
    <forceful/>
    <graceful/>
  </clear-services-bsg-registrations-subscription>
</rpc>
```

Description Clear border signaling gateway registrations subscription

Contents

<gateway>—Name of border signaling gateway

<master>—Query the master border signaling gateway (default)

<backup>—Query the backup border signaling gateway

<address-of-record>—Address of record

<forceful>—Remove address-of-record

<graceful>—Remove address-of-record gracefully

<clear-services-dynamic-flow-capture-criteria>

Usage

```
<rpc>
  <clear-services-dynamic-flow-capture-criteria>
    <capture-group>capture-group</capture-group> <!-- mandatory -->
    <destination-identifier>destination-identifier</destination-identifier>
    <criteria-identifier>criteria-identifier</criteria-identifier>
    <static/>
  </clear-services-dynamic-flow-capture-criteria>
```

`</rpc>`

- Description** Clear dynamic flow capture criteria
- Contents** `<capture-group>`—Capture group name
- `<destination-identifier>`—Content destination identifier
- `<criteria-identifier>`—Criteria identifier
- `<static>`—Clear static criteria also

`<clear-services-dynamic-flow-capture-sequence-number>`

Usage

```
<rpc>
  <clear-services-dynamic-flow-capture-sequence-number>
    <capture-group>capture-group</capture-group> <!-- mandatory -->
    <source-identifier>source-identifier</source-identifier> <!-- mandatory -->
  </clear-services-dynamic-flow-capture-sequence-number>
</rpc>
```

- Description** Clear dynamic flow capture sequence-number
- Contents** `<capture-group>`—Capture group name
- `<source-identifier>`—Control source identifier

`<clear-services-flow-collector-information>`

Usage

```
<rpc>
  <clear-services-flow-collector-information>
</clear-services-flow-collector-information>
</rpc>
```

- Description** Clear services flow collector information
- Contents** `<clear-services-flow-collector-statistics>`—Clear statistics

`<clear-services-flow-collector-statistics>`

Usage

```
<rpc>
  <clear-services-flow-collector-statistics>
    <interface>interface</interface> <!-- mandatory -->
  </clear-services-flow-collector-statistics>
</rpc>
```

```
</rpc>
```

Description Clear statistics

Contents <interface>—Interface name

- all - All configured Collector PICs
- interface - Physical interface

<clear-sflow-collector-statistics>

Usage

```
<rpc>  
  <clear-sflow-collector-statistics/>  
</rpc>
```

Description Clear sFlow collector statistics

<clear-synchronous-ethernet-esmc-statistics>

Usage

```
<rpc>  
  <clear-synchronous-ethernet-esmc-statistics>  
    <interface-name>interface-name</interface-name>  
  </clear-synchronous-ethernet-esmc-statistics>  
</rpc>
```

Description Clear ESMC statistics

Contents <interface-name>—Name of interface

<clear-system-commit>

Usage

```
<rpc>  
  <clear-system-commit/>  
</rpc>
```

Description Clear all pending commit requests

<clear-system-services-reverse-information>

Usage

```
<rpc>
```

```
<clear-system-services-reverse-information/>
</rpc>
```

Description Clear reverse telnet/SSH connection

<clear-tgm-media-gateway-controller>

Usage

```
<rpc>
  <clear-tgm-media-gateway-controller>
    <slot>slot</slot> <!-- mandatory -->
    <media-gateway-controller/>
  </clear-tgm-media-gateway-controller>
</rpc>
```

Description Clear Flexible PIC Concentrator information

Contents <slot>—FPC slot number

<media-gateway-controller>—Name of one or more media gateway controllers

<clear-virtual-chassis-port-statistics>

Usage

```
<rpc>
  <clear-virtual-chassis-port-statistics>
    <interface-name>interface-name</interface-name>
  </clear-virtual-chassis-port-statistics>
</rpc>
```

Description Clear virtual chassis port statistics

Contents <interface-name>—Name of virtual chassis port

<clear-virtual-chassis-statistics>

Usage

```
<rpc>
  <clear-virtual-chassis-statistics/>
</rpc>
```

Description Clear virtual chassis statistics

<clear-visitor-all>

Usage

```
<rpc>
  <clear-visitor-all/>
</rpc>
```

Description Clear all visitors

<clear-visitor-ip>

Usage

```
<rpc>
  <clear-visitor-ip>
    <ip-address>ip-address</ip-address> <!-- mandatory -->
  </clear-visitor-ip>
</rpc>
```

Description Clear visitor entry based on IP address

Contents <ip-address>—Enter IP Address

<clear-visitor-nai>

Usage

```
<rpc>
  <clear-visitor-nai>
    <nai>nai</nai> <!-- mandatory -->
  </clear-visitor-nai>
</rpc>
```

Description Clear visitor entry based on nai

Contents <nai>—Enter nai

<clear-vpls-interface-mac-table>

Usage

```
<rpc>
  <clear-vpls-interface-mac-table>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
    <vlan-id>vlan-id</vlan-id>
  </clear-vpls-interface-mac-table>
</rpc>
```

Description Clear media access control table for specified interface

Contents <interface-name>—Name of interface for which to clear table

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN

<vlan-id>—Clear MAC address learned on a specified VLAN

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN

<clear-vpls-mac-table>

Usage

```
<rpc>
  <clear-vpls-mac-table>
    <instance>instance</instance>
    <logical-system>logical-system</logical-system>
    <vlan-id>vlan-id</vlan-id>
    <isid>isid</isid>
    <address>address</address>
  </clear-vpls-mac-table>
</rpc>
```

Description Clear all learned media access control addresses

Contents <clear-vpls-interface-mac-table>—Clear media access control table for specified interface

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<instance>—Display information for a specified instance

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<logical-system>—Name of logical system, or 'all'

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN

- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<vlan-id>—Clear MAC address learned on a specified VLAN

- all-vlan - Clear MAC addresses on all VLAN(s)
- vlan-id - Clear MAC address learned on a specified VLAN
- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<isid>—Clear MAC address learned on a specified ISID

- all-isid - Clear MAC addresses on all ISID(s)
- isid - Clear MAC address learned on a specified ISID

<address>—MAC address

<clear-vrrp-information>

Usage

```
<rpc>
  <clear-vrrp-information>
    <all/>
  </clear-vrrp-information>
</rpc>
```

Description Clear Virtual Router Redundancy Protocol statistics

Contents <all>—Clear all statistics

<clear-vrrp-interface-statistics>—Name of interface on which to clear statistics

<clear-vrrp-interface-statistics>

Usage

```
<rpc>
  <clear-vrrp-interface-statistics>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </clear-vrrp-interface-statistics>
</rpc>
```

Description Name of interface on which to clear statistics

Contents <interface-name>—Name of interface

<clear-web-filter-clear>

Usage

```
<rpc>
  <clear-web-filter-clear/>
</rpc>
```

Description Clear web-filtering statistics information

<file-compare>

Usage

```
<rpc>
  <file-compare>
    <context/>
    <unified/>
    <ignore-white-space/>
    <files>files</files>
    <from-file>from-file</from-file>
    <to-file>to-file</to-file>
  </file-compare>
</rpc>
```

Description Compare files

Contents <context>—Context style output format

<unified>—Unified style output format

<ignore-white-space>—Ignore changes in amount of white space

<files>—Files to compare

<from-file>—File to compare

<to-file>—File to compare against

<file-copy>

Usage

```
<rpc>
  <file-copy>
    <source>source</source> <!-- mandatory -->
    <destination>destination</destination> <!-- mandatory -->
    <source-address>source-address</source-address>
  </file-copy>
</rpc>
```

Description	Copy files (local or remote)
Contents	<code><source></code> —URL of source file <code><destination></code> —URL of destination file <code><source-address></code> —Local address to use in originating the connection

<file-delete>

Usage

```
<rpc>  
  <file-delete>  
    <purge/>  
    <path>path</path> <!-- mandatory -->  
  </file-delete>  
</rpc>
```

Description	Delete files from the system
--------------------	------------------------------

Contents	<code><purge></code> —Overwrite regular files before deleting them <code><path></code> —Path to delete
-----------------	-----------------------------------------------------------------------------------------------------------------------

<file-get>

Usage

```
<rpc>  
  <file-get>  
    <filename>filename</filename> <!-- mandatory -->  
    <encoding>encoding</encoding> <!-- mandatory -->  
  </file-get>  
</rpc>
```

Description	Get file from device with contents inlined
--------------------	--------------------------------------------

Contents	<code><filename></code> —Name of source file on device <code><encoding></code> —Encoding type: ascii, base64, or raw
-----------------	-------------------------------------------------------------------------------------------------------------------------------------

<file-list>

Usage

```
<rpc>  
  <file-list>  
    <detail/>  
    <recursive/>  
    <path>path</path>
```

```

    </file-list>
  </rpc>

```

Description List file information

Contents <detail>—Display detailed output (like 'ls -l')

<recursive>—Descend recursively through directory hierarchy

<path>—Path to list

<file-put>

Usage

```

<rpc>
  <file-put>
    <filename>filename</filename> <!-- mandatory -->
    <permission>permission</permission>
    <encoding>encoding</encoding> <!-- mandatory -->
    <delete-if-exist/>
    <file-contents>file-contents</file-contents> <!-- mandatory -->
  </file-put>
</rpc>

```

Description Put file onto device with contents inlined

Contents <filename>—Name of destination file on device

<permission>—Name of destination file on device

<encoding>—Encoding type: ascii or base64

<delete-if-exist>—Delete the destination file on device if it already exists

<file-contents>—File content

<file-rename>

Usage

```

<rpc>
  <file-rename>
    <source>source</source> <!-- mandatory -->
    <destination>destination</destination> <!-- mandatory -->
  </file-rename>
</rpc>

```

Description Rename files

Contents <source>—Source URL
 <destination>—Destination URL

<file-show>

Usage

```
<rpc>
  <file-show>
    <filename>filename</filename> <!-- mandatory -->
    <encoding>encoding</encoding>
  </file-show>
</rpc>
```

Description Show file contents

Contents <filename>—Filename to show

- base64 - Encode file with base64 encoding
- raw - Show raw text from file

 <encoding>—Encode file contents

- base64 - Encode file with base64 encoding
- raw - Show raw text from file

<generate-pki-certificate-request>

Usage

```
<rpc>
  <generate-pki-certificate-request>
    <ip-address>ip-address</ip-address>
    <filename>filename</filename>
    <subject>subject</subject> <!-- mandatory -->
    <certificate-id>certificate-id</certificate-id> <!-- mandatory -->
    <domain-name>domain-name</domain-name>
    <email>email</email>
  </generate-pki-certificate-request>
</rpc>
```

Description Generate the certificate request in PKCS-10 format

Contents <ip-address>—Static IP address of the device

 <filename>—Local location for copy of certificate request

 <subject>—DC=<Domain
 component>CN=<Common Name>OU=<Organizational Unit>O=<Organization>L=<Locality>ST=<State>C=<Country>

<certificate-id>—Certificate identifier

<domain-name>—Fully qualified domain name

<email>—Email address

<generate-pki-key-pair>

Usage

```
<rpc>
  <generate-pki-key-pair>
    <certificate-id>certificate-id</certificate-id> <!-- mandatory -->
    <size>size</size>
  </generate-pki-key-pair>
</rpc>
```

Description Generate RSA private and public key pair

Contents <certificate-id>—Certificate identifier

- 512 - 512 bits
- 1024 - 1024 bits
- 2048 - 2048 bits

<size>—Size of key

- 512 - 512 bits
- 1024 - 1024 bits
- 2048 - 2048 bits

<generate-pki-self-signed-local-certificate>

Usage

```
<rpc>
  <generate-pki-self-signed-local-certificate>
    <certificate-id>certificate-id</certificate-id> <!-- mandatory -->
    <domain-name>domain-name</domain-name> <!-- mandatory -->
    <ip-address>ip-address</ip-address>
    <email>email</email>
    <subject>subject</subject> <!-- mandatory -->
  </generate-pki-self-signed-local-certificate>
</rpc>
```

Description Generate a self-signed certificate

Contents <certificate-id>—Certificate identifier

<domain-name>—Fully qualified domain name

<ip-address>—Static IP address of the device

<email>—Email address of the entity owning the certificate

<subject>—DC=<Domain Component>, CN=<Common Name>, OU=<Organizational Unit>, O=<Organization>, L=<Locality>, ST=<State>, C=<Country>

<get-aaa-module-statistics>

Usage

```
<rpc>
  <get-aaa-module-statistics>
    <authentication/>
    <accounting/>
    <dynamic-requests/>
    <re-authentication/>
    <subscribers/>
  </get-aaa-module-statistics>
</rpc>
```

Description (Re)authentication, authorization and accounting (AAA) module statistics

Contents <authentication>—Authentication statistics

<accounting>—Accounting statistics

<dynamic-requests>—Dynamic requests statistics

<re-authentication>—Re-authentication statistics

<subscribers>—Subscriber statistics

<address-assignment>—Statistics for address assignments

<get-aaa-subscriber-statistics>

Usage

```
<rpc>
  <get-aaa-subscriber-statistics>
    <username>username</username> <!-- mandatory -->
  </get-aaa-subscriber-statistics>
</rpc>
```

Description Statistics on subscriber events

Contents <username>—Show statistics for this subscriber's session entry

<get-aaa-subscriber-table>

Usage

```

<rpc>
  <get-aaa-subscriber-table>
    <username>username</username>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-aaa-subscriber-table>
</rpc>

```

Description List subscriber specific command options

Contents <username>—Show details for this subscriber's session entry

<routing-instance>—Name of routing instance

<logical-system>—Name of logical system

<session-id>—Session id

<get-aaa-subscriber-statistics>—Statistics on subscriber events

<get-accounting-information>

Usage

```

<rpc>
  <get-accounting-information>
    <status>status</status>
    <records/>
    <calls>calls</calls>
  </get-accounting-information>
</rpc>

```

Description Show accounting information

Contents <status>—Show accounting status

- completed - Completed calls
- established - Established calls
- in-progress - In progress calls

<records>—Show accounting records

- completed - Completed calls
- established - Established calls
- in-progress - In progress calls

<calls>—Show call status

- completed - Completed calls
- established - Established calls
- in-progress - In progress calls

<get-accounting-profile-information>

Usage

```
<rpc>  
  <get-accounting-profile-information>  
    <profile>profile</profile>  
  </get-accounting-profile-information>  
</rpc>
```

Description Show accounting profile information

Contents <profile>—Profile name

<get-accounting-record-information>

Usage

```
<rpc>  
  <get-accounting-record-information>  
    <profile>profile</profile> <!-- mandatory -->  
    <since>since</since>  
    <utc-timestamp/>  
  </get-accounting-record-information>  
</rpc>
```

Description Show accounting records

Contents <profile>—Name of profile

<since>—Timestamp on earliest records to show (YYYY-MM-DD.HH:MM:SS)

<utc-timestamp>—Display timestamp in UTC format

<get-active-servers>

Usage

```
<rpc>  
  <get-active-servers/>  
</rpc>
```

Description Show configured servers

<get-address-assignment-pool-table>

Usage

```
<rpc>
  <get-address-assignment-pool-table>
    <get-address-assignment-pool-table-specific>
    <!-- mandatory -->
      <routing-instance>routing-instance</routing-instance>
      <logical-system>logical-system</logical-system>
    </get-address-assignment-pool-table>
  </rpc>
```

Description Show pool information

Contents <get-address-assignment-pool-table-specific>—Show information for a specific pool

<routing-instance>—Name of routing instance

<logical-system>—Name of logical system

<get-alarm-information>

Usage

```
<rpc>
  <get-alarm-information/>
</rpc>
```

Description Show alarm status

<get-alg-h323-counters>

Usage

```
<rpc>
  <get-alg-h323-counters/>
</rpc>
```

Description Show H323 counters

<get-alg-mgcp-call-information>

Usage

```
<rpc>
  <get-alg-mgcp-call-information>
    <endpoint>endpoint</endpoint>
  </get-alg-mgcp-call-information>
```

```
</rpc>
```

Description Show MGCP calls

Contents <endpoint>—Show MGCP call endpoint

<get-alg-mgcp-counter-information>

Usage

```
<rpc>  
  <get-alg-mgcp-counter-information/>  
</rpc>
```

Description Show MGCP counters

<get-alg-mgcp-endpoint-information>

Usage

```
<rpc>  
  <get-alg-mgcp-endpoint-information>  
    <endpoint-name>endpoint-name</endpoint-name>  
  </get-alg-mgcp-endpoint-information>  
</rpc>
```

Description Show MGCP endpoints

Contents <endpoint-name>—Show MGCP endpoint with identifier

<get-alg-msrpc-uuid2oid-table>

Usage

```
<rpc>  
  <get-alg-msrpc-uuid2oid-table/>  
</rpc>
```

Description Show MSRPC UUID to OID table

<get-alg-sccp-calls>

Usage

```
<rpc>  
  <get-alg-sccp-calls>  
    <detail/>  
    <brief/>  
  </get-alg-sccp-calls>
```

`</rpc>`

Description Show SCCP calls

Contents `<detail>`—Display detailed call information
`<brief>`—Display brief call information (default)

`<get-alg-sccp-counters>`

Usage

```
<rpc>  
  <get-alg-sccp-counters/>  
</rpc>
```

Description Show SCCP counters

`<get-alg-sip-call-information>`

Usage

```
<rpc>  
  <get-alg-sip-call-information>  
    <detail/>  
    <brief/>  
  </get-alg-sip-call-information>  
</rpc>
```

Description Show SIP calls

Contents `<detail>`—Display detailed call information
`<brief>`—Display brief call information (default)

`<get-alg-sip-counter-information>`

Usage

```
<rpc>  
  <get-alg-sip-counter-information/>  
</rpc>
```

Description Show SIP counters

<get-alg-sip-rate-information>

Usage

```
<rpc>
  <get-alg-sip-rate-information/>
</rpc>
```

Description Show SIP rate

<get-alg-status>

Usage

```
<rpc>
  <get-alg-status/>
</rpc>
```

Description Show ALG status

<get-amt-statistics>

Usage

```
<rpc>
  <get-amt-statistics>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-amt-statistics>
</rpc>
```

Description Show AMT statistics summary

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<get-amt-summary>

Usage

```
<rpc>
  <get-amt-summary>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-amt-summary>
</rpc>
```

Description Show AMT configuration summary

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<get-amt-tunnel-information>

Usage

```
<rpc>
  <get-amt-tunnel-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <brief/>
    <detail/>
  </get-amt-tunnel-information>
</rpc>
```

Description Show AMT tunnel parameters

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<brief>—Display brief output (default)

<detail>—Display detailed output

<tunnel-interface>—AMT tunnel interface

<gateway-address>—AMT tunnel gateway address

<get-analyzer-information>

Usage

```
<rpc>
  <get-analyzer-information>
    <analyzer-name>analyzer-name</analyzer-name>
  </get-analyzer-information>
</rpc>
```

Description Show analyzer information

Contents <analyzer-name>—Name of analyzer

<get-ancp-cos-information>

Usage

```
<rpc>
  <get-ancp-cos-information>
    <identifier>identifier</identifier>
```

```
</get-ancp-cos-information>
</rpc>
```

Description Show ANCP Cos information

Contents <get-ancp-cos-pending-information>—Show ANCP Pending Update Cos information
<get-ancp-cos-last-update-information>—Show ANCP Last Update Cos information
<identifier>—Access loop identifier

<get-ancp-cos-last-update-information>

Usage

```
<rpc>
  <get-ancp-cos-last-update-information/>
</rpc>
```

Description Show ANCP Last Update Cos information

<get-ancp-cos-pending-information>

Usage

```
<rpc>
  <get-ancp-cos-pending-information/>
</rpc>
```

Description Show ANCP Pending Update Cos information

<get-ancp-neighbor-information>

Usage

```
<rpc>
  <get-ancp-neighbor-information>
    <brief/>
    <detail/>
    <ip-address>ip-address</ip-address>
    <system-name>system-name</system-name>
  </get-ancp-neighbor-information>
</rpc>
```

Description Neighbor information

Contents <brief>—Display brief output (default)
<detail>—Display detailed output

<ip-address>—IP address of the neighbor

<system-name>—MAC address of the neighbor

<get-ancp-subscriber-information>

Usage

```
<rpc>
  <get-ancp-subscriber-information>
    <brief/>
    <detail/>
  </get-ancp-subscriber-information>
</rpc>
```

Description Subscriber information

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<identifier>—Access loop identifier

<neighbor>—Subscriber information from a neighbor

<get-appid-application-system-cache>

Usage

```
<rpc>
  <get-appid-application-system-cache>
    <interface>interface</interface>
  </get-appid-application-system-cache>
</rpc>
```

Description Show application system cache

Contents <interface>—Services interface to query

<get-appid-counter>

Usage

```
<rpc>
  <get-appid-counter>
    <interface>interface</interface>
  </get-appid-counter>
</rpc>
```

Description Show the application identification counters

Contents <interface>—Services interface to query

<get-appid-package-version>

Usage

```
<rpc>
  <get-appid-package-version/>
</rpc>
```

Description Show the current application package version

<get-arp-inspection-statistics>

Usage

```
<rpc>
  <get-arp-inspection-statistics/>
</rpc>
```

Description Show ARP inspection statistics

<get-arp-table-information>

Usage

```
<rpc>
  <get-arp-table-information>
    <no-resolve/>
    <expiration-time/>
    <vpn>vpn</vpn>
    <logical-system>logical-system</logical-system>
  </get-arp-table-information>
</rpc>
```

Description Show system Address Resolution Protocol table entries

Contents <no-resolve>—Don't attempt to print addresses symbolically

 <expiration-time>—Show seconds remaining before expiration

 <vpn>—Name of VPN routing table

 <logical-system>—Name of logical system

<get-authentication-pending-table>

Usage

```
<rpc>
  <get-authentication-pending-table>
```

```

    <filter>filter</filter>
    <get-authentication-pending-table-detailed/>

<get-authentication-pending-table-specific>get-authentication-pending-table-specific</get-authentication-pending-table-specific>

    </get-authentication-pending-table>
</rpc>

```

Description Show pending authentication requests

Contents <get-authentication-pending-table-detailed>—Show the detailed information

<get-authentication-pending-table-specific>—Show detail information for a specific request

<get-authentication-statistics>

Usage

```

<rpc>
  <get-authentication-statistics/>
</rpc>

```

Description Show authentication statistics

<get-authentication-whitelist-mac-bypassed-users>

Usage

```

<rpc>
  <get-authentication-whitelist-mac-bypassed-users/>
</rpc>

```

Description List users who have bypassed 802.1X authentication

<get-authorization-information>

Usage

```

<rpc>
  <get-authorization-information/>
</rpc>

```

Description Show authorization and authentication information

<get-autoinstallation-status-information>

Usage

```

<rpc>

```

```
<get-autoinstallation-status-information/>
</rpc>
```

Description Show autoinstallation status

<get-avt-counters>

Usage

```
<rpc>
  <get-avt-counters/>
</rpc>
```

Description Show Application tracking counters

<get-bfd-session-information>

Usage

```
<rpc>
  <get-bfd-session-information>
    <summary/>
    <brief/>
    <detail/>
    <extensive/>
    <logical-system>logical-system</logical-system>
  </get-bfd-session-information>
</rpc>
```

Description Show all BFD sessions

Contents

- <summary>—Display summary output
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <extensive>—Display extensive output
- <address>—Show BFD session with specific neighbor address
- <discriminator>—Show BFD session with specific local discriminator
- <logical-system>—Name of logical system, or 'all'
- <prefix>—Show all BFD sessions for this LDP FEC

<get-bgp-group-information>

Usage

```
<rpc>
  <get-bgp-group-information>
    <logical-system>logical-system</logical-system>
    <summary/>
    <brief/>
    <detail/>
    <instance>instance</instance>
    <group-name>group-name</group-name>
  </get-bgp-group-information>
</rpc>
```

Description Show the BGP group database

Contents

- <logical-system>—Name of logical system, or 'all'
- <get-bgp-rtf-information>—Show route target filtering information
- <get-bgp-traffic-statistics-information>—Show packet statistics for labeled BGP routes
- <summary>—Display summary output
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <instance>—Show peer information for a particular instance
- <group-name>—Show group information for a particular group

<get-bgp-neighbor-information>

Usage

```
<rpc>
  <get-bgp-neighbor-information>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <instance>instance</instance>
    <neighbor-address>neighbor-address</neighbor-address>
  </get-bgp-neighbor-information>
</rpc>
```

Description Show the BGP neighbor database

Contents

- <logical-system>—Name of logical system, or 'all'
- <fabric>—Internal fabric state

<get-bgp-orf-information>—Show outbound route filtering information

<instance>—Show peer information for a particular instance

<neighbor-address>—Show the neighbor database for a particular neighbor

<get-bgp-orf-information>

Usage

```
<rpc>
  <get-bgp-orf-information>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <brief/>
    <detail/>
    <instance>instance</instance>
    <neighbor-address>neighbor-address</neighbor-address>
  </get-bgp-orf-information>
</rpc>
```

Description Show outbound route filtering information

Contents <logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<brief>—Display brief output (default)

<detail>—Display detailed output

<instance>—Show ORF information for a particular instance

<neighbor-address>—Show ORF information for a particular neighbor

<get-bgp-rtf-information>

Usage

```
<rpc>
  <get-bgp-rtf-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <group-name>group-name</group-name>
  </get-bgp-rtf-information>
</rpc>
```

Description Show route target filtering information

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<group-name>—Show group information for a particular group

<get-bgp-summary-information>

Usage

```
<rpc>
  <get-bgp-summary-information>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <instance>instance</instance>
  </get-bgp-summary-information>
</rpc>
```

Description Show overview of BGP information

Contents <logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<instance>—Show peer information for a particular instance

<get-bgp-traffic-statistics-information>

Usage

```
<rpc>
  <get-bgp-traffic-statistics-information>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <brief/>
    <detail/>
    <group-name>group-name</group-name>
  </get-bgp-traffic-statistics-information>
</rpc>
```

Description Show packet statistics for labeled BGP routes

Contents <logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<brief>—Display brief output (default)

<detail>—Display detailed output

<group-name>—Show group information for a particular group

<get-bios-version-information>

Usage

```
<rpc>
  <get-bios-version-information/>
</rpc>
```

Description Show BIOS firmware version

<get-bridge-domain-alt-root-flood-route-information>

Usage

```
<rpc>
  <get-bridge-domain-alt-root-flood-route-information>
    <interface>interface</interface> <!-- mandatory -->
  </get-bridge-domain-alt-root-flood-route-information>
</rpc>
```

Description Show STP alt-root flooding route used for interface

Contents <interface>—Interface for which to show alternate-root flooding route

<get-bridge-domain-bd-flood-route-information>

Usage

```
<rpc>
  <get-bridge-domain-bd-flood-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <bridge-domain>bridge-domain</bridge-domain>
  </get-bridge-domain-bd-flood-route-information>
</rpc>
```

Description Show route for flooding traffic of a bridge domain if no-local-switching is not enabled

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Display information for a specified instance

<bridge-domain>—Display information for a specified bridge domain

<get-bridge-domain-event-queue-information>

Usage

```
<rpc>
  <get-bridge-domain-event-queue-information/>
</rpc>
```

Description Show queue of pending bridge flood events

<get-bridge-domain-mlp-flood-route-information>

Usage

```
<rpc>
  <get-bridge-domain-mlp-flood-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <bridge-domain>bridge-domain</bridge-domain>
  </get-bridge-domain-mlp-flood-route-information>
</rpc>
```

Description Show route for flooding traffic to MAC learning chips

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Display information for a specified instance

<bridge-domain>—Display information for a specified bridge domain

<get-bridge-domain-re-flood-route-information>

Usage

```
<rpc>
  <get-bridge-domain-re-flood-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <bridge-domain>bridge-domain</bridge-domain>
  </get-bridge-domain-re-flood-route-information>
</rpc>
```

Description Show route for Routing Engine flooding to all interfaces

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Display information for a specified instance

<bridge-domain>—Display information for a specified bridge domain

<get-bridge-instance-information>

Usage

```
<rpc>
  <get-bridge-instance-information>
    <instance>instance</instance>
    <bridge-domain-name>bridge-domain-name</bridge-domain-name>
    <logical-system>logical-system</logical-system>
    <interface-choice>interface-choice</interface-choice>
    <interface>interface</interface>
    <detail/>
    <brief/>
    <extensive/>
  </get-bridge-instance-information>
</rpc>
```

Description Show bridge domain information

Contents

- <instance>—Display information for a specified instance
- <bridge-domain-name>—Display information for a specified bridge domain
- <logical-system>—Name of logical system, or 'all'
- <interface>—Name of interface for which to display table
- <detail>—Display detailed output
- <brief>—Display brief output
- <extensive>—Display extensive output
- <operational>—Show operational bridging instance

<get-bridge-interface-mac-table>

Usage

```
<rpc>
  <get-bridge-interface-mac-table>
    <interface-choice>interface-choice</interface-choice> <!-- mandatory -->
    <interface-name>interface-name</interface-name>
    <all/>
    <remote-beb-mac-address>remote-beb-mac-address</remote-beb-mac-address>

    <vlan-id>vlan-id</vlan-id>
    <isid>isid</isid>
    <detail/>
    <brief/>
    <extensive/>
    <count/>
  </get-bridge-interface-mac-table>
```

</rpc>

Description Display MAC table for a specified interface

Contents <interface-name>—Name of interface for which to display table

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<all>—Display MAC table for all the interfaces

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<remote-beb-mac-address>—Remote backbone edge bridge MAC address

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<vlan-id>—Display MAC address learned on a specified VLAN

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<isid>—Display Information for specified ISID or all ISID(s)

- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<detail>—Display detailed output

<brief>—Display brief output

<extensive>—Display extensive output

<count>—Display count only

<get-bridge-mac-table>

Usage

```
<rpc>
  <get-bridge-mac-table>
    <instance>instance</instance>
    <bridge-domain>bridge-domain</bridge-domain>
    <logical-system>logical-system</logical-system>
    <vlan-id>vlan-id</vlan-id>
    <isid>isid</isid>
    <address>address</address>
    <detail/>
    <brief/>
    <extensive/>
    <count/>
  </get-bridge-mac-table>
</rpc>
```

Description Show media access control table

Contents <get-bridge-interface-mac-table>—Display MAC table for a specified interface

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<instance>—Display information for a specified instance

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<bridge-domain>—Name of bridging domain, or 'all'

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<logical-system>—Name of logical system, or 'all'

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN

- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<vlan-id>—Display MAC address learned on a specified VLAN

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<isid>—Display Information for specified ISID or all ISID(s)

- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<address>—MAC address

<detail>—Display detailed output

<brief>—Display brief output

<extensive>—Display extensive output

<count>—Display count only

<get-bridge-statistics-information>

Usage

```
<rpc>
  <get-bridge-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <bridge-domain>bridge-domain</bridge-domain>
  </get-bridge-statistics-information>
</rpc>
```

Description Show bridge statistics information

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Display information for a specified instance

<bridge-domain>—Display information for a specified bridge domain

<get-captive-portal-authentication-failed-users>

Usage

```
<rpc>
```

```
<get-captive-portal-authentication-failed-users/>
</rpc>
```

Description List users who have failed captive-portal authentication

<get-captive-portal-firewall-interface>

Usage

```
<rpc>
  <get-captive-portal-firewall-interface>
    <interface-name>interface-name</interface-name>
  </get-captive-portal-firewall-interface>
</rpc>
```

Description Show captive-portal firewall statistics for an interface

Contents <interface-name>—Show firewall statistics for this interface

<get-captive-portal-interface-information>

Usage

```
<rpc>
  <get-captive-portal-interface-information>
    <brief/>
    <detail/>
    <interface-name>interface-name</interface-name>
  </get-captive-portal-interface-information>
</rpc>
```

Description Show Captive Portal interface information

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<interface-name>—Name of interface

<get-certificates-information>

Usage

```
<rpc>
  <get-certificates-information>
    <brief/>
    <detail/>
    <serial-number>serial-number</serial-number>
  </get-certificates-information>
</rpc>
```

Description Show IPSec digital certificate information

Contents <brief>—Display brief output
 <detail>—Display detailed output
 <serial-number>—Serial number of certificate
 <get-crl-information>—Show IPSec digital certificate revocation lists

<get-cfeb-information>

Usage

```
<rpc>
  <get-cfeb-information/>
</rpc>
```

Description Show Compact Forwarding Engine Board status

<get-cfm-delay-statistics>

Usage

```
<rpc>
  <get-cfm-delay-statistics>
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
    <maintenance-association>maintenance-association</maintenance-association>
  <!-- mandatory -->
    <local-mep>local-mep</local-mep>
    <remote-mep>remote-mep</remote-mep>
    <count>count</count>
    <logical-system>logical-system</logical-system>
  </get-cfm-delay-statistics>
</rpc>
```

Description Show Ethernet OAM maintenance endpoint delay statistics information

Contents <maintenance-domain>—Name of maintenance domain
 <maintenance-association>—Name of maintenance association
 <local-mep>—Identifier for local maintenance endpoint
 <remote-mep>—Identifier for remote maintenance endpoint
 <count>—Number of delay statistics per maintenance endpoint
 <logical-system>—Name of logical system

<get-cfm-forwarding-state-instance-information>

Usage

```
<rpc>
  <get-cfm-forwarding-state-instance-information>
    <instance-name>instance-name</instance-name>
    <bridge-domain>bridge-domain</bridge-domain>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
  </get-cfm-forwarding-state-instance-information>
</rpc>
```

Description Show Ethernet OAM state for a forwarding instance

Contents

- <instance-name>—Show information for a particular routing instance
- <bridge-domain>—Show information for a particular bridge domain
- <logical-system>—Name of logical system
- <brief>—Display brief output
- <detail>—Display detail output
- <extensive>—Display extensive output

<get-cfm-forwarding-state-interface-information>

Usage

```
<rpc>
  <get-cfm-forwarding-state-interface-information>
    <interface-name>interface-name</interface-name>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
  </get-cfm-forwarding-state-interface-information>
</rpc>
```

Description Show Ethernet OAM state for an interface

Contents

- <interface-name>—Display information for this logical interface
- <logical-system>—Name of logical system
- <brief>—Display brief output
- <detail>—Display detail output

<extensive>—Display extensive output

<get-cfm-interfaces-information>

Usage

```
<rpc>
  <get-cfm-interfaces-information>
    <interface-name>interface-name</interface-name>
    <vlan>vlan</vlan>
    <level>level</level>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
  </get-cfm-interfaces-information>
</rpc>
```

Description Show Ethernet OAM information for interface

Contents <interface-name>—Name of interface

<vlan>—Trunk interface VLAN

<level>—Level value for maintenance domain

<logical-system>—Name of logical system, or 'all'

<brief>—Display brief output

<detail>—Display detail output

<extensive>—Display extensive output

<get-cfm-linktrace-path-database>

Usage

```
<rpc>
  <get-cfm-linktrace-path-database>
    <logical-system>logical-system</logical-system>
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
    <maintenance-association>maintenance-association</maintenance-association>
  <!-- mandatory -->
    <host>host</host> <!-- mandatory -->
  </get-cfm-linktrace-path-database>
</rpc>
```

Description Display the linktrace path-database for a remote host

Contents <logical-system>—Name of logical system

<maintenance-domain>—Name of maintenance domain

<maintenance-association>—Name of maintenance association

<host>—MAC address of remote host in xx:xx:xx:xx:xx:xx format

<get-cfm-mep-database>

Usage

```
<rpc>
  <get-cfm-mep-database>
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
    <maintenance-association>maintenance-association</maintenance-association>
  <!-- mandatory -->
    <local-mep>local-mep</local-mep>
    <remote-mep>remote-mep</remote-mep>
    <logical-system>logical-system</logical-system>
  </get-cfm-mep-database>
</rpc>
```

Description Show Ethernet OAM maintenance endpoint database information

Contents

<maintenance-domain>—Name of maintenance domain

<maintenance-association>—Name of maintenance association

<local-mep>—Identifier for local maintenance endpoint

<remote-mep>—Identifier for remote maintenance endpoint

<logical-system>—Name of logical system

<get-cfm-mep-statistics>

Usage

```
<rpc>
  <get-cfm-mep-statistics>
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
    <maintenance-association>maintenance-association</maintenance-association>
  <!-- mandatory -->
    <local-mep>local-mep</local-mep>
    <remote-mep>remote-mep</remote-mep>
    <count>count</count>
    <logical-system>logical-system</logical-system>
  </get-cfm-mep-statistics>
</rpc>
```

Description Show Ethernet OAM maintenance endpoint statistics information

Contents	<p><maintenance-domain>—Name of maintenance domain</p> <p><maintenance-association>—Name of maintenance association</p> <p><local-mep>—Identifier for local maintenance endpoint</p> <p><remote-mep>—Identifier for remote maintenance endpoint</p> <p><count>—Number of statistics per maintenance endpoint</p> <p><logical-system>—Name of logical system</p>
-----------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<get-cfm-mip-information>

Usage

```

<rpc>
  <get-cfm-mip-information>
    <logical-system>logical-system</logical-system>
    <instance-name>instance-name</instance-name>
    <bridge-domain>bridge-domain</bridge-domain>
    <interface-name>interface-name</interface-name>
    <vlan>vlan</vlan>
  </get-cfm-mip-information>
</rpc>

```

Description Display MIP information

Contents	<p><logical-system>—Name of logical system</p> <p><instance-name>—Show information for a particular routing instance</p> <p><bridge-domain>—Show information for a particular bridge domain</p> <p><interface-name>—Display information for this logical interface</p> <p><vlan>—Show information for a particular VLAN within a bridge domain</p>
-----------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<get-chassis-cluster-control-plane-statistics>

Usage

```

<rpc>
  <get-chassis-cluster-control-plane-statistics/>
</rpc>

```

Description Display control-plane statistics

<get-chassis-cluster-data-plane-interfaces>

Usage

```
<rpc>  
  <get-chassis-cluster-data-plane-interfaces/>  
</rpc>
```

Description Display data-plane interfaces

<get-chassis-cluster-data-plane-statistics>

Usage

```
<rpc>  
  <get-chassis-cluster-data-plane-statistics/>  
</rpc>
```

Description Display data-plane statistics

<get-chassis-cluster-interfaces>

Usage

```
<rpc>  
  <get-chassis-cluster-interfaces/>  
</rpc>
```

Description Display chassis cluster interfaces

<get-chassis-cluster-ip-monitoring-status>

Usage

```
<rpc>  
  <get-chassis-cluster-ip-monitoring-status>  
  </get-chassis-cluster-ip-monitoring-status>  
</rpc>
```

Description Display IP monitoring status

Contents <get-chassis-cluster-ip-monitoring-status-redundancy-group>—Display IP monitoring status for a specific redundancy-group

<get-chassis-cluster-ip-monitoring-status-redundancy-group>

Usage

```
<rpc>
```

<get-chassis-cluster-ip-monitoring-status-redundancy-group>

```

<redundancy-group-identifier>redundancy-group-identifier</redundancy-group-identifier>
<!-- mandatory -->
  </get-chassis-cluster-ip-monitoring-status-redundancy-group>
</rpc>

```

Description Display IP monitoring status for a specific redundancy-group

Contents <redundancy-group-identifier>—Redundancy-group identifier

<get-chassis-cluster-statistics>**Usage**

```

<rpc>
  <get-chassis-cluster-statistics/>
</rpc>

```

Description Display chassis cluster statistics

<get-chassis-cluster-status>**Usage**

```

<rpc>
  <get-chassis-cluster-status>
    <redundancy-group>redundancy-group</redundancy-group>
  </get-chassis-cluster-status>
</rpc>

```

Description Display chassis cluster status

Contents <redundancy-group>—Display chassis cluster status per redundancy-group

<get-chassis-inventory>**Usage**

```

<rpc>
  <get-chassis-inventory>
    <detail/>
    <extensive/>
    <models/>
    <clei-models/>
  </get-chassis-inventory>
</rpc>

```

Description Show installed hardware components

- Contents** <detail>—Include RAM and disk information in output
- <extensive>—Display ID EEPROM information
- <models>—Display serial number and model number for orderable FRUs
- <clei-models>—Display CLEI barcode and model number for orderable FRUs

<get-chassis-location>

Usage

```
<rpc>
  <get-chassis-location>
</get-chassis-location>
</rpc>
```

Description Show physical location of chassis

- Contents** <interface>—Show physical location of interface
- <fpc>—Show physical location of all fpcs

<get-checksum-information>

Usage

```
<rpc>
  <get-checksum-information>
    <path>path</path> <!-- mandatory -->
    <method>method</method>
  </get-checksum-information>
</rpc>
```

Description Calculate MD5 checksum of a file

- Contents** <path>—Path to filename
- md5 - Calculate MD5 checksum of a file
 - sha1 - Calculate SHA1 checksum of a file
 - sha-256 - Calculate SHA-256 checksum of a file
- <method>—
- md5 - Calculate MD5 checksum of a file
 - sha1 - Calculate SHA1 checksum of a file
 - sha-256 - Calculate SHA-256 checksum of a file

<get-cli-tip>

Usage

```
<rpc>
  <get-cli-tip>
    <number>number</number>
  </get-cli-tip>
</rpc>
```

Description Tip about using the CLI

Contents <number>—

<get-client-version>

Usage

```
<rpc>
  <get-client-version/>
</rpc>
```

Description Show Dynamic VPN client version

<get-clock-synchronization-information>

Usage

```
<rpc>
  <get-clock-synchronization-information>
    <interface>interface</interface>
    <extensive/>
  </get-clock-synchronization-information>
</rpc>
```

Description Show clock synchronization information

Contents <interface>—Name of physical interface

<extensive>—Show clock synchronization information in detail

<master>—Show master clock information

<backup>—Show backup clock information

<get-commit-information>

Usage

```
<rpc>
```

```
<get-commit-information/>
</rpc>
```

Description Show pending commit requests (if any) and commit history

<get-core-file-information>

Usage

```
<rpc>
  <get-core-file-information>
    <detail/>
    <brief/>
    <core-filename>core-filename</core-filename> <!-- mandatory -->
  </get-core-file-information>
</rpc>
```

Description Display the stack trace of core file

Contents <detail>—View stack trace with details of binary

<brief>—View details of binary

<core-filename>—Name of core file

<get-cos-adaptive-shaper-information>

Usage

```
<rpc>
  <get-cos-adaptive-shaper-information>
    <adaptive-shaper-name>adaptive-shaper-name</adaptive-shaper-name>
  </get-cos-adaptive-shaper-information>
</rpc>
```

Description Show trigger types and associated rate for adaptive shaper

Contents <adaptive-shaper-name>—Name of adaptive shaper

<get-cos-classifier-information>

Usage

```
<rpc>
  <get-cos-classifier-information>
    <classifier-name>classifier-name</classifier-name>
    <type>type</type>
  </get-cos-classifier-information>
</rpc>
```

Description Show mapping of code point to forwarding class/loss priority

Contents <classifier-name>—Name of classifier

- dscp - Differentiated Services code point (DSCP)
- dscp-ipv6 - Differentiated Services code point (DSCP) for IPv6
- exp - MPLS experimental code point
- ieee-802.1 - IEEE-802.1 code point
- inet-precedence - IPv4 precedence code point
- ieee-802.1ad - IEEE-802.1ad (DEI) code point

<type>—Type of classifier

- dscp - Differentiated Services code point (DSCP)
- dscp-ipv6 - Differentiated Services code point (DSCP) for IPv6
- exp - MPLS experimental code point
- ieee-802.1 - IEEE-802.1 code point
- inet-precedence - IPv4 precedence code point
- ieee-802.1ad - IEEE-802.1ad (DEI) code point

<get-cos-classifier-table-information>

Usage

```
<rpc>
  <get-cos-classifier-table-information>
  </get-cos-classifier-table-information>
</rpc>
```

Description Show classifier information

Contents <get-cos-classifier-table-map-information>—Show mapping of interfaces to classifiers

<get-cos-classifier-table-map-information>

Usage

```
<rpc>
  <get-cos-classifier-table-map-information/>
</rpc>
```

Description Show mapping of interfaces to classifiers

<get-cos-code-point-map-information>

Usage

```
<rpc>  
  <get-cos-code-point-map-information>  
    <dscp/>  
    <dscp-ipv6/>  
    <exp/>  
    <ieee-802.1/>  
    <inet-precedence/>  
    <ieee-802.1ad/>  
  </get-cos-code-point-map-information>  
</rpc>
```

Description Show mapping of symbolic name to code point bit pattern

Contents

- <dscp>—Differentiated Services code point (DSCP)
- <dscp-ipv6>—Differentiated Services code point (DSCP) for IPv6
- <exp>—MPLS experimental code point
- <ieee-802.1>—IEEE-802.1 code point
- <inet-precedence>—IPv4 precedence code point
- <ieee-802.1ad>—IEEE-802.1ad (DEI) code point

<get-cos-congestion-notification-information>

Usage

```
<rpc>  
  <get-cos-congestion-notification-information/>  
</rpc>
```

Description Show congestion-notification information

<get-cos-drop-profile-information>

Usage

```
<rpc>  
  <get-cos-drop-profile-information>  
    <profile-name>profile-name</profile-name>  
  </get-cos-drop-profile-information>  
</rpc>
```

Description Show interpolated data points of named drop profile

Contents <profile-name>—Name of drop profile

<get-cos-fabric-scheduler-map-information>

Usage

```
<rpc>
  <get-cos-fabric-scheduler-map-information/>
</rpc>
```

Description Show fabric scheduler map information

<get-cos-forwarding-class-information>

Usage

```
<rpc>
  <get-cos-forwarding-class-information>
    <get-cos-forwarding-class-map-information>get-cos-forwarding-class-map-information<get-cos-forwarding-class-map-information>
    </get-cos-forwarding-class-map-information>
  </get-cos-forwarding-class-information>
</rpc>
```

Description Show mapping of forwarding class names to queue numbers

Contents <get-cos-forwarding-class-map-information>—Name of forwarding class map

<get-cos-forwarding-class-map-interface-table-information>

Usage

```
<rpc>
  <get-cos-forwarding-class-map-interface-table-information/>
</rpc>
```

Description Show interface to forwarding class mapping

<get-cos-forwarding-class-map-table-information>

Usage

```
<rpc>
  <get-cos-forwarding-class-map-table-information>
  </get-cos-forwarding-class-map-table-information>
</rpc>
```

Description Show forwarding class map information

Contents <get-cos-forwarding-class-map-interface-table-information>—Show interface to forwarding class mapping

<get-cos-fragmentation-map-information>

Usage

```
<rpc>  
  <get-cos-fragmentation-map-information>  
    <fragmentation-map-name>fragmentation-map-name</fragmentation-map-name>  
  
  </get-cos-fragmentation-map-information>  
</rpc>
```

Description Show mapping of forwarding classes to fragmentation options

Contents <fragmentation-map-name>—Name of fragmentation map

<get-cos-fwtab-fabric-scheduler-map-information>

Usage

```
<rpc>  
  <get-cos-fwtab-fabric-scheduler-map-information/>  
</rpc>
```

Description Show fabric scheduler map

<get-cos-information>

Usage

```
<rpc>  
  <get-cos-information>  
  </get-cos-information>  
</rpc>
```

Description Show class-of-service (CoS) information

Contents <get-cos-forwarding-class-information>—Show mapping of forwarding class names to queue numbers

<get-cos-drop-profile-information>—Show interpolated data points of named drop profile

<get-cos-adaptive-shaper-information>—Show trigger types and associated rate for adaptive shaper

<get-cos-virtual-channel-information>—Show virtual channel names

<get-cos-virtual-channel-group-information>—Show virtual channel group information

<get-cos-classifier-information>—Show mapping of code point to forwarding class/loss priority

<get-cos-l2tp-session-map-information>—Show mapping of CoS objects to L2TP sessions

<get-cos-loss-priority-map-information>—Show mapping of code point to loss priority

<get-cos-rewrite-information>—Show mapping of forwarding class/loss priority to code point

<get-cos-multi-destination-information>—Show multi destination

<get-cos-code-point-map-information>—Show mapping of symbolic name to code point bit pattern

<get-cos-scheduler-map-information>—Show mapping of forwarding classes to schedulers

<get-cos-traffic-control-profile-information>—Show traffic control profiles

<get-cos-fragmentation-map-information>—Show mapping of forwarding classes to fragmentation options

<get-cos-interface-map-information>—Show mapping of CoS objects to interfaces

<get-cos-interface-set-map-information>—Show mapping of CoS objects to interface-set

<get-cos-routing-instance-map-information>—Show mapping of CoS objects to routing instance

<get-cos-table-information>—Show forwarding table information

<fabric>—Show fabric information

<get-cos-translation-table-map-information>—Show mapping of code point to code point

<get-cos-congestion-notification-information>—Show congestion-notification information

<get-cos-interface-map-information>

Usage

```
<rpc>
  <get-cos-interface-map-information>
    <interface-name>interface-name</interface-name>
  </get-cos-interface-map-information>
</rpc>
```

Description Show mapping of CoS objects to interfaces

Contents <interface-name>—Name of interface

<get-cos-interface-set-map-information>

Usage

```
<rpc>
  <get-cos-interface-set-map-information>
    <interface-set-name>interface-set-name</interface-set-name>
  </get-cos-interface-set-map-information>
</rpc>
```

Description Show mapping of CoS objects to interface-set

Contents <interface-set-name>—Name of interface set

<get-cos-l2tp-session-map-information>

Usage

```
<rpc>
  <get-cos-l2tp-session-map-information>
    <session-id>session-id</session-id>
  </get-cos-l2tp-session-map-information>
</rpc>
```

Description Show mapping of CoS objects to L2TP sessions

Contents <session-id>—Session Index

<get-cos-loss-priority-map-information>

Usage

```
<rpc>
  <get-cos-loss-priority-map-information>
    <loss-priority-map-name>loss-priority-map-name</loss-priority-map-name>
    <type>type</type>
  </get-cos-loss-priority-map-information>
</rpc>
```

Description Show mapping of code point to loss priority

Contents <loss-priority-map-name>—Name of loss priority map

- frame-relay-de - Frame Relay discard eligible code point

<type>—

- frame-relay-de - Frame Relay discard eligible code point

<get-cos-loss-priority-map-table-binding-information>

Usage

```
<rpc>  
  <get-cos-loss-priority-map-table-binding-information/>  
</rpc>
```

Description Show interface to loss priority map binding

<get-cos-loss-priority-map-table-information>

Usage

```
<rpc>  
  <get-cos-loss-priority-map-table-information>  
  </get-cos-loss-priority-map-table-information>  
</rpc>
```

Description Show loss priority map table

Contents <get-cos-loss-priority-map-table-binding-information>—Show interface to loss priority map binding

<get-cos-multi-destination-information>

Usage

```
<rpc>  
  <get-cos-multi-destination-information/>  
</rpc>
```

Description Show multi destination

<get-cos-policer-table-map-information>

Usage

```
<rpc>  
  <get-cos-policer-table-map-information/>  
</rpc>
```

Description Show policer

<get-cos-red-information>

Usage

```
<rpc>
  <get-cos-red-information/>
</rpc>
```

Description Show random early detection drop profile

<get-cos-rewrite-information>

Usage

```
<rpc>
  <get-cos-rewrite-information>
    <rewrite-rule-name>rewrite-rule-name</rewrite-rule-name>
    <type>type</type>
  </get-cos-rewrite-information>
</rpc>
```

Description Show mapping of forwarding class/loss priority to code point

Contents

<rewrite-rule-name>—Name of rewrite rule

- dscp - Differentiated Services code point (DSCP)
- dscp-ipv6 - Differentiated Services code point (DSCP) for IPv6
- exp - MPLS experimental code point
- ieee-802.1 - IEEE-802.1 code point
- inet-precedence - IPv4 precedence code point
- frame-relay-de - Frame relay discard eligible bit code point
- ieee-802.1ad - IEEE-802.1ad (DEI) code point

<type>—Type of rewrite rule

- dscp - Differentiated Services code point (DSCP)
- dscp-ipv6 - Differentiated Services code point (DSCP) for IPv6
- exp - MPLS experimental code point
- ieee-802.1 - IEEE-802.1 code point
- inet-precedence - IPv4 precedence code point
- frame-relay-de - Frame relay discard eligible bit code point
- ieee-802.1ad - IEEE-802.1ad (DEI) code point

<get-cos-rewrite-table-information>

Usage

```
<rpc>
  <get-cos-rewrite-table-information>
  </get-cos-rewrite-table-information>
</rpc>
```

Description Show rewrite information

Contents <get-cos-rewrite-table-map-information>—Show interface to rewrite rule mapping

<get-cos-rewrite-table-map-information>

Usage

```
<rpc>
  <get-cos-rewrite-table-map-information/>
</rpc>
```

Description Show interface to rewrite rule mapping

<get-cos-routing-instance-map-information>

Usage

```
<rpc>
  <get-cos-routing-instance-map-information>
  <routing-instance-name>routing-instance-name</routing-instance-name>
  </get-cos-routing-instance-map-information>
</rpc>
```

Description Show mapping of CoS objects to routing instance

Contents <routing-instance-name>—Name of routing instance

<get-cos-scheduler-map-information>

Usage

```
<rpc>
  <get-cos-scheduler-map-information>
  <scheduler-map-name>scheduler-map-name</scheduler-map-name>
  </get-cos-scheduler-map-information>
</rpc>
```

Description Show mapping of forwarding classes to schedulers

Contents <scheduler-map-name>—Name of scheduler map

<get-cos-scheduler-map-table-information>

Usage

```
<rpc>
  <get-cos-scheduler-map-table-information/>
</rpc>
```

Description Show scheduler map

<get-cos-shaper-table-map-information>

Usage

```
<rpc>
  <get-cos-shaper-table-map-information/>
</rpc>
```

Description Show shaper

<get-cos-table-information>

Usage

```
<rpc>
  <get-cos-table-information>
  </get-cos-table-information>
</rpc>
```

Description Show forwarding table information

Contents <get-cos-classifier-table-information>—Show classifier information

 <get-cos-loss-priority-map-table-information>—Show loss priority map table

 <get-cos-scheduler-map-table-information>—Show scheduler map

 <get-cos-policer-table-map-information>—Show policer

 <get-cos-shaper-table-map-information>—Show shaper

 <get-cos-red-information>—Show random early detection drop profile

 <get-cos-rewrite-table-information>—Show rewrite information

 <get-cos-forwarding-class-map-table-information>—Show forwarding class map information

 <fabric>—Show fabric information

`<get-cos-translation-table-information>`—Show translation table information

`<get-cos-traffic-control-profile-information>`

Usage

```
<rpc>
  <get-cos-traffic-control-profile-information>

  <traffic-control-profile-name>traffic-control-profile-name</traffic-control-profile-name>

  </get-cos-traffic-control-profile-information>
</rpc>
```

Description Show traffic control profiles

Contents `<traffic-control-profile-name>`—Name of traffic control profile

`<get-cos-translation-table-information>`

Usage

```
<rpc>
  <get-cos-translation-table-information>
  </get-cos-translation-table-information>
</rpc>
```

Description Show translation table information

Contents `<get-cos-translation-table-mapping-information>`—Show mapping of interfaces to translation table

`<get-cos-translation-table-map-information>`

Usage

```
<rpc>
  <get-cos-translation-table-map-information>
  <translation-table-name>translation-table-name</translation-table-name>
  <type>type</type>
  </get-cos-translation-table-map-information>
</rpc>
```

Description Show mapping of code point to code point

Contents `<translation-table-name>`—Name of translation table

- to-inet-precedence-from-inet-precedence - INET PRECEDENCE to INET PRECEDENCE translation table
- to-dscp-from-dscp - DSCP to DSCP translation table
- to-dscp-ipv6-from-dscp-ipv6 - DSCP IPV6 to DSCP IPV6 translation table
- to-exp-from-exp - EXP to EXP translation table

<type>—Type of translation table

- to-inet-precedence-from-inet-precedence - INET PRECEDENCE to INET PRECEDENCE translation table
- to-dscp-from-dscp - DSCP to DSCP translation table
- to-dscp-ipv6-from-dscp-ipv6 - DSCP IPV6 to DSCP IPV6 translation table
- to-exp-from-exp - EXP to EXP translation table

<get-cos-translation-table-mapping-information>

Usage

```
<rpc>  
  <get-cos-translation-table-mapping-information/>  
</rpc>
```

Description Show mapping of interfaces to translation table

<get-cos-virtual-channel-group-information>

Usage

```
<rpc>  
  <get-cos-virtual-channel-group-information>  
  
  <virtual-channel-group-name>virtual-channel-group-name</virtual-channel-group-name>  
  
  </get-cos-virtual-channel-group-information>  
</rpc>
```

Description Show virtual channel group information

Contents <virtual-channel-group-name>—Name of virtual channel group

<get-cos-virtual-channel-information>

Usage

```
<rpc>  
  <get-cos-virtual-channel-information>  
  <virtual-channel-name>virtual-channel-name</virtual-channel-name>
```

```

    </get-cos-virtual-channel-information>
  </rpc>

```

Description Show virtual channel names

Contents <virtual-channel-name>—Name of virtual channel

<get-craft-information>

Usage

```

    <rpc>
      <get-craft-information/>
    </rpc>

```

Description Show craft interface status

<get-crl-information>

Usage

```

    <rpc>
      <get-crl-information>
        <brief/>
        <detail/>
        <crl-name>crl-name</crl-name>
      </get-crl-information>
    </rpc>

```

Description Show IPSec digital certificate revocation lists

Contents <brief>—Display brief output

<detail>—Display detailed output

<crl-name>—Name of CRL

<get-database-replication-statistics-information>

Usage

```

    <rpc>
      <get-database-replication-statistics-information/>
    </rpc>

```

Description Show database replication statistics

<get-database-replication-summary-information>

Usage

```
<rpc>
  <get-database-replication-summary-information/>
</rpc>
```

Description Show database replication summary

<get-destination-class-statistics>

Usage

```
<rpc>
  <get-destination-class-statistics>
    <class-name>class-name</class-name> <!-- mandatory -->
    <interface-name>interface-name</interface-name>
  </get-destination-class-statistics>
</rpc>
```

Description Show statistics for destination class

Contents <all>—Display all destination class usage

<class-name>—Name of destination class

<interface-name>—Name of logical interface

<get-destination-nat-pool-information>

Usage

```
<rpc>
  <get-destination-nat-pool-information>
    <pool-choice>pool-choice</pool-choice> <!-- mandatory -->
    <pool-name>pool-name</pool-name> <!-- mandatory -->
    <all/>
  </get-destination-nat-pool-information>
</rpc>
```

Description Show destination NAT address-pool information

Contents <pool-name>—The name of the address-pool

<all>—Display all destination NAT address-pool information

<get-destination-nat-rule-sets-information>

Usage

```
<rpc>
  <get-destination-nat-rule-sets-information>
    <rule-choice>rule-choice</rule-choice> <!-- mandatory -->
    <rule-name>rule-name</rule-name> <!-- mandatory -->
    <all/>
  </get-destination-nat-rule-sets-information>
</rpc>
```

Description Show destination NAT rule-set information

Contents <rule-name>—The name of the rule-set
 <all>—Display all destination NAT rule-sets information

<get-destination-nat-summary-information>

Usage

```
<rpc>
  <get-destination-nat-summary-information/>
</rpc>
```

Description Show destination NAT summary information

<get-dhcp-binding-information>

Usage

```
<rpc>
  <get-dhcp-binding-information>
    <detail/>
    <address>address</address>
  </get-dhcp-binding-information>
</rpc>
```

Description Show DHCP client binding information

Contents <detail>—Display detailed information
 <address>—Address of DHCP client binding

<get-dhcp-client-information>

Usage

```
<rpc>
```

```
<get-dhcp-client-information>
<statistics/>
<interface-name>interface-name</interface-name>
</get-dhcp-client-information>
</rpc>
```

Description Show DHCP client information

Contents <statistics>—Show DHCP client statistics
<interface-name>—Interface name of DHCP client

<get-dhcp-conflict-information>

Usage

```
<rpc>
<get-dhcp-conflict-information/>
</rpc>
```

Description Show DHCP address conflict

<get-dhcp-global-information>

Usage

```
<rpc>
<get-dhcp-global-information/>
</rpc>
```

Description Show DHCP global scope information

<get-dhcp-helper-statistics>

Usage

```
<rpc>
<get-dhcp-helper-statistics/>
</rpc>
```

Description Show DHCP relay statistics information

<get-dhcp-pool-information>

Usage

```
<rpc>
<get-dhcp-pool-information>
<detail/>
<subnet-address>subnet-address</subnet-address>
```

```

    </get-dhcp-pool-information>
  </rpc>

```

Description Show DHCP address pool information

Contents <detail>—Display detailed information
 <subnet-address>—Logical subnet of address pool

<get-dhcp-relay-binding-information>

Usage

```

  <rpc>
    <get-dhcp-relay-binding-information>
      <brief/>
      <detail/>
      <summary/>
      <address>address</address>
      <routing-instance>routing-instance</routing-instance>
      <bridge-domain>bridge-domain</bridge-domain>
      <logical-system>logical-system</logical-system>
    </get-dhcp-relay-binding-information>
  </rpc>

```

Description Show DHCP relay client binding information

Contents <brief>—Display brief information
 <detail>—Display detailed information
 <summary>—Display summary information
 <address>—IP address or MAC address or Session Id of DHCP client binding
 <interface>—Name of interface on which to show bindings
 <routing-instance>—Name of routing instance
 <bridge-domain>—Name of bridge domain
 <logical-system>—Name of logical system

<get-dhcp-relay-statistics-information>

Usage

```

  <rpc>
    <get-dhcp-relay-statistics-information>
      <routing-instance>routing-instance</routing-instance>
      <bridge-domain>bridge-domain</bridge-domain>
      <logical-system>logical-system</logical-system>

```

```
</get-dhcp-relay-statistics-information>
</rpc>
```

Description Show DHCP statistics

Contents <routing-instance>—Name of routing instance
<bridge-domain>—Name of bridge domain
<logical-system>—Name of logical system

<get-dhcp-server-binding-information>

Usage

```
<rpc>
  <get-dhcp-server-binding-information>
    <brief/>
    <detail/>
    <summary/>
    <address>address</address>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-dhcp-server-binding-information>
</rpc>
```

Description Show DHCP server client binding information

Contents <brief>—Display brief information
<detail>—Display detailed information
<summary>—Display summary information
<address>—IP address or MAC address or Session Id of DHCP client binding
<interface>—Name of interface on which to show bindings
<routing-instance>—Name of routing instance
<logical-system>—Name of logical system

<get-dhcp-server-statistics-information>

Usage

```
<rpc>
  <get-dhcp-server-statistics-information>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-dhcp-server-statistics-information>
</rpc>
```

```
</rpc>
```

Description Show DHCP server statistics

Contents <routing-instance>—Name of routing instance
 <logical-system>—Name of logical system

<get-dhcp-snoop-binding>

Usage

```
<rpc>
  <get-dhcp-snoop-binding>
    <interface>interface</interface>
    <vlan>vlan</vlan>
  </get-dhcp-snoop-binding>
</rpc>
```

Description Show DHCP snooping database

Contents <interface>—Name of interface for which to display the entries
 <vlan>—Name of VLAN for which to display the entries

<get-dhcp-snooping-statistics>

Usage

```
<rpc>
  <get-dhcp-snooping-statistics/>
</rpc>
```

Description Show DHCP snooping statistics

<get-dhcp-statistics-information>

Usage

```
<rpc>
  <get-dhcp-statistics-information/>
</rpc>
```

Description Show DHCP statistics

<get-dhcpv6-server-binding-information>

Usage

```
<rpc>
  <get-dhcpv6-server-binding-information>
    <brief/>
    <detail/>
    <summary/>
    <address>address</address>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-dhcpv6-server-binding-information>
</rpc>
```

Description Show DHCPv6 server client binding information

Contents

- <brief>—Display brief information
- <detail>—Display detailed information
- <summary>—Display summary information
- <address>—IPv6 Prefix or session-id or CID <cid-len/0x.../0x...> of DHCPv6 client binding
- <interface>—Name of interface on which to show bindings
- <routing-instance>—Name of routing instance
- <logical-system>—Name of logical system

<get-dhcpv6-server-statistics-information>

Usage

```
<rpc>
  <get-dhcpv6-server-statistics-information>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-dhcpv6-server-statistics-information>
</rpc>
```

Description Show DHCPv6 server statistics

Contents

- <routing-instance>—Name of routing instance
- <logical-system>—Name of logical system

<get-dialer-defaults-information>

Usage

```
<rpc>
  <get-dialer-defaults-information/>
</rpc>
```

Description Show dialer services software defaults

<get-diameter-function-information>

Usage

```
<rpc>
  <get-diameter-function-information>
    <summary/>
    <brief/>
    <detail/>
    <jsrc/>
    <charging-gw/>
    <packet-triggered-subscribers/>
  </get-diameter-function-information>
</rpc>
```

Description Show diameter function information

Contents

- <summary>—Display summary output (default)
- <brief>—Display brief output
- <detail>—Display detailed output
- <jsrc>—Function to use SRC application
- <charging-gw>—Function to use CHARGING application
- <packet-triggered-subscribers>—Function to use PACKET-TRIGGERED-SUBSCRIBERS application
- <get-diameter-function-statistics>—Show diameter function statistics

<get-diameter-function-statistics>

Usage

```
<rpc>
  <get-diameter-function-statistics>
    <summary/>
    <brief/>
    <detail/>
    <jsrc/>
```

```
<charging-gw/>
<packet-triggered-subscribers/>
</get-diameter-function-statistics>
</rpc>
```

Description Show diameter function statistics

Contents <summary>—Display summary output(default)

<brief>—Display brief output

<detail>—Display detailed output

<jsrc>—Function to use SRC application

<charging-gw>—Function to use CHARGING application

<packet-triggered-subscribers>—Function to use PACKET-TRIGGERED-SUBSCRIBERS application

<get-diameter-information>

Usage

```
<rpc>
  <get-diameter-information>
    <summary/>
    <brief/>
    <detail/>
  </get-diameter-information>
</rpc>
```

Description Show diameter information

Contents <summary>—Display summary output(default)

<brief>—Display brief output

<detail>—Display detailed output

<get-diameter-function-information>—Show diameter function information

<get-diameter-instance-information>—Show diameter instance information

<get-diameter-network-element-information>—Show diameter network-element information

<get-diameter-route-information>—Show diameter route information

<get-diameter-peer-information>—Show diameter peer information

<get-diameter-instance-information>

Usage

```
<rpc>
  <get-diameter-instance-information>
    <summary/>
    <brief/>
    <detail/>
    <instance-name>instance-name</instance-name>
  </get-diameter-instance-information>
</rpc>
```

Description Show diameter instance information

Contents <summary>—Display summary output (default)

<brief>—Display brief output

<detail>—Display detailed output

<instance-name>—Instance name

<get-diameter-network-element-information>

Usage

```
<rpc>
  <get-diameter-network-element-information>
    <summary/>
    <brief/>
    <detail/>
    <network-element-name>network-element-name</network-element-name>
  </get-diameter-network-element-information>
</rpc>
```

Description Show diameter network-element information

Contents <summary>—Display summary output (default)

<brief>—Display brief output

<detail>—Display detailed output

<network-element-name>—Network-element name

<get-diameter-network-element-map-information>—Show diameter network-element map to peers

<get-diameter-network-element-map-information>

Usage

```
<rpc>
  <get-diameter-network-element-map-information>
    <summary/>
    <brief/>
    <detail/>

    <network-element-map-name>network-element-map-name</network-element-map-name>

  </get-diameter-network-element-map-information>
</rpc>
```

Description Show diameter network-element map to peers

Contents <summary>—Display summary output(default)

<brief>—Display brief output

<detail>—Display detailed output

<network-element-map-name>—Network-element name

<get-diameter-peer-information>

Usage

```
<rpc>
  <get-diameter-peer-information>
    <summary/>
    <brief/>
    <detail/>
    <peer-name>peer-name</peer-name>
  </get-diameter-peer-information>
</rpc>
```

Description Show diameter peer information

Contents <summary>—Display summary output(default)

<brief>—Display brief output

<detail>—Display detailed output

<peer-name>—Peer name

<get-diameter-peer-map-information>—Show diameter peer mapping to network-elements

<get-diameter-peer-statistics>—Show diameter peer statistics

<get-diameter-peer-map-information>

Usage

```

<rpc>
  <get-diameter-peer-map-information>
    <summary/>
    <brief/>
    <detail/>
    <peer-map-name>peer-map-name</peer-map-name>
  </get-diameter-peer-map-information>
</rpc>

```

Description Show diameter peer mapping to network-elements

Contents <summary>—Display summary output(default)

<brief>—Display brief output

<detail>—Display detailed output

<peer-map-name>—Peer name

<get-diameter-peer-statistics>

Usage

```

<rpc>
  <get-diameter-peer-statistics>
    <summary/>
    <brief/>
    <detail/>
    <peer-statistics-name>peer-statistics-name</peer-statistics-name>
  </get-diameter-peer-statistics>
</rpc>

```

Description Show diameter peer statistics

Contents <summary>—Display summary output(default)

<brief>—Display brief output

<detail>—Display detailed output

<peer-statistics-name>—Peer name

<get-diameter-route-information>

Usage

```

<rpc>
  <get-diameter-route-information>

```

```
<summary/>
<brief/>
<detail/>
<route-name>route-name</route-name>
</get-diameter-route-information>
</rpc>
```

Description Show diameter route information

Contents <summary>—Display summary output(default)

<brief>—Display brief output

<detail>—Display detailed output

<route-name>—Route name

<get-directory-usage-information>

Usage

```
<rpc>
  <get-directory-usage-information>
    <path>path</path>
    <depth>depth</depth>
  </get-directory-usage-information>
</rpc>
```

Description Show local directory information

Contents <path>—Path of root directory to traverse

<depth>—Depth of directories to traverse

<get-domain-map-statistics>

Usage

```
<rpc>
  <get-domain-map-statistics/>
</rpc>
```

Description Domain-map module statistics

<get-dot1x-authentication-failed-users>

Usage

```
<rpc>
  <get-dot1x-authentication-failed-users/>
```

```
</rpc>
```

Description List users who have failed 802.1X authentication

<get-dot1x-firewall-interface>

Usage

```
<rpc>
  <get-dot1x-firewall-interface>
    <interface-name>interface-name</interface-name>
  </get-dot1x-firewall-interface>
</rpc>
```

Description Show dot1x firewall statistics for an interface

Contents <interface-name>—Show firewall statistics for this interface

<get-dot1x-interface-information>

Usage

```
<rpc>
  <get-dot1x-interface-information>
    <brief/>
    <detail/>
    <interface-name>interface-name</interface-name>
  </get-dot1x-interface-information>
</rpc>
```

Description Show 802.1X interface information

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<interface-name>—Name of interface

<get-dot1x-interface-mac-addresses>

Usage

```
<rpc>
  <get-dot1x-interface-mac-addresses>
    <interface-name>interface-name</interface-name>
  </get-dot1x-interface-mac-addresses>
</rpc>
```

Description Show 802.1X static MAC addresses on this interface

Contents <interface-name>—Show static MAC addresses of interface

<get-dot1x-static-mac-addresses>

Usage

```
<rpc>
  <get-dot1x-static-mac-addresses>
</get-dot1x-static-mac-addresses>
</rpc>
```

Description Show 802.1X static MAC addresses

Contents <get-dot1x-interface-mac-addresses>—Show 802.1X static MAC addresses on this interface

<get-dot1x-statistics>

Usage

```
<rpc>
  <get-dot1x-statistics>
</get-dot1x-statistics>
</rpc>
```

Description Show 802.1X statistics

Contents <get-dot1x-statistics-interface>—Show 802.1X statistics on this interface

<get-dot1x-statistics-interface>

Usage

```
<rpc>
  <get-dot1x-statistics-interface>
    <interface-name>interface-name</interface-name>
  </get-dot1x-statistics-interface>
</rpc>
```

Description Show 802.1X statistics on this interface

Contents <interface-name>—Show statistics for this interface

<get-dvmrp-interfaces-information>

Usage

```
<rpc>
  <get-dvmrp-interfaces-information>
    <logical-system>logical-system</logical-system>
  </get-dvmrp-interfaces-information>
```

```
</rpc>
```

Description Show DVMRP interfaces

Contents <logical-system>—Name of logical system, or 'all'

<get-dvmrp-neighbors-information>

Usage

```
<rpc>
  <get-dvmrp-neighbors-information>
    <logical-system>logical-system</logical-system>
  </get-dvmrp-neighbors-information>
</rpc>
```

Description Show DVMRP neighbors

Contents <logical-system>—Name of logical system, or 'all'

<get-dvmrp-prefix-information>

Usage

```
<rpc>
  <get-dvmrp-prefix-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <prefix>prefix</prefix>
  </get-dvmrp-prefix-information>
</rpc>
```

Description Show DVMRP prefixes

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<prefix>—DVMRP prefix

<get-dvmrp-prunes-information>

Usage

```
<rpc>
  <get-dvmrp-prunes-information>
    <logical-system>logical-system</logical-system>
```

```
<all/>
<rx/>
<tx/>
</get-dvmrp-prunes-information>
</rpc>
```

Description Show DVMRP prunes

Contents <logical-system>—Name of logical system, or 'all'

<all>—Display both received and transmitted prunes

<rx>—Display received prunes

<tx>—Display transmitted prunes

<get-eeedebug-action-profile>

Usage

```
<rpc>
  <get-eeedebug-action-profile/>
</rpc>
```

Description Show current datapath-debug action profile

<get-eeedebug-counters>

Usage

```
<rpc>
  <get-eeedebug-counters/>
</rpc>
```

Description Show datapath counters

<get-eeedebug-events>

Usage

```
<rpc>
  <get-eeedebug-events/>
</rpc>
```

Description Show current registered data path events

<get-elmi-information>

Usage

```
<rpc>
  <get-elmi-information>
    <interface>interface</interface>
  </get-elmi-information>
</rpc>
```

Description Show ethernet local management information

Contents <interface>—Name of interface
<get-elmi-statistics>—Show ethernet local management statistics

<get-elmi-statistics>

Usage

```
<rpc>
  <get-elmi-statistics>
    <interface>interface</interface>
  </get-elmi-statistics>
</rpc>
```

Description Show ethernet local management statistics

Contents <interface>—Name of interface

<get-environment-cb-information>

Usage

```
<rpc>
  <get-environment-cb-information>
    <slot>slot</slot>
  </get-environment-cb-information>
</rpc>
```

Description Show Control Board information

Contents <slot>—CB slot number

<get-environment-cip-information>

Usage

```
<rpc>
  <get-environment-cip-information>
```

```
<slot>slot</slot>
</get-environment-cip-information>
</rpc>
```

Description Show Connector Interface Panel Information

Contents <slot>—CIP slot number

<get-environment-feb-information>

Usage

```
<rpc>
  <get-environment-feb-information>
    <slot>slot</slot>
  </get-environment-feb-information>
</rpc>
```

Description Show Forwarding Engine Board information

Contents <slot>—FEB slot number

<get-environment-fpc-information>

Usage

```
<rpc>
  <get-environment-fpc-information>
    <fpc-slot>fpc-slot</fpc-slot>
  </get-environment-fpc-information>
</rpc>
```

Description Show Flexible PIC Concentrator information

Contents <fpc-slot>—FPC slot number

<get-environment-fpm-information>

Usage

```
<rpc>
  <get-environment-fpm-information/>
</rpc>
```

Description Show craft interface information

<get-environment-information>

Usage

```
<rpc>
  <get-environment-information>
  </get-environment-information>
</rpc>
```

Description Show component status and temperature, cooling system speeds

Contents

- <get-environment-sib-information>—Show Switch Interface Board information
- <get-environment-fpc-information>—Show Flexible PIC Concentrator information
- <get-environment-fpm-information>—Show craft interface information
- <get-environment-mcs-information>—Show Miscellaneous Control Subsystem information
- <get-environment-pcg-information>—Show Packet Forwarding Engine Clock Generator information
- <get-environment-scg-information>—Show SONET Clock Generator information
- <get-environment-cb-information>—Show Control Board information
- <get-environment-psu-information>—Show Power Supply Unit information
- <get-environment-power-supply-unit-information>—Show power supply unit information
- <get-environment-pem-information>—Show Power Entry Module information
- <get-environment-re-information>—Show Routing Engine information
- <get-environment-sfm-information>—Show Switching and Forwarding Module information
- <get-environment-feb-information>—Show Forwarding Engine Board information
- <get-environment-cip-information>—Show Connector Interface Panel Information

<get-environment-mcs-information>

Usage

```
<rpc>
  <get-environment-mcs-information>
  <slot>slot</slot>
  </get-environment-mcs-information>
</rpc>
```

Description Show Miscellaneous Control Subsystem information

Contents <slot>—MCS slot number

<get-environment-pcg-information>

Usage

```
<rpc>  
  <get-environment-pcg-information>  
    <slot>slot</slot>  
  </get-environment-pcg-information>  
</rpc>
```

Description Show Packet Forwarding Engine Clock Generator information

Contents <slot>—PCG slot number

<get-environment-pem-information>

Usage

```
<rpc>  
  <get-environment-pem-information>  
    <slot>slot</slot>  
  </get-environment-pem-information>  
</rpc>
```

Description Show Power Entry Module information

Contents <slot>—PEM slot number

<get-environment-power-supply-unit-information>

Usage

```
<rpc>  
  <get-environment-power-supply-unit-information>  
    <slot>slot</slot>  
  </get-environment-power-supply-unit-information>  
</rpc>
```

Description Show power supply unit information

Contents <slot>—FPC slot number

<get-environment-psu-information>

Usage

```
<rpc>  
  <get-environment-psu-information>
```

```
<slot>slot</slot>
</get-environment-psu-information>
</rpc>
```

Description Show Power Supply Unit information

Contents <slot>—PSU slot number

<get-environment-re-information>

Usage

```
<rpc>
<get-environment-re-information>
  <slot>slot</slot>
</get-environment-re-information>
</rpc>
```

Description Show Routing Engine information

Contents <slot>—Routing Engine slot number

<get-environment-scg-information>

Usage

```
<rpc>
<get-environment-scg-information>
  <slot>slot</slot>
</get-environment-scg-information>
</rpc>
```

Description Show SONET Clock Generator information

Contents <slot>—SCG slot number

<get-environment-sfm-information>

Usage

```
<rpc>
<get-environment-sfm-information>
  <sfm_plane>sfm_plane</sfm_plane>
</get-environment-sfm-information>
</rpc>
```

Description Show Switching and Forwarding Module information

Contents <sfm_plane>—SFM slot number

<get-environment-sib-information>

Usage

```
<rpc>
  <get-environment-sib-information>
    <sib-slot>sib-slot</sib-slot>
  </get-environment-sib-information>
</rpc>
```

Description Show Switch Interface Board information

Contents <f13>—Show SIB F13 information

 <f2s>—Show SIB F2S information

 <sib-slot>—SIB slot number

<get-esis-adjacency-information>

Usage

```
<rpc>
  <get-esis-adjacency-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <esis-neighbor-id>esis-neighbor-id</esis-neighbor-id>
  </get-esis-adjacency-information>
</rpc>
```

Description Show ES-IS adjacency database

Contents <logical-system>—Name of logical system, or 'all'

 <brief>—Display brief output (default)

 <detail>—Display detailed output

 <extensive>—Display extensive output

 <instance>—Name of ES-IS instance

 <esis-neighbor-id>—NSAP/NET of end system

<get-esis-interface-information>

Usage

```

<rpc>
  <get-esis-interface-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <interface-name>interface-name</interface-name>
  </get-esis-interface-information>
</rpc>

```

Description Show ES-IS interface information

Contents

- <logical-system>—Name of logical system, or 'all'
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <extensive>—Display extensive output
- <instance>—Name of ES-IS instance
- <interface-name>—Name of interface

<get-esis-statistics-information>

Usage

```

<rpc>
  <get-esis-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-esis-statistics-information>
</rpc>

```

Description Show ES-IS performance statistics

Contents

- <logical-system>—Name of logical system, or 'all'
- <instance>—Name of ES-IS instance

<get-ethernet-switching-aging-stats-information>

Usage

```

<rpc>
  <get-ethernet-switching-aging-stats-information>

```

```
<brief/>
<detail/>
</get-ethernet-switching-aging-stats-information>
</rpc>
```

Description Show media access control aging statistics

Contents <brief>—Display brief output (default)
<detail>—Display detailed output

<get-ethernet-switching-authentication-whitelist-mac>

Usage

```
<rpc>
  <get-ethernet-switching-authentication-whitelist-mac>
</get-ethernet-switching-authentication-whitelist-mac>
</rpc>
```

Description Show 802.1X White List MAC addresses

Contents <get-ethernet-switching-interface-mac-addresses>—Show 802.1X White List MAC addresses on this interface
<get-authentication-whitelist-mac-bypassed-users>—List users who have bypassed 802.1X authentication

<get-ethernet-switching-interface-information>

Usage

```
<rpc>
  <get-ethernet-switching-interface-information>
    <summary/>
    <brief/>
    <detail/>
    <interface-name>interface-name</interface-name>
  </get-ethernet-switching-interface-information>
</rpc>
```

Description Display Ethernet-switching interface information

Contents <summary>—Display summary output
<brief>—Display brief output (default)
<detail>—Display detailed output
<interface-name>—Name of interface

<get-ethernet-switching-interface-mac-addresses>

Usage

```
<rpc>
  <get-ethernet-switching-interface-mac-addresses>
    <interface-name>interface-name</interface-name>
  </get-ethernet-switching-interface-mac-addresses>
</rpc>
```

Description Show 802.1X White List MAC addresses on this interface

Contents <interface-name>—Show White List MAC addresses of interface

<get-ethernet-switching-l2pt-information>

Usage

```
<rpc>
  <get-ethernet-switching-l2pt-information>
  </get-ethernet-switching-l2pt-information>
</rpc>
```

Description Show Layer2 protocol tunneling information

Contents <interface>—Show Layer2 protocol tunneling state for interfaces

<vlan>—Show Layer2 protocol tunneling state for vlans

<statistics>—Show Layer2 protocol tunneling statistics

<get-ethernet-switching-log-information>

Usage

```
<rpc>
  <get-ethernet-switching-log-information/>
</rpc>
```

Description Show MAC address learning log

<get-ethernet-switching-mac-notification-information>

Usage

```
<rpc>
  <get-ethernet-switching-mac-notification-information/>
</rpc>
```

Description Display MAC notification information

<get-ethernet-switching-next-hop-information>

Usage

```
<rpc>
  <get-ethernet-switching-next-hop-information>
    <summary/>
    <brief/>
    <detail/>
    <interface-index>interface-index</interface-index>
  </get-ethernet-switching-next-hop-information>
</rpc>
```

Description Show next hop information

Contents <summary>—Display summary output

<brief>—Display brief output (default)

<detail>—Display detailed output

<interface-index>—Interface index

<get-ethernet-switching-stats-information>

Usage

```
<rpc>
  <get-ethernet-switching-stats-information>
    <brief/>
    <detail/>
    <interface>interface</interface>
  </get-ethernet-switching-stats-information>
</rpc>
```

Description Show media access control learning statistics

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<interface>—Display MAC learning statistics for a specified interface

<get-ethernet-switching-table-information>

Usage

```
<rpc>
  <get-ethernet-switching-table-information>
    <summary/>
```

```

    <brief/>
    <detail/>
    <extensive/>
    <sort-by>sort-by</sort-by>
    </get-ethernet-switching-table-information>
  </rpc>

```

Description Show media access control table

Contents

<summary>—Display summary output

- name - Sort display by VLAN name
- tag - Sort display by VLAN id

<brief>—Display brief output (default)

- name - Sort display by VLAN name
- tag - Sort display by VLAN id

<detail>—Display detailed output

- name - Sort display by VLAN name
- tag - Sort display by VLAN id

<extensive>—Display extensive output

- name - Sort display by VLAN name
- tag - Sort display by VLAN id

<sort-by>—Specify display order

- name - Sort display by VLAN name
- tag - Sort display by VLAN id

<interface>—Display MAC table for a specified interface

<vlan>—Display MAC table for a specified VLAN

<management-vlan>—Display MAC table for a Management VLAN

<get-evc-infomation>

Usage

```

<rpc>
  <get-evc-infomation>
    <evc-id>evc-id</evc-id>
  </get-evc-infomation>
</rpc>

```

Description Show ethernet virtual circuit information

Contents <evc-id>—EVC identifier

<get-event-summary>

Usage

```
<rpc>
  <get-event-summary>
    <syslogfile>syslogfile</syslogfile>
    <event-id>event-id</event-id>
    <daemon-name>daemon-name</daemon-name>
    <event-description>event-description</event-description>
    <start-time>start-time</start-time>
    <end-time>end-time</end-time>
    <total-message-display>total-message-display</total-message-display>
    <show-start-event>show-start-event</show-start-event>
    <show-end-event>show-end-event</show-end-event>
    <new-search/>
    <output-file-name>output-file-name</output-file-name>
  </get-event-summary>
</rpc>
```

Description Show syslog event

Contents <syslogfile>—Syslog file name filter

<event-id>—Event Id filter

<daemon-name>—Daemon name filter

<event-description>—Regular expression for description filter

<start-time>—Start time filter. Format is mm/dd/yyyy hour:min

<end-time>—End time filter. Format is mm/dd/yyyy hour:min

<total-message-display>—Number of messages displayed per page

<show-start-event>—Requested event starting number

<show-end-event>—Requested event ending number

<new-search>—It is a new search

<output-file-name>—File name where filtered messages are stored

<get-fabric-queue-information>

Usage

```
<rpc>
```

```
<get-fabric-queue-information>
  <destination>destination</destination>
  <source>source</source>
  <summary/>
</get-fabric-queue-information>
</rpc>
```

Description Show fabric queue statistics

Contents <destination>—Destination FPC for which to show details
<source>—Source FPC for which to show details
<summary>—Display summary output

<get-feb-brief-information>

Usage

```
<rpc>
  <get-feb-brief-information>
  </get-feb-brief-information>
</rpc>
```

Description Show Forwarding Engine Board status

Contents <get-feb-information>—Show detailed output

<get-feb-information>

Usage

```
<rpc>
  <get-feb-information>
    <feb_slot>feb_slot</feb_slot>
  </get-feb-information>
</rpc>
```

Description Show detailed output

Contents <feb_slot>—FEB slot number

<get-feb-redundancy-error-information>

Usage

```
<rpc>
  <get-feb-redundancy-error-information/>
</rpc>
```

Description Show error information

<get-feb-redundancy-group-information>

Usage

```
<rpc>
  <get-feb-redundancy-group-information>
    <group>group</group> <!-- mandatory -->
    <errors/>
  </get-feb-redundancy-group-information>
</rpc>
```

Description Show FEB redundancy group information

Contents <group>—Name of FEB redundancy group

<errors>—Include error information

<get-feb-redundancy-information>

Usage

```
<rpc>
  <get-feb-redundancy-information>
  </get-feb-redundancy-information>
</rpc>
```

Description Show Forwarding Engine Board redundancy information

Contents <get-feb-redundancy-error-information>—Show error information

<get-feb-redundancy-group-information>—Show FEB redundancy group information

<get-filter-version>

Usage

```
<rpc>
  <get-filter-version>
    <filtername>filtername</filtername>
  </get-filter-version>
</rpc>
```

Description Show filter version installed

Contents <filtername>—Filter name

<get-fip-snooping>

Usage

```

<rpc>
  <get-fip-snooping>
    <brief/>
    <detail/>
  </get-fip-snooping>
</rpc>

```

Description Show FIP snooping information

Contents

- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <get-fip-snooping-vlan>—Show per VLAN information
- <get-fip-snooping-fcf>—Show fibre-channel forwarder information
- <get-fip-snooping-enode>—Show per enode information
- <get-fip-snooping-statistics>—Show FIP snooping statistics

<get-fip-snooping-enode>

Usage

```

<rpc>
  <get-fip-snooping-enode>
    <brief/>
    <detail/>
    <mac>mac</mac> <!-- mandatory -->
    <vlan>vlan</vlan>
  </get-fip-snooping-enode>
</rpc>

```

Description Show per enode information

Contents

- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <mac>—MAC address of Enode
- <vlan>—Name of VLAN

<get-fip-snooping-fcf>

Usage

```
<rpc>
  <get-fip-snooping-fcf>
    <brief/>
    <detail/>
    <mac>mac</mac> <!-- mandatory -->
    <vlan>vlan</vlan>
  </get-fip-snooping-fcf>
</rpc>
```

Description Show fibre-channel forwarder information

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<mac>—MAC address of FCF

<vlan>—Name of VLAN

<get-fip-snooping-statistics>

Usage

```
<rpc>
  <get-fip-snooping-statistics>
    <vlan>vlan</vlan>
  </get-fip-snooping-statistics>
</rpc>
```

Description Show FIP snooping statistics

Contents <vlan>—Name of VLAN

<get-fip-snooping-vlan>

Usage

```
<rpc>
  <get-fip-snooping-vlan>
    <brief/>
    <detail/>
    <vlan-name>vlan-name</vlan-name> <!-- mandatory -->
  </get-fip-snooping-vlan>
</rpc>
```

Description Show per VLAN information

Contents <brief>—Display brief output (default)

 <detail>—Display detailed output

 <vlan-name>—Name of VLAN

<get-fips-pic-status-information>

Usage

```
<rpc>
  <get-fips-pic-status-information/>
</rpc>
```

Description Show FIPS PIC authorization status

<get-firewall-authentication-history>

Usage

```
<rpc>
  <get-firewall-authentication-history>
    <filter>filter</filter>

    <get-firewall-authentication-history-specific>get-firewall-authentication-history-specific</get-firewall-authentication-history-specific>

    <get-firewall-authentication-history-specific>get-firewall-authentication-history-specific</get-firewall-authentication-history-specific>

  </get-firewall-authentication-history>
</rpc>
```

Description Show firewall authentication history

Contents <get-firewall-authentication-history-specific>—Locate authentication history by id

 <get-firewall-authentication-history-specific>—Locate authentication history by ip address

<get-firewall-authentication-users>

Usage

```
<rpc>
  <get-firewall-authentication-users>
    <filter>filter</filter>

    <get-firewall-authentication-users-specific>get-firewall-authentication-users-specific</get-firewall-authentication-users-specific>

    <get-firewall-authentication-users-specific>get-firewall-authentication-users-specific</get-firewall-authentication-users-specific>

  </get-firewall-authentication-users>
```

```
</rpc>
```

Description Show current firewall authentication users

Contents <get-firewall-authentication-users-specific>—Locate authentication entry by id

<get-firewall-authentication-users-specific>—Locate authentication entry by ip address

<get-firewall-counter-information>

Usage

```
<rpc>
  <get-firewall-counter-information>
    <countername>countername</countername> <!-- mandatory -->
    <filter>filter</filter> <!-- mandatory -->
    <application>application</application>
    <logical-system>logical-system</logical-system>
  </get-firewall-counter-information>
</rpc>
```

Description Counter name

Contents <countername>—Counter name

- cfm - Statistics for implicit filters for CFM

<filter>—Filter name

- cfm - Statistics for implicit filters for CFM

<application>—Owner application

- cfm - Statistics for implicit filters for CFM

<logical-system>—Name of logical system, or 'all'

<get-firewall-dynamic-policies>

Usage

```
<rpc>
  <get-firewall-dynamic-policies>
    <from-zone>from-zone</from-zone>
    <to-zone>to-zone</to-zone>
    <detail/>
    <scope-id>scope-id</scope-id>
  </get-firewall-dynamic-policies>
</rpc>
```

Description Show security firewall dynamic policies

- Contents**
- <from-zone>—Show the policy information matching the given source zone
 - <to-zone>—Show the policy information matching the given destination zone
 - <detail>—Show the detailed dynamic policy information
 - <scope-id>—Show the policy information matching the given scope policy id [4...MAX_POLICIES]

<get-firewall-filter-information>

Usage

```
<rpc>
  <get-firewall-filter-information>
    <filtername>filtername</filtername> <!-- mandatory -->
    <counter>counter</counter>
    <application>application</application>
    <logical-system>logical-system</logical-system>
  </get-firewall-filter-information>
</rpc>
```

Description Filter name

- Contents**
- <get-filter-version>—Show filter version installed
 - cfm - Statistics for implicit filters for CFM
 - <filtername>—Filter name
 - cfm - Statistics for implicit filters for CFM
 - <counter>—Counter name
 - cfm - Statistics for implicit filters for CFM
 - <application>—Owner application
 - cfm - Statistics for implicit filters for CFM
 - <logical-system>—Name of logical system, or 'all'

<get-firewall-information>

Usage

```
<rpc>
  <get-firewall-information>
    <application>application</application>
    <logical-system>logical-system</logical-system>
    <terse/>
  </get-firewall-information>
```

</rpc>

Description Show firewall information

Contents <application>—Owner application

- cfm - Statistics for implicit filters for CFM

<logical-system>—Name of logical system, or 'all'

<get-firewall-counter-information>—Counter name

<get-firewall-filter-information>—Filter name

<get-firewall-log-information>—Show log entries for firewall activity

<get-firewall-prefix-action-information>—Show prefix-action statistics for a filter

<terse>—Show filter names only

<get-firewall-log-information>

Usage

```
<rpc>  
  <get-firewall-log-information>  
    <get-firewall-log-detailed-information/>  
    <interface>interface</interface>  
    <logical-system>logical-system</logical-system>  
  </get-firewall-log-information>  
</rpc>
```

Description Show log entries for firewall activity

Contents <get-firewall-log-detailed-information>—Display detailed output

<interface>—Interface name

<logical-system>—Name of logical system, or 'all'

<get-firewall-policies>

Usage

```
<rpc>  
  <get-firewall-policies>  
    <from-zone>from-zone</from-zone>  
    <to-zone>to-zone</to-zone>  
    <policy-name>policy-name</policy-name>  
    <detail/>  
  </get-firewall-policies>
```

```
</rpc>
```

Description Show security firewall policies

Contents <from-zone>—Show the policy information matching the given source zone
 <to-zone>—Show the policy information matching the given destination zone
 <policy-name>—Show the policy information matching the given policy name
 <detail>—Show the detailed information

<get-firewall-prefix-action-information>

Usage

```
<rpc>
  <get-firewall-prefix-action-information>
    <filter>filter</filter> <!-- mandatory -->
    <prefix-action>prefix-action</prefix-action> <!-- mandatory -->
    <from>from</from>
    <to>to</to>
    <logical-system>logical-system</logical-system>
  </get-firewall-prefix-action-information>
</rpc>
```

Description Show prefix-action statistics for a filter

Contents <filter>—Filter name
 <prefix-action>—Prefix-action name
 <from>—Starting counter or policer
 <to>—Ending counter or policer
 <logical-system>—Name of logical system, or 'all'

<get-firmware-information>

Usage

```
<rpc>
  <get-firmware-information/>
</rpc>
```

Description Show firmware and operating system version for components

<get-flow-cp-session>

Usage

```
<rpc>
  <get-flow-cp-session>
    <source-prefix>source-prefix</source-prefix>
    <destination-prefix>destination-prefix</destination-prefix>
    <source-port>source-port</source-port>
    <destination-port>destination-port</destination-port>
    <protocol>protocol</protocol>
    <family>family</family>
    <summary/>
    <terse/>
  </get-flow-cp-session>
</rpc>
```

Description Show CP sessions

Contents <source-prefix>—Source IP prefix or address

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- protocol-number - Numeric protocol value (0 .. 255)
- inet - Show IPv4
- inet6 - Show IPv6/IPv6-NATPT

<destination-prefix>—Destination IP prefix or address

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol

- inet - Show IPv4
- inet6 - Show IPv6/IPv6-NATPT

<family>—Show session by family

- inet - Show IPv4
- inet6 - Show IPv6/IPv6-NATPT

<summary>—Show output summary

<brief>—Show brief output (default)

<get-flow-ipaction-information>

Usage

```
<rpc>  
  <get-flow-ipaction-information/>  
</rpc>
```

Description Show all ip-action entries

<get-flow-session-by-identifier>

Usage

```
<rpc>
```

```

<get-flow-session-by-identifier>
  <session-identifier>session-identifier</session-identifier> <!-- mandatory -->
</get-flow-session-by-identifier>
</rpc>

```

Description Show session with specified session identifier

Contents <session-identifier>—Session identifier

<get-flow-session-information>

Usage

```

<rpc>
  <get-flow-session-information>
    <source-prefix>source-prefix</source-prefix>
    <destination-prefix>destination-prefix</destination-prefix>
    <source-port>source-port</source-port>
    <destination-port>destination-port</destination-port>

- http - Hyper Text transfer protocol
- https - Secure HyperText Transfer Protocol

- smtp - Simple Mail Transfer Protocol
- imap - Internet Message Access Protocol
- ssh - Secure Shell
- telnet - Telnet Terminal Emulation Protocol
- inet - Show IPv4
- inet6 - Show IPv6/IPv6-NATPT

<family>—Show session by family

- inet - Show IPv4
- inet6 - Show IPv6/IPv6-NATPT

<interface>—Name of incoming or outgoing interface

<get-flow-session-by-identifier>—Show session with specified session identifier

<get-flow-statistics-all>

Usage

```
<rpc>  
  <get-flow-statistics-all/>  
</rpc>
```

Description Show flow statistics

<get-flow-status-all>

Usage

```
<rpc>  
  <get-flow-status-all/>  
</rpc>
```

Description Show flow status

<get-flow-table-statistics-information>

Usage

```
<rpc>  
  <get-flow-table-statistics-information>  
    <detail/>  
  </get-flow-table-statistics-information>  
</rpc>
```

Description Show flow table statistics

Contents <detail>—Show detailed statistics information

<get-fm-fpc-errors>

Usage

```
<rpc>
  <get-fm-fpc-errors>
    <slot>slot</slot> <!-- mandatory -->
  </get-fm-fpc-errors>
</rpc>
```

Description Show Flexible PIC Controller errors

Contents <slot>—FPC slot number

<get-fm-fpc-state-information>

Usage

```
<rpc>
  <get-fm-fpc-state-information/>
</rpc>
```

Description Show summary fabric management FPC state from Routing Engine

<get-fm-plane-location-information>

Usage

```
<rpc>
  <get-fm-plane-location-information/>
</rpc>
```

Description Show fabric plane location

<get-fm-plane-state-information>

Usage

```
<rpc>
  <get-fm-plane-state-information>
    <terse/>
    <detail/>
    <extensive/>
    <number>number</number>
  </get-fm-plane-state-information>
</rpc>
```

Description Show state of fabric management plane

Contents <terse>—Show terse output
<detail>—Show detail output
<extensive>—Show extensive output
<number>—Fabric plane number

<get-fm-sib-errors>

Usage

```
<rpc>  
  <get-fm-sib-errors>  
    <sib-slot>sib-slot</sib-slot> <!-- mandatory -->  
  </get-fm-sib-errors>  
</rpc>
```

Description Show Switch Interface Board errors

Contents <f13>—Show SIB F13 errors
<f2s>—Show SIB F2S errors
<sib-slot>—SIB slot number

<get-fm-sib-state-information>

Usage

```
<rpc>  
  <get-fm-sib-state-information/>  
</rpc>
```

Description Show summary fabric management SIB state from Routing Engine

<get-fm-state-information>

Usage

```
<rpc>  
  <get-fm-state-information/>  
</rpc>
```

Description Show summary fabric management state

<get-fm-topology>

Usage

```
<rpc>
  <get-fm-topology>
    <plane>plane</plane>
  </get-fm-topology>
</rpc>
```

Description Show fabric topology for plane

Contents <plane>—Fabric plane number

<get-forwarding-table-information>

Usage

```
<rpc>
  <get-forwarding-table-information>
    <detail/>
    <extensive/>
    <multicast/>
    <family>family</family>
    <vpn>vpn</vpn>
    <table>table</table>
    <interface-name>interface-name</interface-name>
    <vlan>vlan</vlan>
    <bridge-domain>bridge-domain</bridge-domain>
    <summary/>
    <matching>matching</matching>
    <destination>destination</destination>
    <learning-vlan-id>learning-vlan-id</learning-vlan-id>
    <label>label</label>
    <ccc>ccc</ccc>
    <all/>
  </get-forwarding-table-information>
</rpc>
```

Description Show entries in all forwarding tables

Contents <detail>—Display all routes

- inet - IP version 4 (IPv4)
- inet6 - IP version 6 (IPv6)
- unix - UNIX
- iso - International Standards Organization protocol
- tnp - Trivial Network Protocol
- mpls - Multiprotocol Label Switching

- vpls - Virtual private LAN service
- bridge - Bridge (Layer 2 switching)
- vlan-classification - VLAN classification table
- ethernet-switching - Switch forwarding table
- fibre-channel - Fibre channel forwarding table
- fmembers - Fibre channel membership table

<extensive>—Display extensive information about routes

- inet - IP version 4 (IPv4)
- inet6 - IP version 6 (IPv6)
- unix - UNIX
- iso - International Standards Organization protocol
- tnp - Trivial Network Protocol
- mpls - Multiprotocol Label Switching
- vpls - Virtual private LAN service
- bridge - Bridge (Layer 2 switching)
- vlan-classification - VLAN classification table
- ethernet-switching - Switch forwarding table
- fibre-channel - Fibre channel forwarding table
- fmembers - Fibre channel membership table

<multicast>—Display multicast routes

- inet - IP version 4 (IPv4)
- inet6 - IP version 6 (IPv6)
- unix - UNIX
- iso - International Standards Organization protocol
- tnp - Trivial Network Protocol
- mpls - Multiprotocol Label Switching
- vpls - Virtual private LAN service
- bridge - Bridge (Layer 2 switching)
- vlan-classification - VLAN classification table
- ethernet-switching - Switch forwarding table
- fibre-channel - Fibre channel forwarding table
- fmembers - Fibre channel membership table

<family>—Name of family

- inet - IP version 4 (IPv4)
- inet6 - IP version 6 (IPv6)
- unix - UNIX
- iso - International Standards Organization protocol
- tnp - Trivial Network Protocol
- mpls - Multiprotocol Label Switching
- vpls - Virtual private LAN service
- bridge - Bridge (Layer 2 switching)
- vlan-classification - VLAN classification table
- ethernet-switching - Switch forwarding table
- fibre-channel - Fibre channel forwarding table
- fmembers - Fibre channel membership table

<vpn>—Name of VPN instance

<table>—Name of routing table

<interface-name>—Interface name

<vlan>—VLAN name

<bridge-domain>—Name of bridging domain

<summary>—Display count of routes instead of details

<matching>—IP prefix and length for entries to match

<destination>—Destination prefix

<learning-vlan-id>—Learning VLAN

<label>—Label for entries to match

<ccc>—Circuit cross-connect interface name for entries to match

<all>—Display all routing forwarding-tables

<get-fpc-feb-connectivity-information>

Usage

```
<rpc>  
  <get-fpc-feb-connectivity-information/>  
</rpc>
```

Description Show connectivity between Flexible PIC Concentrators and Forwarding Engine boards

<get-fpc-information>

Usage

```
<rpc>  
  <get-fpc-information>  
    <detail/>  
    <fpc-slot>fpc-slot</fpc-slot>  
  </get-fpc-information>  
</rpc>
```

Description Show Flexible PIC Concentrator status

Contents <get-pic-information>—Show Physical Interface Cards installed in FPC

<detail>—Display detailed output

<fpc-slot>—FPC slot number

<get-fru-information>

Usage

```
<rpc>  
  <get-fru-information/>  
</rpc>
```

Description Show Line Card Chassis (LCC) status

<get-fru-power-on-sequence>

Usage

```
<rpc>  
  <get-fru-power-on-sequence/>  
</rpc>
```

Description Show chassis fru power on sequence

<get-fwdd-information>

Usage

```
<rpc>  
  <get-fwdd-information/>  
</rpc>
```

Description Show forwarding process (fwdd) status

<get-ggsn-apn-statistics-information>

Usage

```

<rpc>
  <get-ggsn-apn-statistics-information>
    <apn-name>apn-name</apn-name>
  </get-ggsn-apn-statistics-information>
</rpc>

```

Description Show access point name statistics

Contents <apn-name>—Name of APN

<get-ggsn-charging-statistics-information>

Usage

```

<rpc>
  <get-ggsn-charging-statistics-information/>
</rpc>

```

Description Show charging statistics

<get-ggsn-gtp-prime-statistics-information>

Usage

```

<rpc>
  <get-ggsn-gtp-prime-statistics-information/>
</rpc>

```

Description Show GPRS Tunneling Protocol Prime statistics

<get-ggsn-gtp-statistics-information>

Usage

```

<rpc>
  <get-ggsn-gtp-statistics-information/>
</rpc>

```

Description Show GPRS tunneling protocol statistics

<get-ggsn-imsi-trace>

Usage

```

<rpc>

```

```
<get-ggsn-imsi-trace>
  <imsi-identifier>imsi-identifier</imsi-identifier> <!-- mandatory -->
</get-ggsn-imsi-trace>
</rpc>
```

Description Show trace information for Identifier for International Mobile Subscriber Identity

Contents <imsi-identifier>—Identifier for IMSI

<get-ggsn-imsi-user-information>

Usage

```
<rpc>
  <get-ggsn-imsi-user-information>
    <imsi-identifier>imsi-identifier</imsi-identifier> <!-- mandatory -->
  </get-ggsn-imsi-user-information>
</rpc>
```

Description Show International Mobile Subscriber Identity statistics

Contents <imsi-identifier>—Identifier for IMSI

<get-ggsn-interface-information>

Usage

```
<rpc>
  <get-ggsn-interface-information/>
</rpc>
```

Description Show GGSN operational status information

<get-ggsn-l2tp-tunnel-statistics-information>

Usage

```
<rpc>
  <get-ggsn-l2tp-tunnel-statistics-information>
    <lac-address>lac-address</lac-address>
  </get-ggsn-l2tp-tunnel-statistics-information>
</rpc>
```

Description Show L2TP tunnel statistics

Contents <lac-address>—IP address of LAC

<get-ggsn-msisdn-trace>

Usage

```
<rpc>
  <get-ggsn-msisdn-trace>
    <msisdn-identifier>msisdn-identifier</msisdn-identifier> <!-- mandatory -->
  </get-ggsn-msisdn-trace>
</rpc>
```

Description Show trace information for Mobile Station Integrated Services Digital Network

Contents <msisdn-identifier>—Identifier for MSISDN

<get-ggsn-radius-statistics-information>

Usage

```
<rpc>
  <get-ggsn-radius-statistics-information/>
</rpc>
```

Description Show RADIUS statistics

<get-ggsn-sgsn-statistics-information>

Usage

```
<rpc>
  <get-ggsn-sgsn-statistics-information>
    <address>address</address>
  </get-ggsn-sgsn-statistics-information>
</rpc>
```

Description Show statistics for client Serving GPRS Support Node

Contents <address>—IP address and optional prefix length of SGSN

<get-ggsn-statistics>

Usage

```
<rpc>
  <get-ggsn-statistics>
  </get-ggsn-statistics>
</rpc>
```

Description Show GGSN statistics

Contents	<code><get-ggsn-gtp-statistics-information></code> —Show GPRS tunneling protocol statistics
	<code><get-ggsn-charging-statistics-information></code> —Show charging statistics
	<code><get-ggsn-radius-statistics-information></code> —Show RADIUS statistics
	<code><get-ggsn-gtp-prime-statistics-information></code> —Show GPRS Tunneling Protocol Prime statistics
	<code><get-ggsn-imsi-user-information></code> —Show International Mobile Subscriber Identity statistics
	<code><msisdn></code> —Show Mobile Station Integrated Services Digital Network statistics
	<code><get-ggsn-apn-statistics-information></code> —Show access point name statistics
	<code><get-ggsn-sgsn-statistics-information></code> —Show statistics for client Serving GPRS Support Node
	<code><get-ggsn-l2tp-tunnel-statistics-information></code> —Show L2TP tunnel statistics

`<get-ggsn-trace>`

Usage

```
<rpc>  
  <get-ggsn-trace/>  
</rpc>
```

Description Show all trace information

`<get-gre-ka-information>`

Usage

```
<rpc>  
  <get-gre-ka-information>  
    <interface-name>interface-name</interface-name>  
  </get-gre-ka-information>  
</rpc>
```

Description Show GRE Keepalive information

Contents `<interface-name>`—Display information for this logical interface

`<get-gvpn-ike-security-associations-information>`

Usage

```
<rpc>  
  <get-gvpn-ike-security-associations-information>  
    <brief/>  
    <detail/>
```

```

    <peer-address>peer-address</peer-address>
    <index>index</index>
    <fpc>fpc</fpc>
    <pic>pic</pic>
    <kmd-instance>kmd-instance</kmd-instance>
    </get-gvpn-ike-security-associations-information>
  </rpc>

```

Description Show IKE security association information

Contents

- <brief>—Show brief output (default)
- <detail>—Show detailed output
- <peer-address>—IP address of the peer
- <index>—Index of security association
- <fpc>—FPC slot number
- <pic>—PIC slot number
- <kmd-instance>—Name of KMD instance or 'all'

<get-gvpn-ipsec-statistics-information>

Usage

```

  <rpc>
    <get-gvpn-ipsec-statistics-information>
    <fpc>fpc</fpc>
    <pic>pic</pic>

    <show-gvpn-index-ipsec-statistics>show-gvpn-index-ipsec-statistics</show-gvpn-index-ipsec-statistics>

    </get-gvpn-ipsec-statistics-information>
  </rpc>

```

Description Show IPSec statistics

Contents

- <fpc>—FPC slot number
- <pic>—PIC slot number
- <show-gvpn-index-ipsec-statistics>—Index of Security Association

<get-gvpn-kek-security-associations-information>

Usage

```

  <rpc>
    <get-gvpn-kek-security-associations-information>

```

```
<brief/>
<detail/>
<peer-address>peer-address</peer-address>
<index>index</index>
<fpc>fpc</fpc>
<pic>pic</pic>
<kmd-instance>kmd-instance</kmd-instance>
</get-gvpn-kek-security-associations-information>
</rpc>
```

Description Show KEK security association information

Contents <brief>—Show brief output (default)

<detail>—Show detailed output

<peer-address>—IP address of the peer

<index>—Index of security association

<fpc>—FPC slot number

<pic>—PIC slot number

<kmd-instance>—Name of KMD instance or 'all'

<get-gvpn-security-associations-information>

Usage

```
<rpc>
  <get-gvpn-security-associations-information>
    <brief/>
    <detail/>

    <show-gvpn-index-ipsec-security-association>
      <show-gvpn-index-ipsec-security-association>
        <show-gvpn-index-ipsec-security-association>
          <fpc>fpc</fpc>
          <pic>pic</pic>
          <kmd-instance>kmd-instance</kmd-instance>
        </get-gvpn-security-associations-information>
      </rpc>
```

Description Show IPSec security association information

Contents <brief>—Display brief output

<detail>—Display detailed output

<show-gvpn-index-ipsec-security-association>—Index of security association

<fpc>—FPC slot number

<pic>—PIC slot number

<kmd-instance>—Name of KMD instance or 'all'

<get-gvrp-information>

Usage

```
<rpc>
  <get-gvrp-information>
</get-gvrp-information>
</rpc>
```

Description Show Generic VLAN Registration Protocol information

Contents <timers>—Show GVRP protocol timers

<statistics>—Show GVRP statistics

<get-header-redirect-set-statistics-information>

Usage

```
<rpc>
  <get-header-redirect-set-statistics-information>
  <detail/>
</get-header-redirect-set-statistics-information>
</rpc>
```

Description Show header redirect set statistics

Contents <detail>—Display detailed statistics

<get-health-monitor-alarm-information>

Usage

```
<rpc>
  <get-health-monitor-alarm-information>
  <brief/>
  <detail/>
</get-health-monitor-alarm-information>
</rpc>
```

Description Show health-monitor alarms

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<get-health-monitor-information>

Usage

```
<rpc>  
  <get-health-monitor-information>  
  </get-health-monitor-information>  
</rpc>
```

Description Show health-monitoring information

Contents <get-health-monitor-alarm-information>—Show health-monitor alarms
<get-health-monitor-log-information>—Show health-monitoring logs

<get-health-monitor-log-information>

Usage

```
<rpc>  
  <get-health-monitor-log-information/>  
</rpc>
```

Description Show health-monitoring logs

<get-helper-statistics-information>

Usage

```
<rpc>  
  <get-helper-statistics-information/>  
</rpc>
```

Description Show helper statistics

<get-history-results>

Usage

```
<rpc>  
  <get-history-results>  
    <brief/>  
    <detail/>  
    <owner>owner</owner>  
    <test>test</test>  
    <since>since</since>  
  </get-history-results>  
</rpc>
```

Description	Show history results
Contents	<p><brief>—Display brief output (default)</p> <p><detail>—Display detailed output</p> <p><owner>—Name of owner</p> <p><test>—Name of test</p> <p><since>—Show history since YYYY-MM-DD.HH:MM:SS</p>

<get-idp-addos-application-information>

Usage

```

<rpc>
  <get-idp-addos-application-information>
    <application-name>application-name</application-name>
    <context>context</context>
    <server>server</server>
    <zone>zone</zone>
    <detail/>
  </get-idp-addos-application-information>
</rpc>

```

Description	Show DDOS Application information
Contents	<p><application-name>—Application name</p> <p><context>—Context name</p> <p><server>—Application server address</p> <p><zone>—Application server zone</p> <p><detail>—Show application details</p>

<get-idp-application-system-cache>

Usage

```

<rpc>
  <get-idp-application-system-cache/>
</rpc>

```

Description	Show IDP application system cache
--------------------	-----------------------------------

<get-idp-applications-information>

Usage

```
<rpc>  
  <get-idp-applications-information/>  
</rpc>
```

Description Show IDP application statistics

<get-idp-attack-table-information>

Usage

```
<rpc>  
  <get-idp-attack-table-information/>  
</rpc>
```

Description Show IDP attack table

<get-idp-counter-information>

Usage

```
<rpc>  
  <get-idp-counter-information>  
    <counter-class>counter-class</counter-class> <!-- mandatory -->  
  </get-idp-counter-information>  
</rpc>
```

Description Show IDP counters

Contents <counter-class>—Show IDP counters by counter class

<get-idp-detail-status-information>

Usage

```
<rpc>  
  <get-idp-detail-status-information/>  
</rpc>
```

Description Show IDP detail status

<get-idp-memory-information>

Usage

```
<rpc>
```

```
<get-idp-memory-information/>
</rpc>
```

Description Show IDP data plane memory statistics

<get-idp-policy-commit-status>

Usage

```
<rpc>
  <get-idp-policy-commit-status>
    <re-selector-idpd>re-selector-idpd</re-selector-idpd>
    <re0/>
    <re1/>
    <clear/>
  </get-idp-policy-commit-status>
</rpc>
```

Description Show the status of ongoing policy compilation and load

Contents <re0>—RE0
 <re1>—RE1
 <clear>—Clears the policy commit status

<get-idp-policy-template-information>

Usage

```
<rpc>
  <get-idp-policy-template-information/>
</rpc>
```

Description Show available policy templates

<get-idp-predefined-attack-filters>

Usage

```
<rpc>
  <get-idp-predefined-attack-filters>
    <re-selector-idpd>re-selector-idpd</re-selector-idpd>
    <re0/>
    <re1/>
    <category>category</category>
    <severity>severity</severity>
    <direction>direction</direction>
  </get-idp-predefined-attack-filters>
</rpc>
```

Description Configure filters

Contents <re0>—RE0

- info - Provide information of attack when it matches
- warning - The attack is a minor one
- minor - The attack is a minor one
- major - The attack is a major one
- critical - The attack is a critical one
- client-to-server - Select attacks from client to server
- server-to-client - Select attacks from server to client
- any - Select attacks which are in any direction
- exclude-client-to-server - Filter out attacks from client to server
- exclude-server-to-client - Filter out attacks from server to client
- exclude-any - Filter out attacks which are in any direction

<re1>—RE1

- info - Provide information of attack when it matches
- warning - The attack is a minor one
- minor - The attack is a minor one
- major - The attack is a major one
- critical - The attack is a critical one
- client-to-server - Select attacks from client to server
- server-to-client - Select attacks from server to client
- any - Select attacks which are in any direction
- exclude-client-to-server - Filter out attacks from client to server
- exclude-server-to-client - Filter out attacks from server to client
- exclude-any - Filter out attacks which are in any direction

<category>—Category of attack

- info - Provide information of attack when it matches
- warning - The attack is a minor one
- minor - The attack is a minor one
- major - The attack is a major one
- critical - The attack is a critical one
- client-to-server - Select attacks from client to server

- server-to-client - Select attacks from server to client
- any - Select attacks which are in any direction
- exclude-client-to-server - Filter out attacks from client to server
- exclude-server-to-client - Filter out attacks from server to client
- exclude-any - Filter out attacks which are in any direction

<severity>—Severity of attack

- info - Provide information of attack when it matches
- warning - The attack is a minor one
- minor - The attack is a minor one
- major - The attack is a major one
- critical - The attack is a critical one
- client-to-server - Select attacks from client to server
- server-to-client - Select attacks from server to client
- any - Select attacks which are in any direction
- exclude-client-to-server - Filter out attacks from client to server
- exclude-server-to-client - Filter out attacks from server to client
- exclude-any - Filter out attacks which are in any direction

<direction>—Direction of attack

- client-to-server - Select attacks from client to server
- server-to-client - Select attacks from server to client
- any - Select attacks which are in any direction
- exclude-client-to-server - Filter out attacks from client to server
- exclude-server-to-client - Filter out attacks from server to client
- exclude-any - Filter out attacks which are in any direction

<get-idp-predefined-attack-group-filters>

Usage

```
<rpc>
  <get-idp-predefined-attack-group-filters>
    <re-selector-idpd>re-selector-idpd</re-selector-idpd>
    <re0/>
    <re1/>
    <category>category</category>
  </get-idp-predefined-attack-group-filters>
</rpc>
```

Description	Configure filters
Contents	<code><re0></code> —RE0 <code><re1></code> —RE1 <code><category></code> —Category of attack group

`<get-idp-predefined-attack-groups>`

Usage	<pre><rpc> <get-idp-predefined-attack-groups> </get-idp-predefined-attack-groups> </rpc></pre>
Description	Show predefined attack groups
Contents	<code><get-idp-predefined-attack-group-filters></code> —Configure filters

`<get-idp-predefined-attacks>`

Usage	<pre><rpc> <get-idp-predefined-attacks> </get-idp-predefined-attacks> </rpc></pre>
Description	Show predefined attacks
Contents	<code><get-idp-predefined-attack-filters></code> —Configure filters

`<get-idp-recent-security-package-information>`

Usage	<pre><rpc> <get-idp-recent-security-package-information> <re-selector-idpd>re-selector-idpd</re-selector-idpd> <re0/> <re1/> </get-idp-recent-security-package-information> </rpc></pre>
Description	List ten most recent security package versions
Contents	<code><re0></code> —RE0

<re1>—RE1

<get-idp-security-package-information>

Usage

```
<rpc>
  <get-idp-security-package-information>
    <re-selector-idpd>re-selector-idpd</re-selector-idpd>
    <re0/>
    <re1/>
  </get-idp-security-package-information>
</rpc>
```

Description Show the version of currently installed security-package

Contents <re0>—RE0

<re1>—RE1

<get-idp-ssl-key-information>

Usage

```
<rpc>
  <get-idp-ssl-key-information>
    <key-name>key-name</key-name>
  </get-idp-ssl-key-information>
</rpc>
```

Description Show SSL keys

Contents <key-name>—Key name

<get-idp-ssl-session-cache-information>

Usage

```
<rpc>
  <get-idp-ssl-session-cache-information/>
</rpc>
```

Description Session ID cache

<get-idp-status-information>

Usage

```
<rpc>
  <get-idp-status-information>
```

```
</get-idp-status-information>
</rpc>
```

Description Show IDP status

Contents <get-idp-detail-status-information>—Show IDP detail status

<get-idp-subscriber-policy-list>

Usage

```
<rpc>
  <get-idp-subscriber-policy-list/>
</rpc>
```

Description Show the list of currently installed policies

<get-ids-statistics>

Usage

```
<rpc>
  <get-ids-statistics>
    <filter>filter</filter> <!-- mandatory -->
    <zone>zone</zone>
    <interface>interface</interface>
  </get-ids-statistics>
</rpc>
```

Description Show screen attack statistics information

Contents <zone>—IDS statistics zone

<interface>—IDS statistics interface

<get-igmp-group-information>

Usage

```
<rpc>
  <get-igmp-group-information>
    <logical-system>logical-system</logical-system>
    <terse/>
    <brief/>
    <detail/>
    <group-name>group-name</group-name>
  </get-igmp-group-information>
</rpc>
```

Description	Show IGMP group members
Contents	<p><logical-system>—Name of logical system, or 'all'</p> <p><terse>—Display terse output</p> <p><brief>—Display brief output (default)</p> <p><detail>—Display detailed output</p> <p><group-name>—Name of group</p>

<get-igmp-interface-information>

Usage

```

<rpc>
  <get-igmp-interface-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <interface-name>interface-name</interface-name>
  </get-igmp-interface-information>
</rpc>

```

Description	Show IGMP interfaces
Contents	<p><logical-system>—Name of logical system, or 'all'</p> <p><brief>—Display brief output (default)</p> <p><detail>—Display detailed output</p> <p><interface-name>—Name of interface</p>

<get-igmp-output-group-information>

Usage

```

<rpc>
  <get-igmp-output-group-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <group-name>group-name</group-name>
  </get-igmp-output-group-information>
</rpc>

```

Description	Show IGMP output group members
Contents	<logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<group-name>—Name of group

<get-igmp-snooping-flow-information>

Usage

```
<rpc>
  <get-igmp-snooping-flow-information>
    <brief/>
    <detail/>
  </get-igmp-snooping-flow-information>
</rpc>
```

Description Show igmp-snooping flows

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<get-igmp-snooping-interface-information>

Usage

```
<rpc>
  <get-igmp-snooping-interface-information>
    <brief/>
    <detail/>
    <interface>interface</interface>
    <vlan-id>vlan-id</vlan-id>
    <instance>instance</instance>
  </get-igmp-snooping-interface-information>
</rpc>
```

Description Show IGMP snooping interfaces

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<interface>—Name of interface

<vlan-id>—VLAN ID for a learning domain

<instance>—Name of routing-instance

<bridge-domain>—For a particular bridge-domain

<get-igmp-snooping-membership-information>

Usage

```
<rpc>
  <get-igmp-snooping-membership-information>
    <brief/>
    <detail/>
    <group>group</group>
    <interface>interface</interface>
    <vlan-id>vlan-id</vlan-id>
    <instance>instance</instance>
  </get-igmp-snooping-membership-information>
</rpc>
```

Description Show IGMP snooping group membership

Contents

- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <group>—IP address range for group
- <interface>—Name of interface
- <vlan-id>—VLAN ID for a learning domain
- <instance>—Name of routing-instance
- <bridge-domain>—For a particular bridge-domain

<get-igmp-snooping-membership-information>

Usage

```
<rpc>
  <get-igmp-snooping-membership-information>
    <brief/>
    <detail/>
    <vlan>vlan</vlan>
    <interface>interface</interface>
  </get-igmp-snooping-membership-information>
</rpc>
```

Description Show igmp-snooping membership

Contents

- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <vlan>—Groups on specified VLAN

<interface>—Groups with membership on interface

<get-igmp-snooping-routing-information>

Usage

```
<rpc>
  <get-igmp-snooping-routing-information>
    <ethernet-switching/>
    <inet/>
    <brief/>
    <detail/>
    <vlan>vlan</vlan>
  </get-igmp-snooping-routing-information>
</rpc>
```

Description Show routing information

Contents <ethernet-switching>—Ethernet-switching multicast routes

<inet>—Family inet multicast routes

<brief>—Display brief output (default)

<detail>—Display detailed output

<vlan>—Show entries for a specific VLAN

<get-igmp-snooping-statistics-information>

Usage

```
<rpc>
  <get-igmp-snooping-statistics-information>
    <interface>interface</interface>
    <vlan-id>vlan-id</vlan-id>
    <instance>instance</instance>
  </get-igmp-snooping-statistics-information>
</rpc>
```

Description Show IGMP snooping statistics

Contents <interface>—Name of interface

<vlan-id>—VLAN ID for a learning domain

<instance>—Name of routing-instance

<bridge-domain>—For a particular bridge-domain

<get-igmp-snooping-statistics-information>

Usage

```
<rpc>
  <get-igmp-snooping-statistics-information/>
</rpc>
```

Description Show igmp-snooping statistics

<get-igmp-snooping-task-information>

Usage

```
<rpc>
  <get-igmp-snooping-task-information>
  <summary/>
  </get-igmp-snooping-task-information>
</rpc>
```

Description Show IGMP snooping task information

Contents

- <accounting>—Per-task CPU accounting
- <io>—Show task I/O statistics
- <jobs>—Show scheduled jobs
- <timers>—Task timers
- <statistics>—Task statistics
- <memory>—Show memory utilization of IGMP snooping tasks
- <summary>—Display summary output (default)

<get-igmp-snooping-vlan-information>

Usage

```
<rpc>
  <get-igmp-snooping-vlan-information>
  <brief/>
  <detail/>
  <vlan>vlan</vlan>
  </get-igmp-snooping-vlan-information>
</rpc>
```

Description VLAN information

Contents <brief>—Display brief output (default)
 <detail>—Display detailed output
 <vlan>—VLAN name

<get-igmp-statistics-information>

Usage

```
<rpc>
  <get-igmp-statistics-information>
    <logical-system>logical-system</logical-system>
    <interface>interface</interface>
  </get-igmp-statistics-information>
</rpc>
```

Description Show IGMP statistics

Contents <logical-system>—Name of logical system, or 'all'
 <interface>—Name of interface

<get-ike-active-peers-information>

Usage

```
<rpc>
  <get-ike-active-peers-information>
    <brief/>
    <detail/>
    <peer-address>peer-address</peer-address>
    <port>port</port>
    <fpc>fpc</fpc>
    <pic>pic</pic>
    <kmd-instance>kmd-instance</kmd-instance>
  </get-ike-active-peers-information>
</rpc>
```

Description Show IKE active peers

Contents <brief>—Display brief output
 <detail>—Display detailed output
 <peer-address>—IP of peer
 <port>—Port number of peer
 <fpc>—FPC slot number
 <pic>—PIC slot number

<kmd-instance>—Name of KMD instance or 'all'

<get-ike-security-associations-information>

Usage

```
<rpc>
  <get-ike-security-associations-information>
    <brief/>
    <detail/>
    <peer-address>peer-address</peer-address>
    <index>index</index>
    <fpc>fpc</fpc>
    <pic>pic</pic>
    <kmd-instance>kmd-instance</kmd-instance>
  </get-ike-security-associations-information>
</rpc>
```

Description Show IKE security association information

Contents <brief>—Show brief output (default)

<detail>—Show detailed output

<peer-address>—IP address of the peer

<index>—Index of security association

<fpc>—FPC slot number

<pic>—PIC slot number

<kmd-instance>—Name of KMD instance or 'all'

<get-ike-security-associations-information>

Usage

```
<rpc>
  <get-ike-security-associations-information>
    <brief/>
    <detail/>
    <peer-address>peer-address</peer-address>
  </get-ike-security-associations-information>
</rpc>
```

Description Show IKE security association information

Contents <brief>—Show brief output (default)

<detail>—Show detailed output

<peer-address>—Name of security association

<get-ike-services-security-associations-information>

Usage

```
<rpc>
  <get-ike-services-security-associations-information>
    <brief/>
    <detail/>
    <peer-address>peer-address</peer-address>
  </get-ike-services-security-associations-information>
</rpc>
```

Description Show services IKE security association information

Contents <brief>—Show brief output (default)

<detail>—Show detailed output

<peer-address>—Name of security association

<get-incoming-table-information>

Usage

```
<rpc>
  <get-incoming-table-information/>
</rpc>
```

Description Show incoming table information

<get-ingress-replication-information>

Usage

```
<rpc>
  <get-ingress-replication-information>
    <logical-system>logical-system</logical-system>
    <mvpn/>
    <tunnel-name>tunnel-name</tunnel-name>
  </get-ingress-replication-information>
</rpc>
```

Description Show Ingress-Replication tunnel information

Contents <logical-system>—Name of logical system, or 'all'

<mvpn>—MVPN ingress-replication tunnels

<tunnel-name>—Name of Ingress-Replication tunnel

<get-initialsetup-status-information>

Usage

```
<rpc>
  <get-initialsetup-status-information/>
</rpc>
```

Description Show initialsetup status

<get-instance-information>

Usage

```
<rpc>
  <get-instance-information>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <summary/>
    <brief/>
    <detail/>
    <instance-name>instance-name</instance-name>
  </get-instance-information>
</rpc>
```

Description Show routing instances information

Contents <logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<summary>—Display summary output

<brief>—Display brief output (default)

<detail>—Display detailed output

<instance-name>—Particular instance name

<get-operational-routing-instance-information>—Show operational routing instances

<get-interface-filter-information>

Usage

```
<rpc>
  <get-interface-filter-information>
    <interface-name>interface-name</interface-name>
  </get-interface-filter-information>
```

</rpc>

Description Show interface filters information

Contents <interface-name>—Name of physical or logical interface

<get-interface-information>

Usage

```
<rpc>
  <get-interface-information>
    <routing-instance>routing-instance</routing-instance>
    <extensive/>
    <statistics/>
    <media/>
    <detail/>
    <terse/>
    <brief/>
    <descriptions/>
    <snmp-index>snmp-index</snmp-index>
    <switch-port>switch-port</switch-port>
    <interface-name>interface-name</interface-name>
  </get-interface-information>
</rpc>
```

Description Show interface information

Contents <routing>—Show routing status

- all - All instances
- instance-name - Instance name

<mc-ae>—Show MC-AE configured interface information

- all - All instances
- instance-name - Instance name

<routing-instance>—Name of routing instance

- all - All instances
- instance-name - Instance name

<controller>—Show controller information

<interface-set>—Show interface set information

<interval>—Show interval statistics

<far-end-interval>—Show far end interval statistics

<get-mac-database>—Show media access control database information
 <get-interface-queue-information>—Show queue statistics for this interface
 <get-interface-filter-information>—Show interface filters information
 <get-interface-policer-information>—Show interface policers information
 <diagnostics>—Show interface diagnostics information
 <extensive>—Display extensive output
 <statistics>—Display statistics and detailed output
 <media>—Display media information
 <detail>—Display detailed output
 <terse>—Display terse output
 <brief>—Display brief output
 <descriptions>—Display interface description strings
 <get-destination-class-statistics>—Show statistics for destination class
 <get-source-class-statistics>—Show statistics for source class
 <snmp-index>—SNMP index of interface
 <switch-port>—Front end port number
 <interface-name>—Name of physical or logical interface
 <redundancy>—Show redundancy status

<get-interface-location-information>

Usage

```

<rpc>
  <get-interface-location-information>
    <lcc>lcc</lcc> <!-- mandatory -->
    <fpc>fpc</fpc> <!-- mandatory -->
  </get-interface-location-information>
</rpc>

```

Description Show interface name given location

Contents

<lcc>—LCC number

<fpc>—FPC number

<get-interface-location-name-information>

Usage

```
<rpc>
  <get-interface-location-name-information>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </get-interface-location-name-information>
</rpc>
```

Description Show physical location given interface name

Contents <interface-name>—Interface name

<get-interface-nat-ports-information>

Usage

```
<rpc>
  <get-interface-nat-ports-information/>
</rpc>
```

Description Show interface nat ports information

<get-interface-optics-diagnostics-information>

Usage

```
<rpc>
  <get-interface-optics-diagnostics-information>
    <interface-name>interface-name</interface-name>
  </get-interface-optics-diagnostics-information>
</rpc>
```

Description Show interface optics-diagnostics information

Contents <interface-name>—Name of physical interface

<get-interface-policer-information>

Usage

```
<rpc>
  <get-interface-policer-information>
    <interface-name>interface-name</interface-name>
  </get-interface-policer-information>
</rpc>
```

Description Show interface policers information

Contents <interface-name>—Name of physical or logical interface

<get-interface-queue-information>

Usage

```
<rpc>
  <get-interface-queue-information>
    <forwarding-class>forwarding-class</forwarding-class>
    <ingress/>
    <egress/>
    <both-ingress-egress/>
    <aggregate/>
    <remaining-traffic/>
    <source-chassis>source-chassis</source-chassis> <!-- mandatory -->
    <source-fpc>source-fpc</source-fpc> <!-- mandatory -->
    <interface-name>interface-name</interface-name>
  </get-interface-queue-information>
</rpc>
```

Description Show queue statistics for this interface

Contents <forwarding-class>—Name of forwarding class

<ingress>—Display ingress queue statistics

<egress>—Display egress queue statistics

<both-ingress-egress>—Display both ingress and egress queue statistics

<aggregate>—Display aggregate queue statistics

<remaining-traffic>—Display remaining-traffic queue statistics

<source-chassis>—Source chassis name for which to show details

<source-fpc>—Source FPC for which to show details

<interface-name>—Name of physical interface

<get-interface-set-queue-information>

Usage

```
<rpc>
  <get-interface-set-queue-information>
    <forwarding-class>forwarding-class</forwarding-class>
    <ingress/>
    <egress/>
    <both-ingress-egress/>
    <aggregate/>
    <remaining-traffic/>
    <interface-set-name>interface-set-name</interface-set-name>
  </get-interface-set-queue-information>
```

```
</rpc>
```

Description Show queue statistics for this interface-set

Contents

- <forwarding-class>—Name of forwarding class
- <ingress>—Display ingress queue statistics
- <egress>—Display egress queue statistics
- <both-ingress-egress>—Display both ingress and egress queue statistics
- <aggregate>—Display aggregate queue statistics
- <remaining-traffic>—Display remaining-traffic queue statistics
- <interface-set-name>—Name of interface set

<get-ioc-npc-connectivity-information>

Usage

```
<rpc>  
  <get-ioc-npc-connectivity-information/>  
</rpc>
```

Description Show connectivity between IOC and NPC

<get-ip-mip-binding-information>

Usage

```
<rpc>  
  <get-ip-mip-binding-information>  
    <ip-address>ip-address</ip-address> <!-- mandatory -->  
    <routing-instance>routing-instance</routing-instance>  
    <logical-system>logical-system</logical-system>  
  </get-ip-mip-binding-information>  
</rpc>
```

Description Show binding detail based on IP address

Contents

- <ip-address>—Show binding detail based on IP address
- <routing-instance>—Name of routing instance
- <logical-system>—Name of logical system

<get-ip-source-guard-information>

Usage

```
<rpc>
  <get-ip-source-guard-information/>
</rpc>
```

Description Show IP source guard information

<get-ipsec-next-hop-tunnel-information>

Usage

```
<rpc>
  <get-ipsec-next-hop-tunnel-information>
    <interface-name>interface-name</interface-name>
  </get-ipsec-next-hop-tunnel-information>
</rpc>
```

Description Show manual and auto next-hop-tunnel entries

Contents <interface-name>—Name of secure tunnel logical interface

<get-ipsec-pic-redundancy-information>

Usage

```
<rpc>
  <get-ipsec-pic-redundancy-information>
    <interface-name>interface-name</interface-name>
  </get-ipsec-pic-redundancy-information>
</rpc>
```

Description Show ES PIC redundancy information

Contents <interface-name>—Name of ES interface

<get-ipsec-statistics-information>

Usage

```
<rpc>
  <get-ipsec-statistics-information>
    <fpc>fpc</fpc>
    <pic>pic</pic>

    <show-index-ipsec-statistics>show-index-ipsec-statistics</show-index-ipsec-statistics>

  </get-ipsec-statistics-information>
```

```
</rpc>
```

Description Show IPSec statistics

Contents <fpc>—FPC slot number

<pic>—PIC slot number

<show-index-ipsec-statistics>—Index of Security Association

<get-ipsec-tunnel-redundancy-information>

Usage

```
<rpc>
```

```
<get-ipsec-tunnel-redundancy-information>
```

```
<security-association-name>security-association-name</security-association-name>
```

```
</get-ipsec-tunnel-redundancy-information>
```

```
</rpc>
```

Description Show remote tunnel redundancy information

Contents <security-association-name>—Name of security association

<get-ipv6-nd-information>

Usage

```
<rpc>
```

```
<get-ipv6-nd-information/>
```

```
</rpc>
```

Description Show IPv6 neighbor cache information

<get-ipv6-ra-information>

Usage

```
<rpc>
```

```
<get-ipv6-ra-information>
```

```
<logical-system>logical-system</logical-system>
```

```
<interface>interface</interface>
```

```
<conflicts/>
```

```
<prefix>prefix</prefix>
```

```
<virtual-router/>
```

```
</get-ipv6-ra-information>
```

```
</rpc>
```

Description	Show IPv6 router advertisement information
Contents	<p><logical-system>—Name of logical system, or 'all'</p> <p><interface>—Name of interface</p> <p><conflicts>—Display conflicting information</p> <p><prefix>—Prefix and optional prefix length</p> <p><virtual-router>—Display only virtual-interface information</p>

<get-isis-adjacency-information>

Usage

```

<rpc>
  <get-isis-adjacency-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <system-id>system-id</system-id>
  </get-isis-adjacency-information>
</rpc>

```

Description	Show IS-IS adjacency database
Contents	<p><logical-system>—Name of logical system, or 'all'</p> <p><brief>—Display brief output (default)</p> <p><detail>—Display detailed output</p> <p><extensive>—Display extensive output</p> <p><instance>—Name of IS-IS instance</p> <p><system-id>—System ID of intermediate system</p>

<get-isis-authentication-information>

Usage

```

<rpc>
  <get-isis-authentication-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-isis-authentication-information>
</rpc>

```

Description Show IS-IS authentication information

Contents <logical-system>—Name of logical system, or 'all'
<instance>—Name of IS-IS instance

<get-isis-backup-coverage-information>

Usage

```
<rpc>  
  <get-isis-backup-coverage-information>  
    <logical-system>logical-system</logical-system>  
    <instance>instance</instance>  
  </get-isis-backup-coverage-information>  
</rpc>
```

Description Show IS-IS backup coverage

Contents <logical-system>—Name of logical system, or 'all'
<instance>—Name of IS-IS instance

<get-isis-backup-lsp-information>

Usage

```
<rpc>  
  <get-isis-backup-lsp-information>  
    <logical-system>logical-system</logical-system>  
  </get-isis-backup-lsp-information>  
</rpc>
```

Description Show IS-IS MPLS backup LSP information

Contents <logical-system>—Name of logical system, or 'all'

<get-isis-backup-spf-results-information>

Usage

```
<rpc>  
  <get-isis-backup-spf-results-information>  
    <logical-system>logical-system</logical-system>  
    <instance>instance</instance>  
    <level>level</level>  
    <no-coverage/>  
    <topology>topology</topology>  
  </get-isis-backup-spf-results-information>  
</rpc>
```

Description Show results from backup SPF runs

Contents <logical-system>—Name of logical system, or 'all'

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<instance>—IS-IS instance

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<level>—Number of IS-IS level

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<no-coverage>—Destinations with no backup coverage

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<topology>—Name of topology

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<get-isis-context-identifier-information>

Usage

```
<rpc>
<get-isis-context-identifier-information>
  <logical-system>logical-system</logical-system>
  <brief/>
```

```
<detail/>
<instance>instance</instance>
</get-isis-context-identifier-information>
</rpc>
```

Description Show IS-IS context-identifier information

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<instance>—Name of IS-IS instance

<get-isis-context-identifier-origin-information>—Show IS-IS context-identifier information

<get-isis-context-identifier-origin-information>

Usage

```
<rpc>
  <get-isis-context-identifier-origin-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <id_addr>id_addr</id_addr> <!-- mandatory -->
    <instance>instance</instance>
  </get-isis-context-identifier-origin-information>
</rpc>
```

Description Show IS-IS context-identifier information

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<id_addr>—Context identifier address of session

<instance>—Name of IS-IS instance

<get-isis-database-information>

Usage

```
<rpc>
  <get-isis-database-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
  </get-isis-database-information>
</rpc>
```

```

    <extensive/>
    <instance>instance</instance>
    <level>level</level>
    <system-id>system-id</system-id>
    </get-isis-database-information>
  </rpc>

```

Description Show IS-IS link-state database

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<instance>—Name of IS-IS instance

<level>—Number of IS-IS level

<system-id>—System ID of IS

<get-isis-hostname-information>

Usage

```

  <rpc>
    <get-isis-hostname-information>
      <logical-system>logical-system</logical-system>
    </get-isis-hostname-information>
  </rpc>

```

Description Show IS-IS hostname database

Contents <logical-system>—Name of logical system, or 'all'

<get-isis-interface-information>

Usage

```

  <rpc>
    <get-isis-interface-information>
      <logical-system>logical-system</logical-system>
      <brief/>
      <detail/>
      <extensive/>
      <instance>instance</instance>
      <interface-name>interface-name</interface-name>
    </get-isis-interface-information>
  </rpc>

```

Description	Show IS-IS interface information
Contents	<p><logical-system>—Name of logical system, or 'all'</p> <p><brief>—Display brief output (default)</p> <p><detail>—Display detailed output</p> <p><extensive>—Display extensive output</p> <p><instance>—Name of IS-IS instance</p> <p><interface-name>—Name of interface</p>

<get-isis-overview-information>

Usage

```
<rpc>
  <get-isis-overview-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-isis-overview-information>
</rpc>
```

Description	Show overview of IS-IS information
--------------------	------------------------------------

Contents	<p><logical-system>—Name of logical system, or 'all'</p> <p><instance>—Name of IS-IS instance</p>
-----------------	---------------------------------------------------------------------------------------------------------------

<get-isis-route-information>

Usage

```
<rpc>
  <get-isis-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <destination>destination</destination>
    <inet/>
    <inet6/>
    <iso/>
    <topology>topology</topology>
  </get-isis-route-information>
</rpc>
```

Description	Show IS-IS routing table
--------------------	--------------------------

Contents	<logical-system>—Name of logical system, or 'all'
-----------------	---------------------------------------------------

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<instance>—Name of IS-IS instance

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<destination>—IP address and optional prefix length of destination

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<inet>—Display IPv4 routes

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<inet6>—Display IPv6 routes

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<iso>—Display CLNS routes

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<topology>—Name of topology from which routes were learned

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<get-isis-spf-log-information>

Usage

```
<rpc>
  <get-isis-spf-log-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <level>level</level>
    <topology>topology</topology>
  </get-isis-spf-log-information>
</rpc>
```

Description Show log of SPF runs

Contents <logical-system>—Name of logical system, or 'all'

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<instance>—Name of IS-IS instance

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<level>—Number of IS-IS level

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<topology>—Name of topology

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology

- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<get-isis-spf-results-brief-information>

Usage

```
<rpc>
  <get-isis-spf-results-brief-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <level>level</level>
    <topology>topology</topology>
  </get-isis-spf-results-brief-information>
</rpc>
```

Description Show brief summary of SPF results

Contents <logical-system>—Name of logical system, or 'all'

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<instance>—Name of IS-IS instance

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<level>—Number of level

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<topology>—Name of topology

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<get-isis-spf-results-information>

Usage

```
<rpc>
  <get-isis-spf-results-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <level>level</level>
    <topology>topology</topology>
  </get-isis-spf-results-information>
</rpc>
```

Description Show results from SPF runs

Contents <logical-system>—Name of logical system, or 'all'

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<instance>—IS-IS instance

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<level>—Number of IS-IS level

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<topology>—Name of topology

- unicast - Unicast topology
- ipv4-multicast - IPv4 multicast topology
- ipv6-unicast - IPv6 unicast topology
- ipv6-multicast - IPv6 multicast topology

<get-isis-statistics-information>

Usage

```

<rpc>
  <get-isis-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-isis-statistics-information>
</rpc>

```

Description Show IS-IS performance statistics

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of IS-IS instance

<get-l2ckt-connection-information>

Usage

```

<rpc>
  <get-l2ckt-connection-information>
    <logical-system>logical-system</logical-system>
    <neighbor>neighbor</neighbor>
    <interface>interface</interface>
    <down/>
    <up/>
    <up-down/>
    <brief/>
    <extensive/>
    <history/>
    <status/>
    <summary/>
  </get-l2ckt-connection-information>
</rpc>

```

Description Show the Layer 2 circuit connections

Contents <logical-system>—Name of logical system, or 'all'

<neighbor>—IP address of neighbor

<interface>—Name of interface

<down>—Display nonoperational connections

<up>—Display operational connections

<up-down>—Display both operational and nonoperational connections (default)

<brief>—Display one-line version of output

- <extensive>—Display connection status and history
- <history>—Display connection history
- <status>—Display connection and interface status (default)
- <summary>—Display summary output

<get-l2tp-destination-information>

Usage

```
<rpc>
  <get-l2tp-destination-information>
    <extensive/>
    <brief/>
    <detail/>
    <filter>filter</filter>
    <local-gateway>local-gateway</local-gateway>
    <peer-gateway>peer-gateway</peer-gateway>
  </get-l2tp-destination-information>
</rpc>
```

Description Show active L2TP destination list

Contents

- <extensive>—Display extensive output
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <local-gateway>—Local gateway address to use as filter
- <peer-gateway>—Peer gateway address to use as filter

<get-l2tp-multilink-information>

Usage

```
<rpc>
  <get-l2tp-multilink-information>
    <extensive/>
    <brief/>
    <detail/>
    <statistics/>
    <filter>filter</filter>
    <bundle-id>bundle-id</bundle-id>
  </get-l2tp-multilink-information>
</rpc>
```

Description Show active L2TP multilink list

Contents <extensive>—Display extensive output

<brief>—Display brief output (default)

<detail>—Display detailed output

<statistics>—Display statistics

<bundle-id>—Filter by multilink bundle ID

<get-l2tp-session-information>

Usage

```
<rpc>
  <get-l2tp-session-information>
    <extensive/>
    <brief/>
    <detail/>
    <statistics/>
    <filter>filter</filter>
    <tunnel-group>tunnel-group</tunnel-group>
    <local-tunnel-id>local-tunnel-id</local-tunnel-id>
    <interface>interface</interface>
    <local-gateway>local-gateway</local-gateway>
    <local-gateway-name>local-gateway-name</local-gateway-name>
    <peer-gateway>peer-gateway</peer-gateway>
    <peer-gateway-name>peer-gateway-name</peer-gateway-name>
    <local-session-id>local-session-id</local-session-id>
    <user>user</user>
  </get-l2tp-session-information>
</rpc>
```

Description Show active L2TP session list

Contents <extensive>—Display extensive output

<brief>—Display brief output (default)

<detail>—Display detailed output

<statistics>—Display statistics

<tunnel-group>—Tunnel group to use as filter

<local-tunnel-id>—Local tunnel ID to use as filter

<interface>—Interface name to use as filter

<local-gateway>—Local gateway address to use as filter

<local-gateway-name>—Local gateway name to use as filter

<peer-gateway>—Peer gateway address to use as filter

<peer-gateway-name>—Peer gateway name to use as filter

<local-session-id>—Local session ID to use as filter

<user>—Username to use as filter

<get-l2tp-summary-information>

Usage

```
<rpc>
  <get-l2tp-summary-information>
    <interface>interface</interface>
  </get-l2tp-summary-information>
</rpc>
```

Description Show L2TP summary information

Contents <interface>—Name of adaptive services interface

<get-l2tp-tunnel-information>

Usage

```
<rpc>
  <get-l2tp-tunnel-information>
    <extensive/>
    <brief/>
    <detail/>
    <statistics/>
    <filter>filter</filter>
    <tunnel-group>tunnel-group</tunnel-group>
    <local-tunnel-id>local-tunnel-id</local-tunnel-id>
    <interface>interface</interface>
    <local-gateway>local-gateway</local-gateway>
    <local-gateway-name>local-gateway-name</local-gateway-name>
    <peer-gateway>peer-gateway</peer-gateway>
    <peer-gateway-name>peer-gateway-name</peer-gateway-name>
  </get-l2tp-tunnel-information>
</rpc>
```

Description Show active L2TP tunnel list

Contents <extensive>—Display extensive output

<brief>—Display brief output (default)

<detail>—Display detailed output

<statistics>—Display statistics

<tunnel-group>—Tunnel group to use as filter

<local-tunnel-id>—Local tunnel ID to use as filter

<interface>—Interface name to use as filter

<local-gateway>—Local gateway address to use as filter

<local-gateway-name>—Local gateway name to use as filter

<peer-gateway>—Peer gateway address to use as filter

<peer-gateway-name>—Peer gateway name to use as filter

<get-l2vpn-connection-information>

Usage

```
<rpc>
  <get-l2vpn-connection-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <local-site>local-site</local-site>
    <remote-site>remote-site</remote-site>
    <down/>
    <up/>
    <up-down/>
    <brief/>
    <extensive/>
    <history/>
    <status/>
    <summary/>
  </get-l2vpn-connection-information>
</rpc>
```

Description Show Layer 2 VPN connections information

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of Layer 2 VPN instance

<local-site>—Name or ID of Layer 2 VPN local site

<remote-site>—ID of Layer 2 VPN remote site

<down>—Display nonoperational connections

<up>—Display operational connections

<up-down>—Display both non- and operational connections (default)

<brief>—Display one-line version of output

<extensive>—Display connection status and history

<history>—Display connection history

<status>—Display connection and circuit status (default)

<summary>—Display summary output

<get-lacp-interface-information>

Usage

```
<rpc>
  <get-lacp-interface-information>
    <interface-name>interface-name</interface-name>
  </get-lacp-interface-information>
</rpc>
```

Description Show LACP interfaces information

Contents <interface-name>—Name of interface

<get-lacp-interface-statistics>

Usage

```
<rpc>
  <get-lacp-interface-statistics>
    <interface-name>interface-name</interface-name>
  </get-lacp-interface-statistics>
</rpc>
```

Description Show LACP interface statistics

Contents <interface-name>—Name of interface

<get-lcd-fpc-information>

Usage

```
<rpc>
  <get-lcd-fpc-information>
    <fpc-slot>fpc-slot</fpc-slot>
  </get-lcd-fpc-information>
</rpc>
```

Description Show LCD display for FPC slot number

Contents <fpc-slot>—FPC slot number

<get-lcd-information>

Usage

```
<rpc>
  <get-lcd-information>
</get-lcd-information>
</rpc>
```

Description Show LCD display

Contents <get-lcd-fpc-information>—Show LCD display for FPC slot number
 <menu>—Show active LCD menu items

<get-ldp-database-information>

Usage

```
<rpc>
  <get-ldp-database-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <session>session</session>
    <inet/>
    <l2circuit/>
  </get-ldp-database-information>
</rpc>
```

Description Show LDP label database

Contents <logical-system>—Name of logical system, or 'all'
 <brief>—Display brief output (default)
 <detail>—Display detailed output
 <extensive>—Display extensive output
 <instance>—Name of LDP routing instance
 <session>—IP address of session destination
 <inet>—Display IPv4 bindings
 <l2circuit>—Display Layer 2 circuit bindings

<get-ldp-fec-filters-information>

Usage

```
<rpc>
  <get-ldp-fec-filters-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <fec>fec</fec>
  </get-ldp-fec-filters-information>
</rpc>
```

Description Show filters for forwarding equivalence classes

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of LDP routing instance

<fec>—Forwarding equivalence class

<get-ldp-interface-information>

Usage

```
<rpc>
  <get-ldp-interface-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <interface-name>interface-name</interface-name>
  </get-ldp-interface-information>
</rpc>
```

Description Show LDP interface status

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<instance>—Name of LDP routing instance

<interface-name>—Name of interface

<get-ldp-neighbor-information>

Usage

```

<rpc>
  <get-ldp-neighbor-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <neighbor>neighbor</neighbor>
  </get-ldp-neighbor-information>
</rpc>

```

Description Show LDP neighbor status

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<instance>—Name of LDP routing instance

<neighbor>—IP address of the neighbor

<get-ldp-path-information>

Usage

```

<rpc>
  <get-ldp-path-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <destination>destination</destination>
  </get-ldp-path-information>
</rpc>

```

Description Show LDP path table

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<instance>—Name of LDP routing instance

<destination>—IP address and optional prefix length of destination

<get-ldp-route-information>

Usage

```
<rpc>
  <get-ldp-route-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <destination>destination</destination>
  </get-ldp-route-information>
</rpc>
```

Description Show LDP internal topology table

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<instance>—Name of LDP routing instance

<destination>—IP address and optional prefix length of destination

<get-ldp-session-information>

Usage

```
<rpc>
  <get-ldp-session-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <instance>instance</instance>
    <destination>destination</destination>
  </get-ldp-session-information>
</rpc>
```

Description Show LDP session status

Contents <logical-system>—Name of logical system, or 'all'

 <brief>—Display brief output (default)

 <detail>—Display detailed output

 <extensive>—Display extensive output

 <instance>—Name of LDP routing instance

 <destination>—IP address of session destination

<get-ldp-statistics-information>

Usage

```
<rpc>
  <get-ldp-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-ldp-statistics-information>
</rpc>
```

Description Show LDP statistics

Contents <logical-system>—Name of logical system, or 'all'

 <instance>—Name of LDP routing instance

<get-ldp-traffic-statistics-information>

Usage

```
<rpc>
  <get-ldp-traffic-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <p2mp/>
  </get-ldp-traffic-statistics-information>
</rpc>
```

Description Show packet statistics for LDP label-switched paths

Contents <logical-system>—Name of logical system, or 'all'

 <instance>—Name of LDP routing instance

 <p2mp>—Point to multipoint label-switched paths

<get-led-fpc-information>

Usage

```
<rpc>
  <get-led-fpc-information>
    <fpc-slot>fpc-slot</fpc-slot>
  </get-led-fpc-information>
</rpc>
```

Description Show LED status for FPC slot number

Contents <fpc-slot>—FPC slot number

<get-led-information>

Usage

```
<rpc>
  <get-led-information>
</get-led-information>
</rpc>
```

Description Show LED status

Contents <get-led-fpc-information>—Show LED status for FPC slot number

<get-lfmd-information>

Usage

```
<rpc>
  <get-lfmd-information>
    <detail/>
    <brief/>
    <interface-name>interface-name</interface-name>
  </get-lfmd-information>
</rpc>
```

Description Show link-fault-management information

Contents <detail>—Display detailed data

<brief>—Display brief data (default)

<interface-name>—Name of physical interface

<get-license-information>

Usage

```
<rpc>  
  <get-license-information/>  
</rpc>
```

Description Show installed feature licenses

<get-license-key-information>

Usage

```
<rpc>  
  <get-license-key-information/>  
</rpc>
```

Description Show license keys

<get-license-summary-information>

Usage

```
<rpc>  
  <get-license-summary-information>  
  </get-license-summary-information>  
</rpc>
```

Description Show feature licenses information

Contents <get-license-information>—Show installed feature licenses

<get-license-key-information>—Show license keys

<get-license-usage-summary>—Show licensed features

<get-license-usage-summary>

Usage

```
<rpc>  
  <get-license-usage-summary/>  
</rpc>
```

Description Show licensed features

<get-link-services-cpu-usage>

Usage

```
<rpc>
  <get-link-services-cpu-usage>
    <interface>interface</interface> <!-- mandatory -->
    <brief/>
    <detail/>
  </get-link-services-cpu-usage>
</rpc>
```

Description Show cpu usage as a percentage for the specified PIC

Contents <interface>—Name of link services interface

<brief>—Display brief output (1 and 5 second average)

<detail>—Display detailed output (per cpu average)

<get-lldp-information>

Usage

```
<rpc>
  <get-lldp-information>
  </get-lldp-information>
</rpc>
```

Description Show Link Layer Discovery Protocol information

Contents <get-lldp-information-detail>—Show detailed LLDP information

<get-lldp-neighbors-information>—Show LLDP neighbor information

<get-lldp-statistics-information>—Show LLDP statistics

<get-lldp-local-info>—Show LLDP information of local device

<get-lldp-remote-global-statistics>—Show LLDP remote global statistics information

<get-lldp-information-detail>

Usage

```
<rpc>
  <get-lldp-information-detail/>
</rpc>
```

Description Show detailed LLDP information

<get-lldp-local-info>

Usage

```
<rpc>  
  <get-lldp-local-info/>  
</rpc>
```

Description Show LLDP information of local device

<get-lldp-neighbors-information>

Usage

```
<rpc>  
  <get-lldp-neighbors-information>  
  </get-lldp-neighbors-information>  
</rpc>
```

Description Show LLDP neighbor information

Contents <interface>—Show LLDP neighbors on this interface

<get-lldp-neighbors-information>

Usage

```
<rpc>  
  <get-lldp-neighbors-information>  
  </get-lldp-neighbors-information>  
</rpc>
```

Description Show LLDP neighbor information

Contents <interface>—Show LLDP neighbors on this interface

<get-lldp-remote-global-statistics>

Usage

```
<rpc>  
  <get-lldp-remote-global-statistics/>  
</rpc>
```

Description Show LLDP remote global statistics information

<get-lldp-statistics-information>

Usage

```
<rpc>  
  <get-lldp-statistics-information>  
  </get-lldp-statistics-information>  
</rpc>
```

Description Show LLDP statistics

Contents <interface>—Show LLDP statistics for this interface

<get-lm-information>

Usage

```
<rpc>  
  <get-lm-information>  
  </get-lm-information>  
</rpc>
```

Description Show link management information

Contents <get-lm-peer-information>—Show peer information

<get-lm-te-link-information>—Show traffic engineering links information

<get-lm-statistics-information>—Show link management statistics

<get-lm-routing-information>—Show link management information for routing

<get-lm-peer-information>

Usage

```
<rpc>  
  <get-lm-peer-information>  
    <peer-name>peer-name</peer-name>  
  </get-lm-peer-information>  
</rpc>
```

Description Show peer information

Contents <peer-name>—Name of peer

<get-lm-peer-statistics>

Usage

```
<rpc>
  <get-lm-peer-statistics>
    <peer-name>peer-name</peer-name>
  </get-lm-peer-statistics>
</rpc>
```

Description Show link management statistics for a peer

Contents <peer-name>—Name of peer

<get-lm-routing-information>

Usage

```
<rpc>
  <get-lm-routing-information>
  </get-lm-routing-information>
</rpc>
```

Description Show link management information for routing

Contents <get-lm-routing-peer-information>—Show peer information

<get-lm-routing-te-link-information>—Show traffic engineering links information

<get-lm-routing-resource-information>—Show resource information

<get-lm-routing-peer-information>

Usage

```
<rpc>
  <get-lm-routing-peer-information>
    <peer-name>peer-name</peer-name>
  </get-lm-routing-peer-information>
</rpc>
```

Description Show peer information

Contents <peer-name>—Name of peer

<get-lm-routing-resource-information>

Usage

```
<rpc>
```

```
<get-lm-routing-resource-information>
  <resource-name>resource-name</resource-name>
</get-lm-routing-resource-information>
</rpc>
```

Description Show resource information

Contents <resource-name>—Name of resource

<get-lm-routing-te-link-information>

Usage

```
<rpc>
  <get-lm-routing-te-link-information>
    <brief/>
    <detail/>
    <link-name>link-name</link-name>
  </get-lm-routing-te-link-information>
</rpc>
```

Description Show traffic engineering links information

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<link-name>—Name of traffic engineering link

<get-lm-statistics-information>

Usage

```
<rpc>
  <get-lm-statistics-information>
</get-lm-statistics-information>
</rpc>
```

Description Show link management statistics

Contents <get-lm-peer-statistics>—Show link management statistics for a peer

<get-lm-te-link-information>

Usage

```
<rpc>
  <get-lm-te-link-information>
    <brief/>
    <detail/>
```

```

    <link-name>link-name</link-name>
  </get-lm-te-link-information>
</rpc>

```

Description Show traffic engineering links information

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<link-name>—Name of traffic engineering link

<get-mac-database>

Usage

```

<rpc>
  <get-mac-database>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
    <mac-address>mac-address</mac-address>
  </get-mac-database>
</rpc>

```

Description Show media access control database information

Contents <interface-name>—Name of physical or logical interface

<mac-address>—MAC address

<get-media-gateway-channels>

Usage

```

<rpc>
  <get-media-gateway-channels>
    <list/>
    <types/>
    <status>status</status>
  </get-media-gateway-channels>
</rpc>

```

Description Show channels information

Contents <list>—Show channels list

<types>—Show channels types

<status>—Show channel status for specific channel

<get-media-gateway-codecs>

Usage

```
<rpc>
  <get-media-gateway-codecs/>
</rpc>
```

Description Show codecs information

<get-media-gateway-connections>

Usage

```
<rpc>
  <get-media-gateway-connections/>
</rpc>
```

Description Show media connections information

<get-media-gateway-dialplan>

Usage

```
<rpc>
  <get-media-gateway-dialplan/>
</rpc>
```

Description Show dialplan information

<get-media-gateway-interface>

Usage

```
<rpc>
  <get-media-gateway-interface>
    <terse/>
    <detail/>
    <extensive/>
    <interface-name>interface-name</interface-name>
  </get-media-gateway-interface>
</rpc>
```

Description Show media interface information

Contents <terse>—Show voice interface - asterisk

<detail>—Show voice interface - asterisk

<extensive>—Show voice interface - driver

<interface-name>—Name of physical interface

<get-media-gateway-log>

Usage

```
<rpc>
  <get-media-gateway-log>
    <level>level</level>
    <verbose>verbose</verbose>
  </get-media-gateway-log>
</rpc>
```

Description Show log information

Contents <level>—Show logs with debug level
 <verbose>—Show logs with verbosity level

<get-media-gateway-registers>

Usage

```
<rpc>
  <get-media-gateway-registers/>
</rpc>
```

Description Dump all h/w register for voice interface

<get-media-gateway-statistics>

Usage

```
<rpc>
  <get-media-gateway-statistics>
    <start-session>start-session</start-session>
    <rxtx-statistics>rxtx-statistics</rxtx-statistics>
    <rtcpxr-local>rtcpxr-local</rtcpxr-local>
    <rtcpxr-remote>rtcpxr-remote</rtcpxr-remote>
    <voice-quality-statistics>voice-quality-statistics</voice-quality-statistics>
    <stop-session>stop-session</stop-session>
  </get-media-gateway-statistics>
</rpc>
```

Description Show statistics information

Contents <start-session>—Start statistics session for specific channel

<rxtx-statistics>—Show receive/transmit statistics for specific session

<rtcpxr-local>—Show local RTCP extended reports for specific session

<rtcpxr-remote>—Show remote RTCP extended reports for specific session

<voice-quality-statistics>—Show voice quality statistics for specific session

<stop-session>—Stop specific statistics session

<get-media-gateway-threads>

Usage

```
<rpc>
  <get-media-gateway-threads/>
</rpc>
```

Description Show threads information

<get-media-gateway-uptime>

Usage

```
<rpc>
  <get-media-gateway-uptime/>
</rpc>
```

Description Show uptime information

<get-mip-binding-information>

Usage

```
<rpc>
  <get-mip-binding-information>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-mip-binding-information>
</rpc>
```

Description Show binding information

Contents

<routing-instance>—Name of routing instance

<logical-system>—Name of logical system

<get-nai-mip-binding-information>—Show binding detail based on nai

<get-ip-mip-binding-information>—Show binding detail based on IP address

<get-summary-mip-binding-information>—Show summary of binding table

<get-mip-ha-interface-information>

Usage

```
<rpc>
  <get-mip-ha-interface-information>
    <interface-name>interface-name</interface-name>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-mip-ha-interface-information>
</rpc>
```

Description Show home-agent details on the interfaces it is running

Contents <interface-name>—Show home-agent details based on interface

<routing-instance>—Name of routing instance

<logical-system>—Name of logical system

<get-mip-ha-overview-information>

Usage

```
<rpc>
  <get-mip-ha-overview-information>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-mip-ha-overview-information>
</rpc>
```

Description Show overview

Contents <routing-instance>—Name of routing instance

<logical-system>—Name of logical system

<get-mip-ha-traffic-information>

Usage

```
<rpc>
  <get-mip-ha-traffic-information>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-mip-ha-traffic-information>
</rpc>
```

Description Show traffic information

Contents <routing-instance>—Name of routing instance
<logical-system>—Name of logical system

<get-mip-ha-virtual-network-information>

Usage

```
<rpc>  
  <get-mip-ha-virtual-network-information>  
    <routing-instance>routing-instance</routing-instance>  
    <logical-system>logical-system</logical-system>  
  </get-mip-ha-virtual-network-information>  
</rpc>
```

Description Show virtual network related information

Contents <routing-instance>—Name of routing instance
<logical-system>—Name of logical system

<get-mip-wimax-release-information>

Usage

```
<rpc>  
  <get-mip-wimax-release-information>  
    <routing-instance>routing-instance</routing-instance>  
    <logical-system>logical-system</logical-system>  
  </get-mip-wimax-release-information>  
</rpc>
```

Description Show WiMAX release supported by Mobile IP

Contents <routing-instance>—Name of routing instance
<logical-system>—Name of logical system

<get-mld-group-information>

Usage

```
<rpc>  
  <get-mld-group-information>  
    <logical-system>logical-system</logical-system>  
    <terse/>  
    <brief/>  
    <detail/>  
    <group-name>group-name</group-name>
```

```

    </get-mld-group-information>
  </rpc>

```

Description Show MLD group members

Contents <logical-system>—Name of logical system, or 'all'

<terse>—Display terse output

<brief>—Display brief output (default)

<detail>—Display detailed output

<group-name>—Name of group

<get-mld-interface-information>

Usage

```

<rpc>
  <get-mld-interface-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <interface-name>interface-name</interface-name>
  </get-mld-interface-information>
</rpc>

```

Description Show MLD interfaces

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<interface-name>—Name of interface

<get-mld-output-group-information>

Usage

```

<rpc>
  <get-mld-output-group-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <group-name>group-name</group-name>
  </get-mld-output-group-information>
</rpc>

```

Description	Show MLD output group members
Contents	<p><logical-system>—Name of logical system, or 'all'</p> <p><brief>—Display brief output (default)</p> <p><detail>—Display detailed output</p> <p><group-name>—Name of group</p>

<get-mld-statistics-information>

Usage

```
<rpc>  
  <get-mld-statistics-information>  
    <logical-system>logical-system</logical-system>  
    <interface>interface</interface>  
  </get-mld-statistics-information>  
</rpc>
```

Description	Show MLD statistics
Contents	<p><logical-system>—Name of logical system, or 'all'</p> <p><interface>—Name of interface</p>

<get-mpls-admin-group-information>

Usage

```
<rpc>  
  <get-mpls-admin-group-information>  
    <logical-system>logical-system</logical-system>  
  </get-mpls-admin-group-information>  
</rpc>
```

Description	Show MPLS administrative groups
Contents	<logical-system>—Name of logical system, or 'all'

<get-mpls-call-admission-control-information>

Usage

```
<rpc>  
  <get-mpls-call-admission-control-information>  
    <logical-system>logical-system</logical-system>  
    <lsp-name>lsp-name</lsp-name>  
  </get-mpls-call-admission-control-information>
```

```
</rpc>
```

Description Show CAC information for MPLS LSPs

Contents <logical-system>—Name of logical system, or 'all'
 <lsp-name>—Name of LSP

<get-mpls-context-identifier-information>

Usage

```
<rpc>
  <get-mpls-context-identifier-information>
    <logical-system>logical-system</logical-system>
    <primary/>
    <protector/>
    <brief/>
    <detail/>
    <id>id</id>
  </get-mpls-context-identifier-information>
</rpc>
```

Description Show configured egress protection context identifiers

Contents <logical-system>—Name of logical system, or 'all'
 <primary>—Display primary context identifier(s)
 <protector>—Display protector context identifier(s)
 <brief>—Display brief output (default)
 <detail>—Display detailed output
 <id>—Identifier

<get-mpls-cspf-information>

Usage

```
<rpc>
  <get-mpls-cspf-information>
    <logical-system>logical-system</logical-system>
  </get-mpls-cspf-information>
</rpc>
```

Description Show Constrained Shortest Path First statistics

Contents <logical-system>—Name of logical system, or 'all'

<get-mpls-diffserv-te-information>

Usage

```
<rpc>
  <get-mpls-diffserv-te-information>
    <logical-system>logical-system</logical-system>
  </get-mpls-diffserv-te-information>
</rpc>
```

Description Show MPLS Differentiated Services traffic engineering global properties

Contents <logical-system>—Name of logical system, or 'all'

<get-mpls-interface-information>

Usage

```
<rpc>
  <get-mpls-interface-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
  </get-mpls-interface-information>
</rpc>
```

Description Show MPLS interfaces

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<get-mpls-lsp-defaults-information>

Usage

```
<rpc>
  <get-mpls-lsp-defaults-information>
    <logical-system>logical-system</logical-system>
  </get-mpls-lsp-defaults-information>
</rpc>
```

Description Display LSP defaults

Contents <logical-system>—Name of logical system, or 'all'

<get-mpls-lsp-information>

Usage

```

<rpc>
  <get-mpls-lsp-information>
    <logical-system>logical-system</logical-system>
    <ingress/>
    <egress/>
    <transit/>
    <terse/>
    <brief/>
    <detail/>
    <extensive/>
    <descriptions/>
    <up/>
    <down/>
    <unidirectional/>
    <bidirectional/>
    <p2mp/>
    <statistics/>
    <bypass/>
    <regex>regex</regex>
  </get-mpls-lsp-information>
</rpc>

```

Description Show configured label-switched paths

Contents <logical-system>—Name of logical system, or 'all'

<ingress>—Display LSPs originating at this router

<egress>—Display LSPs ending at this router

<transit>—Display LSPs transiting this router

<terse>—Display terse output

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<descriptions>—Display LSP description strings

<up>—Display active LSPs

<down>—Display inactive LSPs

<unidirectional>—Display unidirectional LSPs

<bidirectional>—Display bidirectional LSPs

<p2mp>—Display point-to-multipoint LSPs

<statistics>—Display packet statistics for LSPs

<bypass>—Display LSPs used for protecting other LSPs

<get-mpls-lsp-defaults-information>—Display LSP defaults

<regex>—Regular expression for LSP names to match

<get-mpls-path-information>

Usage

```
<rpc>
  <get-mpls-path-information>
    <logical-system>logical-system</logical-system>
    <path>path</path>
  </get-mpls-path-information>
</rpc>
```

Description Show configured named paths

Contents <logical-system>—Name of logical system, or 'all'

<path>—Name of label-switched path

<get-mpls-static-lsp-information>

Usage

```
<rpc>
  <get-mpls-static-lsp-information>
    <logical-system>logical-system</logical-system>
    <bypass/>
    <ingress/>
    <transit/>
    <terse/>
    <brief/>
    <detail/>
    <extensive/>
    <descriptions/>
    <statistics/>
    <up/>
    <down/>
    <regex>regex</regex>
  </get-mpls-static-lsp-information>
</rpc>
```

Description Show configured static label-switched paths

Contents <logical-system>—Name of logical system, or 'all'

<bypass>—Display bypass LSPs originating at this router
 <ingress>—Display LSPs originating at this router
 <transit>—Display LSPs transiting this router
 <terse>—Display terse output
 <brief>—Display brief output (default)
 <detail>—Display detailed output
 <extensive>—Display extensive output
 <descriptions>—Display LSP description strings
 <statistics>—Display packet statistics for LSPs
 <up>—Display active LSPs
 <down>—Display inactive LSPs
 <regex>—Regular expression for LSP names to match

<get-msdp-source-active-information>

Usage

```

<rpc>
  <get-msdp-source-active-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <group>group</group>
    <source>source</source>
    <peer>peer</peer>
    <local/>
    <originator>originator</originator>
    <brief/>
    <detail/>
  </get-msdp-source-active-information>
</rpc>

```

Description Show the source-active (SA) cache

Contents

- <logical-system>—Name of logical system, or 'all'
- <instance>—Name of instance
- <group>—Name of group
- <source>—Name of source
- <peer>—IPv4 address of peer

<local>—Display SA cache entries originating at this router

<originator>—IPv4 address of peer that originated SA cache entries

<brief>—Display brief output (default)

<detail>—Display detailed output

<get-msdp-source-information>

Usage

```
<rpc>
  <get-msdp-source-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <source>source</source>
  </get-msdp-source-information>
</rpc>
```

Description Show multicast sources learned from MSDP

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<source>—IP address and optional prefix length of source

<get-msdp-statistics-information>

Usage

```
<rpc>
  <get-msdp-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <peer>peer</peer>
  </get-msdp-statistics-information>
</rpc>
```

Description Show MSDP statistics

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<peer>—IPv4 address and optional prefix length of MSDP peers

<get-msp-session-table>

Usage

```

<rpc>
  <get-msp-session-table>
    <all/>
    <limit>limit</limit>
    <extensive/>
    <brief/>
    <terse/>
    <source-prefix>source-prefix</source-prefix>
    <destination-prefix>destination-prefix</destination-prefix>
    <source-port>source-port</source-port>
    <destination-port>destination-port</destination-port>
    <protocol>protocol</protocol>
    <service-set>service-set</service-set>
    <interface>interface</interface>
    <get-service-msp-sess-count-information/>
  </get-msp-session-table>
</rpc>

```

Description Show session table entries

Contents <all>—Display all the entries

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<limit>—Maximum number of entries to display

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<extensive>—Display extensive output

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<brief>—Display brief output (default)

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<terse>—Display terse output

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<source-prefix>—Source prefix to use as filter

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<destination-prefix>—Destination prefix to use as filter

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<source-port>—Source port to use as filter

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<destination-port>—Destination port to use as filter

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<protocol>—IP protocol type to use as filter

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<service-set>—Name of service set

<interface>—Name of extension provider interface

<get-service-msp-sess-count-information>—Show count of matching entries

<get-mspinfo-connections>

Usage

```
<rpc>
  <get-mspinfo-connections>
    <inet/>
    <inet6/>
    <extensive/>
    <show-routing-instances/>
    <interface>interface</interface>
  </get-mspinfo-connections>
</rpc>
```

Description Show connection activity on the extension provider PIC

Contents <inet>—Display IPv4 connections

<inet6>—Display IPv6 connections

<extensive>—Display extensive output

<show-routing-instances>—Display routing instances

<interface>—Name of extension provider interface

<get-mspinfo-packages>

Usage

```
<rpc>
  <get-mspinfo-packages>
    <detail/>
    <interface>interface</interface>
  </get-mspinfo-packages>
</rpc>
```

Description Show packages loaded on the extension provider PIC

Contents <detail>—

<interface>—Name of extension provider interface

<get-mspinfo-processes>

Usage

```
<rpc>
  <get-mspinfo-processes>
    <detail/>
    <wide/>
    <interface>interface</interface>
  </get-mspinfo-processes>
</rpc>
```

Description Show system process table on the extension provider PIC

Contents <detail>—Display detailed output

<wide>—Display information even if wider than 80 columns

<get-mspinfo-processes-brief>—Display brief output

<get-mspinfo-processes-extensive>—Display brief output

<interface>—Name of extension provider interface

<get-mspinfo-processes-brief>

Usage

```
<rpc>
  <get-mspinfo-processes-brief>
    <interface>interface</interface>
```

```
</get-mspinfo-processes-brief>
</rpc>
```

Description Display brief output

Contents <interface>—Name of extension provider interface

<get-mspinfo-processes-extensive>

Usage

```
<rpc>
  <get-mspinfo-processes-extensive>
    <interface>interface</interface>
  </get-mspinfo-processes-extensive>
</rpc>
```

Description Display brief output

Contents <interface>—Name of extension provider interface

<get-mspinfo-uptime>

Usage

```
<rpc>
  <get-mspinfo-uptime>
    <interface>interface</interface>
  </get-mspinfo-uptime>
</rpc>
```

Description Show uptime on the extension provider PIC

Contents <interface>—Name of extension provider interface

<get-mspinfo-virtual-memory>

Usage

```
<rpc>
  <get-mspinfo-virtual-memory>
    <interface>interface</interface>
  </get-mspinfo-virtual-memory>
</rpc>
```

Description Show kernel dynamic memory usage on the extension provider PIC

Contents <interface>—Name of extension provider interface

<get-mstp-bridge-configuration-information>

Usage

```
<rpc>
  <get-mstp-bridge-configuration-information>
  <brief/>
  <detail/>
  </get-mstp-bridge-configuration-information>
</rpc>
```

Description Show MSTP configuration

Contents <brief>—Display brief output (default)
 <detail>—Display detailed output

<get-multicast-backup-pe-address-information>

Usage

```
<rpc>
  <get-multicast-backup-pe-address-information>
  <logical-system>logical-system</logical-system>
  <pe_address>pe_address</pe_address> <!-- mandatory -->
  </get-multicast-backup-pe-address-information>
</rpc>
```

Description Show groups a PE address is associated with

Contents <logical-system>—Name of logical system, or 'all'
 <pe_address>—IP address of the PE

<get-multicast-backup-pe-groups-information>

Usage

```
<rpc>
  <get-multicast-backup-pe-groups-information>
  <logical-system>logical-system</logical-system>
  <instance>instance</instance>
  </get-multicast-backup-pe-groups-information>
</rpc>
```

Description Show backup PE groups

Contents <logical-system>—Name of logical system, or 'all'
 <instance>—Name of instance

<group>—Show information for specified group

<get-multicast-backup-pe-address-information>—Show groups a PE address is associated with

<get-multicast-flow-maps-information>

Usage

```
<rpc>
  <get-multicast-flow-maps-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
  </get-multicast-flow-maps-information>
</rpc>
```

Description Show configured flow maps

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<get-multicast-interface-information>

Usage

```
<rpc>
  <get-multicast-interface-information>
    <logical-system>logical-system</logical-system>
  </get-multicast-interface-information>
</rpc>
```

Description Show configured interfaces

Contents <logical-system>—Name of logical system, or 'all'

<get-multicast-next-hops-information>

Usage

```
<rpc>
  <get-multicast-next-hops-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <identifier>identifier</identifier>
    <inet/>
    <inet6/>
  </get-multicast-next-hops-information>
```

```
</rpc>
```

Description	Show the multicast next-hop table
Contents	<p><logical-system>—Name of logical system, or 'all'</p> <p><brief>—Display brief output (default)</p> <p><detail>—Display detailed output</p> <p><identifier>—ID of next hop</p> <p><inet>—Display IPv4 information</p> <p><inet6>—Display IPv6 information</p>

<get-multicast-pim-to-igmp-proxy-information>

Usage

```
<rpc>
  <get-multicast-pim-to-igmp-proxy-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-multicast-pim-to-igmp-proxy-information>
</rpc>
```

Description	Show pim-to-igmp-proxy information
Contents	<p><logical-system>—Name of logical system, or 'all'</p> <p><instance>—Name of instance</p>

<get-multicast-pim-to-mld-proxy-information>

Usage

```
<rpc>
  <get-multicast-pim-to-mld-proxy-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-multicast-pim-to-mld-proxy-information>
</rpc>
```

Description	Show pim-to-mld-proxy information
Contents	<p><logical-system>—Name of logical system, or 'all'</p> <p><instance>—Name of instance</p>

<get-multicast-route-information>

Usage

```
<rpc>
  <get-multicast-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <all/>
    <active/>
    <inactive/>
    <brief/>
    <detail/>
    <extensive/>
    <inet/>
    <inet6/>
    <group>group</group>
    <source-prefix>source-prefix</source-prefix>
    <regexp>regexp</regexp>
  </get-multicast-route-information>
</rpc>
```

Description Show the multicast routing table

Contents

- <logical-system>—Name of logical system, or 'all'
- <instance>—Name of instance
- <all>—Display all route entries
- <active>—Display active route entries
- <inactive>—Display inactive route entries
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <extensive>—Display extensive output
- <inet>—Display IPv4 information
- <inet6>—Display IPv6 information
- <group>—IP address and optional prefix length of group
- <source-prefix>—IP address and optional prefix length of source for routes
- <regexp>—Regular expression for session to match

<get-multicast-rpf-information>

Usage

```

<rpc>
  <get-multicast-rpf-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <summary/>
    <prefix>prefix</prefix>
    <inet/>
    <inet6/>
  </get-multicast-rpf-information>
</rpc>

```

Description Show reverse-path forwarding (RPF) source network information

Contents

- <logical-system>—Name of logical system, or 'all'
- <instance>—Name of instance
- <summary>—Display summary output
- <prefix>—IP address and optional prefix length of host
- <inet>—Display RPF information for IPv4
- <inet6>—Display RPF information for IPv6

<get-multicast-scope-information>

Usage

```

<rpc>
  <get-multicast-scope-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <inet/>
    <inet6/>
  </get-multicast-scope-information>
</rpc>

```

Description Show administratively scoped multicast information

Contents

- <logical-system>—Name of logical system, or 'all'
- <instance>—Name of instance
- <inet>—Display IPv4 information
- <inet6>—Display IPv6 information

<get-multicast-sessions-information>

Usage

```
<rpc>
  <get-multicast-sessions-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <regex>regex</regex>
  </get-multicast-sessions-information>
</rpc>
```

Description Show announced multicast sessions

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<regex>—Regular expression for sessions to match

<get-multicast-snooping-next-hops-information>

Usage

```
<rpc>
  <get-multicast-snooping-next-hops-information>
    <brief/>
    <detail/>
    <identifier>identifier</identifier>
  </get-multicast-snooping-next-hops-information>
</rpc>
```

Description Show the multicast next-hop snooping table

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<identifier>—ID of next hop

<get-multicast-snooping-route-information>

Usage

```
<rpc>
  <get-multicast-snooping-route-information>
```

```

<all/>
<active/>
<inactive/>
<brief/>
<detail/>
<extensive/>
<vlan-id>vlan-id</vlan-id>
<mesh-group>mesh-group</mesh-group>
<group>group</group>
<source-prefix>source-prefix</source-prefix>
<regex>regex</regex>
<bridge-domain>bridge-domain</bridge-domain>
<instance>instance</instance>
</get-multicast-snooping-route-information>
</rpc>

```

Description Show the multicast snooping routing table

Contents

- <all>—Display all route entries
- <active>—Display active route entries
- <inactive>—Display inactive route entries
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <extensive>—Display extensive output
- <vlan-id>—VLAN ID for a learning domain
- <mesh-group>—Name of a mesh-group
- <group>—IP address and optional prefix length of group
- <source-prefix>—IP address and optional prefix length of source
- <regex>—Regular expression for session to match
- <bridge-domain>—Name of bridge-domain
- <instance>—Name of routing-instance

<get-multicast-statistics-information>

Usage

```

<rpc>
<get-multicast-statistics-information>
<logical-system>logical-system</logical-system>
<instance>instance</instance>
<inet/>
<inet6/>

```

```
</get-multicast-statistics-information>
</rpc>
```

Description Show multicast statistics

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<inet>—Display statistics for IPv4

<inet6>—Display statistics for IPv6

<get-multicast-usage-information>

Usage

```
<rpc>
  <get-multicast-usage-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <brief/>
    <detail/>
    <inet/>
    <inet6/>
  </get-multicast-usage-information>
</rpc>
```

Description Show multicast usage information

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<brief>—Display brief output (default)

<detail>—Display detailed output

<inet>—Display IPv4 information

<inet6>—Display IPv6 information

<get-mvpn-instance-information>

Usage

```
<rpc>
  <get-mvpn-instance-information>
    <logical-system>logical-system</logical-system>
    <instance-name>instance-name</instance-name>
    <summary/>
    <extensive/>
  </get-mvpn-instance-information>
</rpc>
```

```

</get-mvpn-instance-information>
</rpc>

```

Description Show MVPN instance

Contents <logical-system>—Name of logical system, or 'all'

<instance-name>—Name of MVPN instance

<summary>—Display summary output

<extensive>—Display detailed version of output

<get-mvrp-applicant-information>

Usage

```

<rpc>
  <get-mvrp-applicant-information>
    <logical-system>logical-system</logical-system>
    <routing-instance>routing-instance</routing-instance>
    <interface>interface</interface>
    <vlan>vlan</vlan>
  </get-mvrp-applicant-information>
</rpc>

```

Description Show MVRP applicant state

Contents <logical-system>—Name of logical system

<routing-instance>—Name of routing instance

<interface>—Name of interface

<vlan>—VLAN ID

<get-mvrp-dynamic-vlan-memberships>

Usage

```

<rpc>
  <get-mvrp-dynamic-vlan-memberships>
    <logical-system>logical-system</logical-system>
    <routing-instance>routing-instance</routing-instance>
    <vlan>vlan</vlan>
    <interface>interface</interface>
  </get-mvrp-dynamic-vlan-memberships>
</rpc>

```

Description Show MVRP dynamic VLAN memberships

Contents <logical-system>—Name of logical system
 <routing-instance>—Name of routing instance
 <vlan>—VLAN ID
 <interface>—Name of interface

<get-mvrp-dynamic-vlan-memberships>

Usage

```
<rpc>  
  <get-mvrp-dynamic-vlan-memberships/>  
</rpc>
```

Description Show MVRP dynamic VLAN memberships

<get-mvrp-information>

Usage

```
<rpc>  
  <get-mvrp-information>  
    <logical-system>logical-system</logical-system>  
    <routing-instance>routing-instance</routing-instance>  
  </get-mvrp-information>  
</rpc>
```

Description Show MVRP Protocol information

Contents <logical-system>—Name of logical system
 <routing-instance>—Name of routing instance
 <get-mvrp-interface-information>—Show MVRP interface information
 <get-mvrp-registration-state>—Show MVRP registration state
 <get-mvrp-applicant-information>—Show MVRP applicant state
 <get-mvrp-interface-statistics>—Show MVRP interface statistics
 <get-mvrp-dynamic-vlan-memberships>—Show MVRP dynamic VLAN memberships

<get-mvrp-information>

Usage

```
<rpc>  
  <get-mvrp-information>  
  </get-mvrp-information>
```

```
</rpc>
```

Description Show Multiple VLAN Registration Protocol information

Contents <get-mvrp-stats>—Show MVRP statistics
 <get-mvrp-dynamic-vlan-memberships>—Show MVRP dynamic VLAN memberships

<get-mvrp-interface-information>

Usage

```
<rpc>
  <get-mvrp-interface-information>
    <logical-system>logical-system</logical-system>
    <routing-instance>routing-instance</routing-instance>
    <interface>interface</interface>
  </get-mvrp-interface-information>
</rpc>
```

Description Show MVRP interface information

Contents <logical-system>—Name of logical system
 <routing-instance>—Name of routing instance
 <interface>—Name of interface

<get-mvrp-interface-statistics>

Usage

```
<rpc>
  <get-mvrp-interface-statistics>
    <logical-system>logical-system</logical-system>
    <routing-instance>routing-instance</routing-instance>
    <interface>interface</interface>
  </get-mvrp-interface-statistics>
</rpc>
```

Description Show MVRP interface statistics

Contents <logical-system>—Name of logical system
 <routing-instance>—Name of routing instance
 <interface>—Name of interface

<get-mvrp-registration-state>

Usage

```
<rpc>
  <get-mvrp-registration-state>
    <logical-system>logical-system</logical-system>
    <routing-instance>routing-instance</routing-instance>
    <interface>interface</interface>
    <vlan>vlan</vlan>
  </get-mvrp-registration-state>
</rpc>
```

Description Show MVRP registration state

Contents <logical-system>—Name of logical system

<routing-instance>—Name of routing instance

<interface>—Name of interface

<vlan>—VLAN ID

<get-mvrp-stats>

Usage

```
<rpc>
  <get-mvrp-stats>
</get-mvrp-stats>
</rpc>
```

Description Show MVRP statistics

Contents <get-mvrp-stats-intf>—Show MVRP statistics on this interface

<get-mvrp-stats-intf>

Usage

```
<rpc>
  <get-mvrp-stats-intf>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </get-mvrp-stats-intf>
</rpc>
```

Description Show MVRP statistics on this interface

Contents <interface-name>—Show statistics for this interface

<get-nai-mip-binding-information>

Usage

```
<rpc>
  <get-nai-mip-binding-information>
    <network-access-identifier>network-access-identifier</network-access-identifier>
  <!-- mandatory -->
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </get-nai-mip-binding-information>
</rpc>
```

Description Show binding detail based on nai

Contents <network-access-identifier>—Show binding detail based on nai

<routing-instance>—Name of routing instance

<logical-system>—Name of logical system

<get-operational-routing-instance-information>

Usage

```
<rpc>
  <get-operational-routing-instance-information/>
</rpc>
```

Description Show operational routing instances

<get-ospf-backup-coverage-information>

Usage

```
<rpc>
  <get-ospf-backup-coverage-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <topology>topology</topology>
  </get-ospf-backup-coverage-information>
</rpc>
```

Description Show OSPF backup coverage

Contents <logical-system>—Name of logical system, or 'all'

- default - Default topology
- ipv4-multicast - IPv4 multicast topology

- name - Topology name

<instance>—Name of OSPF instance

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<topology>—Name of topology

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<get-ospf-backup-lsp-information>

Usage

```
<rpc>  
  <get-ospf-backup-lsp-information>  
    <logical-system>logical-system</logical-system>  
  </get-ospf-backup-lsp-information>  
</rpc>
```

Description Show OSPF MPLS backup LSP information

Contents <logical-system>—Name of logical system, or 'all'

<get-ospf-backup-neighbor-information>

Usage

```
<rpc>  
  <get-ospf-backup-neighbor-information>  
    <logical-system>logical-system</logical-system>  
    <instance>instance</instance>  
    <topology>topology</topology>  
    <area>area</area>  
  </get-ospf-backup-neighbor-information>  
</rpc>
```

Description Show OSPF backup neighbors

Contents <logical-system>—Name of logical system, or 'all'

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<instance>—Name of OSPF instance

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<topology>—Name of topology

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<area>—OSPF area ID

<get-ospf-backup-spf-information>

Usage

```
<rpc>
  <get-ospf-backup-spf-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <topology>topology</topology>
    <area>area</area>
    <no-coverage/>
    <node-id>node-id</node-id>
    <brief/>
    <detail/>
  </get-ospf-backup-spf-information>
</rpc>
```

Description Show OSPF backup SPF calculations information

Contents <logical-system>—Name of logical system, or 'all'

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<instance>—Name of OSPF instance

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<topology>—Name of topology

- default - Default topology

- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<area>—OSPF area ID

<no-coverage>—Entries with no backup coverage

<node-id>—Display nodes matching the node-id

<brief>—Display brief output (default)

<detail>—Display detailed output

<get-ospf-context-id-information>

Usage

```
<rpc>
  <get-ospf-context-id-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <context-id>context-id</context-id>
    <area>area</area>
    <instance>instance</instance>
  </get-ospf-context-id-information>
</rpc>
```

Description Show OSPF context identifier information

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<context-id>—IP address representing a context identifier

<area>—OSPF area ID

<instance>—Name of OSPF instance

<get-ospf-database-information>

Usage

```
<rpc>
  <get-ospf-database-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <summary/>
```

```

<router/>
<network/>
<netsummary/>
<asbrsummary/>
<external/>
<nssa/>
<link-local/>
<opaque-area/>
<area>area</area>
<lsa-id>lsa-id</lsa-id>
<advertising-router>advertising-router</advertising-router>
<instance>instance</instance>
</get-ospf-database-information>
</rpc>

```

Description Show OSPF link-state database

Contents <logical-system>—Name of logical system, or 'all'

- self - Router ID of this router
- router-id - Router ID of advertising router

<brief>—Display brief output (default)

- self - Router ID of this router
- router-id - Router ID of advertising router

<detail>—Display detailed output

- self - Router ID of this router
- router-id - Router ID of advertising router

<extensive>—Display extensive output

- self - Router ID of this router
- router-id - Router ID of advertising router

<summary>—Display summary output

- self - Router ID of this router
- router-id - Router ID of advertising router

<router>—Router link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<network>—Network link-state advertisements

- self - Router ID of this router

- router-id - Router ID of advertising router

<netsummary>—Summary network link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<asbrsummary>—Summary AS boundary router link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<external>—External link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<nssa>—Not-so-stubby area link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<link-local>—Link local link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<opaque-area>—Opaque area-scope link-state advertisements

- self - Router ID of this router
- router-id - Router ID of advertising router

<area>—OSPF area ID

- self - Router ID of this router
- router-id - Router ID of advertising router

<lsa-id>—Link-state advertisement ID

- self - Router ID of this router
- router-id - Router ID of advertising router

<advertising-router>—Router ID of advertising router

- self - Router ID of this router
- router-id - Router ID of advertising router

<instance>—Name of OSPF instance

<get-ospf-interface-information>

Usage

```
<rpc>
  <get-ospf-interface-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <interface-name>interface-name</interface-name>
    <area>area</area>
    <instance>instance</instance>
  </get-ospf-interface-information>
</rpc>
```

Description Show OSPF interface status information

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<interface-name>—Name of logical interface

<area>—OSPF area ID

<instance>—Name of OSPF instance

<get-ospf-io-statistics-information>

Usage

```
<rpc>
  <get-ospf-io-statistics-information>
    <logical-system>logical-system</logical-system>
  </get-ospf-io-statistics-information>
</rpc>
```

Description Show OSPF I/O statistics

Contents <logical-system>—Name of logical system, or 'all'

<get-ospf-log-information>

Usage

```
<rpc>
  <get-ospf-log-information>
```

```
<logical-system>logical-system</logical-system>
<instance>instance</instance>
<topology>topology</topology>
</get-ospf-log-information>
</rpc>
```

Description Show shortest-path-first calculations from OSPF log

Contents <logical-system>—Name of logical system, or 'all'

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<instance>—Name of OSPF instance

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<topology>—Name of topology

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<get-ospf-neighbor-information>

Usage

```
<rpc>
  <get-ospf-neighbor-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <interface>interface</interface>
    <area>area</area>
    <neighbor>neighbor</neighbor>
    <instance>instance</instance>
  </get-ospf-neighbor-information>
</rpc>
```

Description Show OSPF neighbor status information

Contents <logical-system>—Name of logical system, or 'all'

- all - Show all instances

- instance-name - Name of OSPF instance

<brief>—Display brief output (default)

- all - Show all instances
- instance-name - Name of OSPF instance

<detail>—Display detailed output

- all - Show all instances
- instance-name - Name of OSPF instance

<extensive>—Display extensive output

- all - Show all instances
- instance-name - Name of OSPF instance

<interface>—Name of logical interface

- all - Show all instances
- instance-name - Name of OSPF instance

<area>—OSPF area ID

- all - Show all instances
- instance-name - Name of OSPF instance

<neighbor>—IP address or ID of neighbor

- all - Show all instances
- instance-name - Name of OSPF instance

<instance>—Name of OSPF instance

- all - Show all instances
- instance-name - Name of OSPF instance

<get-ospf-overview-information>

Usage

```
<rpc>
  <get-ospf-overview-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <extensive/>
    <instance>instance</instance>
  </get-ospf-overview-information>
</rpc>
```

Description Show overview of OSPF information

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<extensive>—Display extensive output

<instance>—Name of OSPF instance

<get-ospf-route-information>

Usage

```
<rpc>
  <get-ospf-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <topology>topology</topology>
    <intra/>
    <inter/>
    <extern/>
    <router/>
    <abr/>
    <asbr/>
    <network/>
    <no-backup-coverage/>
    <destination>destination</destination>
    <brief/>
    <detail/>
    <extensive/>
  </get-ospf-route-information>
</rpc>
```

Description Show OSPF routing table

Contents <logical-system>—Name of logical system, or 'all'

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<instance>—Name of OSPF instance

- default - Default topology
- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<topology>—Name of topology

- default - Default topology

- ipv4-multicast - IPv4 multicast topology
- name - Topology name

<intra>—Display intra-area routes

<inter>—Display inter-area routes

<extern>—Display external routes

<router>—Display routes to all routers

<abr>—Display routes to area border routers

<asbr>—Display routes to AS border routers

<network>—Display routes to networks

<no-backup-coverage>—Display routes with no backup coverage

<destination>—IP address and optional prefix length of destination

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<get-ospf-statistics-information>

Usage

```
<rpc>
  <get-ospf-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-ospf-statistics-information>
</rpc>
```

Description Show OSPF statistics

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of OSPF instance

<get-ospf3-backup-coverage-information>

Usage

```
<rpc>
  <get-ospf3-backup-coverage-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <realm>realm</realm>
```

```
</get-ospf3-backup-coverage-information>
</rpc>
```

Description Show OSPFv3 backup coverage

Contents <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPF instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<get-ospf3-backup-lsp-information>

Usage

```
<rpc>
  <get-ospf3-backup-lsp-information>
    <logical-system>logical-system</logical-system>
    <realm>realm</realm>
  </get-ospf3-backup-lsp-information>
</rpc>
```

Description Show OSPFv3 MPLS backup LSP information

Contents <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm

- ipv4-multicast - IPv4 multicast realm

<get-ospf3-backup-neighbor-information>

Usage

```
<rpc>
  <get-ospf3-backup-neighbor-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <area>area</area>
  </get-ospf3-backup-neighbor-information>
</rpc>
```

Description Show OSPFv3 backup neighbors

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of OSPF instance

<area>—OSPF area ID

<get-ospf3-backup-spf-information>

Usage

```
<rpc>
  <get-ospf3-backup-spf-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <realm>realm</realm>
    <area>area</area>
    <no-coverage/>
    <node-id>node-id</node-id>
    <brief/>
    <detail/>
  </get-ospf3-backup-spf-information>
</rpc>
```

Description Show OSPFv3 backup SPF calculations information

Contents <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPF instance

- ipv6-multicast - IPv6 multicast realm

- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<area>—OSPF area ID

<no-coverage>—Entries with no backup coverage

<node-id>—Display nodes matching the node-id

<brief>—Display brief output (default)

<detail>—Display detailed output

<get-ospf3-database-information>

Usage

```
<rpc>
  <get-ospf3-database-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <summary/>
    <router/>
    <network/>
    <inter-area-prefix/>
    <inter-area-router/>
    <external/>
    <nssa/>
    <link/>
    <link-local/>
    <intra-area-prefix/>
    <area>area</area>
    <lsa-id>lsa-id</lsa-id>
    <advertising-router>advertising-router</advertising-router>
    <instance>instance</instance>
    <realm>realm</realm>
  </get-ospf3-database-information>
</rpc>
```

Description Show OSPFv3 link-state database

Contents <logical-system>—Name of logical system, or 'all'

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<brief>—Display brief output (default)

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<detail>—Display detailed output

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<extensive>—Display extensive output

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<summary>—Display summary output

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<router>—Router LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<network>—Network LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<inter-area-prefix>—Inter-area-prefix LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<inter-area-router>—Inter-area-router LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<external>—External LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<nssa>—NSSA LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<link>—Link LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<link-local>—Link-local LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<intra-area-prefix>—Intra-area-prefix LSAs

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<area>—Area ID of OSPFv3 area

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<lsa-id>—ID of link-state advertisement

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<advertising-router>—Router ID of advertising router

- self - Router ID of this router
- router-id - Router ID of advertising router
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<get-ospf3-interface-information>

Usage

```
<rpc>
  <get-ospf3-interface-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <interface-name>interface-name</interface-name>
    <area>area</area>
    <instance>instance</instance>
    <realm>realm</realm>
  </get-ospf3-interface-information>
</rpc>
```

Description Show OSPFv3 interface status

Contents	<p><logical-system>—Name of logical system, or 'all'</p> <ul style="list-style-type: none">• ipv6-multicast - IPv6 multicast realm• ipv4-unicast - IPv4 unicast realm• ipv4-multicast - IPv4 multicast realm <p><brief>—Display brief output (default)</p> <ul style="list-style-type: none">• ipv6-multicast - IPv6 multicast realm• ipv4-unicast - IPv4 unicast realm• ipv4-multicast - IPv4 multicast realm <p><detail>—Display detailed output</p> <ul style="list-style-type: none">• ipv6-multicast - IPv6 multicast realm• ipv4-unicast - IPv4 unicast realm• ipv4-multicast - IPv4 multicast realm <p><extensive>—Display extensive output</p> <ul style="list-style-type: none">• ipv6-multicast - IPv6 multicast realm• ipv4-unicast - IPv4 unicast realm• ipv4-multicast - IPv4 multicast realm <p><interface-name>—Name of logical interface</p> <ul style="list-style-type: none">• ipv6-multicast - IPv6 multicast realm• ipv4-unicast - IPv4 unicast realm• ipv4-multicast - IPv4 multicast realm <p><area>—OSPF area ID</p> <ul style="list-style-type: none">• ipv6-multicast - IPv6 multicast realm• ipv4-unicast - IPv4 unicast realm• ipv4-multicast - IPv4 multicast realm <p><instance>—Name of OSPFv3 instance</p> <ul style="list-style-type: none">• ipv6-multicast - IPv6 multicast realm• ipv4-unicast - IPv4 unicast realm• ipv4-multicast - IPv4 multicast realm <p><realm>—Name of realm</p> <ul style="list-style-type: none">• ipv6-multicast - IPv6 multicast realm• ipv4-unicast - IPv4 unicast realm
-----------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

- ipv4-multicast - IPv4 multicast realm

<get-ospf3-io-statistics-information>

Usage

```
<rpc>
  <get-ospf3-io-statistics-information>
    <logical-system>logical-system</logical-system>
  </get-ospf3-io-statistics-information>
</rpc>
```

Description Show OSPFv3 I/O statistics

Contents <logical-system>—Name of logical system, or 'all'

<get-ospf3-log-information>

Usage

```
<rpc>
  <get-ospf3-log-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <realm>realm</realm>
  </get-ospf3-log-information>
</rpc>
```

Description Show OSPFv3 SPF log

Contents <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<get-ospf3-neighbor-information>

Usage

```

<rpc>
  <get-ospf3-neighbor-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <interface>interface</interface>
    <area>area</area>
    <neighbor>neighbor</neighbor>
    <instance>instance</instance>
    <realm>realm</realm>
  </get-ospf3-neighbor-information>
</rpc>

```

Description Show OSPFv3 neighbor status

Contents <logical-system>—Name of logical system, or 'all'

- all - Show all instances
- instance-name - Name of OSPFv3 instance
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<brief>—Display brief output (default)

- all - Show all instances
- instance-name - Name of OSPFv3 instance
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<detail>—Display detailed output

- all - Show all instances
- instance-name - Name of OSPFv3 instance
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<extensive>—Display extensive output

- all - Show all instances
- instance-name - Name of OSPFv3 instance
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<interface>—Name of logical interface

- all - Show all instances
- instance-name - Name of OSPFv3 instance
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<area>—OSPF area ID

- all - Show all instances
- instance-name - Name of OSPFv3 instance
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<neighbor>—IP address or ID of neighbor

- all - Show all instances
- instance-name - Name of OSPFv3 instance
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- all - Show all instances
- instance-name - Name of OSPFv3 instance
- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm

- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<get-ospf3-overview-information>

Usage

```
<rpc>
  <get-ospf3-overview-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <extensive/>
    <instance>instance</instance>
    <realm>realm</realm>
  </get-ospf3-overview-information>
</rpc>
```

Description Show overview of OSPFv3 information

Contents <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<brief>—Display brief output (default)

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<extensive>—Display extensive output

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm

- ipv4-multicast - IPv4 multicast realm

<get-ospf3-route-information>

Usage

```
<rpc>
  <get-ospf3-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <realm>realm</realm>
    <intra/>
    <inter/>
    <extern/>
    <router/>
    <abr/>
    <asbr/>
    <transit/>
    <network/>
    <no-backup-coverage/>
    <destination>destination</destination>
    <brief/>
    <detail/>
    <extensive/>
  </get-ospf3-route-information>
</rpc>
```

Description Show the OSPFv3 routing table

Contents <logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPF instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<intra>—Display intra-area routes

<inter>—Display inter-area routes
 <extern>—Display external routes
 <router>—Display routes to all routers
 <abr>—Display routes to area border routers
 <asbr>—Display routes to AS border routers
 <transit>—Display routes to pseudonodes
 <network>—Display routes to networks
 <no-backup-coverage>—Display routes with no backup coverage
 <destination>—Address and optional prefix length of destination
 <brief>—Display brief output (default)
 <detail>—Display detailed output
 <extensive>—Display extensive output

<get-ospf3-statistics-information>

Usage

```

<rpc>
  <get-ospf3-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <realm>realm</realm>
  </get-ospf3-statistics-information>
</rpc>

```

Description Show OSPFv3 statistics

Contents

<logical-system>—Name of logical system, or 'all'

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<instance>—Name of OSPFv3 instance

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<realm>—Name of realm

- ipv6-multicast - IPv6 multicast realm
- ipv4-unicast - IPv4 unicast realm
- ipv4-multicast - IPv4 multicast realm

<get-package-backup-information>

Usage

```
<rpc>  
  <get-package-backup-information/>  
</rpc>
```

Description Show status of old system software packages

<get-packet-distribution-information>

Usage

```
<rpc>  
  <get-packet-distribution-information>  
  
    <packet-size-distribution-information>packet-size-distribution-information</packet-size-distribution-information>  
  
  </get-packet-distribution-information>  
</rpc>
```

Description Show packet size distribution

Contents <packet-size-distribution-information>—Name of service, wildcard, or 'all'

<get-passive-monitoring-error-information>

Usage

```
<rpc>  
  <get-passive-monitoring-error-information>  
    <interface-name>interface-name</interface-name> <!-- mandatory -->  
  </get-passive-monitoring-error-information>  
</rpc>
```

Description Show error statistics

Contents <interface-name>—Name of monitoring interface, wildcard, or 'all'

<get-passive-monitoring-flow-information>

Usage

```
<rpc>
  <get-passive-monitoring-flow-information>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </get-passive-monitoring-flow-information>
</rpc>
```

Description Show flow statistics

Contents <interface-name>—Name of monitoring interface, wildcard, or 'all'

<get-passive-monitoring-information>

Usage

```
<rpc>
  <get-passive-monitoring-information>
  </get-passive-monitoring-information>
</rpc>
```

Description Show information about passive monitoring

Contents <get-passive-monitoring-usage-information>—Show CPU utilization

<get-passive-monitoring-memory-information>—Show memory utilization

<get-passive-monitoring-flow-information>—Show flow statistics

<get-passive-monitoring-error-information>—Show error statistics

<get-passive-monitoring-status-information>—Show status information

<get-passive-monitoring-memory-information>

Usage

```
<rpc>
  <get-passive-monitoring-memory-information>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </get-passive-monitoring-memory-information>
</rpc>
```

Description Show memory utilization

Contents <interface-name>—Name of monitoring interface, wildcard, or 'all'

<get-passive-monitoring-status-information>

Usage

```
<rpc>
  <get-passive-monitoring-status-information>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </get-passive-monitoring-status-information>
</rpc>
```

Description Show status information

Contents <interface-name>—Name of monitoring interface, wildcard, or 'all'

<get-passive-monitoring-usage-information>

Usage

```
<rpc>
  <get-passive-monitoring-usage-information>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </get-passive-monitoring-usage-information>
</rpc>
```

Description Show CPU utilization

Contents <interface-name>—Name of monitoring interface, wildcard, or 'all'

<get-pdp-diagnostics-per-apn>

Usage

```
<rpc>
  <get-pdp-diagnostics-per-apn>
    <apn>apn</apn> <!-- mandatory -->
  </get-pdp-diagnostics-per-apn>
</rpc>
```

Description Show PDP context diagnostics information

Contents <apn>—APN for which to show PDP Contexts

<get-performance-session-information>

Usage

```
<rpc>
  <get-performance-session-information>
    <fpc>fpc</fpc>
    <pic>pic</pic>
```

```
    </get-performance-session-information>
  </rpc>
```

Description Show security performance session information

Contents <fpc>—FPC slot number
 <pic>—PIC slot number

<get-performance-spu-information>

Usage

```
  <rpc>
    <get-performance-spu-information>
      <fpc>fpc</fpc>
      <pic>pic</pic>
    </get-performance-spu-information>
  </rpc>
```

Description Show security performance SPU information

Contents <fpc>—FPC slot number
 <pic>—PIC slot number

<get-persist-nat-all>

Usage

```
  <rpc>
    <get-persist-nat-all/>
  </rpc>
```

Description Show all persistent NAT information

<get-persist-nat-interface-information>

Usage

```
  <rpc>
    <get-persist-nat-interface-information/>
  </rpc>
```

Description Show persistent NAT information of this interface

<get-persist-nat-sum>

Usage

```
<rpc>
  <get-persist-nat-sum/>
</rpc>
```

Description Show persistent NAT summary information

<get-pfe-information>

Usage

```
<rpc>
  <get-pfe-information/>
</rpc>
```

Description Show list of Packet Forwarding Engine components

<get-pfe-statistics>

Usage

```
<rpc>
  <get-pfe-statistics>
    <sfm>sfm</sfm>
    <feb>feb</feb>
    <cid>cid</cid>
    <lcc>lcc</lcc>
    <fpc>fpc</fpc>
  </get-pfe-statistics>
</rpc>
```

Description Show Packet Forwarding Engine traffic statistics

Contents <protocol>—Show detailed Packet Forwarding Engine traffic statistics for a protocol

<multicast>—Show Multicast statistics

<cpu>—Show CPU statistics

<egress-queues>—Show egress-queues statistics

<sfm>—Slot number of SFM for which to show traffic statistics

<feb>—Slot number of FEB for which to show traffic statistics

<lcc>—Slot number of LCC that houses FPC

<fpc>—Slot number of FPC for which to show traffic statistics

<get-pgcpd-active-configuration>

Usage

```
<rpc>
  <get-pgcpd-active-configuration>
</get-pgcpd-active-configuration>
</rpc>
```

Description Show pgcpd active-configuration

Contents <get-service-pgcp-active-configuration-gateway>—Show gateway active configuration

<get-pgm-nak>

Usage

```
<rpc>
  <get-pgm-nak/>
</rpc>
```

Description Show PGM negative acknowledgments

<get-pgm-source-path-messages>

Usage

```
<rpc>
  <get-pgm-source-path-messages/>
</rpc>
```

Description Show PGM source path messages

<get-pgm-statistics>

Usage

```
<rpc>
  <get-pgm-statistics/>
</rpc>
```

Description Show PGM packet statistics

<get-pic-detail>

Usage

```
<rpc>
  <get-pic-detail>
```

```
<fpc-slot>fpc-slot</fpc-slot> <!-- mandatory -->
<pic-slot>pic-slot</pic-slot> <!-- mandatory -->
</get-pic-detail>
</rpc>
```

Description Show Physical Interface Card state, type, and uptime

Contents <fpc-slot>—Slot number of FPC that houses PIC
<pic-slot>—PIC slot number

<get-pic-information>

Usage

```
<rpc>
<get-pic-information>
<slot>slot</slot>
</get-pic-information>
</rpc>
```

Description Show Physical Interface Cards installed in FPC

Contents <slot>—FPC slot number

<get-pim-bootstrap-information>

Usage

```
<rpc>
<get-pim-bootstrap-information>
<logical-system>logical-system</logical-system>
<instance>instance</instance>
</get-pim-bootstrap-information>
</rpc>
```

Description Show PIM bootstrap routers

Contents <logical-system>—Name of logical system, or 'all'
<instance>—Name of instance

<get-pim-interfaces-information>

Usage

```
<rpc>
<get-pim-interfaces-information>
<logical-system>logical-system</logical-system>
<instance>instance</instance>
```

```

    <interface-name>interface-name</interface-name>
    <inet/>
    <inet6/>
    </get-pim-interfaces-information>
  </rpc>

```

Description Show PIM interfaces

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<interface-name>—Name of interface

<inet>—Display IPv4 interfaces

<inet6>—Display IPv6 interfaces

<get-pim-join-information>

Usage

```

  <rpc>
    <get-pim-join-information>
      <logical-system>logical-system</logical-system>
      <instance>instance</instance>
      <summary/>
      <brief/>
      <detail/>
      <extensive/>
      <range>range</range>
      <inet/>
      <inet6/>
    </get-pim-join-information>
  </rpc>

```

Description Show PIM join/prune state

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<summary>—Display summary output

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<range>—IP address and optional prefix length of group

<inet>—Display IPv4 join/prune state

<inet6>—Display IPv6 join/prune state

<get-pim-mdt-information>

Usage

```
<rpc>
  <get-pim-mdt-information>
    <logical-system>logical-system</logical-system>
    <outgoing/>
    <incoming/>
    <brief/>
    <detail/>
    <extensive/>
    <range>range</range>
    <instance>instance</instance> <!-- mandatory -->
  </get-pim-mdt-information>
</rpc>
```

Description Show state of PIM multicast data tunnels

Contents <logical-system>—Name of logical system, or 'all'

<outgoing>—Display outgoing multicast data tunnels

<incoming>—Display incoming multicast data tunnels

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<range>—IP address and optional prefix length of group

<instance>—Name of PIM instance

<get-pim-mvpn-information>

Usage

```
<rpc>
  <get-pim-mvpn-information>
    <logical-system>logical-system</logical-system>
  </get-pim-mvpn-information>
</rpc>
```

Description Show PIM MVPN instances

Contents <logical-system>—Name of logical system, or 'all'

<get-pim-neighbors-information>

Usage

```

<rpc>
  <get-pim-neighbors-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <brief/>
    <detail/>
    <inet/>
    <inet6/>
  </get-pim-neighbors-information>
</rpc>

```

Description Show PIM neighbors

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<brief>—Display brief output (default)

<detail>—Display detailed output

<inet>—Display IPv4 neighbors

<inet6>—Display IPv6 neighbors

<get-pim-rps-information>

Usage

```

<rpc>
  <get-pim-rps-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <brief/>
    <detail/>
    <extensive/>
    <group-address>group-address</group-address>
    <inet/>
    <inet6/>
  </get-pim-rps-information>
</rpc>

```

Description Show PIM rendezvous points

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<group-address>—IP address of group

<inet>—Display IPv4 rendezvous points

<inet6>—Display IPv6 rendezvous points

<get-pim-source-information>

Usage

```
<rpc>
  <get-pim-source-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <brief/>
    <detail/>
    <source>source</source>
    <inet/>
    <inet6/>
  </get-pim-source-information>
</rpc>
```

Description Show the PIM source RPF state

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<brief>—Display brief output (default)

<detail>—Display detailed output

<source>—IP address and optional prefix length of source RPFs

<inet>—Display IPv4 PIM source RPF state

<inet6>—Display IPv6 PIM source RPF state

<get-pim-statistics-information>

Usage

```
<rpc>
  <get-pim-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <interface>interface</interface>
    <inet/>
  </get-pim-statistics-information>
</rpc>
```

```

    <inet6/>
  </get-pim-statistics-information>
</rpc>

```

Description Show PIM statistics

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of instance

<interface>—Name of interface

<inet>—Display IPv4 PIM statistics

<inet6>—Display IPv6 PIM statistics

<get-pki-ca-certificate>

Usage

```

<rpc>
  <get-pki-ca-certificate>
    <ca-profile>ca-profile</ca-profile>
    <brief/>
    <detail/>
  </get-pki-ca-certificate>
</rpc>

```

Description Show certificate-authority certificate information

Contents <ca-profile>—Certificate authority profile

<brief>—Display brief output

<detail>—Display detailed output

<get-pki-certificate-request>

Usage

```

<rpc>
  <get-pki-certificate-request>
    <certificate-id>certificate-id</certificate-id>
    <brief/>
    <detail/>
  </get-pki-certificate-request>
</rpc>

```

Description Show PKCS-10 certificate request information

Contents <certificate-id>—Certificate identifier
 <brief>—Display brief output
 <detail>—Display detailed output

<get-pki-crl>

Usage

```
<rpc>
  <get-pki-crl>
    <ca-profile>ca-profile</ca-profile>
    <brief/>
    <detail/>
  </get-pki-crl>
</rpc>
```

Description Show certificate revocation list information

Contents <ca-profile>—Certificate authority profile
 <brief>—Display brief output
 <detail>—Display detailed output

<get-pki-local-certificate>

Usage

```
<rpc>
  <get-pki-local-certificate>
    <certificate-choice>certificate-choice</certificate-choice>
    <certificate-id>certificate-id</certificate-id>
    <system-generated/>
    <brief/>
    <detail/>
  </get-pki-local-certificate>
</rpc>
```

Description Show router certificate information

Contents <certificate-id>—Certificate identifier
 <system-generated>—Autogenerated self-signed certificate
 <brief>—Display brief output
 <detail>—Display detailed output

<get-poe-controller-information>

Usage

```
<rpc>
  <get-poe-controller-information/>
</rpc>
```

Description Show Power over Ethernet system information

<get-poe-controller-information>

Usage

```
<rpc>
  <get-poe-controller-information/>
</rpc>
```

Description Show PoE system information

<get-poe-fpc-information>

Usage

```
<rpc>
  <get-poe-fpc-information>
    <fpc-slot>fpc-slot</fpc-slot>
  </get-poe-fpc-information>
</rpc>
```

Description Show power over ethernet fpc information

Contents <fpc-slot>—FPC slot number

<get-poe-interface-information>

Usage

```
<rpc>
  <get-poe-interface-information>
    <ifname>ifname</ifname>
  </get-poe-interface-information>
</rpc>
```

Description Show Power over Ethernet interfaces

Contents <ifname>—Name of interface

<get-poe-interface-information>

Usage

```
<rpc>  
  <get-poe-interface-information>  
    <ifname>ifname</ifname>  
  </get-poe-interface-information>  
</rpc>
```

Description Show PoE interfaces

Contents <ifname>—Name of interface

<get-poe-notifications>

Usage

```
<rpc>  
  <get-poe-notifications/>  
</rpc>
```

Description Show Power over Ethernet notification information

<get-poe-notifications>

Usage

```
<rpc>  
  <get-poe-notifications/>  
</rpc>
```

Description Show PoE notification information

<get-power-budget-information>

Usage

```
<rpc>  
  <get-power-budget-information/>  
</rpc>
```

Description Show power budget chassis information

<get-power-management>

Usage

```
<rpc>
```

```
<get-power-management/>
</rpc>
```

Description Show power ratings for the router

<get-power-usage-information>

Usage

```
<rpc>
  <get-power-usage-information>
</get-power-usage-information>
</rpc>
```

Description Show Chassis Power Usages

Contents <get-fru-power-on-sequence>—Show chassis fru power on sequence

<get-ppp-address-pool-inforamation>

Usage

```
<rpc>
  <get-ppp-address-pool-inforamation>
  <detail/>
  <pool-name>pool-name</pool-name> <!-- mandatory -->
</get-ppp-address-pool-inforamation>
</rpc>
```

Description Show PPP address pool information

Contents <detail>—Display detailed information

<pool-name>—Address pool name

<get-ppp-interface-information>

Usage

```
<rpc>
  <get-ppp-interface-information>
  <interface-name>interface-name</interface-name> <!-- mandatory -->
  <extensive/>
  <terse/>
</get-ppp-interface-information>
</rpc>
```

Description Show PPP interface information

Contents <interface-name>—Interface name
 <extensive>—Display detailed output
 <terse>—Display terse output

<get-ppp-statistics-information>

Usage

```
<rpc>  
  <get-ppp-statistics-information>  
    <detail/>  
    <memory/>  
  </get-ppp-statistics-information>  
</rpc>
```

Description Show PPP statistics

Contents <detail>—Display detailed statistics
 <memory>—Display PPP process memory statistics

<get-ppp-summary-information>

Usage

```
<rpc>  
  <get-ppp-summary-information/>  
</rpc>
```

Description Show PPP summary information

<get-pppoe-interface-information>

Usage

```
<rpc>  
  <get-pppoe-interface-information>  
    <brief/>  
    <detail/>  
    <extensive/>  
    <interface-name>interface-name</interface-name>  
  </get-pppoe-interface-information>  
</rpc>
```

Description Show interface information

Contents <brief>—Show brief output

<detail>—Show detailed output

<extensive>—Show extensive output

<interface-name>—Name of PPPoE logical interface

<get-pppoe-service-name-table-information>

Usage

```
<rpc>
  <get-pppoe-service-name-table-information>
    <table-name>table-name</table-name>
  </get-pppoe-service-name-table-information>
</rpc>
```

Description Show service name table information

Contents <table-name>—Name of PPPoE service name table

<get-pppoe-session-information>

Usage

```
<rpc>
  <get-pppoe-session-information>
    <service>service</service>
    <aci>aci</aci>
    <ari>ari</ari>
  </get-pppoe-session-information>
</rpc>
```

Description Show active PPPoE session information

Contents <service>—Name of PPPoE service

<aci>—Agent Circuit ID

<ari>—Agent Remote ID

<get-pppoe-statistics-information>

Usage

```
<rpc>
  <get-pppoe-statistics-information>

  <underlying-interface-name>underlying-interface-name</underlying-interface-name>

  </get-pppoe-statistics-information>
</rpc>
```

Description Show PPPoE-related interface statistics

Contents <underlying-interface-name>—Name of PPPoE underlying logical interface

<get-pppoe-underlying-interface-information>

Usage

```
<rpc>
  <get-pppoe-underlying-interface-information>
    <brief/>
    <detail/>
    <extensive/>

  <underlying-interface-name>underlying-interface-name</underlying-interface-name>

  </get-pppoe-underlying-interface-information>
</rpc>
```

Description Show underlying interface information

Contents <brief>—Show brief output

<detail>—Show detailed output

<extensive>—Show extensive output

<underlying-interface-name>—Name of PPPoE underlying logical interface

<get-pppoe-version>

Usage

```
<rpc>
  <get-pppoe-version/>
</rpc>
```

Description Show version

<get-pre-shared-key>

Usage

```
<rpc>
  <get-pre-shared-key>
    <user-id>user-id</user-id>
    <master-key>master-key</master-key> <!-- mandatory -->
  </get-pre-shared-key>
</rpc>
```

Description Show IKE pre-shared key information for a particular group-ike-id user

Contents <user-id>—IKE user-id value
<master-key>—Master pre-shared key

<get-probe-results>

Usage

```
<rpc>  
  <get-probe-results>  
    <owner>owner</owner>  
    <test>test</test>  
  </get-probe-results>  
</rpc>
```

Description Show probe results

Contents <owner>—Name of owner
<test>—Name of test

<get-process-health-information>

Usage

```
<rpc>  
  <get-process-health-information>  
    <name_pid_choice>name_pid_choice</name_pid_choice>  
    <process-name>process-name</process-name>  
    <pid>pid</pid>  
  </get-process-health-information>  
</rpc>
```

Description Show process health information

Contents <process-name>—Process name
<pid>—Process identifier

<get-psd-information>

Usage

```
<rpc>  
  <get-psd-information/>  
</rpc>
```

Description Show Protected System Domain (PSD) status

<get-r2cp-interface-information>

Usage

```
<rpc>
  <get-r2cp-interface-information>
    <brief/>
    <detail/>
    <extensive/>
    <interface-name>interface-name</interface-name>
  </get-r2cp-interface-information>
</rpc>
```

Description Show interface information

Contents <brief>—Show brief output

<detail>—Show detailed output

<extensive>—Show extensive output

<interface-name>—Name of R2CP interface

<get-r2cp-radio-information>

Usage

```
<rpc>
  <get-r2cp-radio-information>
    <brief/>
    <detail/>
    <extensive/>
    <radio-name>radio-name</radio-name>
  </get-r2cp-radio-information>
</rpc>
```

Description Show radio

Contents <brief>—Show brief output

<detail>—Show detailed output

<extensive>—Show extensive output

<radio-name>—Name of R2CP radio

<get-r2cp-session-information>

Usage

```
<rpc>
  <get-r2cp-session-information>
```

```

    <brief/>
    <detail/>
    <extensive/>
    <session-id>session-id</session-id>
    </get-r2cp-session-information>
  </rpc>

```

Description Show sessions

Contents <brief>—Show brief output

<detail>—Show detailed output

<extensive>—Show extensive output

<session-id>—Session ID

<get-r2cp-statistics>

Usage

```

  <rpc>
    <get-r2cp-statistics/>
  </rpc>

```

Description Show statistics

<get-radius-profile-access-test-result>

Usage

```

  <rpc>
    <get-radius-profile-access-test-result>
      <profile-name>profile-name</profile-name> <!-- mandatory -->
      <user>user</user> <!-- mandatory -->
      <password>password</password> <!-- mandatory -->
      <get-radius-profile-access-test-detail-result/>
    </get-radius-profile-access-test-result>
  </rpc>

```

Description Test user access to an access profile

Contents <profile-name>—Access profile name

<user>—User name to be authenticated to the RADIUS server

<password>—Password for the user

<get-radius-profile-access-test-detail-result>—Show radius attributes returned by the server

<get-radius-server-access-test-result>

Usage

```
<rpc>
  <get-radius-server-access-test-result>
    <address>address</address> <!-- mandatory -->
    <authentication-port>authentication-port</authentication-port>
    <secret>secret</secret> <!-- mandatory -->
    <user>user</user> <!-- mandatory -->
    <password>password</password> <!-- mandatory -->
    <timeout>timeout</timeout>
    <retry>retry</retry>
    <source-address>source-address</source-address>
  </get-radius-server-access-test-result>
</rpc>
```

Description Test user access to a radius server

Contents

- <address>—RADIUS server address
- <authentication-port>—RADIUS server authentication port number
- <secret>—Shared secret with the RADIUS server
- <user>—User name to be authenticated to the RADIUS server
- <password>—Password for the user
- <timeout>—Request timeout period
- <retry>—Retry attempts
- <source-address>—Use specified address as source address

<get-rescue-information>

Usage

```
<rpc>
  <get-rescue-information>
    <format>format</format>
  </get-rescue-information>
</rpc>
```

Description Show rescue configuration

Contents

- <format>—Output format of configuration (XML or text)
 - text - Output text configuration
 - xml - Output XML configuration

<get-resmgr-group-active>

Usage

```
<rpc>
  <get-resmgr-group-active>
    <group-number>group-number</group-number>
  </get-resmgr-group-active>
</rpc>
```

Description Show active resource manager group service information

Contents <group-number>—Show active resource manager group

<get-resmgr-resource-active>

Usage

```
<rpc>
  <get-resmgr-resource-active>
    <resource-number>resource-number</resource-number>
  </get-resmgr-resource-active>
</rpc>
```

Description Show active resource manager resource service information

Contents <resource-number>—Show active resource manager resource

<get-resmgr-settings>

Usage

```
<rpc>
  <get-resmgr-settings/>
</rpc>
```

Description Show resource manager settings information

<get-resource-manager-summary>

Usage

```
<rpc>
  <get-resource-manager-summary/>
</rpc>
```

Description Show resource manager summary information

<get-retag-statistics>

Usage

```
<rpc>
  <get-retag-statistics>
    <filter>filter</filter> <!-- mandatory -->
    <interface>interface</interface>
    <vlan-id>vlan-id</vlan-id>
  </get-retag-statistics>
</rpc>
```

Description Show vlan rewrite statistics information

Contents <interface>—Rewrite statistics interface
 <vlan-id>—Rewrite statistics on vlan-id

<get-rip-general-statistics-information>

Usage

```
<rpc>
  <get-rip-general-statistics-information>
    <logical-system>logical-system</logical-system>
  </get-rip-general-statistics-information>
</rpc>
```

Description Show RIP general statistics

Contents <logical-system>—Name of logical system, or 'all'

<get-rip-neighbor-information>

Usage

```
<rpc>
  <get-rip-neighbor-information>
    <logical-system>logical-system</logical-system>
    <neighbor-name>neighbor-name</neighbor-name>
    <instance>instance</instance>
  </get-rip-neighbor-information>
</rpc>
```

Description Show RIP interfaces

Contents <logical-system>—Name of logical system, or 'all'

- all - Show all instances
- instance-name - Name of RIP instance

<neighbor-name>—Name of RIP neighbor

- all - Show all instances
- instance-name - Name of RIP instance

<instance>—Name of RIP instance

- all - Show all instances
- instance-name - Name of RIP instance

<get-rip-statistics-information>

Usage

```
<rpc>
  <get-rip-statistics-information>
    <logical-system>logical-system</logical-system>
    <neighbor-name>neighbor-name</neighbor-name>
    <instance>instance</instance>
  </get-rip-statistics-information>
</rpc>
```

Description Show RIP statistics

Contents <logical-system>—Name of logical system, or 'all'

- all - Show all instances
- instance-name - Name of RIP instance

<neighbor-name>—Name of RIP neighbor

- all - Show all instances
- instance-name - Name of RIP instance

<instance>—Name of RIP instance

- all - Show all instances
- instance-name - Name of RIP instance

<get-rmon-alarm-information>

Usage

```
<rpc>
  <get-rmon-alarm-information>
    <brief/>
    <detail/>
  </get-rmon-alarm-information>
</rpc>
```

Description	Show RMON alarms
Contents	<brief>—Display brief output (default) <detail>—Display detailed output

<get-rmon-event-information>

Usage

```
<rpc>  
  <get-rmon-event-information>  
    <brief/>  
    <detail/>  
  </get-rmon-event-information>  
</rpc>
```

Description	Show RMON events
Contents	<brief>—Display brief output (default) <detail>—Display detailed output

<get-rmon-history-information>

Usage

```
<rpc>  
  <get-rmon-history-information>  
    <index>index</index>  
    <sample-index>sample-index</sample-index>  
  </get-rmon-history-information>  
</rpc>
```

Description	Show RMON history
Contents	<index>— <sample-index>—

<get-rmon-information>

Usage

```
<rpc>  
  <get-rmon-information>  
  </get-rmon-information>  
</rpc>
```

Description	Show remote monitoring information
--------------------	------------------------------------

Contents	<code><get-rmon-history-information></code> —Show RMON history
	<code><get-rmon-alarm-information></code> —Show RMON alarms
	<code><get-rmon-event-information></code> —Show RMON events
	<code><get-rmon-log-information></code> —Show rmon monitoring logs

`<get-rmon-log-information>`

Usage

```
<rpc>  
  <get-rmon-log-information/>  
</rpc>
```

Description Show rmon monitoring logs

`<get-rollback-information>`

Usage

```
<rpc>  
  <get-rollback-information>  
    <rollback>rollback</rollback> <!-- mandatory -->  
    <compare>compare</compare>  
    <format>format</format>  
  </get-rollback-information>  
</rpc>
```

Description Show rolled back configuration

Contents	<code><rollback></code> —Rollback number to display <ul style="list-style-type: none">• text - Output text configuration• xml - Output XML configuration
	<code><compare></code> —Rollback number to compare <ul style="list-style-type: none">• text - Output text configuration• xml - Output XML configuration
	<code><format></code> —Output format of configuration (XML or text) <ul style="list-style-type: none">• text - Output text configuration• xml - Output XML configuration

<get-route-engine-information>

Usage

```
<rpc>
  <get-route-engine-information>
    <slot>slot</slot>
  </get-route-engine-information>
</rpc>
```

Description Show Routing Engine status

Contents <slot>—Routing Engine slot number

<get-bios-version-information>—Show BIOS firmware version

<get-route-information>

Usage

```
<rpc>
  <get-route-information>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <destination>destination</destination>
    <all/>
    <terse/>
    <brief/>

    <label>label</label>
    <ccc>ccc</ccc>
    <inactive-prefix/>
    <inactive-path/>
    <active-path/>
    <private/>
    <damping>damping</damping>
    <output>output</output>
    <next-hop>next-hop</next-hop>
    <source-gateway>source-gateway</source-gateway>
    <protocol>protocol</protocol>
    <advertising-protocol>advertising-protocol</advertising-protocol>
    <bgp/>
    <dvmrp/>
    <pim/>
    <ripng/>
    <rip/>
    <msdp/>
```

```

<neighbor>neighbor</neighbor>
<receive-protocol>receive-protocol</receive-protocol>
<bgp/>
<rip/>
<ripng/>
<dvmrp/>
<pim/>
<msdp/>
<peer>peer</peer>
<rd-prefix>rd-prefix</rd-prefix>
<aspath-regex>aspath-regex</aspath-regex>
<community>community</community>
<no-community/>
<community-name>community-name</community-name>
<label-switched-path>label-switched-path</label-switched-path>

<static-label-switched-path>static-label-switched-path</static-label-switched-path>

<hidden/>
</get-route-information>
</rpc>

```

Description Show routing table information

Contents <get-forwarding-table-information>—Show entries in all forwarding tables

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6

- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel
- flow - Locally defined flow route
- access - Access route
- access-internal - Access-internal route

<get-instance-information>—Show routing instances information

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol

- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel
- flow - Locally defined flow route
- access - Access route
- access-internal - Access-internal route

<resolution>—Show next-hop resolution database

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol

- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network

- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel
- flow - Locally defined flow route
- access - Access route
- access-internal - Access-internal route

<logical-system>—Name of logical system, or 'all'

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network

- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel
- flow - Locally defined flow route
- access - Access route
- access-internal - Access-internal route

<fabric>—Internal fabric state

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol

- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit

- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel
- flow - Locally defined flow route
- access - Access route
- access-internal - Access-internal route

<destination>—IP address and optional prefix length of destination

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)

- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel
- flow - Locally defined flow route
- access - Access route
- access-internal - Access-internal route

<all>—Show all entries, including hidden entries

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership

- tunnel - Dynamic tunnel
- flow - Locally defined flow route
- access - Access route
- access-internal - Access-internal route

<terse>—Display terse output

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel

- flow - Locally defined flow route
- access - Access route
- access-internal - Access-internal route

<brief>—Display brief output

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol
- local - Local system addresses
- ospf - Open Shortest Path First
- ospf2 - Open Shortest Path First Version 2
- ospf3 - Open Shortest Path First Version 3
- pim - Protocol Independent Multicast
- rip - Routing Information Protocol
- ripng - Routing Information Protocol for IPv6
- rsvp - Resource Reservation Protocol
- static - Statically defined prefixes
- mpls - Multiprotocol Label Switching
- ccc - Circuit cross-connect
- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel
- flow - Locally defined flow route

- access - Access route
- access-internal - Access-internal route

<detail>—Display detailed output

- suppressed - Entries suppressed due to route damping
- history - Entries that are withdrawn but have history
- decayed - Entries that are decayed but not suppressed
- aggregate - Locally generated aggregate route
- bgp - Border Gateway Protocol
- direct - Directly connected routes
- dvmrp - Distance Vector Multicast Routing Protocol
- isis - Intermediate System-to-Intermediate System
- esis - End System-to-Intermediate System
- ldp - Label Distribution Protocol

- msdp - Multicast Source Discovery Protocol
- vpn - Layer 3 virtual private network
- l2vpn - Layer 2 virtual private network
- l2circuit - Layer 2 circuit
- atmvpn - ATM over MPLS (ATM VPN)
- rtarget - Local route target VPN membership
- tunnel - Dynamic tunnel
- flow - Locally defined flow route
- access - Access route
- access-internal - Access-internal route

<advertising-protocol>—Show information in format intended for particular routing protocol

<bgp>—Border Gateway Protocol

<dvmrp>—Distance Vector Multicast Routing Protocol

<pim>—Protocol Independent Multicast

<ripng>—Routing Information Protocol for IPv6

<rip>—Routing Information Protocol

<msdp>—Multicast Source Discovery Protocol

<neighbor>—IP address of neighbor (local for RIP and RIPng)

<receive-protocol>—Show information in format received from particular routing protocol

<bgp>—Border Gateway Protocol

<rip>—Routing Information Protocol

<ripng>—Routing Information Protocol for IPv6

<dvmrp>—Distance Vector Multicast Routing Protocol

<pim>—Protocol Independent Multicast

<msdp>—Multicast Source Discovery Protocol

<peer>—IP address of neighbor

<rd-prefix>—Route distinguisher with ip prefix (rd:prefix)

<aspath-regex>—BGP AS path regular expression for entries to match

<community>—Identifier for community (can include wildcards)

<no-community>—Show entries with no associated community

<community-name>—Name of configured community policy to match

<label-switched-path>—Name of LSP tunnel associated with entries

<static-label-switched-path>—Name of static LSP tunnel associated with entries

<hidden>—Show hidden entries

<get-rteport-table-information>—Show instance export information

<flow>—Show flow routing information

<get-route-summary-information>

Usage

```
<rpc>
  <get-route-summary-information>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
  </get-route-summary-information>
</rpc>
```

Description Show routing table statistics

Contents <logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<get-rps-chassis-information>

Usage

```
<rpc>  
  <get-rps-chassis-information/>  
</rpc>
```

Description Show redundant power supply chassis information

<get-rps-led-information>

Usage

```
<rpc>  
  <get-rps-led-information/>  
</rpc>
```

Description Show Redundant Power Supply led information

<get-rps-power-supply-information>

Usage

```
<rpc>  
  <get-rps-power-supply-information/>  
</rpc>
```

Description Show Redundant Power Supply power supply information

<get-rps-status-information>

Usage

```
<rpc>  
  <get-rps-status-information/>  
</rpc>
```

Description Show Redundant Power Supply status information

<get-rps-version-information>

Usage

```
<rpc>  
  <get-rps-version-information/>  
</rpc>
```

Description Show Redundant Power Supply version information

<get-rsvp-interface-information>

Usage

```

<rpc>
  <get-rsvp-interface-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <link-management/>
    <interface-name>interface-name</interface-name>
  </get-rsvp-interface-information>
</rpc>

```

Description Show RSVP interfaces

Contents

- <logical-system>—Name of logical system, or 'all'
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <extensive>—Display extensive output
- <link-management>—Display RSVP interfaces created by LMP
- <interface-name>—Name of logical interface

<get-rsvp-neighbor-information>

Usage

```

<rpc>
  <get-rsvp-neighbor-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
  </get-rsvp-neighbor-information>
</rpc>

```

Description Show RSVP neighbors

Contents

- <logical-system>—Name of logical system, or 'all'
- <brief>—Display brief output (default)
- <detail>—Display detailed output

<get-rsvp-session-information>

Usage

```
<rpc>
  <get-rsvp-session-information>
    <logical-system>logical-system</logical-system>
    <ingress/>
    <egress/>
    <transit/>
    <lsp/>
    <nolsp/>
    <up/>
    <down/>
    <unidirectional/>
    <bidirectional/>
    <p2mp/>
    <terse/>
    <brief/>
    <detail/>
    <extensive/>
    <statistics/>
    <bypass/>
    <session-name>session-name</session-name>
    <interface>interface</interface>
    <te-link>te-link</te-link>
  </get-rsvp-session-information>
</rpc>
```

Description Show active RSVP sessions

Contents

- <logical-system>—Name of logical system, or 'all'
- <ingress>—Display RSVP sessions originating at this router
- <egress>—Display RSVP sessions ending at this router
- <transit>—Display RSVP sessions transiting this router
- <lsp>—Display RSVP sessions used to set up LSPs
- <nolsp>—Display RSVP sessions not used to set up LSPs
- <up>—Display active LSPs
- <down>—Display inactive LSPs
- <unidirectional>—Display unidirectional RSVP sessions
- <bidirectional>—Display bidirectional RSVP sessions
- <p2mp>—Display point-to-multipoint RSVP sessions
- <terse>—Display terse output

<brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<statistics>—Display packet statistics

<bypass>—Display RSVP sessions used to protect LSPs

<session-name>—Name of RSVP session

<interface>—Name of interface

<te-link>—Name of traffic engineering link

<get-rsvp-statistics-information>

Usage

```
<rpc>
  <get-rsvp-statistics-information>
    <logical-system>logical-system</logical-system>
  </get-rsvp-statistics-information>
</rpc>
```

Description Show RSVP statistics

Contents <logical-system>—Name of logical system, or 'all'

<get-rsvp-version-information>

Usage

```
<rpc>
  <get-rsvp-version-information>
    <logical-system>logical-system</logical-system>
  </get-rsvp-version-information>
</rpc>
```

Description Show RSVP version

Contents <logical-system>—Name of logical system, or 'all'

<get-rtexport-instance-information>

Usage

```
<rpc>
  <get-rtexport-instance-information>
    <brief/>
    <detail/>
  </rpc>
```

```
<daemon-select>daemon-select</daemon-select>
<logical-system>logical-system</logical-system>
<fabric/>
<instance-name>instance-name</instance-name>
</get-rtexport-instance-information>
</rpc>
```

Description Show instance configuration and runtime information

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<instance-name>—Name of instance

<get-rtexport-table-information>

Usage

```
<rpc>
  <get-rtexport-table-information>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <brief/>
    <detail/>
    <table-name>table-name</table-name>
  </get-rtexport-table-information>
</rpc>
```

Description Show instance export information

Contents <logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<brief>—Display brief output (default)

<detail>—Display detailed output

<table-name>—Name of table

<get-rtexport-target-information>—Show VPN routing and forwarding route target export information

<get-rtexport-instance-information>—Show instance configuration and runtime information

<get-rtexport-target-information>

Usage

```

<rpc>
  <get-rtexport-target-information>
    <brief/>
    <detail/>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <community>community</community>
  </get-rtexport-target-information>
</rpc>

```

Description Show VPN routing and forwarding route target export information

Contents

- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <logical-system>—Name of logical system, or 'all'
- <fabric>—Internal fabric state
- <community>—Community to match (can include wildcards)

<get-rtflow-dep-information>

Usage

```

<rpc>
  <get-rtflow-dep-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <table>table</table>
    <destination>destination</destination>
  </get-rtflow-dep-information>
</rpc>

```

Description Show flow route validation tables

Contents

- <logical-system>—Name of logical system, or 'all'
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <table>—Name of unicast routing table
- <destination>—IP address and optional prefix length of destination

<get-rtg-information>

Usage

```
<rpc>
  <get-rtg-information>
</get-rtg-information>
</rpc>
```

Description Show redundant trunk group information

Contents <get-rtg-information-pergrp>—Show information for a particular redundant trunk group

<get-rtg-information-pergrp>

Usage

```
<rpc>
  <get-rtg-information-pergrp>
    <rtg-name>rtg-name</rtg-name> <!-- mandatory -->
  </get-rtg-information-pergrp>
</rpc>
```

Description Show information for a particular redundant trunk group

Contents <rtg-name>—Name of group

<get-sap-listen-information>

Usage

```
<rpc>
  <get-sap-listen-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
  </get-sap-listen-information>
</rpc>
```

Description Show addresses to listen for session announcements

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<get-scb-information>

Usage

```
<rpc>
  <get-scb-information/>
</rpc>
```

Description Show System Control Board status

<get-schedulers>

Usage

```
<rpc>
  <get-schedulers>
    <scheduler-name>scheduler-name</scheduler-name>
  </get-schedulers>
</rpc>
```

Description Show the information on one or more schedulers

Contents <scheduler-name>—Name of the scheduler

<get-security-associations-information>

Usage

```
<rpc>
  <get-security-associations-information>
    <brief/>
    <detail/>

    <show-index-ipsec-security-association>show-index-ipsec-security-association</show-index-ipsec-security-association>

    <fpc>fpc</fpc>
    <pic>pic</pic>
    <kmd-instance>kmd-instance</kmd-instance>
  </get-security-associations-information>
</rpc>
```

Description Show IPSec security association information

Contents <brief>—Display brief output

<detail>—Display detailed output

<show-index-ipsec-security-association>—Index of security association

<fpc>—FPC slot number

<pic>—PIC slot number

<kmd-instance>—Name of KMD instance or 'all'

<get-security-associations-information>

Usage

```
<rpc>
  <get-security-associations-information>
    <brief/>
    <detail/>
    <sa-name>sa-name</sa-name>
  </get-security-associations-information>
</rpc>
```

Description Show IPSec security association information

Contents <brief>—Display brief output

<detail>—Display detailed output

<sa-name>—Name of security association

<get-security-group-vpn-server-ike-security-associations-information>

Usage

```
<rpc>
  <get-security-group-vpn-server-ike-security-associations-information>
    <brief/>
    <detail/>
    <group_index_choice>group_index_choice</group_index_choice>
    <group>group</group>
    <group-id>group-id</group-id>
    <index>index</index>
    <fpc>fpc</fpc>
    <pic>pic</pic>
    <kmd-instance>kmd-instance</kmd-instance>
  </get-security-group-vpn-server-ike-security-associations-information>
</rpc>
```

Description Show IKE security association information

Contents <brief>—Show brief output (default)

<detail>—Show detailed output

<group>—Show specified group

<group-id>—Show specified group id

<index>—Index of security association

<fpc>—FPC slot number

<pic>—PIC slot number

<kmd-instance>—Name of KMD instance or 'all'

<get-security-group-vpn-server-kek-sa>

Usage

```
<rpc>
  <get-security-group-vpn-server-kek-sa>
    <brief/>
    <detail/>
    <group_index_choice>group_index_choice</group_index_choice>
    <group>group</group>
    <group-id>group-id</group-id>
    <index>index</index>
    <fpc>fpc</fpc>
    <pic>pic</pic>
    <kmd-instance>kmd-instance</kmd-instance>
  </get-security-group-vpn-server-kek-sa>
</rpc>
```

Description Show KEK security association information

Contents

<brief>—Show brief output (default)

<detail>—Show detailed output

<group>—Show specified group

<group-id>—Show specified group id

<index>—Index of security association

<fpc>—FPC slot number

<pic>—PIC slot number

<kmd-instance>—Name of KMD instance or 'all'

<get-security-group-vpn-server-registered-members>

Usage

```
<rpc>
  <get-security-group-vpn-server-registered-members>
    <group_choice>group_choice</group_choice>
  </get-security-group-vpn-server-registered-members>
</rpc>
```

```
<show-security-group-vpn-server-reg-group-id>show-security-group-vpn-server-reg-group-id</show-security-group-vpn-server-reg-group-id>  
  
    <fpc>fpc</fpc>  
    <pic>pic</pic>  
    <kmd-instance>kmd-instance</kmd-instance>  
  </get-security-group-vpn-server-registered-members>  
</rpc>
```

Description Show group VPN registered members for group VPN server

Contents <show-security-group-vpn-server-reg-group-name>—Show specified group

<show-security-group-vpn-server-reg-group-id>—Show specified group id

<fpc>—FPC slot number

<pic>—PIC slot number

<kmd-instance>—Name of KMD instance or 'all'

<get-security-group-vpn-server-security-information>

Usage

```
<rpc>  
  <get-security-group-vpn-server-security-information>  
    <brief/>  
    <detail/>  
    <group_choice>group_choice</group_choice>  
    <group>group</group>  
    <group-id>group-id</group-id>  
    <fpc>fpc</fpc>  
    <pic>pic</pic>  
    <kmd-instance>kmd-instance</kmd-instance>  
  </get-security-group-vpn-server-security-information>  
</rpc>
```

Description Show IPSec security association information for group VPN server

Contents <brief>—Show brief output (default)

<detail>—Show detailed output

<group>—Show specified group

<group-id>—Show specified group id

<fpc>—FPC slot number

<pic>—PIC slot number

<kmd-instance>—Name of KMD instance or 'all'

<get-security-report-threats-recent-activity>

Usage

```
<rpc>  
  <get-security-report-threats-recent-activity/>  
</rpc>
```

Description Show the most recent threat activities

<get-security-report-threats-statistics>

Usage

```
<rpc>  
  <get-security-report-threats-statistics/>  
</rpc>
```

Description Show the threat statistics

<get-security-report-threats-summary>

Usage

```
<rpc>  
  <get-security-report-threats-summary/>  
</rpc>
```

Description Show threat indicator summary

<get-security-report-traffic-statistics>

Usage

```
<rpc>  
  <get-security-report-traffic-statistics/>  
</rpc>
```

Description Show the traffic statistics

<get-service-accounting-aggregation-as-information>

Usage

```
<rpc>  
  <get-service-accounting-aggregation-as-information>  
    <as-information>as-information</as-information>  
    <limit>limit</limit>
```

```
<order>order</order>
<extensive/>
<detail/>
<terse/>
<source-as>source-as</source-as>
<destination-as>destination-as</destination-as>

<input-snmp-interface-index>input-snmp-interface-index</input-snmp-interface-index>

<output-snmp-interface-index>output-snmp-interface-index</output-snmp-interface-index>

</get-service-accounting-aggregation-as-information>
</rpc>
```

Description Show aggregation type AS

Contents <as-information>—Name of service, wildcard, or 'all'

- bytes - Display largest number of bytes first
- packets - Display largest number of packets first

<limit>—Maximum number of flows to display

- bytes - Display largest number of bytes first
- packets - Display largest number of packets first

<order>—Order for displaying flows

- bytes - Display largest number of bytes first
- packets - Display largest number of packets first

<extensive>—Display extensive output

<detail>—Display detailed output

<terse>—Display terse output (default)

<source-as>—Filter term source-as

<destination-as>—Filter term destination AS

<input-snmp-interface-index>—Filter term input SNMP interface index

<output-snmp-interface-index>—Filter term output SNMP interface index

<get-service-accounting-aggregation-destination-prefix-information>

Usage

```
<rpc>
<get-service-accounting-aggregation-destination-prefix-information>
```

```

<destination-prefix-information>destination-prefix-information</destination-prefix-information>

    <limit>limit</limit>
    <order>order</order>
    <extensive/>
    <detail/>
    <terse/>
    <destination-prefix>destination-prefix</destination-prefix>
    <destination-as>destination-as</destination-as>

<output-snmp-interface-index>output-snmp-interface-index</output-snmp-interface-index>

    </get-service-accounting-aggregation-destination-prefix-information>
</rpc>

```

Description Show aggregation type destination-prefix

Contents <destination-prefix-information>—Name of service, wildcard, or 'all'

- bytes - Display largest number of bytes first
- packets - Display largest number of packets first

<limit>—Maximum number of flows to display

- bytes - Display largest number of bytes first
- packets - Display largest number of packets first

<order>—Order for displaying flows

- bytes - Display largest number of bytes first
- packets - Display largest number of packets first

<extensive>—Display extensive output

<detail>—Display detailed output

<terse>—Display terse output (default)

<destination-prefix>—Filter term destination prefix

<destination-as>—Filter term destination-as

<output-snmp-interface-index>—Filter term output SNMP interface index

<get-service-accounting-aggregation-information>

Usage

```

<rpc>
  <get-service-accounting-aggregation-information>
  </get-service-accounting-aggregation-information>

```

```
</rpc>
```

Description Show aggregation information

Contents

- <get-service-accounting-aggregation-as-information>—Show aggregation type AS
- <get-service-accounting-aggregation-protocol-port-information>—Show aggregation type protocol-port
- <get-service-accounting-aggregation-source-prefix-information>—Show aggregation type source-prefix
- <get-service-accounting-aggregation-destination-prefix-information>—Show aggregation type destination-prefix
- <get-service-accounting-aggregation-source-destination-prefix-information>—Show aggregation type source-destination-prefix
- <get-service-accounting-aggregation-template-information>—Show aggregation type template

<get-service-accounting-aggregation-protocol-port-information>

Usage

```
<rpc>  
  <get-service-accounting-aggregation-protocol-port-information>  
    <protocol-port-information>protocol-port-information</protocol-port-information>  
  
    <limit>limit</limit>

<extensive>—Display extensive output

<detail>—Display detailed output

<terse>—Display terse output (default)

<source-prefix>—Filter term source prefix

<source-as>—Filter term source-as

<input-snmp-interface-index>—Filter term input SNMP interface index

<get-service-accounting-aggregation-template-information>

Usage

```
<rpc>
  <get-service-accounting-aggregation-template-information>
    <template-name>template-name</template-name> <!-- mandatory -->
    <extensive/>
    <detail/>
    <terse/>
  </get-service-accounting-aggregation-template-information>
</rpc>
```

Description Show aggregation type template

Contents <template-name>—Name of template

<extensive>—Display extensive output

<detail>—Display detailed output

<terse>—Display terse output (default)

<get-service-accounting-error-inline-jflow-information>

Usage

```
<rpc>
```

<get-service-accounting-error-inline-jflow-information>

```
<inline-jflow-error-information>inline-jflow-error-information</inline-jflow-error-information>
<!-- mandatory -->
  </get-service-accounting-error-inline-jflow-information>
</rpc>
```

Description Show service accounting inline Jflow error information

Contents <inline-jflow-error-information>—FPC Slot for inline Jflow

<get-service-accounting-errors-information>

Usage

```
<rpc>
  <get-service-accounting-errors-information>
    <error-information>error-information</error-information>
  </get-service-accounting-errors-information>
</rpc>
```

Description Show error statistics

Contents <error-information>—Name of service, wildcard, or 'all'

<get-service-accounting-error-inline-jflow-information>—Show service accounting inline Jflow error information

<get-service-accounting-flow-detail>

Usage

```
<rpc>
  <get-service-accounting-flow-detail>
    <flow-detail-information>flow-detail-information</flow-detail-information>

    <proto>proto</proto>
    </get-service-accounting-flow-detail>
  </rpc>

```

Description Show flow detail

Contents <flow-detail-information>—Name of service, wildcard, or 'all'

- bytes - Display largest number of bytes first
- packets - Display largest number of packets first

<limit>—Maximum number of flows to display

- bytes - Display largest number of bytes first
- packets - Display largest number of packets first

<order>—Order for displaying flows

- bytes - Display largest number of bytes first
- packets - Display largest number of packets first

<extensive>—Display extensive output

<detail>—Display detailed output

<terse>—Display terse output (default)

<source-prefix>—Filter term source prefix

<destination-prefix>—Filter term destination prefix

<source-port>—Filter term source port

<destination-port>—Filter term destination port

<input-snmp-interface-index>—Filter term input SNMP interface index

<output-snmp-interface-index>—Filter term output SNMP interface index

<source-as>—Filter term source AS

<destination-as>—Filter term destination AS

<tos>—Filter term ToS

<proto>—Filter term protocol

<get-service-accounting-flow-information>

Usage

```
<rpc>  
  <get-service-accounting-flow-information>  
    <flow-information>flow-information</flow-information>  
  </get-service-accounting-flow-information>  
</rpc>
```

Description Show flow information

Contents <flow-information>—Name of service, wildcard, or 'all'

<get-service-accounting-status-inline-jflow-flow-information>—Show service accounting inline Jflow flow information

<get-service-accounting-information>

Usage

```
<rpc>  
  <get-service-accounting-information>  
  </get-service-accounting-information>  
</rpc>
```

Description Show sampled accounting service

Contents <get-service-accounting-status-information>—Show service accounting parameters

<get-service-accounting-usage-information>—Show CPU usage

<get-service-accounting-memory-information>—Show memory information

<get-service-accounting-flow-information>—Show flow information

<get-service-accounting-flow-detail>—Show flow detail

<get-service-accounting-aggregation-information>—Show aggregation information

<get-service-accounting-errors-information>—Show error statistics

<get-packet-distribution-information>—Show packet size distribution

<get-service-accounting-memory-information>

Usage

```
<rpc>  
  <get-service-accounting-memory-information>  
    <memory-information>memory-information</memory-information>  
  </get-service-accounting-memory-information>
```

```
</rpc>
```

Description Show memory information

Contents <memory-information>—Name of service, wildcard, or 'all'

<get-service-accounting-status-information>

Usage

```
<rpc>
  <get-service-accounting-status-information>
    <status-information>status-information</status-information>
  </get-service-accounting-status-information>
</rpc>
```

Description Show service accounting parameters

Contents <status-information>—Name of service, wildcard, or 'all'

<get-service-accounting-status-inline-jflow-information>—Show service accounting inline Jflow parameters

<get-service-accounting-status-inline-jflow-flow-information>

Usage

```
<rpc>
  <get-service-accounting-status-inline-jflow-flow-information>

  <inline-jflow-flow-information>inline-jflow-flow-information</inline-jflow-flow-information>
  <!-- mandatory -->
  </get-service-accounting-status-inline-jflow-flow-information>
</rpc>
```

Description Show service accounting inline Jflow flow information

Contents <inline-jflow-flow-information>—FPC Slot for inline Jflow

<get-service-accounting-status-inline-jflow-information>

Usage

```
<rpc>
  <get-service-accounting-status-inline-jflow-information>
    <inline-jflow-information>inline-jflow-information</inline-jflow-information> <!--
mandatory -->
  </get-service-accounting-status-inline-jflow-information>
</rpc>
```

Description Show service accounting inline Jflow parameters

Contents <inline-jflow-information>—FPC Slot for inline Jflow

<get-service-accounting-usage-information>

Usage

```
<rpc>
  <get-service-accounting-usage-information>
    <usage-information>usage-information</usage-information>
  </get-service-accounting-usage-information>
</rpc>
```

Description Show CPU usage

Contents <usage-information>—Name of service, wildcard, or 'all'

<get-service-border-signaling-gateway-address-of-record>

Usage

```
<rpc>
  <get-service-border-signaling-gateway-address-of-record>
</get-service-border-signaling-gateway-address-of-record>
</rpc>
```

Description Show border signaling gateway address of record

Contents <get-service-border-signaling-gateway-address-of-record-bindings>—Show address of record bindings

<get-service-border-signaling-gateway-address-of-record-bindings>

Usage

```
<rpc>
  <get-service-border-signaling-gateway-address-of-record-bindings>
    <gateway>gateway</gateway> <!-- mandatory -->
    <master/>
    <backup/>
    <address-of-record>address-of-record</address-of-record>
    <detail/>
  </get-service-border-signaling-gateway-address-of-record-bindings>
</rpc>
```

Description Show address of record bindings

Contents <gateway>—Name of border signaling gateway

<master>—Query the master border signaling gateway (default)

<backup>—Query the backup border signaling gateway

<address-of-record>—Address of record name

<detail>—Detail mode

<get-service-border-signaling-gateway-calls-duration>

Usage

```
<rpc>
  <get-service-border-signaling-gateway-calls-duration>
</get-service-border-signaling-gateway-calls-duration>
</rpc>
```

Description Show border signaling gateway calls duration

Contents <get-service-border-signaling-gateway-statistics-calls-duration-by-sp>—Show border signaling gateway calls duration statistics grouped by service-point

<get-service-border-signaling-gateway-statistics-calls-duration-by-server>—Show border signaling gateway calls duration statistics grouped by server

<get-service-border-signaling-gateway-charging-statistics>

Usage

```
<rpc>
  <get-service-border-signaling-gateway-charging-statistics>
    <gateway>gateway</gateway> <!-- mandatory -->
  <master/>
  <backup/>
</get-service-border-signaling-gateway-charging-statistics>
</rpc>
```

Description Show border signaling gateway charging statistics

Contents <gateway>—Name of border signaling gateway

<master>—Query the master border signaling gateway (default)

<backup>—Query the backup border signaling gateway

<get-service-border-signaling-gateway-charging-status>

Usage

```
<rpc>
  <get-service-border-signaling-gateway-charging-status>
    <gateway>gateway</gateway> <!-- mandatory -->
```

```
<master/>
<backup/>
</get-service-border-signaling-gateway-charging-status>
</rpc>
```

Description Show border signaling gateway charging status

Contents <gateway>—Name of border signaling gateway

<master>—Query the master border signaling gateway (default)

<backup>—Query the backup border signaling gateway

<get-service-border-signaling-gateway-information-by-contact>

Usage

```
<rpc>
<get-service-border-signaling-gateway-information-by-contact>
  <gateway>gateway</gateway> <!-- mandatory -->
  <contact>contact</contact>
  <brief/>
  <summary/>
  <detail/>
  <master/>
  <backup/>
</get-service-border-signaling-gateway-information-by-contact>
</rpc>
```

Description Show border signaling gateway information by contact

Contents <gateway>—Name of border signaling gateway

<contact>—Contact

<brief>—Display brief output (default)

<summary>—Display summary output

<detail>—Display detailed output

<master>—Query the master border signaling gateway (default)

<backup>—Query the backup border signaling gateway

<get-service-border-signaling-gateway-information-by-request-uri>

Usage

```
<rpc>
<get-service-border-signaling-gateway-information-by-request-uri>
  <gateway>gateway</gateway> <!-- mandatory -->
```

```

    <uri>uri</uri>
    <brief/>
    <summary/>
    <detail/>
    <master/>
    <backup/>
    </get-service-border-signaling-gateway-information-by-request-uri>
  </rpc>

```

Description	Show border signaling gateway information by request uri
Contents	<p><gateway>—Name of border signaling gateway</p> <p><uri>—URI</p> <p><brief>—Display brief output (default)</p> <p><summary>—Display summary output</p> <p><detail>—Display detailed output</p> <p><master>—Query the master border signaling gateway (default)</p> <p><backup>—Query the backup border signaling gateway</p>

<get-service-border-signaling-gateway-name-resolution-cache>

Usage

```

  <rpc>
    <get-service-border-signaling-gateway-name-resolution-cache>
    </get-service-border-signaling-gateway-name-resolution-cache>
  </rpc>

```

Description	Show border signaling gateway name resolution cache content
Contents	<p><by-fqdn>—Show records for the Fully Qualified Domain Name</p> <p><get-service-border-signaling-gateway-name-resolution-cache-all>—Show contents of the cache</p>

<get-service-border-signaling-gateway-name-resolution-cache-all>

Usage

```

  <rpc>
    <get-service-border-signaling-gateway-name-resolution-cache-all>
      <gateway>gateway</gateway> <!-- mandatory -->
    <master/>
    <backup/>
    </get-service-border-signaling-gateway-name-resolution-cache-all>
  </rpc>

```

</rpc>

Description Show contents of the cache

Contents <gateway>—Name of border signaling gateway
<master>—Query the master border signaling gateway (default)
<backup>—Query the backup border signaling gateway

<get-service-border-signaling-gateway-routing-blacklist>

Usage

```
<rpc>
  <get-service-border-signaling-gateway-routing-blacklist>
    <gateway>gateway</gateway> <!-- mandatory -->
    <master/>
    <backup/>
  </get-service-border-signaling-gateway-routing-blacklist>
</rpc>
```

Description Show border signaling gateway servers blacklist content

Contents <gateway>—Name of border signaling gateway
<master>—Query the master border signaling gateway (default)
<backup>—Query the backup border signaling gateway

<get-service-border-signaling-gateway-statistics-admission-control>

Usage

```
<rpc>
  <get-service-border-signaling-gateway-statistics-admission-control>
    <gateway>gateway</gateway> <!-- mandatory -->
    <master/>
    <backup/>
  </get-service-border-signaling-gateway-statistics-admission-control>
</rpc>
```

Description Show border signaling gateway admission control profile statistics statistics

Contents <gateway>—Name of border signaling gateway
<master>—Query the master border signaling gateway (default)
<backup>—Query the backup border signaling gateway

<get-service-border-signaling-gateway-statistics-calls>

Usage

```
<rpc>
  <get-service-border-signaling-gateway-statistics-calls>
</get-service-border-signaling-gateway-statistics-calls>
</rpc>
```

Description Show border signaling gateway calls statistics

Contents <get-service-border-signaling-gateway-statistics-calls-by-sp>—Show border signaling gateway calls statistics grouped by service-point

<get-service-border-signaling-gateway-statistics-calls-by-server>—Show border signaling gateway calls statistics grouped by server

<get-service-border-signaling-gateway-statistics-calls-by-server>

Usage

```
<rpc>
  <get-service-border-signaling-gateway-statistics-calls-by-server>
    <server-name>server-name</server-name>
    <gateway>gateway</gateway> <!-- mandatory -->
    <master/>
    <backup/>
  </get-service-border-signaling-gateway-statistics-calls-by-server>
</rpc>
```

Description Show border signaling gateway calls statistics grouped by server

Contents <server-name>—Server name

<gateway>—Name of border signaling gateway

<master>—Query the master border signaling gateway (default)

<backup>—Query the backup border signaling gateway

<get-service-border-signaling-gateway-statistics-calls-by-sp>

Usage

```
<rpc>
  <get-service-border-signaling-gateway-statistics-calls-by-sp>
    <service-point-name>service-point-name</service-point-name>
    <gateway>gateway</gateway> <!-- mandatory -->
    <master/>
    <backup/>
  </get-service-border-signaling-gateway-statistics-calls-by-sp>
```

</rpc>

Description Show border signaling gateway calls statistics grouped by service-point

Contents <service-point-name>—Service point name or prefix
<gateway>—Name of border signaling gateway
<master>—Query the master border signaling gateway (default)
<backup>—Query the backup border signaling gateway

<get-service-border-signaling-gateway-statistics-calls-duration-by-server>

Usage

```
<rpc>  
  <get-service-border-signaling-gateway-statistics-calls-duration-by-server>  
    <server-name>server-name</server-name>  
    <gateway>gateway</gateway> <!-- mandatory -->  
    <master/>  
    <backup/>  
  </get-service-border-signaling-gateway-statistics-calls-duration-by-server>  
</rpc>
```

Description Show border signaling gateway calls duration statistics grouped by server

Contents <server-name>—Server name
<gateway>—Name of border signaling gateway
<master>—Query the master border signaling gateway (default)
<backup>—Query the backup border signaling gateway

<get-service-border-signaling-gateway-statistics-calls-duration-by-sp>

Usage

```
<rpc>  
  <get-service-border-signaling-gateway-statistics-calls-duration-by-sp>  
    <service-point-name>service-point-name</service-point-name>  
    <gateway>gateway</gateway> <!-- mandatory -->  
    <master/>  
    <backup/>  
  </get-service-border-signaling-gateway-statistics-calls-duration-by-sp>  
</rpc>
```

Description Show border signaling gateway calls duration statistics grouped by service-point

- Contents**
- <service-point-name>—Service point name or prefix
 - <gateway>—Name of border signaling gateway
 - <master>—Query the master border signaling gateway (default)
 - <backup>—Query the backup border signaling gateway

<get-service-border-signaling-gateway-statistics-calls-failed>

Usage

```
<rpc>
  <get-service-border-signaling-gateway-statistics-calls-failed>
</get-service-border-signaling-gateway-statistics-calls-failed>
</rpc>
```

Description Show border signaling gateway failed calls statistics

- Contents**
- <get-service-border-signaling-gateway-statistics-failed-calls-by-sp>—Show border signaling gateway failed calls statistics grouped by service-point
 - <get-service-border-signaling-gateway-statistics-failed-calls-by-server>—Show border signaling gateway failed calls statistics grouped by server

<get-service-border-signaling-gateway-statistics-failed-calls-by-server>

Usage

```
<rpc>
  <get-service-border-signaling-gateway-statistics-failed-calls-by-server>
    <server-name>server-name</server-name>
    <gateway>gateway</gateway> <!-- mandatory -->
    <master/>
    <backup/>
  </get-service-border-signaling-gateway-statistics-failed-calls-by-server>
</rpc>
```

Description Show border signaling gateway failed calls statistics grouped by server

- Contents**
- <server-name>—Server name
 - <gateway>—Name of border signaling gateway
 - <master>—Query the master border signaling gateway (default)
 - <backup>—Query the backup border signaling gateway

<get-service-border-signaling-gateway-statistics-failed-calls-by-sp>

Usage

```
<rpc>
  <get-service-border-signaling-gateway-statistics-failed-calls-by-sp>
    <service-point-name>service-point-name</service-point-name>
    <gateway>gateway</gateway> <!-- mandatory -->
    <master/>
    <backup/>
  </get-service-border-signaling-gateway-statistics-failed-calls-by-sp>
</rpc>
```

Description Show border signaling gateway failed calls statistics grouped by service-point

Contents <service-point-name>—Service point name or prefix

<gateway>—Name of border signaling gateway

<master>—Query the master border signaling gateway (default)

<backup>—Query the backup border signaling gateway

<get-service-bsg-denied-messages>

Usage

```
<rpc>
  <get-service-bsg-denied-messages>
    <gateway>gateway</gateway> <!-- mandatory -->
    <master/>
    <backup/>
  </get-service-bsg-denied-messages>
</rpc>
```

Description Show information about dropped messages

Contents <gateway>—Name of border signaling gateway

<master>—Query the master border signaling gateway (default)

<backup>—Query the backup border signaling gateway

<get-service-bsg-information-by-call-context-id>

Usage

```
<rpc>
  <get-service-bsg-information-by-call-context-id>
    <gateway>gateway</gateway> <!-- mandatory -->
    <context-id>context-id</context-id>
    <brief/>
  </get-service-bsg-information-by-call-context-id>
</rpc>
```

```

    <detail/>
    <master/>
    <backup/>
    </get-service-bsg-information-by-call-context-id>
  </rpc>

```

Description Show border signaling gateway information by call context ID

Contents

- <gateway>—Name of border signaling gateway
- <context-id>—Call context ID
- <brief>—Display brief output (default)
- <detail>—Display detailed output
- <master>—Query the master border signaling gateway (default)
- <backup>—Query the backup border signaling gateway

<get-service-bsg-registrations>

Usage

```

<rpc>
  <get-service-bsg-registrations>
    <gateway>gateway</gateway> <!-- mandatory -->
    <master/>
    <backup/>
  </get-service-bsg-registrations>
</rpc>

```

Description Show border signaling gateway registrations statistics

Contents

- <gateway>—Name of border signaling gateway
- <get-service-bsg-registrations-statistics>—Show registration statistics
- <get-service-bsg-registrations-realm-statistics>—Realm statistics
- <master>—Query the master border signaling gateway (default)
- <backup>—Query the backup border signaling gateway

<get-service-bsg-registrations-realm-statistics>

Usage

```

<rpc>
  <get-service-bsg-registrations-realm-statistics>
    <gateway>gateway</gateway> <!-- mandatory -->
    <master/>

```

```
<backup/>
<realm-name>realm-name</realm-name>
</get-service-bsg-registrations-realm-statistics>
</rpc>
```

Description Realm statistics

Contents <gateway>—Name of border signaling gateway

<master>—Query the master border signaling gateway (default)

<backup>—Query the backup border signaling gateway

<realm-name>—

<get-service-bsg-registrations-statistics>

Usage

```
<rpc>
  <get-service-bsg-registrations-statistics>
    <gateway>gateway</gateway> <!-- mandatory -->
    <master/>
    <backup/>
  </get-service-bsg-registrations-statistics>
</rpc>
```

Description Show registration statistics

Contents <gateway>—Name of border signaling gateway

<master>—Query the master border signaling gateway (default)

<backup>—Query the backup border signaling gateway

<get-service-bsg-status-information>

Usage

```
<rpc>
  <get-service-bsg-status-information>
    <gateway>gateway</gateway> <!-- mandatory -->
    <brief/>
    <detail/>
    <master/>
    <backup/>
  </get-service-bsg-status-information>
</rpc>
```

Description Show border signaling gateway status information

Contents <gateway>—Name of border signaling gateway

 <brief>—Display brief output (default)

 <detail>—Display detailed output

 <master>—Query the master border signaling gateway (default)

 <backup>—Query the backup border signaling gateway

<get-service-cos-diffserv-statistics>

Usage

```
<rpc>
  <get-service-cos-diffserv-statistics>
    <brief/>
    <detail/>
    <extensive/>
    <summary/>
  </get-service-cos-diffserv-statistics>
</rpc>
```

Description Show Diffserv marking statistics

Contents <brief>—Display brief output (default)

 <detail>—Display detailed output

 <extensive>—Display extensive output

 <summary>—Display summary output

<get-service-cos-forwarding-class-statistics>

Usage

```
<rpc>
  <get-service-cos-forwarding-class-statistics>
    <brief/>
    <detail/>
    <extensive/>
    <summary/>
  </get-service-cos-forwarding-class-statistics>
</rpc>
```

Description Show forwarding Class statistics

Contents <brief>—Display brief output (default)

 <detail>—Display detailed output

<extensive>—Display extensive output

<summary>—Display summary output

<get-service-cos-statistics-information>

Usage

```
<rpc>
  <get-service-cos-statistics-information>
    <brief/>
    <detail/>
    <extensive/>
    <summary/>
    <service-set>service-set</service-set>
    <interface>interface</interface>
  </get-service-cos-statistics-information>
</rpc>
```

Description Show statistics

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<summary>—Display summary output

<service-set>—Name of service set

<interface>—Name of adaptive services interface

<get-service-cos-diffserv-statistics>—Show Diffserv marking statistics

<get-service-cos-forwarding-class-statistics>—Show forwarding Class statistics

<get-service-crtp-extensive-information>

Usage

```
<rpc>
  <get-service-crtp-extensive-information>
    <interface>interface</interface>
  </get-service-crtp-extensive-information>
</rpc>
```

Description Show CRTP extensive output

Contents <interface>—Name of link services interface

<get-service-crtp-flow-table-information>

Usage

```
<rpc>
  <get-service-crtp-flow-table-information>
    <interface>interface</interface>
  </get-service-crtp-flow-table-information>
</rpc>
```

Description Show CRTP flow table entries

Contents <interface>—Name of link services interface

<get-service-crtp-params-information>

Usage

```
<rpc>
  <get-service-crtp-params-information>
    <interface>interface</interface>
  </get-service-crtp-params-information>
</rpc>
```

Description Show Compressed Real-Time Protocol information

Contents <interface>—Name of link services interface

<get-service-crtp-extensive-information>—Show CRTP extensive output

<get-service-crtp-flow-table-information>—Show CRTP flow table entries

<get-service-deployment-service-information>

Usage

```
<rpc>
  <get-service-deployment-service-information/>
</rpc>
```

Description Show service deployment service information

<get-service-fwnat-flow-table-information>

Usage

```
<rpc>
  <get-service-fwnat-flow-table-information>
    <service-set>service-set</service-set>
    <interface>interface</interface>
  </get-service-fwnat-flow-table-information>
</rpc>
```

```
<get-service-softwire-count-information/>
</get-service-fwnat-flow-table-information>
</rpc>
```

Description Show flow table entries

Contents <service-set>—Name of service set

<interface>—Name of adaptive services interface

<get-service-softwire-count-information>—Show count of matching entries

<get-service-identification-statistics-information>

Usage

```
<rpc>
  <get-service-identification-statistics-information>
    <detail/>
  </get-service-identification-statistics-information>
</rpc>
```

Description Show service identification statistics

Contents <detail>—Display detailed statistics

<get-service-ids-destination-table-information>

Usage

```
<rpc>
  <get-service-ids-destination-table-information>
    <destination-prefix>destination-prefix</destination-prefix>
    <service-set>service-set</service-set>
    <interface>interface</interface>
    <order>order</order>
    <threshold>threshold</threshold>
    <limit>limit</limit>
    <extensive/>
    <brief/>
    <terse/>
  </get-service-ids-destination-table-information>
</rpc>
```

Description Show attack destination address table

Contents <destination-prefix>—Destination prefix to use as filter

- anomalies - Order by number of anomalies (default)
- bytes - Order by bytes received

- flows - Order by number of flows
- packets - Order by packets received

<service-set>—Name of service set

- anomalies - Order by number of anomalies (default)
- bytes - Order by bytes received
- flows - Order by number of flows
- packets - Order by packets received

<interface>—Name of adaptive services interface

- anomalies - Order by number of anomalies (default)
- bytes - Order by bytes received
- flows - Order by number of flows
- packets - Order by packets received

<order>—Specify table ordering criteria

- anomalies - Order by number of anomalies (default)
- bytes - Order by bytes received
- flows - Order by number of flows
- packets - Order by packets received

<threshold>—Minimum threshold for table entries

<limit>—Maximum number of entries to display

<extensive>—Display extensive output

<brief>—Display brief output (default)

<terse>—Display terse output

<get-service-ids-pair-table-information>

Usage

```
<rpc>
  <get-service-ids-pair-table-information>
    <source-prefix>source-prefix</source-prefix>
    <destination-prefix>destination-prefix</destination-prefix>
    <service-set>service-set</service-set>
    <interface>interface</interface>
    <order>order</order>
    <threshold>threshold</threshold>
    <limit>limit</limit>
    <extensive/>
```

```
<brief/>
<terse/>
</get-service-ids-pair-table-information>
</rpc>
```

Description Show attack source and destination address pair table

Contents <source-prefix>—Source prefix to use as filter

- anomalies - Order by number of anomalies (default)
- bytes - Order by bytes received
- flows - Order by number of flows
- packets - Order by packets received

<destination-prefix>—Destination prefix to use as filter

- anomalies - Order by number of anomalies (default)
- bytes - Order by bytes received
- flows - Order by number of flows
- packets - Order by packets received

<service-set>—Name of service set

- anomalies - Order by number of anomalies (default)
- bytes - Order by bytes received
- flows - Order by number of flows
- packets - Order by packets received

<interface>—Name of adaptive services interface

- anomalies - Order by number of anomalies (default)
- bytes - Order by bytes received
- flows - Order by number of flows
- packets - Order by packets received

<order>—Specify table ordering criteria

- anomalies - Order by number of anomalies (default)
- bytes - Order by bytes received
- flows - Order by number of flows
- packets - Order by packets received

<threshold>—Minimum threshold for table entries

<limit>—Maximum number of entries to display

<extensive>—Display extensive output

<brief>—Display brief output (default)

<terse>—Display terse output

<get-service-ids-source-table-information>

Usage

```
<rpc>
  <get-service-ids-source-table-information>
    <source-prefix>source-prefix</source-prefix>
    <service-set>service-set</service-set>
    <interface>interface</interface>
    <order>order</order>
    <threshold>threshold</threshold>
    <limit>limit</limit>
    <extensive/>
    <brief/>
    <terse/>
  </get-service-ids-source-table-information>
</rpc>
```

Description Show attack source address table

Contents <source-prefix>—Source prefix to use as filter

- anomalies - Order by number of anomalies (default)
- bytes - Order by bytes received
- flows - Order by number of flows
- packets - Order by packets received

<service-set>—Name of service set

- anomalies - Order by number of anomalies (default)
- bytes - Order by bytes received
- flows - Order by number of flows
- packets - Order by packets received

<interface>—Name of adaptive services interface

- anomalies - Order by number of anomalies (default)
- bytes - Order by bytes received
- flows - Order by number of flows
- packets - Order by packets received

<order>—Specify table ordering criteria

- anomalies - Order by number of anomalies (default)
- bytes - Order by bytes received
- flows - Order by number of flows
- packets - Order by packets received

<threshold>—Minimum threshold for table entries

<limit>—Maximum number of entries to display

<extensive>—Display extensive output

<brief>—Display brief output (default)

<terse>—Display terse output

<get-service-msp-flow-table-information>

Usage

```
<rpc>
  <get-service-msp-flow-table-information>
    <all/>
    <limit>limit</limit>
    <extensive/>
    <brief/>
    <terse/>
    <source-prefix>source-prefix</source-prefix>
    <destination-prefix>destination-prefix</destination-prefix>
    <source-port>source-port</source-port>
    <destination-port>destination-port</destination-port>
    <protocol>protocol</protocol>
    <service-set>service-set</service-set>
    <interface>interface</interface>
    <get-service-sfw-flow-count-information/>
  </get-service-msp-flow-table-information>
</rpc>
```

Description Show flow table entries

Contents <all>—Display all the entries

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol

- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<limit>—Maximum number of entries to display

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<extensive>—Display extensive output

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol

- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<brief>—Display brief output (default)

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<terse>—Display terse output

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol

- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation

- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<protocol>—IP protocol type to use as filter

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<service-set>—Name of service set

<interface>—Name of extension provider interface

<get-service-sfw-flow-count-information>—Show count of matching entries

<get-service-nat-ipv6-multicast-information>

Usage

<rpc>

<get-service-nat-ipv6-multicast-information>

```
</get-service-nat-ipv6-multicast-information>
</rpc>
```

Description Show interfaces with IPv6 multicast filter

Contents

<get-service-nat-mapping-information>

Usage

```
<rpc>
  <get-service-nat-mapping-information>
    <pool-name>pool-name</pool-name>
    <brief/>
    <detail/>
  </get-service-nat-mapping-information>
</rpc>
```

Description Show NAT mapping information

Contents <pool-name>—Name of pool

<brief>—Display brief output (default)

<detail>—Display detailed output

<get-service-nat-pool-information>

Usage

```
<rpc>
  <get-service-nat-pool-information>
    <pool-name>pool-name</pool-name>
    <brief/>
    <detail/>
  </get-service-nat-pool-information>
</rpc>
```

Description Show NAT pools information

Contents <pool-name>—Name of pool

<brief>—Display brief output (default)

<detail>—Display detailed output

<get-service-pgcp-active-configuration-gateway>

Usage

```

<rpc>
  <get-service-pgcp-active-configuration-gateway>
    <gateway-name>gateway-name</gateway-name> <!-- mandatory -->
    <master/>
    <backup/>
  </get-service-pgcp-active-configuration-gateway>
</rpc>

```

Description Show gateway active configuration

Contents <gateway-name>—Gateway name

<master>—Query the master RE or ms-pic (default)

<backup>—Query the backup ms-pic

<get-service-pgcp-conversation-information>

Usage

```

<rpc>
  <get-service-pgcp-conversation-information>
  </get-service-pgcp-conversation-information>
</rpc>

```

Description Show PGCP conversations

Contents <get-service-pgcp-conversation-information-gateway>—Show PGCP conversations for gateway

<get-service-pgcp-conversation-information-gateway>

Usage

```

<rpc>
  <get-service-pgcp-conversation-information-gateway>
    <gateway-name>gateway-name</gateway-name> <!-- mandatory -->
    <service-set>service-set</service-set>
    <source-prefix>source-prefix</source-prefix>
    <destination-prefix>destination-prefix</destination-prefix>
    <source-port>source-port</source-port>
    <destination-port>destination-port</destination-port>
    <source-routing-instance>source-routing-instance</source-routing-instance>
    <destination-routing-instance>destination-routing-instance</destination-routing-instance>

    <protocol>protocol</protocol>
    <brief/>
  </get-service-pgcp-conversation-information-gateway>
</rpc>

```

```
<extensive/>
<master/>
<backup/>
</get-service-pgcp-conversation-information-gateway>
</rpc>
```

Description Show PGCP conversations for gateway

Contents <gateway-name>—Gateway name

- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- number - Numeric protocol value (0 .. 255)

<get-service-pgcp-flow-count-information>—Show count of matching entries

<brief>—Display brief output

<extensive>—Display extensive output

<master>—Query the master RE or ms-pic (default)

<backup>—Query the backup ms-pic

<get-service-pgcp-gate>

Usage

```
<rpc>  
  <get-service-pgcp-gate>  
  </get-service-pgcp-gate>  
</rpc>
```

Description Show gate according to gate-id

Contents <get-service-pgcp-gate-gateway>—Show gate for gateway

<get-service-pgcp-gate-gateway>

Usage

```
<rpc>
  <get-service-pgcp-gate-gateway>
    <gateway-name>gateway-name</gateway-name> <!-- mandatory -->
    <gate-id>gate-id</gate-id> <!-- mandatory -->
    <extensive/>
    <brief/>
    <statistics/>
    <session-mirroring/>
    <master/>
    <backup/>
  </get-service-pgcp-gate-gateway>
</rpc>
```

Description Show gate for gateway

Contents <gateway-name>—Gateway name

<gate-id>—Gate id

<extensive>—Display extensive output

<brief>—Display brief output (default)

<statistics>—Display statistics for gate

<session-mirroring>—Display session mirroring for gate

<master>—Query the master RE or ms-pic (default)

<backup>—Query the backup ms-pic

<get-service-pgcp-gates>

Usage

```
<rpc>
  <get-service-pgcp-gates>
  </get-service-pgcp-gates>
</rpc>
```

Description Show list of gates

Contents <get-service-pgcp-gates-gateway>—Show all gates for gateway

<get-service-pgcp-gates-gateway>

Usage

```
<rpc>
  <get-service-pgcp-gates-gateway>
    <gateway-name>gateway-name</gateway-name> <!-- mandatory -->
    <extensive/>
    <brief/>
    <count/>
    <source-routing-instance>source-routing-instance</source-routing-instance>

    <destination-routing-instance>destination-routing-instance</destination-routing-instance>

    <master/>
    <backup/>
  </get-service-pgcp-gates-gateway>
</rpc>
```

Description Show all gates for gateway

Contents

- <gateway-name>—Gateway name
- <extensive>—Display extensive output
- <brief>—Display brief output (default)
- <count>—Show count of matching entries
- <source-routing-instance>—Source routing-instance
- <destination-routing-instance>—Destination routing-instance
- <master>—Query the master RE or ms-pic (default)
- <backup>—Query the backup ms-pic

<get-service-pgcp-statistics>

Usage

```
<rpc>
  <get-service-pgcp-statistics>
  </get-service-pgcp-statistics>
</rpc>
```

Description Show pgcpd statistics

Contents <get-service-pgcp-statistics-gateway>—Show gateway statistics

<get-service-pgcp-statistics-gateway>

Usage

```

<rpc>
  <get-service-pgcp-statistics-gateway>
    <gateway-name>gateway-name</gateway-name> <!-- mandatory -->
    <brief/>
    <extensive/>
    <master/>
    <backup/>
  </get-service-pgcp-statistics-gateway>
</rpc>

```

Description Show gateway statistics

Contents

- <gateway-name>—Gateway name
- <brief>—Display brief output (default)
- <extensive>—Display extensive output
- <master>—Query the master RE or ms-pic (default)
- <backup>—Query the backup ms-pic

<get-service-pgcp-terminations>

Usage

```

<rpc>
  <get-service-pgcp-terminations>
  </get-service-pgcp-terminations>
</rpc>

```

Description Show list of terminations

Contents <get-service-pgcp-terminations-gateway>—Show list of terminations for gateway

<get-service-pgcp-terminations-gateway>

Usage

```

<rpc>
  <get-service-pgcp-terminations-gateway>
    <gateway-name>gateway-name</gateway-name> <!-- mandatory -->
    <termination-prefix>termination-prefix</termination-prefix>
    <h248/>
    <brief/>
    <count/>
    <master/>
    <backup/>
  </get-service-pgcp-terminations-gateway>
</rpc>

```

```
</get-service-pgcp-terminations-gateway>
</rpc>
```

Description Show list of terminations for gateway

Contents

- <gateway-name>—Gateway name
- <termination-prefix>—Termination-prefix to use as filter, default * (all)
- <h248>—Display H248 output format
- <brief>—Display brief output (default)
- <count>—Show count of matching entries
- <master>—Query the master RE or ms-pic (default)
- <backup>—Query the backup ms-pic

<get-service-set-cpu-statistics>

Usage

```
<rpc>
  <get-service-set-cpu-statistics>
    <service-set>service-set</service-set>
    <interface>interface</interface>
  </get-service-set-cpu-statistics>
</rpc>
```

Description Show service interface CPU utilization as a percentage

Contents

- <service-set>—Name of service set
- <interface>—Name of adaptive services interface

<get-service-set-memory-statistics>

Usage

```
<rpc>
  <get-service-set-memory-statistics>
    <service-set>service-set</service-set>
    <interface>interface</interface>
  </get-service-set-memory-statistics>
</rpc>
```

Description Show service interface memory utilization

Contents

- <service-set>—Name of service set

<interface>—Name of adaptive services interface

<zone>—Show current memory usage zone

<get-service-set-packet-drop-statistics>

Usage

```
<rpc>
  <get-service-set-packet-drop-statistics>
    <interface>interface</interface>
  </get-service-set-packet-drop-statistics>
</rpc>
```

Description Show service set packet drop statistics

Contents <interface>—Name of adaptive services interface

<get-service-set-plugin-summary>

Usage

```
<rpc>
  <get-service-set-plugin-summary>
    <interface>interface</interface>
  </get-service-set-plugin-summary>
</rpc>
```

Description Show service set plugins summary

Contents <interface>—Name of extension provider interface

<get-service-set-summary-information>

Usage

```
<rpc>
  <get-service-set-summary-information>
    <interface>interface</interface>
  </get-service-set-summary-information>
</rpc>
```

Description Show service set summary information

Contents <interface>—Name of adaptive services interface

<get-service-set-tcp-mss-statistics>

Usage

```
<rpc>
  <get-service-set-tcp-mss-statistics>
    <interface>interface</interface>
  </get-service-set-tcp-mss-statistics>
</rpc>
```

Description Show service set TCP MSS statistics

Contents <interface>—Name of adaptive services interface

<get-service-sfw-conversation-information>

Usage

```
<rpc>
  <get-service-sfw-conversation-information>
    <all/>
    <limit>limit</limit>
    <extensive/>
    <brief/>
    <terse/>
    <source-prefix>source-prefix</source-prefix>
    <destination-prefix>destination-prefix</destination-prefix>
    <source-port>source-port</source-port>
    <destination-port>destination-port</destination-port>
    <protocol>protocol</protocol>
    <application-protocol>application-protocol</application-protocol>
    <service-set>service-set</service-set>
    <interface>interface</interface>
    <pgcp/>
  </get-service-sfw-conversation-information>
</rpc>
```

Description Show conversations

Contents <all>—Display all the entries

- icmp - Internet Control Message Protocol

<service-set>—Name of service set

<interface>—Name of adaptive services interface

<pgcp>—Use pgcp flow type as filter

<get-service-sfw-flow-count-information>—Show count of matching entries

<get-service-sfw-sip-call-information>

Usage

```
<rpc>
  <get-service-sfw-sip-call-information>
    <all/>
    <limit>limit</limit>
    <extensive/>
    <brief/>
    <terse/>
    <source-prefix>source-prefix</source-prefix>
    <destination-prefix>destination-prefix</destination-prefix>
    <source-port>source-port</source-port>
    <destination-port>destination-port</destination-port>
    <protocol>protocol</protocol>
    <application-protocol>application-protocol</application-protocol>
    <service-set>service-set</service-set>
    <interface>interface</interface>
    <get-service-sfw-sip-call-count-information/>
  </get-service-sfw-sip-call-information>
</rpc>
```

Description Show SIP call information

<service-set>—Name of service set

<interface>—Name of adaptive services interface

<get-service-sfw-sip-call-count-information>—Show count of matching entries

<get-service-sfw-sip-register-information>

Usage

```
<rpc>
  <get-service-sfw-sip-register-information>
    <all/>
    <limit>limit</limit>
    <extensive/>
    <brief/>
    <terse/>
    <source-prefix>source-prefix</source-prefix>
    <destination-prefix>destination-prefix</destination-prefix>
    <source-port>source-port</source-port>
    <destination-port>destination-port</destination-port>
    <protocol>protocol</protocol>
    <application-protocol>application-protocol</application-protocol>
    <service-set>service-set</service-set>
    <interface>interface</interface>
    <get-service-sfw-sip-register-count-information/>
  </get-service-sfw-sip-register-information>
</rpc>
```

Description Show SIP register information

Contents <all>—Display all the entries

- icmp - Internet Control Message Protocol

<service-set>—Name of service set

<interface>—Name of adaptive services interface

<get-service-sfw-sip-register-count-information>—Show count of matching entries

<get-service-sfw-statistics-information>

Usage

```
<rpc>
  <get-service-sfw-statistics-information>
  <brief/>
  <detail/>
  <extensive/>
  <summary/>
  <service-set>service-set</service-set>
  <interface>interface</interface>
  </get-service-sfw-statistics-information>
</rpc>
```

Description Show statistics

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<summary>—Display summary output

<service-set>—Name of service set

<interface>—Name of adaptive services interface

<application-protocol>—Application protocol type to use as filter

<get-service-softwire-statistics-information>

Usage

```
<rpc>
  <get-service-softwire-statistics-information>
    <service-set>service-set</service-set>
    <interface>interface</interface>
  </get-service-softwire-statistics-information>
</rpc>
```

Description Show global softwire statistics

Contents <service-set>—Name of service set

<interface>—Name of adaptive services interface

<get-service-softwire-table-information>

Usage

```
<rpc>
  <get-service-softwire-table-information>
</get-service-softwire-table-information>
</rpc>
```

Description Show softwire information

Contents <get-service-fwnat-flow-table-information>—Show flow table entries

<get-service-softwire-statistics-information>—Show global softwire statistics

<get-services-dynamic-flow-capture-content-destination-information>

Usage

```
<rpc>
  <get-services-dynamic-flow-capture-content-destination-information>
    <terse/>
    <capture-group>capture-group</capture-group> <!-- mandatory -->
    <destination-identifier>destination-identifier</destination-identifier> <!-- mandatory -->
  </get-services-dynamic-flow-capture-content-destination-information>
```

</rpc>

Description Show DFC content destination information

Contents <terse>—Display terse output (default)
 <capture-group>—Capture group name
 <destination-identifier>—Content destination identifier

<get-services-dynamic-flow-capture-control-source-information>

Usage

```
<rpc>
  <get-services-dynamic-flow-capture-control-source-information>
    <detail/>
    <terse/>
    <capture-group>capture-group</capture-group> <!-- mandatory -->
    <source-identifier>source-identifier</source-identifier> <!-- mandatory -->
  </get-services-dynamic-flow-capture-control-source-information>
</rpc>
```

Description Show DFC control source information

Contents <detail>—Display detailed output
 <terse>—Display terse output (default)
 <capture-group>—Capture group name
 <source-identifier>—Control source identifier

<get-services-flow-collector-file-information>

Usage

```
<rpc>
  <get-services-flow-collector-file-information>
    <interface>interface</interface> <!-- mandatory -->
    <extensive/>
    <detail/>
    <terse/>
  </get-services-flow-collector-file-information>
</rpc>
```

Description Show file status information

Contents <interface>—Interface name

- all - All configured Collector PICs

- interface - Physical interface

<extensive>—Display extensive output

<detail>—Display detailed output

<terse>—Display terse output (default)

<get-services-flow-collector-information>

Usage

```
<rpc>
  <get-services-flow-collector-information>
    <extensive/>
    <detail/>
    <terse/>
    <interface>interface</interface> <!-- mandatory -->
  </get-services-flow-collector-information>
</rpc>
```

Description Show flow collector service information

Contents

<extensive>—Display extensive output

- all - All configured Collector PICs
- interface - Physical interface

<detail>—Display detailed output

- all - All configured Collector PICs
- interface - Physical interface

<terse>—Display terse output (default)

- all - All configured Collector PICs
- interface - Physical interface

<interface>—Interface name

- all - All configured Collector PICs
- interface - Physical interface

<get-services-flow-collector-file-information>—Show file status information

<get-services-flow-collector-input-information>—Show input status information

<get-services-flow-collector-input-information>

Usage

```

<rpc>
  <get-services-flow-collector-input-information>
    <interface>interface</interface> <!-- mandatory -->
    <extensive/>
    <detail/>
    <terse/>
  </get-services-flow-collector-input-information>
</rpc>

```

Description Show input status information

Contents <interface>—Interface name

- all - All configured Collector PICs
- interface - Physical interface

<extensive>—Display extensive output

<detail>—Display detailed output

<terse>—Display terse output (default)

<get-services-ipsec-statistics-information>

Usage

```

<rpc>
  <get-services-ipsec-statistics-information>
    <remote-gw>remote-gw</remote-gw>
    <detail/>
    <brief/>
    <service-set>service-set</service-set>
  </get-services-ipsec-statistics-information>
</rpc>

```

Description Show IPSec statistics

Contents <remote-gw>—Peer address to use as filter

<detail>—Display all tunnels

<brief>—Display accumulated statistics (default)

<service-set>—Name of service set

<get-services-l2tp-radius-accounting-servers-information>

Usage

```
<rpc>  
  <get-services-l2tp-radius-accounting-servers-information/>  
</rpc>
```

Description Show RADIUS accounting servers information

<get-services-l2tp-radius-accounting-statistics-information>

Usage

```
<rpc>  
  <get-services-l2tp-radius-accounting-statistics-information/>  
</rpc>
```

Description Show RADIUS accounting statistics information

<get-services-l2tp-radius-authentication-accounting-servers-information>

Usage

```
<rpc>  
  <get-services-l2tp-radius-authentication-accounting-servers-information/>  
</rpc>
```

Description Show RADIUS authentication and accounting servers information

<get-services-l2tp-radius-authentication-accounting-statistics-information>

Usage

```
<rpc>  
  <get-services-l2tp-radius-authentication-accounting-statistics-information/>  
</rpc>
```

Description Show RADIUS authentication and accounting statistics information

<get-services-l2tp-radius-authentication-servers-information>

Usage

```
<rpc>  
  <get-services-l2tp-radius-authentication-servers-information/>  
</rpc>
```

Description Show RADIUS authentication servers information

<get-services-l2tp-radius-authentication-statistics-information>

Usage

```
<rpc>
  <get-services-l2tp-radius-authentication-statistics-information/>
</rpc>
```

Description Show RADIUS authentication statistics information

<get-services-pgcpd-root-termination>

Usage

```
<rpc>
  <get-services-pgcpd-root-termination>
  </get-services-pgcpd-root-termination>
</rpc>
```

Description Show root termination h248 information

Contents <get-services-pgcpd-root-termination-gateway>—Show root termination h248 information for gateway

<get-services-pgcpd-root-termination-gateway>

Usage

```
<rpc>
  <get-services-pgcpd-root-termination-gateway>
  <gateway-name>gateway-name</gateway-name> <!-- mandatory -->
  <master/>
  <backup/>
  </get-services-pgcpd-root-termination-gateway>
</rpc>
```

Description Show root termination h248 information for gateway

Contents <gateway-name>—Gateway name

<master>—Query the master RE or ms-pic (default)

<backup>—Query the backup ms-pic

<get-services-security-associations-information>

Usage

```
<rpc>
  <get-services-security-associations-information>
```

```
<brief/>
<detail/>
<extensive/>
<service-set>service-set</service-set>
</get-services-security-associations-information>
</rpc>
```

Description Show IPSec security association information

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<service-set>—Restrict output to one service set

<get-sflow-collector>

Usage

```
<rpc>
  <get-sflow-collector/>
</rpc>
```

Description Show sFlow collectors

<get-sflow-interface>

Usage

```
<rpc>
  <get-sflow-interface/>
</rpc>
```

Description Show sFlow interfaces

<get-sfm-information>

Usage

```
<rpc>
  <get-sfm-information>
  </get-sfm-information>
</rpc>
```

Description Show Switching and Forwarding Module status

Contents <detail>—Show detailed output

<get-sha1-checksum-information>

Usage

```

<rpc>
  <get-sha1-checksum-information>
    <path>path</path> <!-- mandatory -->
  </get-sha1-checksum-information>
</rpc>

```

Description Calculate SHA1 checksum of a file

Contents <path>—Path to filename

<get-sha256-checksum-information>

Usage

```

<rpc>
  <get-sha256-checksum-information>
    <path>path</path> <!-- mandatory -->
  </get-sha256-checksum-information>
</rpc>

```

Description Calculate SHA-256 checksum of a file

Contents <path>—Path to filename

<get-show-bridge-domain-all-ce-flood-route-information>

Usage

```

<rpc>
  <get-show-bridge-domain-all-ce-flood-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <bridge-domain>bridge-domain</bridge-domain>
  </get-show-bridge-domain-all-ce-flood-route-information>
</rpc>

```

Description Show route for flooding traffic to all CE routers if no-local-switching is enabled

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Display information for a specified instance

<bridge-domain>—Display information for a specified bridge domain

<get-show-bridge-domain-ve-flood-route-information>

Usage

```
<rpc>
  <get-show-bridge-domain-ve-flood-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <bridge-domain>bridge-domain</bridge-domain>
  </get-show-bridge-domain-ve-flood-route-information>
</rpc>
```

Description Show route for flooding traffic to all VE routers if no-local-switching is enabled

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Display information for a specified instance

<bridge-domain>—Display information for a specified bridge domain

<get-sib-information>

Usage

```
<rpc>
  <get-sib-information/>
</rpc>
```

Description Show Switch Interface Board status

<get-sip-peers>

Usage

```
<rpc>
  <get-sip-peers/>
</rpc>
```

Description Show SIP peers and their information

<get-sip-registry>

Usage

```
<rpc>
  <get-sip-registry/>
</rpc>
```

Description Show SIP registry entries

<get-smtp-configuration>

Usage

```
<rpc>
  <get-smtp-configuration/>
</rpc>
```

Description Show SMTP server configuration information

<get-smtp-statistics>

Usage

```
<rpc>
  <get-smtp-statistics/>
</rpc>
```

Description Show SMTP client service statistics

<get-snapshot-information>

Usage

```
<rpc>
  <get-snapshot-information>
    <slice>slice</slice>
    <media>media</media>
  </get-snapshot-information>
</rpc>
```

Description Show snapshot information

Contents <slice>—Show snapshot information from specified partition

- 1 - Show snapshot information from first partition
- 2 - Show snapshot information from second partition
- alternate - Show snapshot information from alternate partition
- removable-compact-flash - Show snapshot information from removable compact flash
- compact-flash - Show snapshot information from compact flash
- usb - Show snapshot information from device connected to USB port
- hard-disk - Show snapshot information from hard disk
- internal - Show snapshot information from internal flash
- external - Show snapshot information from external flash

<media>—Media to show snapshot information from

- removable-compact-flash - Show snapshot information from removable compact flash
- compact-flash - Show snapshot information from compact flash
- usb - Show snapshot information from device connected to USB port
- hard-disk - Show snapshot information from hard disk
- internal - Show snapshot information from internal flash
- external - Show snapshot information from external flash

<get-snmp-inform-statistics>

Usage

```
<rpc>
  <get-snmp-inform-statistics/>
</rpc>
```

Description Show SNMP Inform request statistics

<get-snmp-information>

Usage

```
<rpc>
  <get-snmp-information/>
</rpc>
```

Description Show SNMP statistics

<get-snmp-object>

Usage

```
<rpc>
  <get-snmp-object>
    <decimal/>
    <ascii/>
    <snmp-object-name>snmp-object-name</snmp-object-name> <!-- mandatory
-->
  </get-snmp-object>
</rpc>
```

Description Get SNMP object value

Contents <decimal>—Decimal format (default)

<ascii>—Convert string indices to 'ascii-keys' representation

<snmp-object-name>—

<get-snmp-v3-access-information>

Usage

```
<rpc>  
  <get-snmp-v3-access-information>  
    <brief/>  
    <detail/>  
  </get-snmp-v3-access-information>  
</rpc>
```

Description Show SNMPv3 access information

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<get-snmp-v3-community-information>

Usage

```
<rpc>  
  <get-snmp-v3-community-information/>  
</rpc>
```

Description Show SNMPv3 community information

<get-snmp-v3-general-information>

Usage

```
<rpc>  
  <get-snmp-v3-general-information/>  
</rpc>
```

Description Show general SNMPv3 information

<get-snmp-v3-group-information>

Usage

```
<rpc>  
  <get-snmp-v3-group-information/>  
</rpc>
```

Description Show SNMPv3 security-to-group information

<get-snmp-v3-information>

Usage

```
<rpc>  
  <get-snmp-v3-information>  
  </get-snmp-v3-information>  
</rpc>
```

Description Show SNMP version 3 information

Contents <get-snmp-v3-general-information>—Show general SNMPv3 information

<get-snmp-v3-usm-user-information>—Show SNMPv3 user information

<get-snmp-v3-access-information>—Show SNMPv3 access information

<get-snmp-v3-community-information>—Show SNMPv3 community information

<get-snmp-v3-target-information>—Show SNMPv3 target information

<get-snmp-v3-notify-information>—Show SNMPv3 notify information

<get-snmp-v3-notify-filter-information>

Usage

```
<rpc>  
  <get-snmp-v3-notify-filter-information/>  
</rpc>
```

Description Show SNMPv3 notify filter information

<get-snmp-v3-notify-information>

Usage

```
<rpc>  
  <get-snmp-v3-notify-information>  
  </get-snmp-v3-notify-information>  
</rpc>
```

Description Show SNMPv3 notify information

Contents <get-snmp-v3-notify-filter-information>—Show SNMPv3 notify filter information

<get-snmp-v3-target-address-information>

Usage

```
<rpc>
  <get-snmp-v3-target-address-information/>
</rpc>
```

Description Show SNMPv3 target address information

<get-snmp-v3-target-information>

Usage

```
<rpc>
  <get-snmp-v3-target-information>
  </get-snmp-v3-target-information>
</rpc>
```

Description Show SNMPv3 target information

Contents <get-snmp-v3-target-address-information>—Show SNMPv3 target address information

<get-snmp-v3-target-parameters-information>—Show SNMPv3 target parameters information

<get-snmp-v3-target-parameters-information>

Usage

```
<rpc>
  <get-snmp-v3-target-parameters-information/>
</rpc>
```

Description Show SNMPv3 target parameters information

<get-snmp-v3-usm-user-information>

Usage

```
<rpc>
  <get-snmp-v3-usm-user-information/>
</rpc>
```

Description Show SNMPv3 user information

<get-software-information>

Usage

```
<rpc>
  <get-software-information>
    <brief/>
    <detail/>
  </get-software-information>
</rpc>
```

Description Show software process revision levels

Contents <brief>—Display brief output
 <detail>—Display detailed output

<get-software-installation-status>

Usage

```
<rpc>
  <get-software-installation-status/>
</rpc>
```

Description Show status of software installation

<get-source-class-statistics>

Usage

```
<rpc>
  <get-source-class-statistics>
    <class-name>class-name</class-name> <!-- mandatory -->
    <interface-name>interface-name</interface-name>
  </get-source-class-statistics>
</rpc>
```

Description Show statistics for source class

Contents <all>—Display all source class usage
 <class-name>—Name of source class
 <interface-name>—Name of logical interface

<get-source-nat-pool-information>

Usage

```
<rpc>
  <get-source-nat-pool-information>
    <pool-name>pool-name</pool-name> <!-- mandatory -->
  </get-source-nat-pool-information>
</rpc>
```

Description Show source NAT information of this pool

Contents <pool-name>—Address-pool name

<get-source-nat-rule-sets-information>

Usage

```
<rpc>
  <get-source-nat-rule-sets-information>
    <rule-choice>rule-choice</rule-choice> <!-- mandatory -->
    <rule-name>rule-name</rule-name> <!-- mandatory -->
    <all/>
  </get-source-nat-rule-sets-information>
</rpc>
```

Description Show source NAT rule-set information

Contents <rule-name>—The name of the source NAT rule-set

<all>—Display all source NAT rule-sets information

<get-source-nat-summary>

Usage

```
<rpc>
  <get-source-nat-summary/>
</rpc>
```

Description Show source NAT summary information

<get-spmb-information>

Usage

```
<rpc>
  <get-spmb-information>
  </get-spmb-information>
```

</rpc>

Description Show Switch Processor Mezzanine Board status

Contents <get-symb-sib-information>—Show Switch Interface Board status

<get-symb-sib-information>

Usage

```
<rpc>
  <get-symb-sib-information/>
</rpc>
```

Description Show Switch Interface Board status

<get-spu-monitoring-information>

Usage

```
<rpc>
  <get-spu-monitoring-information>
    <fpc-slot>fpc-slot</fpc-slot> <!-- mandatory -->
  </get-spu-monitoring-information>
</rpc>
```

Description Show the FPC slot security monitoring information

Contents <fpc-slot>—FPC slot number

<get-ssb-information>

Usage

```
<rpc>
  <get-ssb-information>
    <slot>slot</slot>
  </get-ssb-information>
</rpc>
```

Description Show System and Switch Board status

Contents <slot>—SSB slot number

<get-static-mac-bypassed-users>

Usage

```
<rpc>
```

```

    <get-static-mac-bypassed-users/>
  </rpc>

```

Description List users who have bypassed 802.1X authentication

<get-static-nat-rule-information>

Usage

```

  <rpc>
    <get-static-nat-rule-information>
      <rule-choice>rule-choice</rule-choice> <!-- mandatory -->
      <rule-name>rule-name</rule-name> <!-- mandatory -->
      <all/>
    </get-static-nat-rule-information>
  </rpc>

```

Description Show static NAT rule information

Contents <rule-name>—The name of the rule
 <all>—Display all static NAT rule information

<get-static-nat-summary>

Usage

```

  <rpc>
    <get-static-nat-summary/>
  </rpc>

```

Description Show static NAT summary information

<get-statistics-information>

Usage

```

  <rpc>
    <get-statistics-information>
      <ip/>
      <ip6/>
      <icmp/>
      <icmp6/>
      <tcp/>
      <udp/>
      <igmp/>
      <arp/>
      <clns/>
      <esis/>
      <tnp/>
      <rdp/>
    </get-statistics-information>
  </rpc>

```

```
<ttp/>
<tudp/>
<mpls/>
<ethoam/>
</get-statistics-information>
</rpc>
```

Description Show statistics for protocol

Contents

- <ip>—IP version 4 (IPv4)
- <ip6>—IP version 6 (IPv6)
- <icmp>—Internet Control Message Protocol
- <icmp6>—Internet Control Message Protocol for IPv6
- <tcp>—Transmission Control Protocol
- <udp>—User Datagram Protocol
- <igmp>—Internet Gateway Management Protocol
- <arp>—Address Resolution Protocol
- <clns>—Connectionless Network Service
- <esis>—End System-to-Intermediate System
- <tnp>—Trivial Network Protocol
- <rdp>—Reliable Datagram Protocol
- <ttp>—TNP Tunneling Protocol
- <tudp>—Trivial User Datagram Protocol
- <mpls>—Multiprotocol Label Switching
- <ethoam>—Ethernet OAM protocol
- <vpls>—Virtual private LAN service
- <bridge>—IEEE 802.1 Bridging

<get-stp-bridge-information>

Usage

```
<rpc>
  <get-stp-bridge-information>
    <brief/>
    <detail/>
    <msti-vlan>msti-vlan</msti-vlan>
```

```

    <msti>msti</msti>
    <vlan-id>vlan-id</vlan-id>
  </get-stp-bridge-information>
</rpc>

```

Description Show STP bridge parameters

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<msti>—MSTP instance ID (0 for CIST; 1..4094 for MSTIs)

<vlan-id>—VLAN ID

<get-stp-bridge-interface-information>

Usage

```

<rpc>
  <get-stp-bridge-interface-information>
  <brief/>
  <detail/>
  <interface-name>interface-name</interface-name>
  <msti-vlan>msti-vlan</msti-vlan>
  <msti>msti</msti>
  <vlan-id>vlan-id</vlan-id>
</get-stp-bridge-interface-information>
</rpc>

```

Description Show STP interface parameters

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<interface-name>—Name of interface

<msti>—MSTP instance ID (0 for CIST; 1..4094 for MSTIs)

<vlan-id>—VLAN ID

<get-stp-statistics-interface-information>

Usage

```

<rpc>
  <get-stp-statistics-interface-information>
  <brief/>
  <detail/>
  <interface-name>interface-name</interface-name>
</get-stp-statistics-interface-information>

```

```
</rpc>
```

Description	Show STP interface statistics
Contents	<pre><brief>—Display brief output (default)</pre> <pre><detail>—Display detailed output</pre> <pre><interface-name>—Name of interface</pre>

<get-stp-vlan-interface-statistics>

Usage

```
<rpc>  
  <get-stp-vlan-interface-statistics>  
    <brief/>  
    <detail/>  
    <vlan-id>vlan-id</vlan-id> <!-- mandatory -->  
  </get-stp-vlan-interface-statistics>  
</rpc>
```

Description	Show STP VLAN interface statistics
Contents	<pre><brief>—Display brief output (default)</pre> <pre><detail>—Display detailed output</pre> <pre><vlan-id>—VLAN ID</pre>

<get-subscribers>

Usage

```
<rpc>  
  <get-subscribers>  
    <address>address</address>  
    <interface>interface</interface>  
    <logical-system>logical-system</logical-system>  
    <routing-instance>routing-instance</routing-instance>  
    <profile-name>profile-name</profile-name>  
    <stacked-vlan-id>stacked-vlan-id</stacked-vlan-id>  
    <vlan-id>vlan-id</vlan-id>  
    <mac-address>mac-address</mac-address>  
    <client-type>client-type</client-type>  
    <subscriber-state>subscriber-state</subscriber-state>  
    <terse/>  
    <detail/>  
    <extensive/>  
    <count/>  
  </get-subscribers>
```

</rpc>

Description Show subscriber information

Contents <address>—IPv4 or IPv6 address of subscriber

- dhcp - DHCP clients only
- vlan - VLAN clients only
- ppp - PPP clients only
- pppoe - PPPoE clients only
- l2tp - L2TP clients only
- init - INIT state only
- configured - CONFIGURED state only
- active - ACTIVE state only
- terminating - TERMINATING state only
- terminated - TERMINATED state only

<interface>—Interface name, or with wildcards (e.g. fe-0/0/*, fe-0/*/*)

- dhcp - DHCP clients only
- vlan - VLAN clients only
- ppp - PPP clients only
- pppoe - PPPoE clients only
- l2tp - L2TP clients only
- init - INIT state only
- configured - CONFIGURED state only
- active - ACTIVE state only
- terminating - TERMINATING state only
- terminated - TERMINATED state only

<logical-system>—Logical system where subscriber resides

- dhcp - DHCP clients only
- vlan - VLAN clients only
- ppp - PPP clients only
- pppoe - PPPoE clients only
- l2tp - L2TP clients only
- init - INIT state only

- configured - CONFIGURED state only
- active - ACTIVE state only
- terminating - TERMINATING state only
- terminated - TERMINATED state only

<routing-instance>—Routing instance where subscriber resides

- dhcp - DHCP clients only
- vlan - VLAN clients only
- ppp - PPP clients only
- pppoe - PPPoE clients only
- l2tp - L2TP clients only
- init - INIT state only
- configured - CONFIGURED state only
- active - ACTIVE state only
- terminating - TERMINATING state only
- terminated - TERMINATED state only

<profile-name>—Profile with which subscriber has been activated

- dhcp - DHCP clients only
- vlan - VLAN clients only
- ppp - PPP clients only
- pppoe - PPPoE clients only
- l2tp - L2TP clients only
- init - INIT state only
- configured - CONFIGURED state only
- active - ACTIVE state only
- terminating - TERMINATING state only
- terminated - TERMINATED state only

<stacked-vlan-id>—Stacked VLAN identifier of subscriber

- dhcp - DHCP clients only
- vlan - VLAN clients only
- ppp - PPP clients only
- pppoe - PPPoE clients only
- l2tp - L2TP clients only

- init - INIT state only
- configured - CONFIGURED state only
- active - ACTIVE state only
- terminating - TERMINATING state only
- terminated - TERMINATED state only

<vlan-id>—VLAN identifier of subscriber

- dhcp - DHCP clients only
- vlan - VLAN clients only
- ppp - PPP clients only
- pppoe - PPPoE clients only
- l2tp - L2TP clients only
- init - INIT state only
- configured - CONFIGURED state only
- active - ACTIVE state only
- terminating - TERMINATING state only
- terminated - TERMINATED state only

<mac-address>—MAC address of subscriber

- dhcp - DHCP clients only
- vlan - VLAN clients only
- ppp - PPP clients only
- pppoe - PPPoE clients only
- l2tp - L2TP clients only
- init - INIT state only
- configured - CONFIGURED state only
- active - ACTIVE state only
- terminating - TERMINATING state only
- terminated - TERMINATED state only

<client-type>—Client type of subscriber

- dhcp - DHCP clients only
- vlan - VLAN clients only
- ppp - PPP clients only
- pppoe - PPPoE clients only

- l2tp - L2TP clients only
- init - INIT state only
- configured - CONFIGURED state only
- active - ACTIVE state only
- terminating - TERMINATING state only
- terminated - TERMINATED state only

<subscriber-state>—State of subscriber

- init - INIT state only
- configured - CONFIGURED state only
- active - ACTIVE state only
- terminating - TERMINATING state only
- terminated - TERMINATED state only

<get-subscribers-summary>—Display subscriber summary

<terse>—Display terse output

<detail>—Display detailed output

<extensive>—Display extensive output

<count>—Display number of subscribers

<get-subscribers-summary>

Usage

```
<rpc>
  <get-subscribers-summary>
    <logical-system>logical-system</logical-system>
    <routing-instance>routing-instance</routing-instance>
    <all/>
  </get-subscribers-summary>
</rpc>
```

Description Display subscriber summary

Contents <logical-system>—Display summary for specified logical system

 <routing-instance>—Display summary for specified routing instance

 <all>—Display full subscriber summary

<get-summary-mip-binding-information>

Usage

```
<rpc>  
  <get-summary-mip-binding-information>  
    <routing-instance>routing-instance</routing-instance>  
    <logical-system>logical-system</logical-system>  
  </get-summary-mip-binding-information>  
</rpc>
```

Description Show summary of binding table

Contents <routing-instance>—Name of routing instance

<logical-system>—Name of logical system

<get-survivable-call-service-sessions>

Usage

```
<rpc>  
  <get-survivable-call-service-sessions/>  
</rpc>
```

Description Show sessions information

<get-survivable-call-service-statistics>

Usage

```
<rpc>  
  <get-survivable-call-service-statistics/>  
</rpc>
```

Description Show statistics information

<get-switchover-information>

Usage

```
<rpc>  
  <get-switchover-information/>  
</rpc>
```

Description Show Routing Engine graceful switchover information

<get-synchronous-ethernet-esmc-statistics>

Usage

```
<rpc>
  <get-synchronous-ethernet-esmc-statistics>
    <interface>interface</interface>
    <brief/>
    <detail/>
  </get-synchronous-ethernet-esmc-statistics>
</rpc>
```

Description Show ESMC related statistics

Contents <interface>—Name of physical interface

<brief>—Display brief output

<detail>—Display detail output

<get-synchronous-ethernet-esmc-transmit>

Usage

```
<rpc>
  <get-synchronous-ethernet-esmc-transmit>
    <interface>interface</interface>
    <brief/>
    <detail/>
  </get-synchronous-ethernet-esmc-transmit>
</rpc>
```

Description Show ESMC enabled outgoing interfaces

Contents <interface>—Name of physical interface

<brief>—Display brief output

<detail>—Display detail output

<get-synchronous-ethernet-global-information>

Usage

```
<rpc>
  <get-synchronous-ethernet-global-information/>
</rpc>
```

Description Show process related global information only

<get-syslog-events>

Usage

```

<rpc>
  <get-syslog-events>
    <stream>stream</stream> <!-- mandatory -->
    <event>event</event>
    <process>process</process>
    <priority>priority</priority>
    <host>host</host>
    <start-time>start-time</start-time>
    <stop-time>stop-time</stop-time>
    <parameter>parameter</parameter>
    <text-pattern>text-pattern</text-pattern>
    <count>count</count>
    <recorded/>
  </get-syslog-events>
</rpc>

```

Description Show system log messages

Contents

- <stream>—Name of stream (log file) containing messages to filter
- <event>—Event ID of messages to include in output
- <process>—Name of process generating messages to include in output
- <priority>—Facility and severity of messages to include in output
- <host>—Name of host generating messages to include in output
- <start-time>—Earliest timestamp of messages to include in output
- <stop-time>—Latest timestamp of messages to include in output
- <parameter>—Parameter (key=value) of messages to include in output
- <text-pattern>—Pattern in messages to include in output
- <count>—Number of messages to include in output
- <recorded>—Match only the recorded messages

<get-syslog-facility-information>

Usage

```

<rpc>
  <get-syslog-facility-information>
    <facility-name>facility-name</facility-name>
  </get-syslog-facility-information>
</rpc>

```

Description System facility messages

Contents <facility-name>—Facility name or regular expression

<get-syslog-filenames>

Usage

```
<rpc>  
  <get-syslog-filenames/>  
</rpc>
```

Description Get syslog file names

<get-syslog-tag-information>

Usage

```
<rpc>  
  <get-syslog-tag-information>  
    <syslog-tag>syslog-tag</syslog-tag>  
  </get-syslog-tag-information>  
</rpc>
```

Description System log error messages

Contents <syslog-tag>—System log tag or regular expression

<get-syslog-facility-information>—System facility messages

<get-system-alarm-information>

Usage

```
<rpc>  
  <get-system-alarm-information/>  
</rpc>
```

Description Show system alarm status

<get-system-archival>

Usage

```
<rpc>  
  <get-system-archival/>  
</rpc>
```

Description List files queued up for archive transfer

<get-system-firmware-information>

Usage

```
<rpc>
  <get-system-firmware-information>
    <compatibility/>
  </get-system-firmware-information>
</rpc>
```

Description Show all firmware version information

Contents <compatibility>—Show all firmware compatibility information

<get-system-resource-cleanup-processes-information>

Usage

```
<rpc>
  <get-system-resource-cleanup-processes-information>
    <detail/>
    <name_pid_choice>name_pid_choice</name_pid_choice>
    <process-name>process-name</process-name>
    <pid>pid</pid>
  </get-system-resource-cleanup-processes-information>
</rpc>
```

Description Show process resource cleanup information

Contents <detail>—Display detailed information

<process-name>—Process name

<pid>—Process identifier

<get-system-services-reverse-information>

Usage

```
<rpc>
  <get-system-services-reverse-information/>
</rpc>
```

Description Show reverse telnet/SSH connection information

<get-system-storage>

Usage

```
<rpc>
```

```
<get-system-storage>
  <detail/>
</get-system-storage>
</rpc>
```

Description Show local storage data

Contents <detail>—

<get-system-storage-partitions>—Show partitions information for the boot media

<get-system-storage-partitions>

Usage

```
<rpc>
  <get-system-storage-partitions/>
</rpc>
```

Description Show partitions information for the boot media

<get-system-uptime-information>

Usage

```
<rpc>
  <get-system-uptime-information/>
</rpc>
```

Description Show time since system and processes started

<get-system-users-information>

Usage

```
<rpc>
  <get-system-users-information>
  <no-resolve/>
</get-system-users-information>
</rpc>
```

Description Show users who are currently logged in

Contents <no-resolve>—Don't attempt to print addresses symbolically

<get-system-virtual-memory-information>

Usage

```
<rpc>
  <get-system-virtual-memory-information/>
</rpc>
```

Description Show kernel dynamic memory usage

<get-task-memory-information>

Usage

```
<rpc>
  <get-task-memory-information>
    <daemon-select>daemon-select</daemon-select>
    <logical-system>logical-system</logical-system>
    <fabric/>
    <summary/>
    <brief/>
    <detail/>
    <history/>
  </get-task-memory-information>
</rpc>
```

Description Show memory utilization of routing tasks

Contents <logical-system>—Name of logical system, or 'all'

<fabric>—Internal fabric state

<summary>—Display current and maximum memory usage

<brief>—Display current/maximum/available memory

<detail>—Display memory usage by individual users

<history>—Display memory usage in the recent past

<get-tdr-interface-information>

Usage

```
<rpc>
  <get-tdr-interface-information>
  </get-tdr-interface-information>
</rpc>
```

Description Status of TDR diagnostics

Contents <interface>—Show TDR interface name

<get-ted-database-information>

Usage

```
<rpc>
  <get-ted-database-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
    <extensive/>
    <system-id>system-id</system-id>
  </get-ted-database-information>
</rpc>
```

Description Show current Traffic Engineering Database

Contents <logical-system>—Name of logical system, or 'all'

 <brief>—Display brief output (default)

 <detail>—Display detailed output

 <extensive>—Display extensive output

 <system-id>—System ID or node ID

<get-ted-link-information>

Usage

```
<rpc>
  <get-ted-link-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
  </get-ted-link-information>
</rpc>
```

Description Show current Traffic Engineering Database link

Contents <logical-system>—Name of logical system, or 'all'

 <brief>—Display brief output (default)

 <detail>—Display detailed output

<get-ted-protocol-information>

Usage

```

<rpc>
  <get-ted-protocol-information>
    <logical-system>logical-system</logical-system>
    <brief/>
    <detail/>
  </get-ted-protocol-information>
</rpc>

```

Description Show current contributing protocols

Contents <logical-system>—Name of logical system, or 'all'

<brief>—Display brief output (default)

<detail>—Display detailed output

<get-telemetries-information>

Usage

```

<rpc>
  <get-telemetries-information>
    <ifname>ifname</ifname> <!-- mandatory -->
    <all/>
    <entries/>
  </get-telemetries-information>
</rpc>

```

Description Show telemetries for an interface

Contents <ifname>—Name of interface

<all>—Show all entries

<entries>—Number of entries

<get-telemetries-information>

Usage

```

<rpc>
  <get-telemetries-information>
    <ifname>ifname</ifname> <!-- mandatory -->
    <all/>
    <entries/>
  </get-telemetries-information>
</rpc>

```

Description Show PoE telemetries for an interface

Contents <ifname>—Name of interface

<all>—Show all entries

<entries>—Number of entries

<get-temperature-threshold-information>

Usage

```
<rpc>  
  <get-temperature-threshold-information/>  
</rpc>
```

Description Show chassis temperature threshold settings

<get-tfeb-information>

Usage

```
<rpc>  
  <get-tfeb-information/>  
</rpc>
```

Description Show Compact Forwarding Engine Board status

<get-tgm-dynamic-cac-information>

Usage

```
<rpc>  
  <get-tgm-dynamic-cac-information/>  
</rpc>
```

Description Show dynamic call admission control information

<get-tgm-information>

Usage

```
<rpc>  
  <get-tgm-information>  
    <slot>slot</slot> <!-- mandatory -->  
    <media-gateway-controller/>  
    <dsp-capacity/>  
  </get-tgm-information>  
</rpc>
```

- Description** Show Flexible PIC Concentrator information
- Contents** <slot>—FPC slot number
- <media-gateway-controller>—Show TGM media gateway controller configuration
- <dsp-capacity>—Show TGM DSP resources

<get-tgm-telephony-interface-module-status>

Usage

```
<rpc>  
  <get-tgm-telephony-interface-module-status>  
  <status/>  
</get-tgm-telephony-interface-module-status>  
</rpc>
```

- Description** Show telephony interface module information
- Contents** <status>—Status of telephony interface modules

<get-uri-redirect-set-statistics-information>

Usage

```
<rpc>  
  <get-uri-redirect-set-statistics-information>  
  <detail/>  
</get-uri-redirect-set-statistics-information>  
</rpc>
```

- Description** Show URI redirect set statistics
- Contents** <detail>—Display detailed statistics

<get-user-connection>

Usage

```
<rpc>  
  <get-user-connection>  
  <terse/>  
  <detail/>  
</get-user-connection>  
</rpc>
```

- Description** Show Dynamic VPN user connection information

Contents <terse>—Display terse output
 <detail>—Display detailed user connection information (default)

<get-vcpu-information>

Usage

```
<rpc>  
  <get-vcpu-information>  
    <detail/>  
    <slot>slot</slot>  
  </get-vcpu-information>  
</rpc>
```

Description Show Visibility CPU status

Contents <detail>—Display detailed output
 <slot>—VCPU slot number

<get-virtual-chassis-active-topology>

Usage

```
<rpc>  
  <get-virtual-chassis-active-topology/>  
</rpc>
```

Description Virtual chassis active topology

<get-virtual-chassis-adjacency-information>

Usage

```
<rpc>  
  <get-virtual-chassis-adjacency-information>  
    <brief/>  
    <detail/>  
    <extensive/>  
    <system-id>system-id</system-id>  
  </get-virtual-chassis-adjacency-information>  
</rpc>
```

Description Show virtual chassis adjacency database

Contents <brief>—Display brief output (default)
 <detail>—Display detailed output

<extensive>—Display extensive output

<system-id>—System ID of neighbor

<get-virtual-chassis-database-information>

Usage

```
<rpc>
  <get-virtual-chassis-database-information>
    <brief/>
    <detail/>
    <extensive/>
    <system-id>system-id</system-id>
  </get-virtual-chassis-database-information>
</rpc>
```

Description Show virtual chassis link-state database

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<system-id>—System ID of neighbor

<get-virtual-chassis-device-topology>

Usage

```
<rpc>
  <get-virtual-chassis-device-topology/>
</rpc>
```

Description PFE device topology

<get-virtual-chassis-fast-failover>

Usage

```
<rpc>
  <get-virtual-chassis-fast-failover/>
</rpc>
```

Description Fast failover status

<get-virtual-chassis-information>

Usage

```
<rpc>
  <get-virtual-chassis-information/>
</rpc>
```

Description Virtual chassis information

<get-virtual-chassis-interface-information>

Usage

```
<rpc>
  <get-virtual-chassis-interface-information>
    <brief/>
    <detail/>
    <interface-name>interface-name</interface-name>
  </get-virtual-chassis-interface-information>
</rpc>
```

Description Show virtual chassis protocol interface information

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<interface-name>—Name of interface

<get-virtual-chassis-packet-path>

Usage

```
<rpc>
  <get-virtual-chassis-packet-path>
    <source-interface>source-interface</source-interface> <!-- mandatory -->
    <destination-interface>destination-interface</destination-interface> <!-- mandatory -->
  </get-virtual-chassis-packet-path>
</rpc>
```

Description Show virtual-chassis packet path

Contents <source-interface>—Source interface name

<destination-interface>—Destination interface name

<get-virtual-chassis-port-information>

Usage

```
<rpc>
  <get-virtual-chassis-port-information>
</get-virtual-chassis-port-information>
</rpc>
```

Description Virtual chassis port information

Contents <get-virtual-chassis-port-statistics>—Show virtual chassis port statistics

<get-virtual-chassis-port-statistics>

Usage

```
<rpc>
  <get-virtual-chassis-port-statistics>
    <brief/>
    <detail/>
    <extensive/>
    <interface-name>interface-name</interface-name>
  </get-virtual-chassis-port-statistics>
</rpc>
```

Description Show virtual chassis port statistics

Contents <brief>—Display brief output (default)

<detail>—Display detailed output

<extensive>—Display extensive output

<interface-name>—Name of virtual chassis port

<get-virtual-chassis-route-information>

Usage

```
<rpc>
  <get-virtual-chassis-route-information>
    <destination>destination</destination>
  </get-virtual-chassis-route-information>
</rpc>
```

Description Show virtual chassis routing table

Contents <destination>—System ID of destination

<get-virtual-chassis-statistics-information>

Usage

```
<rpc>
  <get-virtual-chassis-statistics-information>
    <interface-name>interface-name</interface-name>
  </get-virtual-chassis-statistics-information>
</rpc>
```

Description Show virtual chassis performance statistics

Contents <interface-name>—Name of logical interface

<get-vlan-information>

Usage

```
<rpc>
  <get-vlan-information>
    <brief/>
    <detail/>
    <extensive/>
    <summary/>
    <sort-by>sort-by</sort-by>
    <vlan-name>vlan-name</vlan-name>
  </get-vlan-information>
</rpc>
```

Description Show VLAN information

Contents <brief>—Display brief output

- name - Sort display by name
- tag - Sort display by tag

<detail>—Display detailed output

- name - Sort display by name
- tag - Sort display by tag

<extensive>—Display extensive output

- name - Sort display by name
- tag - Sort display by tag

<summary>—Display summary output

- name - Sort display by name

- tag - Sort display by tag

<management-vlan>—Show management vlan information

- name - Sort display by name
- tag - Sort display by tag

<dot1q-tunneling>—Show dot1q-tunneling vlan information

- name - Sort display by name
- tag - Sort display by tag

<sort-by>—Specify display order

- name - Sort display by name
- tag - Sort display by tag

<vlan-name>—Show information for a particular VLAN

<get-vpls-all-ce-flood-route-information>

Usage

```
<rpc>
  <get-vpls-all-ce-flood-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance> <!-- mandatory -->
  </get-vpls-all-ce-flood-route-information>
</rpc>
```

Description Show route for flooding traffic to all CE routers

Contents <logical-system>—Name of logical system

<instance>—Display information for a specified vpls

<get-vpls-all-flood-route-information>

Usage

```
<rpc>
  <get-vpls-all-flood-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance> <!-- mandatory -->
  </get-vpls-all-flood-route-information>
</rpc>
```

Description Show route for flooding traffic from customer edge router

Contents <logical-system>—Name of logical system
 <instance>—Display information for a specified vpls

<get-vpls-alt-root-flood-route-information>

Usage

```
<rpc>
  <get-vpls-alt-root-flood-route-information>
    <interface>interface</interface> <!-- mandatory -->
  </get-vpls-alt-root-flood-route-information>
</rpc>
```

Description Show STP alt-root flooding route used for interface

Contents <interface>—Interface for which to show alternate-root flooding route

<get-vpls-ce-flood-route-information>

Usage

```
<rpc>
  <get-vpls-ce-flood-route-information>
    <interface>interface</interface> <!-- mandatory -->
  </get-vpls-ce-flood-route-information>
</rpc>
```

Description Show customer edge flood route

Contents <interface>—Interface for which to show CE flood route

<get-vpls-connection-information>

Usage

```
<rpc>
  <get-vpls-connection-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
    <local-site>local-site</local-site>
    <remote-site>remote-site</remote-site>
    <down/>
    <up/>
    <up-down/>
    <brief/>
    <extensive/>
    <history/>
    <status/>
    <summary/>
  </get-vpls-connection-information>
```

```
</rpc>
```

Description Show VPLS connections information

Contents

- <logical-system>—Name of logical system, or 'all'
- <instance>—Name of VPLS instance
- <local-site>—Name or ID of VPLS local site
- <remote-site>—ID of VPLS remote site
- <down>—Display nonoperational connections
- <up>—Display operational connections
- <up-down>—Display both non- and operational connections (default)
- <brief>—Display one-line version of output
- <extensive>—Display connection status and history
- <history>—Display connection history
- <status>—Display connection and circuit status (default)
- <summary>—Display summary output

<get-vpls-event-queue-information>

Usage

```
<rpc>
  <get-vpls-event-queue-information/>
</rpc>
```

Description Show queue of pending VPLS flood events

<get-vpls-interface-mac-table>

Usage

```
<rpc>
  <get-vpls-interface-mac-table>
    <interface-choice>interface-choice</interface-choice> <!-- mandatory -->
    <interface-name>interface-name</interface-name>
    <all/>
    <detail/>
    <brief/>
    <extensive/>
    <count/>
  </get-vpls-interface-mac-table>
```

</rpc>

Description Display MAC table for a specified interface

Contents <interface-name>—Name of interface for which to display table

<all>—Display MAC table for all the interfaces

<detail>—Display detailed output

<brief>—Display brief output

<extensive>—Display extensive output

<count>—Display count only

<get-vpls-mac-table>

Usage

```
<rpc>
  <get-vpls-mac-table>
    <instance>instance</instance>
    <logical-system>logical-system</logical-system>
    <vlan-id>vlan-id</vlan-id>
    <isid>isid</isid>
    <address>address</address>
    <detail/>
    <brief/>
    <extensive/>
    <count/>
  </get-vpls-mac-table>
</rpc>
```

Description Show media access control table

Contents <get-vpls-interface-mac-table>—Display MAC table for a specified interface

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<instance>—Display information for a specified vpls

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<logical-system>—Name of logical system, or 'all'

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<vlan-id>—Display MAC address learned on a specified VLAN

- all-vlan - Display MAC addresses on all VLAN(s)
- vlan-id - Display MAC address learned on a specified VLAN
- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<isid>—Display Information for specified ISID or all ISID(s)

- all-isid - Display Information for all ISID(s)
- isid - Display information for a specified ISID

<address>—MAC address

<detail>—Display detailed output

<brief>—Display brief output

<extensive>—Display extensive output

<count>—Display count only

<get-vpls-mlp-flood-route-information>

Usage

```
<rpc>
  <get-vpls-mlp-flood-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance> <!-- mandatory -->
  </get-vpls-mlp-flood-route-information>
</rpc>
```

Description Show route for flooding traffic to MAC learning chips

Contents <logical-system>—Name of logical system

<instance>—Display information for a specified vpls

<get-vpls-re-flood-route-information>

Usage

```
<rpc>
  <get-vpls-re-flood-route-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance> <!-- mandatory -->
  </get-vpls-re-flood-route-information>
</rpc>
```

Description Show route for Routing Engine flooding to all interfaces

Contents <logical-system>—Name of logical system

<instance>—Display information for a specified vpls

<get-vpls-statistics-information>

Usage

```
<rpc>
  <get-vpls-statistics-information>
    <logical-system>logical-system</logical-system>
    <instance>instance</instance>
  </get-vpls-statistics-information>
</rpc>
```

Description Show VPLS statistics information

Contents <logical-system>—Name of logical system, or 'all'

<instance>—Name of VPLS instance

<get-vrrp-information>

Usage

```
<rpc>
  <get-vrrp-information>
    <brief/>
    <detail/>
    <extensive/>
    <summary/>
    <logical-system>logical-system</logical-system>
  </get-vrrp-information>
</rpc>
```

Description Show Virtual Router Redundancy Protocol information

Contents <brief>—Display brief output (default)
 <detail>—Display detailed output
 <extensive>—Display extensive output
 <summary>—Display summary output
 <get-vrrp-interface-information>—Show VRRP interface
 <get-vrrp-track-interfaces>—Show VRRP track interfaces
 <logical-system>—Name of logical system

<get-vrrp-interface-information>

Usage

```
<rpc>
  <get-vrrp-interface-information>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
    <group>group</group>
    <logical-system>logical-system</logical-system>
  </get-vrrp-interface-information>
</rpc>
```

Description Show VRRP interface

Contents <interface-name>—Name of interface
 <group>—Number of VRRP group
 <logical-system>—Name of logical system

<get-vrrp-track-interfaces>

Usage

```
<rpc>
  <get-vrrp-track-interfaces>
    <interfaces/>
    <summary/>
    <detail/>
    <logical-system>logical-system</logical-system>
  </get-vrrp-track-interfaces>
</rpc>
```

Description Show VRRP track interfaces

Contents <interfaces>—Show all VRRP track interfaces
 <summary>—Display summary output (default)

<detail>—Display detailed output

<logical-system>—Name of logical system

<get-wlan-access-points-list>

Usage

```
<rpc>
  <get-wlan-access-points-list>
    <wlan-access-point-name>wlan-access-point-name</wlan-access-point-name>

    <client-associations/>
    <detail/>
    <neighbors/>
    <virtual-access-points/>
  </get-wlan-access-points-list>
</rpc>
```

Description Show Wireless LAN access points information

Contents <wlan-access-point-name>—Name of the access point

<client-associations>—Show access point client associations

<detail>—Show detailed output

<neighbors>—Show access point neighbors

<virtual-access-points>—Show virtual access points

<get-wlan-clusters-list>

Usage

```
<rpc>
  <get-wlan-clusters-list/>
</rpc>
```

Description Show Wireless LAN cluster information

<get-wx-status>

Usage

```
<rpc>
  <get-wx-status>
  </get-wx-status>
</rpc>
```

Description Show WAN acceleration status

Contents

<get-zones-information>**Usage**

```

<rpc>
  <get-zones-information>
    <filter>filter</filter>

    <get-zones-named-information>get-zones-named-information</get-zones-named-information>

    <type>type</type>
    <terse/>
    <detail/>
  </get-zones-information>
</rpc>

```

Description Show security zone information

Contents <get-zones-named-information>—Show information for a specified zone

- functional - Show information for functional zones
- security - Show information for security zones

<type>—Show information for zones of a specified type

- functional - Show information for functional zones
- security - Show information for security zones

<terse>—Display terse output

<detail>—Display detailed output (default)

<load-dhcp-snooping>**Usage**

```

<rpc>
  <load-dhcp-snooping>
    <filename>filename</filename> <!-- mandatory -->
  </load-dhcp-snooping>
</rpc>

```

Description Load DHCP snooping entries

Contents <filename>—Filename (URL, local, remote)

<load-pki-ca-certificate>

Usage

```
<rpc>
  <load-pki-ca-certificate>
    <ca-profile>ca-profile</ca-profile> <!-- mandatory -->
    <filename>filename</filename> <!-- mandatory -->
  </load-pki-ca-certificate>
</rpc>
```

Description Load the certificate onto the routing platform

Contents <ca-profile>—Certificate authority profile

<filename>—File pathname containing certificate to load

<load-pki-crl>

Usage

```
<rpc>
  <load-pki-crl>
    <ca-profile>ca-profile</ca-profile> <!-- mandatory -->
    <filename>filename</filename> <!-- mandatory -->
  </load-pki-crl>
</rpc>
```

Description Load the CRL onto the routing platform

Contents <ca-profile>—Certificate authority profile

<filename>—Pathname of file containing CRL to load

<load-pki-local-certificate>

Usage

```
<rpc>
  <load-pki-local-certificate>
    <certificate-id>certificate-id</certificate-id> <!-- mandatory -->
    <filename>filename</filename> <!-- mandatory -->
  </load-pki-local-certificate>
</rpc>
```

Description Load the certificate onto the routing platform

Contents <certificate-id>—Certificate identifier

<filename>—File pathname containing certificate to load

<match-firewall-policies>

Usage

```

<rpc>
  <match-firewall-policies>
    <from-zone>from-zone</from-zone> <!-- mandatory -->
    <to-zone>to-zone</to-zone> <!-- mandatory -->
    <source-ip>source-ip</source-ip> <!-- mandatory -->
    <destination-ip>destination-ip</destination-ip> <!-- mandatory -->
    <source-port>source-port</source-port> <!-- mandatory -->
    <destination-port>destination-port</destination-port> <!-- mandatory -->
    <protocol>protocol</protocol> <!-- mandatory -->
    <result-count>result-count</result-count>
  </match-firewall-policies>
</rpc>

```

Description Show security match policies

Contents <from-zone>—Match policy for the given source zone

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- protocol-number - Numeric protocol value (0 .. 255)

<to-zone>—Match policy for the given destination zone

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP

- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- protocol-number - Numeric protocol value (0 .. 255)

<source-ip>—Match policy for the given source IP

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- protocol-number - Numeric protocol value (0 .. 255)

<destination-ip>—Match policy for the given destination IP

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP

- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- protocol-number - Numeric protocol value (0 .. 255)

<source-port>—Match policy for the given source port)

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- protocol-number - Numeric protocol value (0 .. 255)

<destination-port>—Match policy for the given destination port)

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP

- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- protocol-number - Numeric protocol value (0 .. 255)

<protocol>—Match policy for the given protocol)

- icmp - Internet Control Message Protocol
- igmp - Internet Group Management Protocol
- ipip - IP in IP
- tcp - Transmission Control Protocol
- egp - Exterior gateway protocol
- udp - User Datagram Protocol
- rsvp - Resource Reservation Protocol
- gre - Generic routing encapsulation
- esp - IPSec Encapsulating Security Payload
- ah - IP Security authentication header
- icmp6 - Internet Control Message Protocol Version 6
- ospf - Open Shortest Path First
- pim - Protocol Independent Multicast
- sctp - Stream Control Transmission Protocol
- protocol-number - Numeric protocol value (0 .. 255)

<result-count>—Expected results count (optional)

<network-services>

Usage

<rpc>

```

    <network-services/>
  </rpc>

```

Description Show chassis network services

<next-snmp-object>

Usage

```

    <rpc>
      <next-snmp-object>
        <decimal/>
        <ascii/>
        <snmp-object-name>snmp-object-name</snmp-object-name> <!-- mandatory
    -->
      </next-snmp-object>
    </rpc>

```

Description Get next SNMP object value

Contents <decimal>—Decimal format (default)

<ascii>—Convert string indices to 'ascii-keys' representation

<snmp-object-name>—

<node-secret-file-table>

Usage

```

    <rpc>
      <node-secret-file-table/>
    </rpc>

```

Description Show SecurID server's node secret file path

<op-script>

Usage

```

    <rpc>
      <op-script>
        <script>script</script> <!-- mandatory -->
        <detail/>
        <argument>argument</argument>
      </op-script>
    </rpc>

```

Description Invoke an operation script

Contents <url>—Execution of remote op script

 <script>—Name of script to run

 <detail>—Display detailed output

 <argument>—Argument to pass to script

<other-routing-engine>

Usage

```
<rpc>
  <other-routing-engine/>
</rpc>
```

Description Execute command on other routing engine

<ping>

Usage

```
<rpc>
  <ping>
    <count>count</count>
    <wait>wait</wait>
    <no-resolve/>
    <rapid/>
    <record-route/>
    <detail/>
    <do-not-fragment/>
    <loose-source>loose-source</loose-source>
    <interface>interface</interface>
    <interval>interval</interval>
    <source>source</source>
    <pattern>pattern</pattern>
    <size>size</size>
    <strict/>
    <strict-source>strict-source</strict-source>
    <ttl>ttl</ttl>
    <verbose/>
    <tos>tos</tos>
    <bypass-routing/>
    <inet/>
    <inet6/>
    <routing-instance>routing-instance</routing-instance>
    <host>host</host> <!-- mandatory -->
    <logical-system>logical-system</logical-system>
  </ping>
</rpc>
```

Description Ping remote target

Contents	<mpls> —Ping label-switched path
	<vpls> —Ping VPLS MAC address
	<count> —Number of ping requests to send
	<wait> —Delay after sending last packet
	<no-resolve> —Don't attempt to print addresses symbolically
	<rapid> —Send requests rapidly (default count of 5)
	<record-route> —Record and report packet's path (IPv4)
	<detail> —Display incoming interface of received packet
	<do-not-fragment> —Don't fragment echo request packets (IPv4)
	<loose-source> —Intermediate loose source route entry (IPv4)
	<interface> —Source interface (multicast, all-ones, unrouted packets)
	<interval> —Delay between ping requests
	<source> —Source address of echo request
	<pattern> —Hexadecimal fill pattern
	<size> —Size of request packets
	<strict> —Use strict source route option (IPv4)
	<strict-source> —Intermediate strict source route entry (IPv4)
	<ttl> —IP time-to-live value (IPv6 hop-limit value)
	<verbose> —Display detailed output
	<tos> —IP type-of-service value
	<bypass-routing> —Bypass routing table, use specified interface
	<inet> —Force ping to IPv4 destination
	<inet6> —Force ping to IPv6 destination
	<routing-instance> —Routing instance for ping attempt
	<host> —Hostname or IP address of remote host
	<logical-system> —Name of logical system
	<request-ping-ethernet> —Ping to an ethernet host by unicast mac address

<relay-group-information>

Usage

```
<rpc>
  <relay-group-information>
    <group-index>group-index</group-index>
    <detail/>
  </relay-group-information>
</rpc>
```

Description Relay group information

Contents <group-index>—Group number

<detail>—Display detailed output

<relay-group-member>

Usage

```
<rpc>
  <relay-group-member>
    <group-index>group-index</group-index> <!-- mandatory -->
    <member-index>member-index</member-index>
    <detail/>
  </relay-group-member>
</rpc>
```

Description Relay group member information

Contents <group-index>—Group number

<member-index>—Member index

<detail>—Display detailed output

<relay-summary>

Usage

```
<rpc>
  <relay-summary/>
</rpc>
```

Description Relay status summary

<release-dhcp-client>

Usage

```
<rpc>
  <release-dhcp-client>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </release-dhcp-client>
</rpc>
```

Description Request DHCP client release

Contents <interface-name>—Interface name of DHCP client

<reload-eedebg-action-profile>

Usage

```
<rpc>
  <reload-eedebg-action-profile/>
</rpc>
```

Description Reload all datapath-debug action profile

<reload-event-scripts>

Usage

```
<rpc>
  <reload-event-scripts/>
</rpc>
```

Description Reload all existing event-scripts

<renew-dhcp-client>

Usage

```
<rpc>
  <renew-dhcp-client>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </renew-dhcp-client>
</rpc>
```

Description Request DHCP client renew

Contents <interface-name>—Interface name of DHCP client

<request-anti-virus-request-update-express>

Usage

```
<rpc>
  <request-anti-virus-request-update-express>
    <pattern-update/>
    <pattern-reload/>
    <pattern-delete/>
  </request-anti-virus-request-update-express>
</rpc>
```

Description Request update of anti-virus pattern for juniper-express-engine

Contents <pattern-update>—Update juniper-express-engine pattern

<pattern-reload>—Reload juniper-express-engine pattern

<pattern-delete>—Delete juniper-express-engine pattern

<request-anti-virus-request-update-kaspersky>

Usage

```
<rpc>
  <request-anti-virus-request-update-kaspersky>
    <pattern-update/>
    <pattern-reload/>
    <pattern-delete/>
  </request-anti-virus-request-update-kaspersky>
</rpc>
```

Description Request update of anti-virus pattern for kaspersky-lab-engine

Contents <pattern-update>—Update kaspersky-lab-engine pattern

<pattern-reload>—Reload kaspersky-lab-engine pattern

<pattern-delete>—Delete kaspersky-lab-engine pattern

<request-appid-application-package-download>

Usage

```
<rpc>
  <request-appid-application-package-download>
  </request-appid-application-package-download>
</rpc>
```

Description Download application package

- Contents** `<request-appid-application-package-download-version>`—Version of application package to download
- `<request-appid-application-package-download-status>`—Download and display installation status

`<request-appid-application-package-download-status>`

Usage

```
<rpc>
  <request-appid-application-package-download-status/>
</rpc>
```

Description Download and display installation status

`<request-appid-application-package-download-version>`

Usage

```
<rpc>
  <request-appid-application-package-download-version>
    <version-value>version-value</version-value> <!-- mandatory -->
  </request-appid-application-package-download-version>
</rpc>
```

Description Version of application package to download

Contents `<version-value>`—Version number (1 - 65535)

`<request-appid-application-package-uninstall>`

Usage

```
<rpc>
  <request-appid-application-package-uninstall>
    <all/>
    <predefined/>
    <customer-defined/>
  </request-appid-application-package-uninstall>
</rpc>
```

Description Uninstall application package

Contents `<all>`—Uninstall both predefined and customer defined applications

`<predefined>`—Uninstall predefined applications

`<customer-defined>`—Uninstall customer defined applications

<request-chassis-cluster-in-service-upgrade>

Usage

```
<rpc>
  <request-chassis-cluster-in-service-upgrade>
  <abort/>
</request-chassis-cluster-in-service-upgrade>
</rpc>
```

Description Initiate in-service-upgrade

Contents <abort>—Abort in-service-upgrade

<failover>—Initiate failover for a redundancy-group

<request-delete-rescue-configuration>

Usage

```
<rpc>
  <request-delete-rescue-configuration/>
</rpc>
```

Description Delete the rescue configuration

<request-dhcp-server-reconfigure-information>

Usage

```
<rpc>
  <request-dhcp-server-reconfigure-information>
  <reconfigure-choice>reconfigure-choice</reconfigure-choice> <!-- mandatory -->
  <address>address</address>
  <all/>
  <routing-instance>routing-instance</routing-instance>
  <logical-system>logical-system</logical-system>
  </request-dhcp-server-reconfigure-information>
</rpc>
```

Description Perform DHCP server reconfigure operation

Contents <address>—IP address or MAC address or Session Id of DHCP client binding

<all>—Reconfigure all clients

<interface>—Name of interface

<routing-instance>—Name of routing instance

<logical-system>—Name of logical system

<request-dhcpv6-server-reconfigure-information>

Usage

```
<rpc>
  <request-dhcpv6-server-reconfigure-information>
    <reconfigure-choice>reconfigure-choice</reconfigure-choice> <!-- mandatory -->
    <address>address</address>
    <all/>
    <routing-instance>routing-instance</routing-instance>
    <logical-system>logical-system</logical-system>
  </request-dhcpv6-server-reconfigure-information>
</rpc>
```

Description Perform DHCPv6 server reconfigure operation

Contents <address>—IPv6 Prefix or session-id or CID <cid-len/0x.../0x...> of DHCPv6 client binding

<all>—Reconfigure all clients

<interface>—Name of interface

<routing-instance>—Name of routing instance

<logical-system>—Name of logical system

<request-eedebg-capture-start>

Usage

```
<rpc>
  <request-eedebg-capture-start/>
</rpc>
```

Description Start datapath debug packet capture

<request-eedebg-capture-stop>

Usage

```
<rpc>
  <request-eedebg-capture-stop/>
</rpc>
```

Description Stop datapath debug packet capture

<request-end-session>

Usage

```
<rpc>
  <request-end-session/>
</rpc>
```

Description Exit the management session

<request-feb>

Usage

```
<rpc>
  <request-feb>
    <slot>slot</slot> <!-- mandatory -->
    <offline/>
    <online/>
    <restart/>
  </request-feb>
</rpc>
```

Description Change Forwarding Engine Board status

Contents <slot>—FEB slot number

<offline>—Take FEB offline

<online>—Bring FEB online

<restart>—Restart FEB

<request-ggsn-restart-interface>

Usage

```
<rpc>
  <request-ggsn-restart-interface>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </request-ggsn-restart-interface>
</rpc>
```

Description Restart GGSN service interface

Contents <interface-name>—Name of GGSN service interface

<request-ggsn-restart-node>

Usage

```
<rpc>
  <request-ggsn-restart-node/>
</rpc>
```

Description Restart GGSN node activity

<request-ggsn-software-update>

Usage

```
<rpc>
  <request-ggsn-software-update/>
</rpc>
```

Description Start GGSN in service update

<request-ggsn-start-imsi-trace>

Usage

```
<rpc>
  <request-ggsn-start-imsi-trace>
    <imsi-identifier>imsi-identifier</imsi-identifier> <!-- mandatory -->
  </request-ggsn-start-imsi-trace>
</rpc>
```

Description Start tracing International Mobile Subscriber Identity

Contents <imsi-identifier>—Identifier for IMSI

<request-ggsn-start-msisdn-trace>

Usage

```
<rpc>
  <request-ggsn-start-msisdn-trace>
    <msisdn-identifier>msisdn-identifier</msisdn-identifier> <!-- mandatory -->
  </request-ggsn-start-msisdn-trace>
</rpc>
```

Description Start tracing Mobile Station Integrated Services Digital Network

Contents <msisdn-identifier>—Identifier for MSISDN

<request-ggsn-stop-imsi-trace>

Usage

```
<rpc>
  <request-ggsn-stop-imsi-trace>
    <imsi-identifier>imsi-identifier</imsi-identifier> <!-- mandatory -->
  </request-ggsn-stop-imsi-trace>
</rpc>
```

Description Stop tracing International Mobile Subscriber Identity

Contents <imsi-identifier>—Identifier for IMSI

<request-ggsn-stop-interface>

Usage

```
<rpc>
  <request-ggsn-stop-interface>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </request-ggsn-stop-interface>
</rpc>
```

Description Stop GGSN service interface

Contents <interface-name>—Name of GGSN service interface

<request-ggsn-stop-msisdn-trace>

Usage

```
<rpc>
  <request-ggsn-stop-msisdn-trace>
    <msisdn-identifier>msisdn-identifier</msisdn-identifier> <!-- mandatory -->
  </request-ggsn-stop-msisdn-trace>
</rpc>
```

Description Stop tracing Mobile Station Integrated Services Digital Network

Contents <msisdn-identifier>—Identifier for MSISDN

<request-ggsn-stop-node>

Usage

```
<rpc>
  <request-ggsn-stop-node/>
</rpc>
```

Description Stop GGSN node activity

<request-ggsn-stop-trace-activity>

Usage

```
<rpc>
  <request-ggsn-stop-trace-activity/>
</rpc>
```

Description Stop all tracing

<request-ggsn-terminate-context>

Usage

```
<rpc>
  <request-ggsn-terminate-context>
    <imsi>imsi</imsi> <!-- mandatory -->
    <nsapi>nsapi</nsapi>
  </request-ggsn-terminate-context>
</rpc>
```

Description Terminate specified kind of PDP context

Contents <request-ggsn-terminate-msisdn-context>—Terminate context for Mobile Station Integrated Services Digital Network

<imsi>—Identifier for International Mobile Subscriber Identity

<nsapi>—Network layer service access point identifier

<request-ggsn-terminate-contexts-apn>

Usage

```
<rpc>
  <request-ggsn-terminate-contexts-apn>
    <apn-name>apn-name</apn-name> <!-- mandatory -->
    <user-category>user-category</user-category>
  </request-ggsn-terminate-contexts-apn>
</rpc>
```

Description Terminate all PDP contexts in access point name

Contents <apn-name>—Name of access point name

- default -
- user-value -

<user-category>—Name of user category ('default' or 1..63)

- default -
- user-value -

<request-ggsn-terminate-msisdn-context>

Usage

```
<rpc>
  <request-ggsn-terminate-msisdn-context>
    <msisdn>msisdn</msisdn> <!-- mandatory -->
  </request-ggsn-terminate-msisdn-context>
</rpc>
```

Description Terminate context for Mobile Station Integrated Services Digital Network

Contents <msisdn>—Identifier for MSISDN

<request-gsm-change-pin>

Usage

```
<rpc>
  <request-gsm-change-pin>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
    <old-pin>old-pin</old-pin> <!-- mandatory -->
    <new-pin>new-pin</new-pin> <!-- mandatory -->
  </request-gsm-change-pin>
</rpc>
```

Description Unblock SIM

Contents <interface-name>—Name of physical interface

<old-pin>—Current SIM unlock code (PIN)

<new-pin>—New SIM unlock code (PIN) to be set

<request-gsm-create-profile>

Usage

```
<rpc>
  <request-gsm-create-profile>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
    <profile-id>profile-id</profile-id> <!-- mandatory -->
    <sip-user-id>sip-user-id</sip-user-id>
    <sip-password>sip-password</sip-password>
    <access-point-name>access-point-name</access-point-name> <!-- mandatory -->
  </request-gsm-create-profile>
</rpc>
```

```

    <authentication-method>authentication-method</authentication-method>
  </request-gsm-create-profile>
</rpc>

```

Description Create GSM profile

Contents

<interface-name>—Name of physical interface

- pap - Password Authentication Protocol
- chap - Challenge Handshake Authentication Protocol

<profile-id>—Profile Id

- pap - Password Authentication Protocol
- chap - Challenge Handshake Authentication Protocol

<sip-user-id>—SIP User ID

- pap - Password Authentication Protocol
- chap - Challenge Handshake Authentication Protocol

<sip-password>—SIP Password

- pap - Password Authentication Protocol
- chap - Challenge Handshake Authentication Protocol

<access-point-name>—Access Point Name (APN)

- pap - Password Authentication Protocol
- chap - Challenge Handshake Authentication Protocol

<authentication-method>—Authentication method

- pap - Password Authentication Protocol
- chap - Challenge Handshake Authentication Protocol

<request-gsm-delete-profile>

Usage

```

<rpc>
  <request-gsm-delete-profile>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
    <profile-id>profile-id</profile-id> <!-- mandatory -->
  </request-gsm-delete-profile>
</rpc>

```

Description Create GSM profile

Contents <interface-name>—Name of physical interface
<profile-id>—Profile Id

<request-gsm-sim-lock>

Usage

```
<rpc>  
  <request-gsm-sim-lock>  
    <interface-name>interface-name</interface-name> <!-- mandatory -->  
    <pin>pin</pin> <!-- mandatory -->  
    <enable/>  
    <disable/>  
  </request-gsm-sim-lock>  
</rpc>
```

Description Enable or disable SIM lock

Contents <interface-name>—Name of physical interface
<pin>—SIM unlock code (PIN)
<enable>—Enable SIM lock
<disable>—Disable SIM lock

<request-gsm-sim-unblock>

Usage

```
<rpc>  
  <request-gsm-sim-unblock>  
    <interface-name>interface-name</interface-name> <!-- mandatory -->  
    <puk>puk</puk> <!-- mandatory -->  
    <pin>pin</pin> <!-- mandatory -->  
  </request-gsm-sim-unblock>  
</rpc>
```

Description Unblock SIM

Contents <interface-name>—Name of physical interface
<puk>—SIM unblock code (PUK)
<pin>—New SIM unlock code (PIN) to be set

<request-gsm-sim-unlock>

Usage

```
<rpc>
```

```

<request-gsm-sim-unlock>
  <interface-name>interface-name</interface-name> <!-- mandatory -->
  <pin>pin</pin> <!-- mandatory -->
</request-gsm-sim-unlock>
</rpc>

```

Description Unlock SIM

Contents <interface-name>—Name of physical interface
 <pin>—SIM unlock code (PIN)

<request-halt>

Usage

```

<rpc>
  <request-halt>
    <at>at</at>
    <in>in</in>
    <message>message</message>
    <power-off>power-off</power-off>
    <media>media</media>
    <slice>slice</slice>
    <both-routing-engines/>
    <other-routing-engine/>
  </request-halt>
</rpc>

```

Description Halt the system

Contents <at>—Time at which to perform the operation

- fpc - Power off FPCs
- disk - Boot off hard disk
- compact-flash - Standard boot off flash device
- pcmcia-flash - Boot off removable PCMCIA device
- lan - Network boot via bootp
- usb - Boot off USB device
- recovery-compact-flash - Boot off recovery partition of compact flash
- removable-compact-flash - Boot off removable compact flash device
- external - Boot from external flash
- internal - Boot from internal flash
- nand-flash0 - Boot off nand-flash0
- nand-flash1 - Boot off nand-flash1

- alternate - Boot from alternate partition
- 1 - Boot from first partition
- 2 - Boot from second partition

<in>—Number of minutes to delay before operation

- fpc - Power off FPCs
- disk - Boot off hard disk
- compact-flash - Standard boot off flash device
- pcmcia-flash - Boot off removable PCMCIA device
- lan - Network boot via bootp
- usb - Boot off USB device
- recovery-compact-flash - Boot off recovery partition of compact flash
- removable-compact-flash - Boot off removable compact flash device
- external - Boot from external flash
- internal - Boot from internal flash
- nand-flash0 - Boot off nand-flash0
- nand-flash1 - Boot off nand-flash1
- alternate - Boot from alternate partition
- 1 - Boot from first partition
- 2 - Boot from second partition

<message>—Message to display to all users

- fpc - Power off FPCs
- disk - Boot off hard disk
- compact-flash - Standard boot off flash device
- pcmcia-flash - Boot off removable PCMCIA device
- lan - Network boot via bootp
- usb - Boot off USB device
- recovery-compact-flash - Boot off recovery partition of compact flash
- removable-compact-flash - Boot off removable compact flash device
- external - Boot from external flash
- internal - Boot from internal flash
- nand-flash0 - Boot off nand-flash0
- nand-flash1 - Boot off nand-flash1

- alternate - Boot from alternate partition
- 1 - Boot from first partition
- 2 - Boot from second partition

<power-off>—Power-off FRUs before shutting down RE

- fpc - Power off FPCs
- disk - Boot off hard disk
- compact-flash - Standard boot off flash device
- pcmcia-flash - Boot off removable PCMCIA device
- lan - Network boot via bootp
- usb - Boot off USB device
- recovery-compact-flash - Boot off recovery partition of compact flash
- removable-compact-flash - Boot off removable compact flash device
- external - Boot from external flash
- internal - Boot from internal flash
- nand-flash0 - Boot off nand-flash0
- nand-flash1 - Boot off nand-flash1
- alternate - Boot from alternate partition
- 1 - Boot from first partition
- 2 - Boot from second partition

<media>—Boot media for next boot

- disk - Boot off hard disk
- compact-flash - Standard boot off flash device
- pcmcia-flash - Boot off removable PCMCIA device
- lan - Network boot via bootp
- usb - Boot off USB device
- recovery-compact-flash - Boot off recovery partition of compact flash
- removable-compact-flash - Boot off removable compact flash device
- external - Boot from external flash
- internal - Boot from internal flash
- nand-flash0 - Boot off nand-flash0
- nand-flash1 - Boot off nand-flash1
- alternate - Boot from alternate partition

- 1 - Boot from first partition
- 2 - Boot from second partition

<slice>—Partition on boot media to boot from

- alternate - Boot from alternate partition
- 1 - Boot from first partition
- 2 - Boot from second partition

<both-routing-engines>—Halt both Routing Engines

<other-routing-engine>—Halt other Routing Engine

<request-idp-security-package-download>

Usage

```
<rpc>
  <request-idp-security-package-download>
    <re-selector-idpd>re-selector-idpd</re-selector-idpd>
    <re0/>
    <re1/>
    <download-choice>download-choice</download-choice>
    <full-update/>
    <check-server/>
    <policy-templates/>
    <precompiled-policy/>
    <status/>
    <policy-template-file/>
    <policy-template-result/>
  </request-idp-security-package-download>
</rpc>
```

Description Download security package (Package includes detector and deltas for attack table)

Contents <re0>—RE0

<re1>—RE1

<full-update>—Download package with complete attack table

<check-server>—Retrieve version information for latest package on server

<policy-templates>—Download policy templates

<precompiled-policy>—Download pre-compiled 'Recommended' policy and detector for it

<status>—Retrieve the status of security package download operation

<policy-template-file>—Current status of policy template file

<policy-template-result>—Status of policy templates operation

<request-idp-security-package-download-version>—Version of package to download

<request-idp-security-package-download-version>

Usage

```
<rpc>
  <request-idp-security-package-download-version>
    <re-selector-idpd>re-selector-idpd</re-selector-idpd>
    <re0/>
    <re1/>
    <version-value>version-value</version-value> <!-- mandatory -->
    <full-update/>
  </request-idp-security-package-download-version>
</rpc>
```

Description Version of package to download

Contents <re0>—RE0

<re1>—RE1

<version-value>—Version number

<full-update>—Download package with complete attack table

<request-idp-security-package-install>

Usage

```
<rpc>
  <request-idp-security-package-install>
    <re-selector-idpd>re-selector-idpd</re-selector-idpd>
    <re0/>
    <re1/>
    <install-choice>install-choice</install-choice>
    <update-attack-database-only/>
    <policy-templates/>
    <precompiled-policy/>
    <older-detector/>
    <status/>
    <policy-template-result/>
  </request-idp-security-package-install>
</rpc>
```

Description Update attack database, active policy, detector with new package

Contents <re0>—RE0

<re1>—RE1

<update-attack-database-only>—Don't update/push active policy or detector to data plane

<policy-templates>—Update previously installed policy-templates with newly downloaded ones

<precompiled-policy>—Update dataplane 'Recommended' policy and detector for it with newly downloaded ones

<older-detector>—Update dataplane with older detector

<status>—Retrieve the status of security package load operation

<policy-template-result>—Status of policy templates operation

<request-idp-security-package-load>

Usage

```
<rpc>
  <request-idp-security-package-load>
    <policy>policy</policy>
    <no-ai/>
    <detector>detector</detector>
  </request-idp-security-package-load>
</rpc>
```

Description Load a compiled policy

Contents <policy>—Compiled policy file name

<no-ai>—Application identification flag

<detector>—Detector file name

<request-idp-ssl-key-add>

Usage

```
<rpc>
  <request-idp-ssl-key-add>
    <key-name>key-name</key-name> <!-- mandatory -->
    <file>file</file>
    <password>password</password>
    <server>server</server>
  </request-idp-ssl-key-add>
</rpc>
```

Description Add SSL key and server

Contents <key-name>—Key name

<file>—Key file

<password>—Password used to encrypt private key

<server>—Server IP address

<request-idp-ssl-key-delete>

Usage

```
<rpc>
  <request-idp-ssl-key-delete>
    <key-name>key-name</key-name>
    <server>server</server>
  </request-idp-ssl-key-delete>
</rpc>
```

Description Delete SSL keys and servers

Contents <key-name>—Key name

<server>—Server IP address

<request-license-delete>

Usage

```
<rpc>
  <request-license-delete>
    <license-identifier>license-identifier</license-identifier> <!-- mandatory -->
  </request-license-delete>
</rpc>
```

Description Delete license keys

Contents <license-identifier>—Identifier of installed license key

<request-license-update>

Usage

```
<rpc>
  <request-license-update>
    <trial/>
  </request-license-update>
</rpc>
```

Description Start autoupdate license keys from LMS servers

Contents <trial>—Start autoupdate trial license keys from LMS servers

<request-logout-user>

Usage

```
<rpc>
  <request-logout-user>
    <all/>
    <user>user</user>
    <terminal>terminal</terminal>
    <pid>pid</pid>
  </request-logout-user>
</rpc>
```

Description Forcibly end user's CLI login session

Contents <all>—Logout all sessions owned by user

<user>—Name of user

<terminal>—Terminal user is logged in to

<pid>—Management process ID for user

<request-modem-wireless-activate-iota>

Usage

```
<rpc>
  <request-modem-wireless-activate-iota>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
  </request-modem-wireless-activate-iota>
</rpc>
```

Description Internet Over The Air Activation

Contents <interface-name>—Name of physical interface

<request-modem-wireless-activate-manual>

Usage

```
<rpc>
  <request-modem-wireless-activate-manual>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
    <msl>msl</msl> <!-- mandatory -->
    <mdn>mdn</mdn> <!-- mandatory -->
    <imsi>imsi</imsi> <!-- mandatory -->
    <sid>sid</sid>
    <nid>nid</nid>
    <sip-user-id>sip-user-id</sip-user-id>
    <sip-password>sip-password</sip-password>
  </request-modem-wireless-activate-manual>
```

```
</rpc>
```

Description Manual Activation

Contents <interface-name>—Name of physical interface

<msl>—Master Subsidy Lock

<mdn>—Mobile Dictionary Number

<imsi>—International Mobile Station Identity

<sid>—System identification

<nid>—Network identification

<sip-user-id>—SIP user ID

<sip-password>—SIP password

<request-modem-wireless-activate-otasp>

Usage

```
<rpc>
  <request-modem-wireless-activate-otasp>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
    <dial-string>dial-string</dial-string> <!-- mandatory -->
  </request-modem-wireless-activate-otasp>
</rpc>
```

Description Over The Air Service Provisioning

Contents <interface-name>—Name of physical interface

<dial-string>—

<request-monitor-ethernet-delay-measurement>

Usage

```
<rpc>
  <request-monitor-ethernet-delay-measurement>
    <one-way/>
    <two-way/>
    <wait>wait</wait>
    <count>count</count>
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
    <maintenance-association>maintenance-association</maintenance-association>
  <!-- mandatory -->
    <remote-mac-address>remote-mac-address</remote-mac-address>
```

```
<mep>mep</mep>
<logical-system>logical-system</logical-system>
</request-monitor-ethernet-delay-measurement>
</rpc>
```

Description Trigger ethernet delay measurement from local to remote host

Contents

- <one-way>—One-way delay measurement
- <two-way>—Two-way delay measurement
- <wait>—Delay after sending last packet
- <count>—Number of delay measurement requests to send
- <maintenance-domain>—Name of maintenance domain
- <maintenance-association>—Name of maintenance association
- <remote-mac-address>—MAC address of remote host in xx:xx:xx:xx:xx:xx format
- <mep>—MEP identifier of remote host
- <logical-system>—Name of logical system

<request-package-add>

Usage

```
<rpc>
  <request-package-add>
    <force/>
    <reboot/>
    <delay-restart/>
    <no-copy/>
    <validate_choice>validate_choice</validate_choice>
    <no-validate/>
    <validate/>
    <best-effort-load/>
    <unlink/>
    <partition/>
    <package-name>package-name</package-name> <!-- mandatory -->
    <re-choice>re-choice</re-choice>
    <re0/>
    <re1/>
    <chassis>chassis</chassis>
    <scc/>
    <lcc>lcc</lcc>
    <sfc/>
    <member>member</member>
    <dont-forward/>
  </request-package-add>
</rpc>
```

Description Add extension or upgrade package

Contents

- <force>—Force addition of package (ignore warnings)
- <reboot>—Reboot system after adding package
- <delay-restart>—Don't restart processes
- <no-copy>—Don't save copies of package files
- <no-validate>—Don't check compatibility with current configuration
- <validate>—Check compatibility with current configuration
- <best-effort-load>—Load succeeds if at least one statement is valid
- <unlink>—Remove the package after successful installation
- <partition>—Format and re-partition the media before installation
- <package-name>—URL or pathname of package
- <re0>—Install package on RE0
- <re1>—Install package on RE1
- <scc>—Install package on SCC
- <lcc>—Install package on an LCC
- <sfc>—Install package on SFC
- <member>—Install package on VC Member
- <dont-forward>—

<request-package-delete>

Usage

```
<rpc>
  <request-package-delete>
    <force/>
    <package-name>package-name</package-name> <!-- mandatory -->
  </request-package-delete>
</rpc>
```

Description Remove extension or upgrade package

Contents

- <force>—Force removal of package (ignore warnings)
- <package-name>—Name of package

<request-package-delete-backup>

Usage

```
<rpc>
  <request-package-delete-backup/>
</rpc>
```

Description Delete old system software packages

<request-package-in-service-upgrade>

Usage

```
<rpc>
  <request-package-in-service-upgrade>
    <reboot/>
    <package-name>package-name</package-name> <!-- mandatory -->
    <no-old-master-upgrade/>
    <no-copy/>
    <unlink/>
  </request-package-in-service-upgrade>
</rpc>
```

Description In-service software upgrade

Contents

- <reboot>—Reboot system after adding package
- <package-name>—URL or pathname of package
- <no-old-master-upgrade>—Don't upgrade the old master after switchover
- <no-copy>—Don't save copies of package files
- <unlink>—Remove the package after successful installation

<request-package-nonstop-upgrade>

Usage

```
<rpc>
  <request-package-nonstop-upgrade>
    <reboot/>
    <package-name>package-name</package-name> <!-- mandatory -->
    <no-old-master-upgrade/>
    <no-copy/>
    <unlink/>
  </request-package-nonstop-upgrade>
</rpc>
```

Description Nonstop software upgrade

- Contents**
- <reboot>—Reboot system after adding package
 - <package-name>—URL or pathname of package
 - <no-old-master-upgrade>—Don't upgrade the old master after switchover
 - <no-copy>—Don't save copies of package files
 - <unlink>—Remove the package after successful installation

<request-package-rollback>

Usage

```
<rpc>
  <request-package-rollback/>
</rpc>
```

Description Attempt to roll back to previous set of packages

<request-package-validate>

Usage

```
<rpc>
  <request-package-validate>
    <package-name>package-name</package-name> <!-- mandatory -->
    <chassis>chassis</chassis>
    <scc/>
    <lcc>lcc</lcc>
    <sfc/>
    <member>member</member>
    <dont-forward/>
  </request-package-validate>
</rpc>
```

Description Verify package compatibility with current configuration

- Contents**
- <check-in-service-upgrade>—Check in-service software upgrade
 - <package-name>—URL or path of package
 - <scc>—Validate package on SCC
 - <lcc>—Validate package on an LCC
 - <sfc>—Validate package on SFC
 - <member>—Install package on VC Member
 - <dont-forward>—

<request-ping-ethernet>

Usage

```
<rpc>
  <request-ping-ethernet>
    <wait>wait</wait>
    <size>size</size>
    <count>count</count>
    <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
    <maintenance-association>maintenance-association</maintenance-association>
  <!-- mandatory -->
    <host>host</host>
    <mep>mep</mep>
    <logical-system>logical-system</logical-system>
  </request-ping-ethernet>
</rpc>
```

Description Ping to an ethernet host by unicast mac address

Contents

- <wait>—Delay after sending last packet
- <size>—Size of data TLV in request packets
- <count>—Number of ping requests to send
- <maintenance-domain>—Name of maintenance domain
- <maintenance-association>—Name of maintenance association
- <host>—MAC address of remote host in xx:xx:xx:xx:xx:xx format
- <mep>—MEP identifier of remote host
- <logical-system>—Name of logical system

<request-ping-l2circuit-interface>

Usage

```
<rpc>
  <request-ping-l2circuit-interface>
    <v1/>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
    <count>count</count>
    <source>source</source>
    <destination>destination</destination>
    <exp>exp</exp>
    <detail/>
    <size>size</size>
    <sweep/>
    <logical-system>logical-system</logical-system>
  </request-ping-l2circuit-interface>
```

```
</rpc>
```

Description Locate LSP from interface name

Contents

```
<v1>—Ping using Layer 2 circuit TLV (type 9)

<interface-name>—Interface name

<count>—Number of ping requests to send

<source>—IP source address of echo request

<destination>—IP address of destination for echo request

<exp>—Forwarding class

<detail>—Display detailed output

<size>—Size of lsp ping request packet

<sweep>—Incremental ping to find MTU

<logical-system>—Name of logical system
```

<request-ping-l2circuit-virtual-circuit>

Usage

```
<rpc>
  <request-ping-l2circuit-virtual-circuit>
    <v1/>
    <neighbor>neighbor</neighbor> <!-- mandatory -->
    <virtual-circuit-id>virtual-circuit-id</virtual-circuit-id> <!-- mandatory -->
    <count>count</count>
    <source>source</source>
    <destination>destination</destination>
    <exp>exp</exp>
    <detail/>
    <size>size</size>
    <sweep/>
    <logical-system>logical-system</logical-system>
  </request-ping-l2circuit-virtual-circuit>
</rpc>
```

Description Locate LSP from virtual circuit information

Contents

```
<v1>—Ping using Layer 2 circuit TLV (type 9)

<neighbor>—Address of remote neighbor

<virtual-circuit-id>—Layer 2 circuit identifier
```

<count>—Number of ping requests to send

<source>—IP source address of echo request

<destination>—IP address of destination for echo request

<exp>—Forwarding class

<detail>—Display detailed output

<size>—Size of lsp ping request packet

<sweep>—Incremental ping to find MTU

<logical-system>—Name of logical system

<request-ping-l2vpn-instance>

Usage

```
<rpc>
  <request-ping-l2vpn-instance>
    <instance-name>instance-name</instance-name> <!-- mandatory -->
    <local-site-id>local-site-id</local-site-id> <!-- mandatory -->
    <remote-site-id>remote-site-id</remote-site-id> <!-- mandatory -->
    <bottom-label-ttl>bottom-label-ttl</bottom-label-ttl>
    <count>count</count>
    <source>source</source>
    <destination>destination</destination>
    <exp>exp</exp>
    <detail/>
    <size>size</size>
    <sweep/>
    <logical-system>logical-system</logical-system>
  </request-ping-l2vpn-instance>
</rpc>
```

Description Instance to which this connection belongs

Contents <instance-name>—Layer 2 VPN name

<local-site-id>—Layer 2 VPN local site identifier

<remote-site-id>—Layer 2 VPN remote site identifier

<bottom-label-ttl>—Time to live for the bottom label in the label stack

<count>—Number of ping requests to send

<source>—IP source address of echo request

<destination>—IP address of destination for echo request

<exp>—Forwarding class

<detail>—Display detailed output

<size>—Size of lsp ping request packet

<sweep>—Incremental ping to find MTU

<logical-system>—Name of logical system

<request-ping-l2vpn-interface>

Usage

```
<rpc>
  <request-ping-l2vpn-interface>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
    <bottom-label-ttl>bottom-label-ttl</bottom-label-ttl>
    <count>count</count>
    <source>source</source>
    <destination>destination</destination>
    <exp>exp</exp>
    <detail/>
    <size>size</size>
    <sweep/>
    <logical-system>logical-system</logical-system>
  </request-ping-l2vpn-interface>
</rpc>
```

Description Locate LSP using interface name

Contents

<interface-name>—Interface name

<bottom-label-ttl>—Time to live for the bottom label in the label stack

<count>—Number of ping requests to send

<source>—IP source address of echo request

<destination>—IP address of destination for echo request

<exp>—Forwarding class

<detail>—Display detailed output

<size>—Size of lsp ping request packet

<sweep>—Incremental ping to find MTU

<logical-system>—Name of logical system

<request-ping-l3vpn>

Usage

```
<rpc>
```

```
<request-ping-l3vpn>
  <l3vpn-name>l3vpn-name</l3vpn-name> <!-- mandatory -->
  <prefix>prefix</prefix> <!-- mandatory -->
  <bottom-label-ttl>bottom-label-ttl</bottom-label-ttl>
  <count>count</count>
  <source>source</source>
  <destination>destination</destination>
  <exp>exp</exp>
  <detail/>
  <size>size</size>
  <sweep/>
  <logical-system>logical-system</logical-system>
</request-ping-l3vpn>
</rpc>
```

Description Ping LSP to Layer 3 VPN prefix

Contents

- <l3vpn-name>—Name of Layer 3 VPN
- <prefix>—IP prefix/length of Layer 3 VPN
- <bottom-label-ttl>—Time to live for the bottom label in the label stack
- <count>—Number of ping requests to send
- <source>—IP source address of echo request
- <destination>—IP address of destination for echo request
- <exp>—Forwarding class
- <detail>—Display detailed output
- <size>—Size of lsp ping request packet
- <sweep>—Incremental ping to find MTU
- <logical-system>—Name of logical system

<request-ping-ldp-lsp>

Usage

```
<rpc>
  <request-ping-ldp-lsp>
    <fec>fec</fec> <!-- mandatory -->
    <instance>instance</instance>
    <count>count</count>
    <source>source</source>
    <destination>destination</destination>
    <exp>exp</exp>
    <detail/>
    <size>size</size>
    <sweep/>
```

```

    <logical-system>logical-system</logical-system>
  </request-ping-ldp-lsp>
</rpc>

```

Description Ping LDP-signaled LSP

Contents

- <fec>—IP prefix/length of forwarding equivalence class
- <instance>—Routing-instance name
- <count>—Number of ping requests to send
- <source>—IP source address of echo request
- <destination>—IP address of destination for echo request
- <exp>—Forwarding class
- <detail>—Display detailed output
- <size>—Size of lsp ping request packet
- <sweep>—Incremental ping to find MTU
- <logical-system>—Name of logical system
- <request-ping-ldp-p2mp-lsp>—Ping LDP-signaled P2MP LSP

<request-ping-ldp-p2mp-lsp>

Usage

```

<rpc>
  <request-ping-ldp-p2mp-lsp>
    <root-addr>root-addr</root-addr> <!-- mandatory -->
    <lsp-id>lsp-id</lsp-id> <!-- mandatory -->
    <egress>egress</egress>
    <instance>instance</instance>
    <count>count</count>
    <source>source</source>
    <destination>destination</destination>
    <exp>exp</exp>
    <detail/>
    <size>size</size>
    <sweep/>
    <logical-system>logical-system</logical-system>
  </request-ping-ldp-p2mp-lsp>
</rpc>

```

Description Ping LDP-signaled P2MP LSP

Contents <root-addr>—IP address of p2mp lsp root

<lsp-id>—LSP ID of p2mp lsp

<egress>—Request only a specific multipoint egress to respond

<instance>—Routing-instance name

<count>—Number of ping requests to send

<source>—IP source address of echo request

<destination>—IP address of destination for echo request

<exp>—Forwarding class

<detail>—Display detailed output

<size>—Size of lsp ping request packet

<sweep>—Incremental ping to find MTU

<logical-system>—Name of logical system

<request-ping-lsp-end-point>

Usage

```
<rpc>
  <request-ping-lsp-end-point>
    <prefix>prefix</prefix> <!-- mandatory -->
    <instance>instance</instance>
    <count>count</count>
    <source>source</source>
    <destination>destination</destination>
    <exp>exp</exp>
    <detail/>
    <size>size</size>
    <sweep/>
    <logical-system>logical-system</logical-system>
  </request-ping-lsp-end-point>
</rpc>
```

Description Ping end point of LSP

Contents <prefix>—IP prefix/length of end point

<instance>—Routing-instance name

<count>—Number of ping requests to send

<source>—IP source address of echo request

<destination>—IP address of destination for echo request

<exp>—Forwarding class

<detail>—Display detailed output

<size>—Size of lsp ping request packet

<sweep>—Incremental ping to find MTU

<logical-system>—Name of logical system

<request-ping-rsvp-dynamic-bypass-lsp>

Usage

```
<rpc>
  <request-ping-rsvp-dynamic-bypass-lsp>
    <lsp-name>lsp-name</lsp-name> <!-- mandatory -->
    <count>count</count>
    <source>source</source>
    <destination>destination</destination>
    <exp>exp</exp>
    <detail/>
    <size>size</size>
    <sweep/>
    <logical-system>logical-system</logical-system>
  </request-ping-rsvp-dynamic-bypass-lsp>
</rpc>
```

Description Dynamically created LSP, used for protecting other LSPs

Contents <lsp-name>—Name of dynamic bypass LSP

<count>—Number of ping requests to send

<source>—IP source address of echo request

<destination>—IP address of destination for echo request

<exp>—Forwarding class

<detail>—Display detailed output

<size>—Size of lsp ping request packet

<sweep>—Incremental ping to find MTU

<logical-system>—Name of logical system

<request-ping-rsvp-lsp>

Usage

```
<rpc>
  <request-ping-rsvp-lsp>
    <lsp-name>lsp-name</lsp-name> <!-- mandatory -->
    <standby>standby</standby>
```

```
<multipoint/>
<egress>egress</egress>
<count>count</count>
<source>source</source>
<destination>destination</destination>
<exp>exp</exp>
<detail/>
<size>size</size>
<sweep/>
<logical-system>logical-system</logical-system>
</request-ping-rsvp-lsp>
</rpc>
```

Description Ping RSVP-signaled LSP

Contents

- <lsp-name>—Name of LSP
- <standby>—Name of standby path
- <multipoint>—Probe multipoint LSP
- <egress>—Request only a specific multipoint egress to respond
- <count>—Number of ping requests to send
- <source>—IP source address of echo request
- <destination>—IP address of destination for echo request
- <exp>—Forwarding class
- <detail>—Display detailed output
- <size>—Size of lsp ping request packet
- <sweep>—Incremental ping to find MTU
- <logical-system>—Name of logical system
- <request-ping-rsvp-dynamic-bypass-lsp>—Dynamically created LSP, used for protecting other LSPs
- <request-ping-rsvp-manual-bypass-lsp>—Manually configured LSP, used for protecting other LSPs

<request-ping-rsvp-manual-bypass-lsp>

Usage

```
<rpc>
<request-ping-rsvp-manual-bypass-lsp>
  <lsp-name>lsp-name</lsp-name> <!-- mandatory -->
  <interface>interface</interface> <!-- mandatory -->
  <count>count</count>
```

```

    <source>source</source>
    <destination>destination</destination>
    <exp>exp</exp>
    <detail/>
    <size>size</size>
    <sweep/>
    <logical-system>logical-system</logical-system>
  </request-ping-rsvp-manual-bypass-lsp>
</rpc>

```

Description Manually configured LSP, used for protecting other LSPs

Contents

- <lsp-name>—Name of manual bypass LSP
- <interface>—Name of the interface, which is protected by this bypass
- <count>—Number of ping requests to send
- <source>—IP source address of echo request
- <destination>—IP address of destination for echo request
- <exp>—Forwarding class
- <detail>—Display detailed output
- <size>—Size of lsp ping request packet
- <sweep>—Incremental ping to find MTU
- <logical-system>—Name of logical system

<request-ping-vpls-instance>

Usage

```

<rpc>
  <request-ping-vpls-instance>
    <instance-name>instance-name</instance-name> <!-- mandatory -->
    <destination-mac>destination-mac</destination-mac> <!-- mandatory -->
    <source-ip>source-ip</source-ip> <!-- mandatory -->
    <learning-vlan-id>learning-vlan-id</learning-vlan-id>
    <control-plane-response/>
    <bd-name>bd-name</bd-name>
    <count>count</count>
    <detail/>
    <logical-system>logical-system</logical-system>
  </request-ping-vpls-instance>
</rpc>

```

Description Instance to which this VPLS connection belongs

Contents	<instance-name> —Layer 2 VPLS name
	<destination-mac> —Destination MAC address
	<source-ip> —Source IP address
	<learning-vlan-id> —Learning VLAN identifier
	<control-plane-response> —Request VPLS OAM responses using the control plane
	<bd-name> —Name of bridge domain
	<count> —Number of ping requests to send
	<detail> —Display detailed output
	<logical-system> —Name of logical system

<request-power-off>

Usage

```
<rpc>
  <request-power-off>
    <at>at</at>
    <in>in</in>
    <message>message</message>
    <power-off>power-off</power-off>
    <media>media</media>
    <slice>slice</slice>
    <both-routing-engines/>
    <other-routing-engine/>
  </request-power-off>
</rpc>
```

Description Power off the system

Contents	<at> —Time at which to perform the operation <ul style="list-style-type: none">fpc - Power off FPCsdisk - Boot off hard diskcompact-flash - Standard boot off flash devicepcmcia-flash - Boot off removable PCMCIA devicelan - Network boot via bootpusb - Boot off USB devicerecovery-compact-flash - Boot off recovery partition of compact flashremovable-compact-flash - Boot off removable compact flash deviceexternal - Boot from external flash

- nand-flash0 - Boot off nand-flash0
- nand-flash1 - Boot off nand-flash1
- alternate - Boot from alternate partition
- 1 - Boot from first partition
- 2 - Boot from second partition

<slice>—Partition on boot media to boot from

- alternate - Boot from alternate partition
- 1 - Boot from first partition
- 2 - Boot from second partition

<other-routing-engine>—Reboot the other Routing Engine

<request-redundancy-feb>

Usage

```
<rpc>
  <request-redundancy-feb>
    <slot>slot</slot> <!-- mandatory -->
    <switch-to-backup/>
    <revert-from-backup/>
  </request-redundancy-feb>
</rpc>
```

Description Change Forwarding Engine Board redundancy status

Contents <slot>—FEB slot number

<switch-to-backup>—Switch mastership to other FEB

<revert-from-backup>—Revert mastership back to configured default

<request-save-rescue-configuration>

Usage

```
<rpc>
  <request-save-rescue-configuration/>
</rpc>
```

Description Save committed configuration as rescue configuration

<request-script-refresh-from>

Usage

```

<rpc>
  <request-script-refresh-from>
    <commit/>
    <op/>
    <event/>
    <file>file</file>
    <url>url</url>
  </request-script-refresh-from>
</rpc>

```

Description Refresh script from a given base URL

Contents <commit>—Refresh commit script from a given base URL

<op>—Refresh op script from a given base URL

<event>—Refresh event script from a given base URL

<file>—Local script file name

<url>—URL from where the content will be retrieved

<request-scripts-package-add>

Usage

```

<rpc>
  <request-scripts-package-add>
    <no-copy/>
    <unlink/>
    <package-name>package-name</package-name> <!-- mandatory -->
    <chassis>chassis</chassis>
    <scc/>
    <lcc>lcc</lcc>
    <sfc/>
    <member>member</member>
    <dont-forward/>
  </request-scripts-package-add>
</rpc>

```

Description Add or upgrade jais package

Contents <no-copy>—Don't save copy of jais package file

<unlink>—Remove the package after successful installation

<package-name>—URL or pathname of package

<scc>—Install package on SCC

<lcc>—Install package on an LCC

<sfc>—Install package on SFC

<member>—Install package on VC Member

<dont-forward>—

<request-scripts-package-delete>

Usage

```
<rpc>
  <request-scripts-package-delete/>
</rpc>
```

Description Remove jais package

<request-scripts-package-rollback>

Usage

```
<rpc>
  <request-scripts-package-rollback/>
</rpc>
```

Description Attempt to roll back to last jais package

<request-services-flow-collector-destination>

Usage

```
<rpc>
  <request-services-flow-collector-destination>
    <primary/>
    <secondary/>
    <interface>interface</interface> <!-- mandatory -->
    <clear-files/>
    <clear-logs/>
    <gracefully/>
    <immediately/>
  </request-services-flow-collector-destination>
</rpc>
```

Description Change to Destination server

Contents <primary>—Primary server

<secondary>—Secondary server

<interface>—Physical interface

<clear-files>—Remove existing files

<clear-logs>—Remove existing logs

<gracefully>—Retain existing FTP connections

<immediately>—Terminate existing FTP connections

<request-services-flow-collector-test-file-transfer>

Usage

```
<rpc>
  <request-services-flow-collector-test-file-transfer>
    <filename>filename</filename> <!-- mandatory -->
    <channel-zero/>
    <channel-one/>
    <primary/>
    <secondary/>
    <interface>interface</interface> <!-- mandatory -->
  </request-services-flow-collector-test-file-transfer>
</rpc>
```

Description Transfer a test file to the current primary server

Contents <filename>—Specify the filename to use

- all - All configured Collector PICs
- interface - Physical interface

<channel-zero>—Channel 0

- all - All configured Collector PICs
- interface - Physical interface

<channel-one>—Channel 1

- all - All configured Collector PICs
- interface - Physical interface

<primary>—Primary server

- all - All configured Collector PICs
- interface - Physical interface

<secondary>—Secondary server

- all - All configured Collector PICs
- interface - Physical interface

<interface>—Interface name

- all - All configured Collector PICs
- interface - Physical interface

<request-snapshot>

Usage

```
<rpc>
  <request-snapshot>
    <partition/>
    <factory/>
    <as-primary/>
    <swap-size>swap-size</swap-size>
    <config-size>config-size</config-size>
    <root-size>root-size</root-size>
    <data-size>data-size</data-size>
    <slice>slice</slice>
    <media>media</media>
  </request-snapshot>
</rpc>
```

Description Archive data and executable areas

Contents <partition>—Partition the media

- 1 - Write snapshot to first partition
- 2 - Write snapshot to second partition
- alternate - Write snapshot to alternate partition
- removable-compact-flash - Write snapshot to removable compact flash
- compact-flash - Write snapshot to compact flash
- usb - Write snapshot to device connected to USB port
- hard-disk - Write snapshot to hard disk
- internal - Write snapshot to internal flash
- external - Write snapshot to external flash

<factory>—Include only files shipped from factory in snapshot

- 1 - Write snapshot to first partition
- 2 - Write snapshot to second partition
- alternate - Write snapshot to alternate partition
- removable-compact-flash - Write snapshot to removable compact flash
- compact-flash - Write snapshot to compact flash

- usb - Write snapshot to device connected to USB port
- hard-disk - Write snapshot to hard disk
- internal - Write snapshot to internal flash
- external - Write snapshot to external flash

<as-primary>—Setup snapshot to be used in the primary boot device

- 1 - Write snapshot to first partition
- 2 - Write snapshot to second partition
- alternate - Write snapshot to alternate partition
- removable-compact-flash - Write snapshot to removable compact flash
- compact-flash - Write snapshot to compact flash
- usb - Write snapshot to device connected to USB port
- hard-disk - Write snapshot to hard disk
- internal - Write snapshot to internal flash
- external - Write snapshot to external flash

<swap-size>—Size of the swap partition

- 1 - Write snapshot to first partition
- 2 - Write snapshot to second partition
- alternate - Write snapshot to alternate partition
- removable-compact-flash - Write snapshot to removable compact flash
- compact-flash - Write snapshot to compact flash
- usb - Write snapshot to device connected to USB port
- hard-disk - Write snapshot to hard disk
- internal - Write snapshot to internal flash
- external - Write snapshot to external flash

<config-size>—Size of the config partition

- 1 - Write snapshot to first partition
- 2 - Write snapshot to second partition
- alternate - Write snapshot to alternate partition
- removable-compact-flash - Write snapshot to removable compact flash
- compact-flash - Write snapshot to compact flash
- usb - Write snapshot to device connected to USB port
- hard-disk - Write snapshot to hard disk

- internal - Write snapshot to internal flash
- external - Write snapshot to external flash

<root-size>—Size of the root partition

- 1 - Write snapshot to first partition
- 2 - Write snapshot to second partition
- alternate - Write snapshot to alternate partition
- removable-compact-flash - Write snapshot to removable compact flash
- compact-flash - Write snapshot to compact flash
- usb - Write snapshot to device connected to USB port
- hard-disk - Write snapshot to hard disk
- internal - Write snapshot to internal flash
- external - Write snapshot to external flash

<data-size>—Size of the data partition

- 1 - Write snapshot to first partition
- 2 - Write snapshot to second partition
- alternate - Write snapshot to alternate partition
- removable-compact-flash - Write snapshot to removable compact flash
- compact-flash - Write snapshot to compact flash
- usb - Write snapshot to device connected to USB port
- hard-disk - Write snapshot to hard disk
- internal - Write snapshot to internal flash
- external - Write snapshot to external flash

<slice>—Write snapshot to specified partition

- 1 - Write snapshot to first partition
- 2 - Write snapshot to second partition
- alternate - Write snapshot to alternate partition
- removable-compact-flash - Write snapshot to removable compact flash
- compact-flash - Write snapshot to compact flash
- usb - Write snapshot to device connected to USB port
- hard-disk - Write snapshot to hard disk
- internal - Write snapshot to internal flash
- external - Write snapshot to external flash

<media>—Media to snapshot to

- removable-compact-flash - Write snapshot to removable compact flash
- compact-flash - Write snapshot to compact flash
- usb - Write snapshot to device connected to USB port
- hard-disk - Write snapshot to hard disk
- internal - Write snapshot to internal flash
- external - Write snapshot to external flash

<request-snmp-spoof-trap>

Usage

```
<rpc>
  <request-snmp-spoof-trap>
    <trap>trap</trap> <!-- mandatory -->
    <variable-bindings>variable-bindings</variable-bindings>
  </request-snmp-spoof-trap>
</rpc>
```

Description Generate artificial SNMP notification

Contents <trap>—The name of the trap to spoof

<variable-bindings>—The list of variables & values to include in the trap

<request-system-storage-cleanup>

Usage

```
<rpc>
  <request-system-storage-cleanup>
    <dry-run/>
  </request-system-storage-cleanup>
</rpc>
```

Description Clean up temporary files and rotate logs

Contents <dry-run>—Only list the cleanup candidates, do not remove them

<request-traceroute-ethernet>

Usage

```
<rpc>
  <request-traceroute-ethernet>
    <ttl>ttl</ttl>
    <wait>wait</wait>
```

```
        <maintenance-domain>maintenance-domain</maintenance-domain> <!--
mandatory -->
        <maintenance-association>maintenance-association</maintenance-association>
<!-- mandatory -->
        <host>host</host>
        <mep>mep</mep>
        <logical-system>logical-system</logical-system>
</request-traceroute-ethernet>
</rpc>
```

Description Trace route to an ethernet host by unicast mac address

Contents <ttl>—Maximum time-to-live value

<wait>—Number of seconds to wait for response

<maintenance-domain>—Name of maintenance domain

<maintenance-association>—Name of maintenance association

<host>—MAC address of remote host in xx:xx:xx:xx:xx:xx format

<mep>—MEP identifier of remote host

<logical-system>—Name of logical system

<request-wlan-access-point-firmware-upgrade>

Usage

```
<rpc>
  <request-wlan-access-point-firmware-upgrade>
    <name/>
    <all/>
    <file>file</file> <!-- mandatory -->
  </request-wlan-access-point-firmware-upgrade>
</rpc>
```

Description Upgrade the firmware

Contents <name>—Name of the access point

<all>—All access points

<file>—Manually specified firmware file

<request-wlan-access-point-restart>

Usage

```
<rpc>
  <request-wlan-access-point-restart>
```

```

<restart-access-point-name>restart-access-point-name</restart-access-point-name>
<!-- mandatory -->
  </request-wlan-access-point-restart>
</rpc>

```

Description Restart operation

Contents <restart-access-point-name>—Name of the access point

<retrieve-destination-nat-summary-information>

Usage

```

<rpc>
  <retrieve-destination-nat-summary-information/>
</rpc>

```

Description Show destination NAT summary information

<retrieve-persist-nat-ip-port-information>

Usage

```

<rpc>
  <retrieve-persist-nat-ip-port-information>
    <ip>ip</ip> <!-- mandatory -->
    <internal-port>internal-port</internal-port>
  </retrieve-persist-nat-ip-port-information>
</rpc>

```

Description Show persistent NAT information of internal IP and port

Contents <ip>—Internal IP address

<internal-port>—Internal port

<retrieve-persist-nat-pool-information>

Usage

```

<rpc>
  <retrieve-persist-nat-pool-information>
    <pool-name>pool-name</pool-name> <!-- mandatory -->
  </retrieve-persist-nat-pool-information>
</rpc>

```

Description Show persistent NAT information of this pool

Contents <pool-name>—Source NAT pool name

<retrieve-source-nat-pool-information>

Usage

```
<rpc>
  <retrieve-source-nat-pool-information>
    <pool-choice>pool-choice</pool-choice> <!-- mandatory -->
    <pool-name>pool-name</pool-name> <!-- mandatory -->
  </retrieve-source-nat-pool-information>
</rpc>
```

Description Show source NAT information of this pool

Contents <pool-name>—Address-pool name
 <all>—Display all source NAT pool information

<retrieve-source-nat-summary>

Usage

```
<rpc>
  <retrieve-source-nat-summary/>
</rpc>
```

Description Show source NAT summary information

<save-dhcp-snooping>

Usage

```
<rpc>
  <save-dhcp-snooping>
    <filename>filename</filename> <!-- mandatory -->
  </save-dhcp-snooping>
</rpc>
```

Description Save DHCP snooping entries

Contents <filename>—Filename (URL, local, remote)

<set-chassis-cluster-disable>

Usage

```
<rpc>
  <set-chassis-cluster-disable>
```

```
<reboot/>
</set-chassis-cluster-disable>
</rpc>
```

Description Disable the chassis cluster

Contents <reboot>—Reboot the system after disabling the cluster

<set-chassis-cluster-enable>

Usage

```
<rpc>
  <set-chassis-cluster-enable>
    <cluster-id>cluster-id</cluster-id> <!-- mandatory -->
    <node>node</node> <!-- mandatory -->
  <reboot/>
</set-chassis-cluster-enable>
</rpc>
```

Description Set cluster identifier

Contents <cluster-id>—Cluster identifier

<node>—Node identifier

<reboot>—Reboot the system after setting the identifiers

<set-logical-router>

Usage

```
<rpc>
  <set-logical-router>
    <logical-system>logical-system</logical-system> <!-- mandatory -->
  </set-logical-router>
</rpc>
```

Description Set default logical system

Contents <logical-system>—Name of logical system

<set-tgm-media-gateway-controller>

Usage

```
<rpc>
  <set-tgm-media-gateway-controller>
    <slot>slot</slot> <!-- mandatory -->
    <media-gateway-controller>media-gateway-controller</media-gateway-controller>
  </set-tgm-media-gateway-controller>
</rpc>
```

```
<!-- mandatory -->
</set-tgm-media-gateway-controller>
</rpc>
```

Description Change Flexible PIC Concentrator information

Contents <slot>—FPC slot number
 <media-gateway-controller>—IPv4 address of one or more media gateway controllers

<show-alg-ike-esp-state>

Usage

```
<rpc>
<show-alg-ike-esp-state>
</show-alg-ike-esp-state>
</rpc>
```

Description Show all IKE-ESP ALG state information

Contents <show-alg-ike-esp-summary>—Show IKE-ESP ALG summary

<show-alg-ike-esp-summary>

Usage

```
<rpc>
<show-alg-ike-esp-summary/>
</rpc>
```

Description Show IKE-ESP ALG summary

<show-anti-spam>

Usage

```
<rpc>
<show-anti-spam>
</show-anti-spam>
</rpc>
```

Description Show anti-spam information

Contents <show-anti-spam-statistics>—Show anti-spam statistics
 <show-anti-spam-status>—Show anti-spam status

<show-anti-spam-statistics>

Usage

```
<rpc>  
  <show-anti-spam-statistics/>  
</rpc>
```

Description Show anti-spam statistics

<show-anti-spam-status>

Usage

```
<rpc>  
  <show-anti-spam-status/>  
</rpc>
```

Description Show anti-spam status

<show-anti-virus>

Usage

```
<rpc>  
  <show-anti-virus>  
  </show-anti-virus>  
</rpc>
```

Description Show anti-virus information

Contents <show-anti-virus-statistics>—Show anti-virus statistics
 <show-anti-virus-status>—Show anti-virus status

<show-anti-virus-statistics>

Usage

```
<rpc>  
  <show-anti-virus-statistics>  
  </show-anti-virus-statistics>  
</rpc>
```

Description Show anti-virus statistics

Contents <show-anti-virus-statistics-detail>—Show anti-virus detailed status

<show-anti-virus-statistics-detail>

Usage

```
<rpc>
  <show-anti-virus-statistics-detail/>
</rpc>
```

Description Show anti-virus detailed status

<show-anti-virus-status>

Usage

```
<rpc>
  <show-anti-virus-status>
  </show-anti-virus-status>
</rpc>
```

Description Show anti-virus status

Contents <show-anti-virus-status-detail>—Show anti-virus detailed status

<show-anti-virus-status-detail>

Usage

```
<rpc>
  <show-anti-virus-status-detail/>
</rpc>
```

Description Show anti-virus detailed status

<show-content-filtering>

Usage

```
<rpc>
  <show-content-filtering>
  </show-content-filtering>
</rpc>
```

Description Show content-filtering information

Contents <show-content-filtering-statistics>—Show content-filtering statistics

<show-content-filtering-statistics>

Usage

```
<rpc>  
  <show-content-filtering-statistics/>  
</rpc>
```

Description Show content-filtering statistics

<show-ds-lite-software-one-sc-information>

Usage

```
<rpc>  
  <show-ds-lite-software-one-sc-information>  
    <software-name-str>software-name-str</software-name-str> <!-- mandatory -->  
  </show-ds-lite-software-one-sc-information>  
</rpc>
```

Description Show Software Concentrator object

Contents <software-name-str>—Software Name

<show-ds-lite-software-sc-infomation>

Usage

```
<rpc>  
  <show-ds-lite-software-sc-infomation>  
  </show-ds-lite-software-sc-infomation>  
</rpc>
```

Description Show software information

Contents <show-ds-lite-software-one-sc-information>—Show Software Concentrator object

<show-eedebg-capture>

Usage

```
<rpc>  
  <show-eedebg-capture/>  
</rpc>
```

Description Show datapath debug capture file

<show-modem-wireless-interface>

Usage

```
<rpc>
  <show-modem-wireless-interface>
    <interface-name>interface-name</interface-name> <!-- mandatory -->
    <firmware/>
    <network/>
    <rsi/>
    <profiles/>
  </show-modem-wireless-interface>
</rpc>
```

Description Show wireless interface information

Contents

- <interface-name>—Name of physical interface
- <firmware>—Show wireless interface firmware details
- <network>—Show wireless Network statistics
- <rsi>—Show Received Signal Strength
- <profiles>—Show profile details

<show-utmd-session>

Usage

```
<rpc>
  <show-utmd-session/>
</rpc>
```

Description Show security utm session

<show-utmd-status>

Usage

```
<rpc>
  <show-utmd-status/>
</rpc>
```

Description Show security utm status

<show-web-filtering>

Usage

```
<rpc>
```

```

<show-web-filtering>
</show-web-filtering>
</rpc>

```

Description Show web-filtering information

Contents <show-web-filtering-statistics>—Show web-filtering statistics
 <show-web-filtering-status>—Show web-filtering status

<show-web-filtering-statistics>

Usage

```

<rpc>
  <show-web-filtering-statistics/>
</rpc>

```

Description Show web-filtering statistics

<show-web-filtering-status>

Usage

```

<rpc>
  <show-web-filtering-status/>
</rpc>

```

Description Show web-filtering status

<test-anti-spam-profile>

Usage

```

<rpc>
  <test-anti-spam-profile>
    <profile>profile</profile>
    <test-string>test-string</test-string>
  </test-anti-spam-profile>
</rpc>

```

Description Test anti-spam profile

Contents <profile>—Anti-spam profile name
 <test-string>—Anti-spam test string

<test-anti-virus-profile>

Usage

```
<rpc>
  <test-anti-virus-profile>
    <profile>profile</profile>
    <test-string>test-string</test-string>
  </test-anti-virus-profile>
</rpc>
```

Description Test anti-virus profile

Contents <profile>—Anti-virus profile name

<test-string>—Anti-virus test string

<test-web-filtering-profile>

Usage

```
<rpc>
  <test-web-filtering-profile>
    <profile>profile</profile>
    <test-string>test-string</test-string>
  </test-web-filtering-profile>
</rpc>
```

Description Test web-filtering profile

Contents <profile>—Web-filtering profile name

<test-string>—Web-filtering test string

<traceroute>

Usage

```
<rpc>
  <traceroute>
    <gateway>gateway</gateway>
    <ttl>ttl</ttl>
    <wait>wait</wait>
    <no-resolve/>
    <source>source</source>
    <tos>tos</tos>
    <as-number-lookup/>
    <bypass-routing/>
    <inet/>
    <inet6/>
    <interface>interface</interface>
    <routing-instance>routing-instance</routing-instance>
```

```

    <host>host</host> <!-- mandatory -->
    <logical-system>logical-system</logical-system>
  </traceroute>
</rpc>

```

Description Trace route to remote host

Contents

- <mpls>—Trace MPLS paths
- <gateway>—Address of router gateway to route through
- <ttl>—IP maximum time-to-live value (or IPv6 maximum hop-limit value)
- <wait>—Number of seconds to wait for response
- <no-resolve>—Don't attempt to print addresses symbolically
- <source>—Source address to use in outgoing traceroute packets
- <tos>—IP type-of-service field (IPv4)
- <as-number-lookup>—Look up AS numbers for each hop
- <bypass-routing>—Bypass routing table, use specified interface
- <inet>—Force traceroute to IPv4 destination
- <inet6>—Force traceroute to IPv6 destination
- <interface>—Name of interface to use for outgoing traffic
- <routing-instance>—Name of routing instance for traceroute attempt
- <host>—Hostname or address of remote host
- <logical-system>—Name of logical system
- <request-traceroute-ethernet>—Trace route to an ethernet host by unicast mac address

<verify-pki-ca-certificate>

Usage

```

<rpc>
  <verify-pki-ca-certificate>
    <ca-profile>ca-profile</ca-profile> <!-- mandatory -->
  </verify-pki-ca-certificate>
</rpc>

```

Description Verify the certificate

Contents <ca-profile>—Certificate authority profile

<verify-pki-local-certificate>

Usage

```
<rpc>
  <verify-pki-local-certificate>
    <certificate-id>certificate-id</certificate-id> <!-- mandatory -->
  </verify-pki-local-certificate>
</rpc>
```

Description Verify the certificate

Contents <certificate-id>—Certificate identifier

<walk-snmp-object>

Usage

```
<rpc>
  <walk-snmp-object>
    <decimal/>
    <ascii/>
    <snmp-object-name>snmp-object-name</snmp-object-name> <!-- mandatory
-->
  </walk-snmp-object>
</rpc>
```

Description Walk SNMP object values

Contents <decimal>—Decimal format (default)

<ascii>—Convert string indices to 'ascii-keys' representation

<snmp-object-name>—Requested SNMP object names

CHAPTER 3

Summary of Operational Response Tag Elements

This chapter lists the Extensible Markup Language (XML) tag elements in the Junos XML application programming interface (API) that contain operational information. The Junos XML protocol and NETCONF servers return them in response to requests from client applications. The tags are divided into the following sections and listed in alphabetical order within each section.

- Summary of Accounting Response Tags on page 736
- Summary of Adaptive Services Response Tags on page 774
- Summary of Alarm Response Tags on page 1055
- Summary of ALG Response Tags on page 1058
- Summary of ANCP Response Tags on page 1079
- Summary of Antispam Statistics Response Tags on page 1093
- Summary of APPIDD Response Tags on page 1125
- Summary of APS Response Tags on page 1130
- Summary of ARP Response Tags on page 1135
- Summary of Authentication Response Tags on page 1138
- Summary of Autoinstallation Response Tags on page 1155
- Summary of AVT Response Tags on page 1156
- Summary of Bidirectional Forwarding Direction Response Tags on page 1157
- Summary of Connectivity Fault Management Response Tags on page 1167
- Summary of Chassis Response Tags on page 1289
- Summary of Class-of-Service Response Tags on page 1468
- Summary of Clock Synchronization Response Tags on page 1566
- Summary of CLNP Traceroute Response Tags on page 1572
- Summary of Database Replication Response Tags on page 1584
- Summary of Dynamic Flow Capture Response Tags on page 1585
- Summary of DHCP Response Tags on page 1590
- Summary of DHCP Relay Response Tags on page 1602

- Summary of DHCP Server Response Tags on page 1607
- Summary of Dialer Response Tags on page 1617
- Summary of Diameter Process Response Tags on page 1629
- Summary of Dynamic VPN Response Tags on page 1688
- Summary of Dynamic Configuration Response Tags on page 1691
- Summary of Ethernet Delay Measurement Response Tags Dynamic Configuration Response Tags on page 1705
- Summary of Ethernet Ping Response Tags on page 1709
- Summary of Ethernet Traceroute Response Tags on page 1713
- Summary of Firewall Filter Response Tags on page 1716
- Summary of Firewall Policy Response Tags on page 1724
- Summary of Graceful Switchover Response Tags on page 1791
- Summary of GRES Test Point Response Tags on page 1797
- Summary of ICCP Response Tags on page 1801
- Summary of IDP Response Tags on page 1804
- Summary of IDS Response Tags on page 1832
- Summary of IGMP Snooping Response Tags on page 1835
- Summary of Interface Metadata Response Tags on page 1879
- Summary of Interface Response Tags on page 1881
- Summary of IPSec Response Tags on page 3470
- Summary of IPv6 Neighbor Discovery Response Tags on page 3553
- Summary of ISDN Response Tags on page 3555
- Summary of JNX Example Response Tags on page 3565
- Summary of LACP Response Response Tags on page 3566
- Summary of Layer 2 Address Learning Response Tags on page 3576
- Summary of Layer 2 Control Protocol Response Tags on page 3647
- Summary of Layer 2 VLAN Retagging Response Tags on page 3705
- Summary of License Response Tags on page 3706
- Summary of Licensed Feature Metadata Response Tags on page 3724
- Summary of Link Fault Management Response Tags on page 3726
- Summary of LLDP Response Tags on page 3736
- Summary of Local Policy Decision Function Response Tags on page 3745
- Summary of MIP Response Tags on page 3749
- Summary of MPLS OAM Response Tags on page 3762
- Summary of Multicast and IGMP Snooping Response Tags on page 3766
- Summary of Multiservices PIC Information Response Tags on page 3865
- Summary of OAM Response Tags on page 3865

- Summary of Packet Triggered Subscribers Response Tags on page 3866
- Summary of Passive Monitoring Interfaces Response Tags on page 3877
- Summary of Periodic Packet Management Response Tags on page 3881
- Summary of PPP Response Tags on page 3886
- Summary of PPP over Ethernet Response Tags on page 3921
- Summary of Pragmatic General Multicast Response Tags on page 3936
- Summary of Public Key Infrastructure Response Tags on page 3942
- Summary of Probe Tests Response Tags on page 3987
- Summary of Product Metadata Response Tags on page 4033
- Summary of R2CP Daemon Response Tags on page 4036
- Summary of Redundant Interfaces Response Tags on page 4046
- Summary of Resource Cleanup Response Tags on page 4049
- Summary of Routing Protocols Response Tags on page 4051
- Summary of Real-Time Performance Monitoring Response Tags on page 5545
- Summary of Routing and Forwarding Table Response Tags on page 5667
- Summary of Scheduler Response Tags on page 5686
- Summary of SCTP Response Tags on page 5687
- Summary of Security Policy Resource Utilization Response Tags on page 5689
- Summary of Service Deployment Response Tags on page 5690
- Summary of Services Accounting Response Tags on page 5692
- Summary of Services Flow Collector Response Tags on page 5732
- Summary of Shared Memory Event Library Response Tags on page 5738
- Summary of Shutdown Response Tags on page 5738
- Summary of SMPL Response Tags on page 5739
- Summary of SMTP Response Tags on page 5749
- Summary of SNMP Response Tags on page 5751
- Summary of SPU Monitoring Response Tags on page 5789
- Summary of SPU Performance Response Tags on page 5790
- Summary of Static Subscribers Response Tags on page 5792
- Summary of Statistics Response Tags on page 5793
- Summary of Subscribers Response Tags on page 5823
- Summary of Tasks Response Tags on page 5827
- Summary of UDP Forwarding Helper Response Tags on page 5839
- Summary of Unified Access Control Response Tags on page 5841
- Summary of VCCP Response Tags on page 5845
- Summary of Virtual Router Redundancy Protocol Response Tags on page 5901

- Summary of X.509 Certificate Response Tags on page 5927
- Summary of Zones Response Tags on page 5951

Summary of Accounting Response Tags

This section lists the Junos XML tags that contain operational information about accounting records. To review the DTD for the tags, see “Junos XML Document Type Definitions” on page 5955.

<accounting-profile-columns>

Usage

```
<accounting-profile-information>
  <accounting-profile-columns>
    <column-label>
      column-label
    </column-label>
  </accounting-profile-columns>
</accounting-profile-information>
```

Description Name of each Junos XML protocol output tag that is included in records generated based on the profile

<accounting-profile-filter>

Usage

```
<accounting-profile-information>
  <accounting-profile-filter>
    <filter-name>
      filter-name
    </filter-name>
    <next-scheduled-collection>
      next-scheduled-collection
    </next-scheduled-collection>
  </accounting-profile-filter>
</accounting-profile-information>
```

Description Name of each filter to which the profile is applied

<accounting-profile-header>

Usage

```
<accounting-profile-information>
  <accounting-profile-header>
    <profile-name>
      profile-name
    </profile-name>
    <profile-type>
      profile-type
    </profile-type>
    <profile-interval>
      profile-interval
    </profile-interval>
  </accounting-profile-header>
</accounting-profile-information>
```

```

</profile-interval>
<profile-use-count>
  profile-use-count
</profile-use-count>
<filename>
  filename
</filename>
<filesize>
  filesize
</filesize>
<filenumber>
  filenumber
</filenumber>
<bytes-written>
  bytes-written
</bytes-written>
<transfer-interval>
  transfer-interval
</transfer-interval>
<next-transfer-time>
  next-transfer-time
</next-transfer-time>
</accounting-profile-header>
</accounting-profile-information>

```

Description Information from the accounting profile header

<accounting-profile-information>

Usage

```

<accounting-profile-information>
  <accounting-profile-header>....</accounting-profile-header>
  <accounting-profile-columns>....</accounting-profile-columns>
  <accounting-profile-interfaces>....</accounting-profile-interfaces>
  <accounting-profile-mib>....</accounting-profile-mib>
  <accounting-profile-filter>....</accounting-profile-filter>
</accounting-profile-information>

```

Description Information about an accounting profile

<accounting-profile-interfaces>

Usage

```

<accounting-profile-information>
  <accounting-profile-interfaces>
    <interface-name>
      interface-name
    </interface-name>
    <next-scheduled-collection>
      next-scheduled-collection
    </next-scheduled-collection>
  </accounting-profile-interfaces>

```

</accounting-profile-information>

Description Name of each interface to which the profile is applied

<accounting-profile-mib>

Usage

```
<accounting-profile-information>
  <accounting-profile-mib>
    <mib-name>
      mib-name
    </mib-name>
    <next-scheduled-collection>
      next-scheduled-collection
    </next-scheduled-collection>
  </accounting-profile-mib>
</accounting-profile-information>
```

Description Name of each Management Information Base to which the profile is applied

<accounting-record-information>

Usage

```
<accounting-record-information>
  <interface-accounting-statistics>....</interface-accounting-statistics>
  <routing-engine-accounting-statistics>....</routing-engine-accounting-statistics>

  <filter-accounting-statistics>....</filter-accounting-statistics>
  <cu-accounting-statistics>....</cu-accounting-statistics>
  <mib-accounting-statistics>....</mib-accounting-statistics>
  <file-accounting-records>....</file-accounting-records>
</accounting-record-information>
```

Description Information in a record that was generated based on an accounting profile

<cu-accounting-record>

Usage

```
<accounting-record-information>
  <cu-accounting-statistics>
    <cu-accounting-record>
      <profile-layout>
        profile-layout
      </profile-layout>
      <epoch-timestamp>
        epoch-timestamp
      </epoch-timestamp>
      <utc-timestamp>
        utc-timestamp
      </utc-timestamp>
      <interface-name>
```

```

    interface-name
  </interface-name>
  <address-family>
    address-family
  </address-family>
  <destination-class-name>
    destination-class-name
  </destination-class-name>
  <source-class-name>
    source-class-name
  </source-class-name>
  <counter-name>
    counter-name
  </counter-name>
  <packet-count>
    packet-count
  </packet-count>
  <byte-count>
    byte-count
  </byte-count>
</cu-accounting-record>
</cu-accounting-statistics>
</accounting-record-information>

```

Description Information in a record that was generated based on a destination class usage or source class usage profile

<cu-accounting-statistics>

Usage

```

<accounting-record-information>
  <b>cu-accounting-statistics</b>
  <cu-accounting-record>....</cu-accounting-record>
  <b>/cu-accounting-statistics</b>
</accounting-record-information>

```

Description Information from one or more records that were generated based on a destination class usage or source class usage profile

<file-accounting-record>

Usage

```

<accounting-record-information>
  <file-accounting-records>
    <b>file-accounting-record</b>
    <profile-layout>
      profile-layout
    </profile-layout>

```

Description

<snmp-request-error>

Usage

```
<snmp-object-information>
  <snmp-request-error>
    <snmp-req-error-value>
      snmp-req-error-value
    </snmp-req-error-value>
  </snmp-request-error>
</snmp-object-information>
```

Description

Summary of Adaptive Services Response Tags

This section lists Junos XML tags that contain operational information about adaptive services interfaces. To review the DTD for the tags, see “Junos XML Document Type Definitions” on page 5955.

<alg-error-counters>

Usage

```
<sfw-stats-service-set-entry>
  <alg-error-counters>
```

```
<alg-bootp-errors>
  alg-bootp-errors
</alg-bootp-errors>
<alg-dce-rpc-errors>
  alg-dce-rpc-errors
</alg-dce-rpc-errors>
<alg-dce-rpc-portmap-errors>
  alg-dce-rpc-portmap-errors
</alg-dce-rpc-portmap-errors>
<alg-dns-errors>
  alg-dns-errors
</alg-dns-errors>
<alg-exec-errors>
  alg-exec-errors
</alg-exec-errors>
<alg-ftp-errors>
  alg-ftp-errors
</alg-ftp-errors>
<alg-h323-errors>
  alg-h323-errors
</alg-h323-errors>
<alg-icmp-errors>
  alg-icmp-errors
</alg-icmp-errors>
<alg-iiop-errors>
  alg-iiop-errors
</alg-iiop-errors>
<alg-login-errors>
  alg-login-errors
</alg-login-errors>
<alg-netbios-errors>
  alg-netbios-errors
</alg-netbios-errors>
<alg-netshow-errors>
  alg-netshow-errors
</alg-netshow-errors>
<alg-realaudio-errors>
  alg-realaudio-errors
</alg-realaudio-errors>
<alg-rpc-errors>
  alg-rpc-errors
</alg-rpc-errors>
<alg-rpc-portmap-errors>
  alg-rpc-portmap-errors
</alg-rpc-portmap-errors>
<alg-rtsp-errors>
  alg-rtsp-errors
</alg-rtsp-errors>
<alg-shell-errors>
  alg-shell-errors
</alg-shell-errors>
<alg-sip-errors>
  alg-sip-errors
</alg-sip-errors>
<alg-snmp-errors>
  alg-snmp-errors
```

```
</alg-snmp-errors>
<alg-sqlnet-errors>
  alg-sqlnet-errors
</alg-sqlnet-errors>
<alg-tftp-errors>
  alg-tftp-errors
</alg-tftp-errors>
<alg-traceroute-errors>
  alg-traceroute-errors
</alg-traceroute-errors>
</alg-error-counters>
</sfw-stats-service-set-entry>
```

Description Extensive output of ALG processing errors

<base-root-entry>

Usage

```
<pgcpd-active-configuration>
  <base-root-entry>
    <brp_name>
      brp_name
    </brp_name>
    <brp_minimum>
      brp_minimum
    </brp_minimum>
    <brp_maximum>
      brp_maximum
    </brp_maximum>
    <brp_default>
      brp_default
    </brp_default>
  </base-root-entry>
</pgcpd-active-configuration>
```

Description Array of h248 base root properties

<bsg-address-of-record>

Usage

```
<bsg-address-of-record>
  <bsg-aor-name>
    bsg-aor-name
  </bsg-aor-name>
  <bsg-aor-bindings-num-of-lu>
    bsg-aor-bindings-num-of-lu
  </bsg-aor-bindings-num-of-lu>
  <bsg-address-of-record-bindings>....</bsg-address-of-record-bindings>
</bsg-address-of-record>
```

Description Address of record

<bsg-address-of-record-binding>**Usage**

```

<bsg-address-of-record-binding>
  <bsg-aor-bindings-uri>
    bsg-aor-bindings-uri
  </bsg-aor-bindings-uri>
  <bsg-aor-bindings-reg-realm>
    bsg-aor-bindings-reg-realm
  </bsg-aor-bindings-reg-realm>
  <bsg-aor-bindings-service-point>
    bsg-aor-bindings-service-point
  </bsg-aor-bindings-service-point>
  <bsg-aor-bindings-last-reg-time>
    bsg-aor-bindings-last-reg-time
  </bsg-aor-bindings-last-reg-time>
  <bsg-aor-bindings-first-reg-time>
    bsg-aor-bindings-first-reg-time
  </bsg-aor-bindings-first-reg-time>
  <bsg-aor-bindings-expiration-time>
    bsg-aor-bindings-expiration-time
  </bsg-aor-bindings-expiration-time>
  <bsg-aor-bindings-lu>
    bsg-aor-bindings-lu
  </bsg-aor-bindings-lu>
</bsg-address-of-record-binding>

```

Description Binding URI's

<bsg-address-of-records>**Usage**

```

<bsg-address-of-records>
  <bsg-address-of-record>....</bsg-address-of-record>
</bsg-address-of-records>

```

Description

<bsg-admission-control-details>**Usage**

```

<bsg-admission-control-details>
  <bsg-cac-name>
    bsg-cac-name
  </bsg-cac-name>
  <bsg-admission-control-dialogs>....</bsg-admission-control-dialogs>
  <bsg-admission-control-transactions>....</bsg-admission-control-transactions>

</bsg-admission-control-details>

```

Description

<bsg-admission-control-details>

Usage

```
<bsg-statistics-admission-control-information>
  <bsg-statistics-admission-control>
    <bfg-admission-control-details>
      <bsg-cac-name>
        bsg-cac-name

      <bsg-admission-control-dialogs>....</bsg-admission-control-dialogs>
      <bsg-admission-control-transactions>....</bsg-admission-control-transactions>

    </bfg-admission-control-details>
  </bsg-statistics-admission-control>
</bsg-statistics-admission-control-information>
```

Description

<bsg-admission-control-dialogs>

Usage

```
<bfg-admission-control-dialogs>
  <bsg-admission-control-dialog-title>
    bsg-admission-control-dialog-title
  </bsg-admission-control-dialog-title>
  <bsg-admission-controlled-object>....</bsg-admission-controlled-object>
</bfg-admission-control-dialogs>
```

Description

<bsg-admission-control-dialogs>

Usage

```
<bsg-admission-control-details>
  <bfg-admission-control-dialogs>
    <bsg-admission-control-dialog-title>
      bsg-admission-control-dialog-title
    </bsg-admission-control-dialog-title>
    <bsg-admission-controlled-object>....</bsg-admission-controlled-object>
  </bfg-admission-control-dialogs>
</bsg-admission-control-details>
```

Description

<bsg-admission-control-dialogs>

Usage

```
<bsg-statistics-admission-control-information>
  <bsg-statistics-admission-control>
    <bsg-admission-control-details>
      <bfg-admission-control-dialogs>
        <bsg-admission-control-dialog-title>
          bsg-admission-control-dialog-title
```

```

    </bsg-admission-control-dialog-title>
    <bsg-admission-controlled-object>....</bsg-admission-controlled-object>
  </bsg-admission-control-dialogs>
</bsg-admission-control-details>
</bsg-statistics-admission-control>
</bsg-statistics-admission-control-information>

```

Description

<bsg-admission-control-transactions>

Usage

```

<bsg-admission-control-transactions>
  <bsg-admission-control-transaction-title>
    bsg-admission-control-transaction-title
  </bsg-admission-control-transaction-title>
  <bsg-admission-controlled-object>....</bsg-admission-controlled-object>
</bsg-admission-control-transactions>

```

Description

<bsg-admission-control-transactions>

Usage

```

<bsg-admission-control-details>
  <bsg-admission-control-transactions>
    <bsg-admission-control-transaction-title>
      bsg-admission-control-transaction-title
    </bsg-admission-control-transaction-title>
    <bsg-admission-controlled-object>....</bsg-admission-controlled-object>
  </bsg-admission-control-transactions>
</bsg-admission-control-details>

```

Description

<bsg-admission-control-transactions>

Usage

```

<bsg-statistics-admission-control-information>
  <bsg-statistics-admission-control>
    <bsg-admission-control-details>
      <bsg-admission-control-transactions>
        <bsg-admission-control-transaction-title>
          bsg-admission-control-transaction-title
        </bsg-admission-control-transaction-title>
        <bsg-admission-controlled-object>....</bsg-admission-controlled-object>
      </bsg-admission-control-transactions>
    </bsg-admission-control-details>
  </bsg-statistics-admission-control>
</bsg-statistics-admission-control-information>

```

Description

<bsg-admission-controlled-object>

Usage

```
<bsg-admission-controlled-object>
  <bsg-cac-active>
    bsg-cac-active
  </bsg-cac-active>
  <bsg-cac-attempts-handled>
    bsg-cac-attempts-handled
  </bsg-cac-attempts-handled>
  <bsg-cac-attempts-rejected-concurrent>
    bsg-cac-attempts-rejected-concurrent
  </bsg-cac-attempts-rejected-concurrent>
  <bsg-cac-attempts-rejected-rate>
    bsg-cac-attempts-rejected-rate
  </bsg-cac-attempts-rejected-rate>
</bsg-admission-controlled-object>
```

Description

<bsg-admission-controlled-object>

Usage

```
<bsg-admission-control-dialogs>
  <bsg-admission-controlled-object>
    <bsg-cac-active>
      bsg-cac-active

    </bsg-admission-control-transactions>
```

```

    </bsg-admission-control-details>
  </bsg-statistics-admission-control>
</bsg-statistics-admission-control-information>

```

Description

<bsg-calls-duration>

Usage

```

<bsg-calls-duration>
  <bsg-calls-duration-details>....</bsg-calls-duration-details>
</bsg-calls-duration>

```

Description Show an histogram of calls-duration for each service point

<bsg-calls-duration-details>

Usage

```

<bsg-calls-duration>
  <bsg-calls-duration-details>
    <bsg-start-time>
      bsg-start-time
    </bsg-start-time>
  </bsg-calls-duration-details>
</bsg-calls-duration>

```

Description

<bsg-charging-statistics>

Usage

```

<bsg-charging-statistics>
  <number-of-ctf-messages>
    number-of-ctf-messages
  </number-of-ctf-messages>
  <number-of-ctf-retries-messages>
    number-of-ctf-retries-messages
  </number-of-ctf-retries-messages>
  <number-of-ctf-replied-messages>

    <cos-stats-service-set-forwarding-class-information>

    <cos-stats-service-set-forwarding-class-entry>....</cos-stats-service-set-forwarding-class-entry>

    </cos-stats-service-set-forwarding-class-information>
  </service-cos-statistics-entry>
</service-cos-statistics-information>

```

Description**<crtp-config-info-entry>****Usage**

```

<crtp-config-info-entry>
  <interface-name>
    interface-name
  </interface-name>
  <crtp-port-min>
    crtp-port-min
  </crtp-port-min>
  <crtp-port-max>
    crtp-port-max
  </crtp-port-max>
  <crtp-tcp-space>
    crtp-tcp-space

```

```
</crtp-tcp-space>
<crtp-udp-space>
  crtp-udp-space
</crtp-udp-space>
<crtp-max-period>
  crtp-max-period
</crtp-max-period>
<crtp-max-time>
  crtp-max-time
</crtp-max-time>
<crtp-rtp-queues>
  crtp-rtp-queues
</crtp-rtp-queues>
</crtp-config-info-entry>
```

Description Compressed Real-Time Protocol information

<crtp-counter-table>

Usage

```
<crtp-counter-table>
  <crtp-counter-name>
    crtp-counter-name
  </crtp-counter-name>
  <crtp-counter-received>
    crtp-counter-received
  </crtp-counter-received>
  <crtp-counter-transmit>
    crtp-counter-transmit
  </crtp-counter-transmit>
</crtp-counter-table>
```

Description

<crtp-flow-entry>

Usage

```
<crtp-flow-entry>
  <crtp-flow-context-id>
    crtp-flow-context-id
  </crtp-flow-context-id>
  <crtp-flow-rtp-id>
    crtp-flow-rtp-id
  </crtp-flow-rtp-id>
  <crtp-flow-source-info>
    crtp-flow-source-info
  </crtp-flow-source-info>
  <crtp-flow-destination-info>
    crtp-flow-destination-info
  </crtp-flow-destination-info>
  <crtp-flow-type>
    crtp-flow-type
  </crtp-flow-type>
```

</crtp-flow-entry>

Description CRTP flow information

<crtp-flow-entry>

Usage

```
<crtp-per-interface-flow-table>
  <service-crtp-flow-table>
    <crtp-flow-entry>
      <crtp-flow-context-id>
        crtp-flow-context-id
      </crtp-flow-context-id>
      <crtp-flow-rtp-id>
        crtp-flow-rtp-id
      </crtp-flow-rtp-id>
      <crtp-flow-source-info>
        crtp-flow-source-info
      </crtp-flow-source-info>
      <crtp-flow-destination-info>
        crtp-flow-destination-info
      </crtp-flow-destination-info>
      <crtp-flow-type>
        crtp-flow-type
      </crtp-flow-type>
    </crtp-flow-entry>
  </service-crtp-flow-table>
</crtp-per-interface-flow-table>
```

Description CRTP flow information

<crtp-flow-entry>

Usage

```
<service-crtp-flow-table-information>
  <crtp-per-interface-flow-table>
    <service-crtp-flow-table>
      <crtp-flow-entry>
        <crtp-flow-context-id>
          crtp-flow-context-id
        </crtp-flow-context-id>
        <crtp-flow-rtp-id>
          crtp-flow-rtp-id
        </crtp-flow-rtp-id>
        <crtp-flow-source-info>
          crtp-flow-source-info
        </crtp-flow-source-info>
        <crtp-flow-destination-info>
          crtp-flow-destination-info
        </crtp-flow-destination-info>
        <crtp-flow-type>
          crtp-flow-type
        </crtp-flow-type>
```

```
</crtp-flow-entry>
</service-crtp-flow-table>
</crtp-per-interface-flow-table>
</service-crtp-flow-table-information>
```

Description CRTP flow information

<crtp-ip-counter-table>

Usage

```
<crtp-ip-counter-table>
  <crtp-ip-counter-name>
    crtp-ip-counter-name
  </crtp-ip-counter-name>
  <crtp-ip-counter-received>
    crtp-ip-counter-received
  </crtp-ip-counter-received>
  <crtp-ip-counter-transmit>
    crtp-ip-counter-transmit
  </crtp-ip-counter-transmit>
</crtp-ip-counter-table>
```

Description

<crtp-per-interface-flow-table>

Usage

```
<crtp-per-interface-flow-table>
  <interface-name>
    interface-name
  </interface-name>
  <service-crtp-flow-table>....</service-crtp-flow-table>
</crtp-per-interface-flow-table>
```

Description CRTP flows sorted by interface

<crtp-per-interface-flow-table>

Usage

```
<service-crtp-flow-table-information>
  <crtp-per-interface-flow-table>
    <interface-name>
      interface-name
    </interface-name>
    <service-crtp-flow-table>....</service-crtp-flow-table>
  </crtp-per-interface-flow-table>
</service-crtp-flow-table-information>
```

Description CRTP flows sorted by interface

<crtp-stats-entry>**Usage**

```

<crtp-stats-entry>
  <crtp-compression-ratio>
    crtp-compression-ratio
  </crtp-compression-ratio>
  <crtp-decompression-ratio>
    crtp-decompression-ratio
  </crtp-decompression-ratio>
  <crtp-sessions-rx>
    crtp-sessions-rx
  </crtp-sessions-rx>
  <crtp-sessions-tx>
    crtp-sessions-tx
  </crtp-sessions-tx>
  <crtp-compressed-rx>
    crtp-compressed-rx
  </crtp-compressed-rx>
  <crtp-compressed-tx>
    crtp-compressed-tx
  </crtp-compressed-tx>
  <crtp-discards>
    crtp-discards
  </crtp-discards>
</crtp-stats-entry>

```

Description CRTP statistics

<drop_counters>**Usage**

```

<sfw-stats-service-set-entry>
  <drop_counters>
    <ip-option>
      ip-option
    </ip-option>
    <syn-defense>
      syn-defense
    </syn-defense>
    <nat-ports-exhausted>
      nat-ports-exhausted
    </nat-ports-exhausted>
  </drop_counters>
</sfw-stats-service-set-entry>

```

Description Drop counters (rules or resource exhaustion)

<drop_counters>**Usage**

```

<service-sfw-statistics-information>

```

```
<service-sfw-statistics-entry>
  <sfw-stats-service-set-entry>
    <drop_counters>
      <ip-option>
        ip-option
      </ip-option>
      <syn-defense>
        syn-defense
      </syn-defense>
      <nat-ports-exhausted>
        nat-ports-exhausted
      </nat-ports-exhausted>
    </drop_counters>
  </sfw-stats-service-set-entry>
</service-sfw-statistics-entry>
</service-sfw-statistics-information>
```

Description Drop counters (rules or resource exhaustion)

<error-counters>

Usage

```
<sfw-stats-service-set-entry>
  <error-counters>
    <ip-errors>
      ip-errors
    </ip-errors>
    <tcp-errors>
      tcp-errors
    </tcp-errors>
    <udp-errors>
      udp-errors
    </udp-errors>
    <icmp-errors>
      icmp-errors
    </icmp-errors>
    <non-ip-packets>
      non-ip-packets
    </non-ip-packets>
    <alg-errors>
      alg-errors
    </alg-errors>
  </error-counters>
</sfw-stats-service-set-entry>
```

Description Summarized protocol processing errors

<error-counters>

Usage

```
<service-sfw-statistics-information>
  <service-sfw-statistics-entry>
    <sfw-stats-service-set-entry>
```

```

<error-counters>
  <ip-errors>
    ip-errors
  </ip-errors>
  <tcp-errors>
    tcp-errors
  </tcp-errors>
  <udp-errors>
    udp-errors
  </udp-errors>
  <icmp-errors>
    icmp-errors
  </icmp-errors>
  <non-ip-packets>
    non-ip-packets
  </non-ip-packets>
  <alg-errors>
    alg-errors
  </alg-errors>
</error-counters>
</sfw-stats-service-set-entry>
</service-sfw-statistics-entry>
</service-sfw-statistics-information>

```

Description Summarized protocol processing errors

<existing-flow-counters>

Usage

```

<sfw-stats-service-set-entry>
  <existing-flow-counters>
    <existing-flow-accepts>
      existing-flow-accepts
    </existing-flow-accepts>
    <existing-flow-discards>
      existing-flow-discards
    </existing-flow-discards>
    <existing-flow-rejects>
      existing-flow-rejects
    </existing-flow-rejects>
  </existing-flow-counters>
</sfw-stats-service-set-entry>

```

Description Existing flow counters

<existing-flow-counters>

Usage

```

<service-sfw-statistics-information>
  <service-sfw-statistics-entry>
    <sfw-stats-service-set-entry>
      <existing-flow-counters>
        <existing-flow-accepts>

```

```
existing-flow-accepts
</existing-flow-accepts>
<existing-flow-discards>
existing-flow-discards
</existing-flow-discards>
<existing-flow-rejects>
existing-flow-rejects
</existing-flow-rejects>
</existing-flow-counters>
</sfw-stats-service-set-entry>
</service-sfw-statistics-entry>
</service-sfw-statistics-information>
```

Description Existing flow counters

<fast-update-filters-entry>

Usage

```
<pgcpd-active-configuration>
<fast-update-filters-entry>
<max-terms>
max-terms
</max-terms>
<max-term-percentage>
max-term-percentage
</max-term-percentage>
</fast-update-filters-entry>
</pgcpd-active-configuration>
```

Description Firewall filters limitation

<fast-update-filters-entry>

Usage

```
<pgcpd-active-configuration>
<gateway-entry>
<fast-update-filters-entry>
<max-terms>
max-terms
</max-terms>
<max-term-percentage>
max-term-percentage
</max-term-percentage>
</fast-update-filters-entry>
</gateway-entry>
</pgcpd-active-configuration>
```

Description Firewall filters limitation

<fast-update-filters-entry>**Usage**

```

<pgcpd-active-configuration>
  <pgcpd-config>
    <gateway-entry>
      <fast-update-filters-entry>
        <max-terms>
          max-terms
        </max-terms>
        <max-term-percentage>
          max-term-percentage
        </max-term-percentage>
      </fast-update-filters-entry>
    </gateway-entry>
  </pgcpd-config>
</pgcpd-active-configuration>

```

Description Firewall filters limitation

<fast-update-filters-entry>**Usage**

```

<service-pgcp-statistics-gateway>
  <gateway-entry>
    <fast-update-filters-entry>
      <max-terms>
        max-terms
      </max-terms>
      <max-term-percentage>
        max-term-percentage
      </max-term-percentage>
    </fast-update-filters-entry>
  </gateway-entry>
</service-pgcp-statistics-gateway>

```

Description Firewall filters limitation

<fast-update-filters-entry>**Usage**

```

<service-pgcp-terminations>
  <gateway-entry>
    <fast-update-filters-entry>
      <max-terms>
        max-terms
      </max-terms>
      <max-term-percentage>
        max-term-percentage
      </max-term-percentage>
    </fast-update-filters-entry>
  </gateway-entry>

```

```
</service-pgcp-terminations>
```

Description Firewall filters limitation

<fast-update-filters-entry>

Usage

```
<service-pgcp-gates>
  <gateway-entry>
    <fast-update-filters-entry>
      <max-terms>
        max-terms
      </max-terms>
      <max-term-percentage>
        max-term-percentage
      </max-term-percentage>
    </fast-update-filters-entry>
  </gateway-entry>
</service-pgcp-gates>
```

Description Firewall filters limitation

<firewall-entry>

Usage

```
<pgcpd-active-configuration>
  <firewall-entry>
    <connection-status>
      connection-status
    </connection-status>
    <number-of-terms>
      number-of-terms
    </number-of-terms>
    <number-of-filters>
      number-of-filters
    </number-of-filters>
  </firewall-entry>
</pgcpd-active-configuration>
```

Description

<firewall-entry>

Usage

```
<pgcpd-active-configuration>
  <pgcpd-config>
    <firewall-entry>
      <connection-status>
        connection-status
      </connection-status>
      <number-of-terms>
        number-of-terms
      </number-of-terms>
    </firewall-entry>
  </pgcpd-config>
</pgcpd-active-configuration>
```

```

    </number-of-terms>
    <number-of-filters>
      number-of-filters
    </number-of-filters>
  </firewall-entry>
</pgcpd-config>
</pgcpd-active-configuration>

```

Description

<flow-table-statistics>

Usage

```

<flow-table-statistics>
  <interface-name>
    interface-name
  </interface-name>
  <flow-tables>
    flow-tables
  </flow-tables>
  <flow>
    flow

```

Description Class of service statistics entry

<service-cos-statistics-information>

Usage

```
<service-cos-statistics-information>
  <service-cos-statistics-entry>....</service-cos-statistics-entry>
</service-cos-statistics-information>
```

Description Class of service statistics information

<service-crtp-extensive-information>

Usage

```
<service-crtp-extensive-information>
</service-crtp-extensive-information>
```

Description Per-interface negotiated CRTP options and statistics

<service-crtp-flow-table>

Usage

```
<crtp-per-interface-flow-table>
  <service-crtp-flow-table>
    <crtp-flow-entry>....</crtp-flow-entry>
  </service-crtp-flow-table>
</crtp-per-interface-flow-table>
```

Description CRTP flows

<service-crtp-flow-table>

Usage

```
<service-crtp-flow-table-information>
```

```

<crtp-per-interface-flow-table>
  <service-crtp-flow-table>
    <crtp-flow-entry>....</crtp-flow-entry>
  </service-crtp-flow-table>
</crtp-per-interface-flow-table>
</service-crtp-flow-table-information>

```

Description CRTP flows

<service-crtp-flow-table-information>

Usage

```

<service-crtp-flow-table-information>
  <crtp-per-interface-flow-table>....</crtp-per-interface-flow-table>
</service-crtp-flow-table-information>

```

Description CRTP flows sorted by interface name

<service-crtp-params-information>

Usage

```

<service-crtp-params-information>
</service-crtp-params-information>

```

Description Negotiated CRTP options sorted by interface name

<service-identification-statistics>

Description Statistics for the service-identification service

<service-identification-statistics-information>

Usage

```
<service-identification-statistics-information>
  <service-identification-statistics>....</service-identification-statistics>
</service-identification-statistics-information>
```

Description

<service-ids-flow-table-information>

Usage

```
<service-ids-flow-table-information>
  <ids-show-summary>....</ids-show-summary>
  <ids-per-service-set-flow-table>....</ids-per-service-set-flow-table>
</service-ids-flow-table-information>
```

Description IDS table

<service-l2tp-destination-clear-information>

Usage

```
<service-l2tp-destination-clear-information>
  <l2tp-destination-clear-entry>....</l2tp-destination-clear-entry>
</service-l2tp-destination-clear-information>
```

Description L2TP cleared destination information

<service-l2tp-destination-information>

Usage

```
<service-l2tp-destination-information>
  <l2tp-destination-table>....</l2tp-destination-table>
</service-l2tp-destination-information>
```

Description L2TP destination information

<service-l2tp-lac-summary-information>

Usage

```
<service-l2tp-lac-summary-information>
  <l2tp-lac-summary-table>....</l2tp-lac-summary-table>
</service-l2tp-lac-summary-information>
```

Description L2TP summary information

<service-l2tp-multilink-clear-information>

Usage

```
<service-l2tp-multilink-clear-information>
  <l2tp-multilink-clear-entry>....</l2tp-multilink-clear-entry>
</service-l2tp-multilink-clear-information>
```

Description Multilink information cleared by L2TP

<service-l2tp-session-clear-information>

Usage

```
<service-l2tp-session-clear-information>
  <l2tp-session-clear-entry>....</l2tp-session-clear-entry>
</service-l2tp-session-clear-information>
```

Description L2TP cleared session information

<service-l2tp-session-information>

Usage

```
<service-l2tp-session-information>
  <l2tp-per-tunnel-session-table>....</l2tp-per-tunnel-session-table>
</service-l2tp-session-information>
```

Description L2TP session information

<service-l2tp-summary-information>

Usage

```
<service-l2tp-summary-information>
  <l2tp-summary-table>....</l2tp-summary-table>
</service-l2tp-summary-information>
```

Description L2TP summary information

<service-l2tp-tunnel-clear-information>

Usage

```
<service-l2tp-tunnel-clear-information>
  <l2tp-tunnel-clear-entry>....</l2tp-tunnel-clear-entry>
</service-l2tp-tunnel-clear-information>
```

Description L2TP cleared tunnel information

<service-l2tp-tunnel-information>

Usage

```
<service-l2tp-tunnel-information>
  <l2tp-per-tunnel-group-tunnel-table>....</l2tp-per-tunnel-group-tunnel-table>
</service-l2tp-tunnel-information>
```

Description L2TP tunnel information

<service-l2tp-user-information>

Usage

```
<service-l2tp-user-information>
  <l2tp-per-tunnel-user-table>....</l2tp-per-tunnel-user-table>
</service-l2tp-user-information>
```

Description L2TP user information

<service-msp-flow-drain>

Usage

```
<service-msp-flow-drain-information>
  <service-msp-flow-drain>
    <interface-name>
      interface-name
    </interface-name>
    <service-set-name>
      service-set-name

    <flows-removed>
      flows-removed
  </service-msp-flow-drain>
</service-msp-flow-drain-information>
```

```

    </flows-removed>
  </service-msp-flow-drain>
</service-msp-flow-drain-information>

```

Description Flow removed

<service-msp-flow-drain-information>

Usage

```

<service-msp-flow-drain-information>
  <service-msp-flow-drain>....</service-msp-flow-drain>
</service-msp-flow-drain-information>

```

Description Remove established flows from the flow table

<service-msp-sess-count>

Usage

```

<service-msp-sess-count-information>
  <service-msp-sess-count>
    <interface-name>
      interface-name
    </interface-name>
    <service-set-name>
      service-set-name

    <sess-count>
      sess-count
    </sess-count>
  </service-msp-sess-count>
</service-msp-sess-count-information>

```

Description Stateful firewall sessions count

<service-msp-sess-count-information>

Usage

```

<service-msp-sess-count-information>
  <service-msp-sess-count>....</service-msp-sess-count>
</service-msp-sess-count-information>

```

Description Count of matching session entries

<service-msp-sess-table-information>

Usage

```

<service-msp-sess-table-information>
  <msp-per-service-set-sess-table>....</msp-per-service-set-sess-table>
</service-msp-sess-table-information>

```

Description Sessions sorted by service set

<service-nat-ipv6-multicast-interfaces>

Usage

```
<service-nat-ipv6-multicast-interfaces>
  <v6-multicast-interface-name>
    v6-multicast-interface-name
  </v6-multicast-interface-name>
  <v6-multicast-configured-status>
    v6-multicast-configured-status
  </v6-multicast-configured-status>
  <v6-multicast-operation-status>
    v6-multicast-operation-status
  </v6-multicast-operation-status>
  <v6-multicast-by-all>
    v6-multicast-by-all
  </v6-multicast-by-all>
</service-nat-ipv6-multicast-interfaces>
```

Description IPv6 multicast interfaces

<service-nat-ipv6-multicast-interfaces>

Usage

```
<service-nat-ipv6-multicast-interfaces-information>
  <service-nat-ipv6-multicast-interfaces>
    <v6-multicast-interface-name>
      v6-multicast-interface-name
    </v6-multicast-interface-name>
    <v6-multicast-configured-status>
      v6-multicast-configured-status
    </v6-multicast-configured-status>

        pool-max-ports-in-use
```

```
</pool-max-ports-in-use>
<pool-addresses-in-use>
  pool-addresses-in-use
</pool-addresses-in-use>
</service-nat-pool>
</sfw-per-service-set-nat-pool>
</service-nat-pool-information>
```

Description NAT pool information

<service-nat-pool-information>

Usage

```
<service-nat-pool-information>
<sfw-per-service-set-nat-pool>....</sfw-per-service-set-nat-pool>
</service-nat-pool-information>
```

Description Show information about NAT pools

<service-nat-pool-map>

Usage

```
<service-nat-mapping-information>
<sfw-per-service-set-nat-mapping>
  <service-nat-pool-map>
    <pool-name>
      pool-name
    </pool-name>
    <natmapping-address-mapping>....</natmapping-address-mapping>
  </service-nat-pool-map>
</sfw-per-service-set-nat-mapping>
</service-nat-mapping-information>
```

Description NAT pool information

<service-pgcp-conversation-information>

Usage

```
<service-pgcp-conversation-information>
<pgcp-per-service-set-conversation>....</pgcp-per-service-set-conversation>
</service-pgcp-conversation-information>
```

Description Show conversations

<service-pgcp-debug-applicationq-latency>

Usage

```
<service-pgcp-debug-applicationq-latency>
<debug-applicationq-latency-information>
  debug-applicationq-latency-information
```

```

</debug-applicationq-latency-information>
</service-pgcp-debug-applicationq-latency>

```

Description

<service-pgcp-debug-applicationq-size>

Usage

```

<service-pgcp-debug-applicationq-size>
  <debug-applicationq-size-information>
    debug-applicationq-size-information
  </debug-applicationq-size-information>
</service-pgcp-debug-applicationq-size>

```

Description

<service-pgcp-debug-commit-latency>

Usage

```

<service-pgcp-debug-commit-latency>
  <debug-commit-latency-information>
    debug-commit-latency-information
  </debug-commit-latency-information>
</service-pgcp-debug-commit-latency>

```

Description

<service-pgcp-debug-mem-mgmt-location>

Usage

```

<service-pgcp-debug-mem-mgmt-location>
  <debug-mem-mgmt-location-information>
    debug-mem-mgmt-location-information
  </debug-mem-mgmt-location-information>
</service-pgcp-debug-mem-mgmt-location>

```

Description

<service-pgcp-debug-mem-mgmt-memory-usage>

Usage

```

<service-pgcp-debug-mem-mgmt-memory-usage>
  <debug-mem-mgmt-memory-usage-information>
    debug-mem-mgmt-memory-usage-information
  </debug-mem-mgmt-memory-usage-information>
</service-pgcp-debug-mem-mgmt-memory-usage>

```

Description

<service-pgcp-debug-mem-mgmt-type>

Usage

```
<service-pgcp-debug-mem-mgmt-type>  
  <debug-mem-mgmt-type-information>  
    debug-mem-mgmt-type-information  
  </debug-mem-mgmt-type-information>  
</service-pgcp-debug-mem-mgmt-type>
```

Description

<service-pgcp-debug-profiling-applicationq-latency-information>

Usage

```
<service-pgcp-debug-profiling-applicationq-latency-information>  
</service-pgcp-debug-profiling-applicationq-latency-information>
```

Description Application queue latency information cleared by pgcpd

<service-pgcp-debug-profiling-datastore-commit-latency-information>

Usage

```
<service-pgcp-debug-profiling-datastore-commit-latency-information>  
</service-pgcp-debug-profiling-datastore-commit-latency-information>
```

Description Datastore commit latency information cleared by pgcpd

<service-pgcp-debug-profiling-resumeq-latency-information>

Usage

```
<service-pgcp-debug-profiling-resumeq-latency-information>  
</service-pgcp-debug-profiling-resumeq-latency-information>
```

Description Resume queue latency information cleared by pgcpd

<service-pgcp-debug-profiling-waitq-latency-information>

Usage

```
<service-pgcp-debug-profiling-waitq-latency-information>  
</service-pgcp-debug-profiling-waitq-latency-information>
```

Description Wait queue latency information cleared by pgcpd

<service-pgcp-debug-profiling-workq-latency-information>

Usage

```
<service-pgcp-debug-profiling-workq-latency-information>  
</service-pgcp-debug-profiling-workq-latency-information>
```

Description Work queue latency information cleared by pgcpd

<service-pgcp-debug-resumeq-latency>

Usage

```
<service-pgcp-debug-resumeq-latency>  
  <debug-resumeq-latency-information>  
    debug-resumeq-latency-information  
  </debug-resumeq-latency-information>  
</service-pgcp-debug-resumeq-latency>
```

Description

<service-pgcp-debug-resumeq-size>

Usage

```
<service-pgcp-debug-resumeq-size>  
  <debug-resumeq-size-information>  
    debug-resumeq-size-information  
  </debug-resumeq-size-information>  
</service-pgcp-debug-resumeq-size>
```

Description

<service-pgcp-debug-roundtrip>

Usage

```
<service-pgcp-debug-roundtrip>  
  <debug-roundtrip-information>  
    debug-roundtrip-information  
  </debug-roundtrip-information>  
</service-pgcp-debug-roundtrip>
```

Description

<service-pgcp-debug-waitq-latency>

Usage

```
<service-pgcp-debug-waitq-latency>  
  <debug-waitq-latency-information>  
    debug-waitq-latency-information  
  </debug-waitq-latency-information>  
</service-pgcp-debug-waitq-latency>
```

Description

<service-pgcp-debug-waitq-size>

Usage

```
<service-pgcp-debug-waitq-size>  
  <debug-waitq-size-information>  
    debug-waitq-size-information  
  </debug-waitq-size-information>
```

</service-pgcp-debug-waitq-size>

Description

<service-pgcp-debug-workq-latency>

Usage

```
<service-pgcp-debug-workq-latency>
  <debug-workq-latency-information>
    debug-workq-latency-information
  </debug-workq-latency-information>
</service-pgcp-debug-workq-latency>
```

Description

<service-pgcp-debug-workq-size>

Usage

```
<service-pgcp-debug-workq-size>
  <debug-workq-size-information>
    debug-workq-size-information
  </debug-workq-size-information>
</service-pgcp-debug-workq-size>
```

Description

<service-pgcp-error-reply>

Usage

```
<service-pgcp-error-reply>
  <service-pgcp-error-reply-message>
    service-pgcp-error-reply-message
  </service-pgcp-error-reply-message>
</service-pgcp-error-reply>
```

Description

<service-pgcp-flow-count>

Usage

```
  <service-pgcp-flow-count-information>
    <service-pgcp-flow-count>
      <interface-name>
        interface-name
      </interface-name>
      <service-set-name>
        service-set-name
      </service-set-name>
      <flow-count>
        flow-count
      </flow-count>
    </service-pgcp-flow-count>
  </service-pgcp-flow-count-information>
```

```
</service-pgcp-flow-count-information>
```

Description Stateful firewall flow count

<service-pgcp-flow-count-information>

Usage

```
<service-pgcp-flow-count-information>
  <service-pgcp-flow-count>....</service-pgcp-flow-count>
</service-pgcp-flow-count-information>
```

Description Count of matching flow entries

<service-pgcp-flow-table>

Usage

```
<pgcp-per-service-set-flow-table>
  <service-pgcp-flow-table>
    <pgcp-flow-entry>....</pgcp-flow-entry>
  </service-pgcp-flow-table>
</pgcp-per-service-set-flow-table>
```

Description Stateful firewall flows

<service-pgcp-flow-table>

Usage

```
<service-pgcp-flow-table-information>
  <pgcp-per-service-set-flow-table>
    <service-pgcp-flow-table>
      <pgcp-flow-entry>....</pgcp-flow-entry>
    </service-pgcp-flow-table>
  </pgcp-per-service-set-flow-table>
</service-pgcp-flow-table-information>
```

Description Stateful firewall flows

<service-pgcp-flow-table>

Usage

```
<pgcp-per-service-set-conversation>
  <pgcp-conversation>
    <service-pgcp-flow-table>
      <pgcp-flow-entry>....</pgcp-flow-entry>
    </service-pgcp-flow-table>
  </pgcp-conversation>
</pgcp-per-service-set-conversation>
```

Description Stateful firewall flows

<service-pgcp-flow-table>

Usage

```
<service-pgcp-conversation-information>
  <pgcp-per-service-set-conversation>
    <pgcp-conversation>
      <service-pgcp-flow-table>
        <pgcp-flow-entry>....</pgcp-flow-entry>
      </service-pgcp-flow-table>
    </pgcp-conversation>
  </pgcp-per-service-set-conversation>
</service-pgcp-conversation-information>
```

Description Stateful firewall flows

<service-pgcp-flow-table-information>

Usage

```
<service-pgcp-flow-table-information>
  <pgcp-per-service-set-flow-table>....</pgcp-per-service-set-flow-table>
</service-pgcp-flow-table-information>
```

Description Conversations sorted by service set

<service-pgcp-gate-entry-information>

Usage

```

Description Gates information cleared by pgcpd

<service-pgcp-stat-h248-per-command>

Usage

```
<service-pgcp-stat-h248-per-command>
  <command-name>
    command-name
  </command-name>
  <commands-total>
    commands-total
  </commands-total>
  <commands-wildcard>
    commands-wildcard
  </commands-wildcard>
  <commands-success>
    commands-success
  </commands-success>
  <commands-error>
    commands-error
  </commands-error>
```

</service-pgcp-stat-h248-per-command>

Description

<service-pgcp-stat-h248-per-command>

Usage

```
<service-pgcp-statistics-gateway>
  <service-pgcp-stat-h248-per-command>
    <command-name>
      command-name
    </command-name>
    <commands-total>
      commands-total
    </commands-total>
    <commands-wildcard>
      commands-wildcard
    </commands-wildcard>
    <commands-success>
      commands-success
    </commands-success>
    <commands-error>
      commands-error
    </commands-error>
  </service-pgcp-stat-h248-per-command>
</service-pgcp-statistics-gateway>
```

Description

<service-pgcp-stat-h248-per-command-header>

Usage

```
<service-pgcp-stat-h248-per-command-header>
  <per-command-header-name>
    per-command-header-name
  </per-command-header-name>
</service-pgcp-stat-h248-per-command-header>
```

Description

<service-pgcp-stat-h248-per-command-header>

Usage

```
<service-pgcp-statistics-gateway>
  <service-pgcp-stat-h248-per-command-header>
    <per-command-header-name>
      per-command-header-name
    </per-command-header-name>
  </service-pgcp-stat-h248-per-command-header>
</service-pgcp-statistics-gateway>
```

Description

<service-pgcp-statistics-drain-information>

Usage

```
<service-pgcp-statistics-drain-information>  
</service-pgcp-statistics-drain-information>
```

Description Statistics information cleared by pgcpd

<service-pgcp-statistics-gateway>

Usage

```
<service-pgcp-statistics-gateway>  
  <gateway-entry>....</gateway-entry>

  </service-pgcp-statistics-h248>
</service-pgcp-statistics-gateway>

```

Description

<service-pgcp-termination-entry-information>

Usage

```

<service-pgcp-termination-entry-information>
  <termination-id-string>
    termination-id-string
  </termination-id-string>
  <termination-state>
    termination-state

```

```
</termination-state>
<termination-duration>
  termination-duration
</termination-duration>
<termination-h248-dump>
  termination-h248-dump
</termination-h248-dump>
</service-pgcp-termination-entry-information>
```

Description

<service-pgcp-termination-entry-information>

Usage

```
<service-pgcp-terminations>
  <service-pgcp-termination-entry-information>
    <termination-id-string>
      termination-id-string
    </termination-id-string>
    <termination-state>
      termination-state
    </termination-state>
    <termination-duration>
      termination-duration
    </termination-duration>
    <termination-h248-dump>
      termination-h248-dump
    </termination-h248-dump>
  </service-pgcp-termination-entry-information>
</service-pgcp-terminations>
```

Description

<service-pgcp-termination-gates-information>

Usage

```
<service-pgcp-termination-gates-information>
  <gate-id>
    gate-id
  </gate-id>
  <gate-direction>
    gate-direction
  </gate-direction>
  <gate-state>
    gate-state
  </gate-state>
  <gate-action>
    gate-action
  </gate-action>
</service-pgcp-termination-gates-information>
```

Description

<service-pgcp-termination-gates-information>**Usage**

```

<service-pgcp-terminations>
  <service-pgcp-termination-gates-information>
    <gate-id>
      gate-id
    </gate-id>
    <gate-direction>
      gate-direction
    </gate-direction>
    <gate-state>
      gate-state
    </gate-state>
    <gate-action>
      gate-action
    </gate-action>
  </service-pgcp-termination-gates-information>
</service-pgcp-terminations>

```

Description**<service-pgcp-terminations>****Usage**

```

<service-pgcp-terminations>
  <gateway-entry>....</gateway-entry>

  <service-pgcp-termination-entry-information>....</service-pgcp-termination-entry-information>

  <service-pgcp-termination-gates-information>....</service-pgcp-termination-gates-information>

  <service-pgcp-terminations-count>....</service-pgcp-terminations-count>
</service-pgcp-terminations>

```

Description**<service-pgcp-terminations-count>****Usage**

```

<service-pgcp-terminations-count>
  <termination-count>
    termination-count
  </termination-count>
  <gateway-name>
    gateway-name
  </gateway-name>
</service-pgcp-terminations-count>

```

Description Count of termination entries per gateway

<service-pgcp-terminations-count>

Usage

```
<service-pgcp-terminations>
  <service-pgcp-terminations-count>
    <termination-count>
      termination-count
    </termination-count>
    <gateway-name>
      gateway-name
    </gateway-name>
  </service-pgcp-terminations-count>
</service-pgcp-terminations>
```

Description Count of termination entries per gateway

<service-pic-entry>

Usage

```
<pgcpd-active-configuration>
  <service-pic-entry>
    <pic-name>
      pic-name
    </pic-name>
    <pic-status>
      pic-status
    </pic-status>
  </service-pic-entry>
</pgcpd-active-configuration>
```

Description

<service-pic-entry>

Usage

```
<pgcpd-active-configuration>
  <pgcpd-config>
    <service-pic-entry>
      <pic-name>
        pic-name
      </pic-name>
      <pic-status>
        pic-status
      </pic-status>
    </service-pic-entry>
  </pgcpd-config>
</pgcpd-active-configuration>
```

Description

<service-pic-entry>**Usage**

```

<service-pgcp-statistics-gateway>
  <service-pic-entry>
    <pic-name>
      pic-name
    </pic-name>
    <pic-status>
      pic-status
    </pic-status>
  </service-pic-entry>
</service-pgcp-statistics-gateway>

```

Description**<service-rate-limit-entry>****Usage**

```

<service-rate-limit-information>
  <service-rate-limit-entry>
    <service-rate-limit-mark-color>
      service-rate-limit-mark-color
    </service-rate-limit-mark-color>
    <service-rate-limit-packet-count>
      service-rate-limit-packet-count
    </service-rate-limit-packet-count>
    <service-rate-limit-byte-count>
      service-rate-limit-byte-count
    </service-rate-limit-byte-count>
  </service-rate-limit-entry>
</service-rate-limit-information>

```

Description**<service-rate-limit-entry>****Usage**

```

<service-pgcp-gate-entry-information>
  <service-rate-limit-information>
    <service-rate-limit-entry>
      <service-rate-limit-mark-color>
        service-rate-limit-mark-color
      </service-rate-limit-mark-color>
      <service-rate-limit-packet-count>
        service-rate-limit-packet-count
      </service-rate-limit-packet-count>
      <service-rate-limit-byte-count>
        service-rate-limit-byte-count
      </service-rate-limit-byte-count>
    </service-rate-limit-entry>
  </service-rate-limit-information>
</service-pgcp-gate-entry-information>

```

Description**<service-rate-limit-entry>****Usage**

```
<service-pgcp-gates>
  <service-pgcp-gate-entry-information>
    <service-rate-limit-information>
      <service-rate-limit-entry>
        <service-rate-limit-mark-color>
          service-rate-limit-mark-color
        </service-rate-limit-mark-color>
        <service-rate-limit-packet-count>
          service-rate-limit-packet-count
        </service-rate-limit-packet-count>
        <service-rate-limit-byte-count>
          service-rate-limit-byte-count
        </service-rate-limit-byte-count>
      </service-rate-limit-entry>
    </service-rate-limit-information>
  </service-pgcp-gate-entry-information>
</service-pgcp-gates>
```

Description**<service-rate-limit-information>****Usage**

```
<service-rate-limit-information>
  <service-rate-limit-entry>....</service-rate-limit-entry>
</service-rate-limit-information>
```

Description Rate limiting statistics

<service-rate-limit-information>**Usage**

```
<service-pgcp-gate-entry-information>
  <service-rate-limit-information>
    <service-rate-limit-entry>....</service-rate-limit-entry>
  </service-rate-limit-information>
</service-pgcp-gate-entry-information>
```

Description Rate limiting statistics

<service-rate-limit-information>**Usage**

```
<service-pgcp-gates>
  <service-pgcp-gate-entry-information>
    <service-rate-limit-information>
      <service-rate-limit-entry>....</service-rate-limit-entry>
```

```

    </service-rate-limit-information>
  </service-pgcp-gate-entry-information>
</service-pgcp-gates>

```

Description Rate limiting statistics

<service-set-cpu-statistics>

Usage

```

<service-set-cpu-statistics>
  <service-set-name>
    service-set-name
  </service-set-name>
  <interface-name>
    interface-name
  </interface-name>
  <cpu-utilization-percent>
    cpu-utilization-percent
  </cpu-utilization-percent>
</service-set-cpu-statistics>

```

Description CPU usage statistics

<service-set-cpu-statistics>

Usage

```

<service-set-cpu-statistics-information>
  <service-set-cpu-statistics>
    <service-set-name>
      service-set-name
    </service-set-name>
    <interface-name>
      interface-name
    </interface-name>
    <cpu-utilization-percent>
      cpu-utilization-percent
    </cpu-utilization-percent>
  </service-set-cpu-statistics>
</service-set-cpu-statistics-information>

```

Description CPU usage statistics

<service-set-cpu-statistics-information>

Usage

```

<service-set-cpu-statistics-information>
  <service-set-cpu-statistics>....</service-set-cpu-statistics>
</service-set-cpu-statistics-information>

```

Description

<service-set-entry>

Usage

```
<pgcpd-active-configuration>
  <service-set-entry>
    <service-set-name>
      service-set-name
    </service-set-name>
    <id>
      id
    </id>
    <rule-ref-entry>....</rule-ref-entry>
  </service-set-entry>
</pgcpd-active-configuration>
```

Description

<service-set-entry>

Usage

```
<pgcpd-active-configuration>
  <pgcpd-config>
    <service-set-entry>
      <service-set-name>
        service-set-name
      </service-set-name>
      <id>
        id
      </id>
      <rule-ref-entry>....</rule-ref-entry>
    </service-set-entry>
  </pgcpd-config>
</pgcpd-active-configuration>
```

Description

<service-set-memory-statistics>

Usage

```
<service-set-memory-statistics>
  <service-set-name>
    service-set-name
  </service-set-name>
  <interface-name>
    interface-name
  </interface-name>
  <bytes-used>
    bytes-used
  </bytes-used>
</service-set-memory-statistics>
```

Description Memory usage statistics

<service-set-memory-statistics>**Usage**

```

<service-set-memory-statistics-information>
  <service-set-memory-statistics>
    <service-set-name>
      service-set-name
    </service-set-name>
    <interface-name>
      interface-name
    </interface-name>
    <bytes-used>
      bytes-used
    </bytes-used>
  </service-set-memory-statistics>
</service-set-memory-statistics-information>

```

Description Memory usage statistics

<service-set-memory-statistics-information>**Usage**

```

<service-set-memory-statistics-information>
  <service-set-memory-statistics>....</service-set-memory-statistics>
</service-set-memory-statistics-information>

```

Description**<service-set-packet-drop-statistics>****Usage**

```

<service-set-packet-drop-statistics>
  <service-set-packet-drops>....</service-set-packet-drops>
</service-set-packet-drop-statistics>

```

Description**<service-set-packet-drops>****Usage**

```

<service-set-packet-drops>
  <service-set-name>
    service-set-name
  </service-set-name>
  <interface-name>
    interface-name
  </interface-name>
  <cpulimit-drops>
    cpulimit-drops
  </cpulimit-drops>
  <memlimit-drops>
    memlimit-drops

```

```
</memlimit-drops>
<flowlimit-drops>
  flowlimit-drops
</flowlimit-drops>
<tcpalg-drops>
  tcpalg-drops
</tcpalg-drops>
</service-set-packet-drops>
```

Description Packet-drop statistics

<service-set-packet-drops>

Usage

```
<service-set-packet-drop-statistics>
  <b>service-set-packet-drops</b>
    <service-set-name>
      service-set-name
    </service-set-name>
    <interface-name>
      interface-name
    </interface-name>
    <cpulimit-drops>
      cpulimit-drops
    </cpulimit-drops>
    <memlimit-drops>
      memlimit-drops
    </memlimit-drops>
    <flowlimit-drops>
      flowlimit-drops
    </flowlimit-drops>
    <tcpalg-drops>
      tcpalg-drops
    </tcpalg-drops>
  </service-set-packet-drops>
</service-set-packet-drop-statistics>
```

Description Packet-drop statistics

<service-set-plugin-information>

Usage

```
<b>service-set-plugin-information</b>
  <service-set-name>
    service-set-name
  </service-set-name>
  <service-set-state>
    service-set-state
  </service-set-state>
  <plugins-configured>
    plugins-configured
  </plugins-configured>
  <plugin-name>
```

```

    plugin-name
  </plugin-name>
  <plugin-id>
    plugin-id
  </plugin-id>
</service-set-plugin-information>

```

Description Service set plugin information

<service-set-plugin-information>

Usage

```

<service-set-plugin-summary>
  <service-set-plugin-information>
    <service-set-name>
      service-set-name
    </service-set-name>
    <service-set-state>
      service-set-state

      </service-set-policy-bytes-used>
      <service-set-percent-policy-bytes-used>
        service-set-percent-policy-bytes-used
      </service-set-percent-policy-bytes-used>
    </service-set-service-type-entry>
  </service-set-summary-information-entry>
```

</service-set-summary-information>

Description Service set service type entry

<service-set-summary-information>

Usage

<service-set-summary-information>

<service-set-summary-information-entry>....</service-set-summary-information-entry>

</service-set-summary-information>

Description Service set summary information

<service-set-summary-information-entry>

Usage

```
<service-set-summary-information>
  <service-set-summary-information-entry>
    <interface-name>
      interface-name
    </interface-name>
    <service-set-service-type-entry>....</service-set-service-type-entry>
  </service-set-summary-information-entry>
</service-set-summary-information>
```

Description Service set summary information entry

<service-set-tcp-mss>

Usage

```
<service-set-tcp-mss>
  <service-set-name>
    service-set-name
  </service-set-name>
  <interface-name>
    interface-name
  </interface-name>
  <syn-received>
    syn-received
  </syn-received>
  <syn-modified>
    syn-modified
  </syn-modified>
</service-set-tcp-mss>
```

Description TCP MSS statistics

<service-set-tcp-mss>

Usage

```
<service-set-tcp-mss-statistics>
  <service-set-tcp-mss>
    <service-set-name>
      service-set-name
    </service-set-name>
    <interface-name>
      interface-name
    </interface-name>
    <syn-received>
      syn-received
    </syn-received>
    <syn-modified>
      syn-modified
    </syn-modified>
  </service-set-tcp-mss>
</service-set-tcp-mss-statistics>
```

Description TCP MSS statistics

<service-set-tcp-mss-statistics>

Usage

```
<service-set-tcp-mss-statistics>
  <service-set-tcp-mss>....</service-set-tcp-mss>
</service-set-tcp-mss-statistics>
```

Description

<service-sfw-conversation-information>

Usage

```
<service-sfw-conversation-information>
  <sfw-per-service-set-conversation>....</sfw-per-service-set-conversation>
</service-sfw-conversation-information>
```

Description Show conversations

<service-sfw-flow-count>

Usage

```
<service-sfw-flow-count-information>
  <service-sfw-flow-count>
    <interface-name>
      interface-name
    </interface-name>
    <service-set-name>
      service-set-name
    </service-set-name>
    <flow-count>
```

```

        flow-count
      </flow-count>
    </service-sfw-flow-count>
  </service-sfw-flow-count-information>

```

Description Stateful firewall flow count

<service-sfw-flow-count-information>

Usage

```

<service-sfw-flow-count-information>
  <service-sfw-flow-count>....</service-sfw-flow-count>
</service-sfw-flow-count-information>

```

Description Count of matching flow entries

<service-sfw-flow-drain>

Usage

```

<service-sfw-flow-drain-information>
  <service-sfw-flow-drain>
    <interface-name>
      interface-name
    </interface-name>
    <service-set-name>
      service-set-name
    </service-set-name>
    <conversations-removed>
      conversations-removed
    </conversations-removed>
  </service-sfw-flow-drain>
</service-sfw-flow-drain-information>

```

Description Stateful firewall flow removed

<service-sfw-flow-drain-information>

Usage

```

<service-sfw-flow-drain-information>
  <service-sfw-flow-drain>....</service-sfw-flow-drain>
</service-sfw-flow-drain-information>

```

Description Remove established flows from the flow table

<service-sfw-flow-table>

Usage

```

<sfw-per-service-set-flow-table>
  <service-sfw-flow-table>
    <sfw-flow-entry>....</sfw-flow-entry>
  </service-sfw-flow-table>
</sfw-per-service-set-flow-table>

```

```
    </service-sfw-flow-table>
  </sfw-per-service-set-flow-table>
```

Description Stateful firewall flows

<service-sfw-flow-table>

Usage

```
  <service-sfw-flow-table-information>
    <sfw-per-service-set-flow-table>
      <service-sfw-flow-table>
        <sfw-flow-entry>....</sfw-flow-entry>
      </service-sfw-flow-table>
    </sfw-per-service-set-flow-table>
  </service-sfw-flow-table-information>
```

Description Stateful firewall flows

<service-sfw-flow-table>

Usage

```
  <sfw-per-service-set-conversation>
    <sfw-conversation>
      <service-sfw-flow-table>
        <sfw-flow-entry>....</sfw-flow-entry>
      </service-sfw-flow-table>
    </sfw-conversation>
  </sfw-per-service-set-conversation>
```

Description Stateful firewall flows

<service-sfw-flow-table>

Usage

```
  <service-sfw-conversation-information>
    <sfw-per-service-set-conversation>
      <sfw-conversation>
        <service-sfw-flow-table>
          <sfw-flow-entry>....</sfw-flow-entry>
        </service-sfw-flow-table>
      </sfw-conversation>
    </sfw-per-service-set-conversation>
  </service-sfw-conversation-information>
```

Description Stateful firewall flows

<service-sfw-flow-table-information>

Usage

```
  <service-sfw-flow-table-information>
```

```
<sfw-per-service-set-flow-table>....</sfw-per-service-set-flow-table>
</service-sfw-flow-table-information>
```

Description Conversations sorted by service set

<service-sfw-sip-call-count>

Usage

```
<service-sfw-sip-call-count-information>
  <service-sfw-sip-call-count>
    <interface-name>
      interface-name
    </interface-name>
    <service-set-name>
      service-set-name
    </service-set-name>
    <sip-call-count>
      sip-call-count
    </sip-call-count>
  </service-sfw-sip-call-count>
</service-sfw-sip-call-count-information>
```

Description SIP call count

<service-sfw-sip-call-count-information>

Usage

```
<service-sfw-sip-call-count-information>
  <service-sfw-sip-call-count>....</service-sfw-sip-call-count>
</service-sfw-sip-call-count-information>
```

Description Display a count of the matching SIP calls

<service-sfw-sip-call-drain>

Usage

```
<service-sfw-sip-call-drain-information>
  <service-sfw-sip-call-drain>
    <interface-name>
      interface-name
    </interface-name>
    <service-set-name>
      service-set-name
    </service-set-name>
    <sip-calls-removed>
      sip-calls-removed
    </sip-calls-removed>
  </service-sfw-sip-call-drain>
</service-sfw-sip-call-drain-information>
```

Description SIP calls removed

<service-sfw-sip-call-drain-information>

Usage

```
<service-sfw-sip-call-drain-information>
  <service-sfw-sip-call-drain>....</service-sfw-sip-call-drain>
</service-sfw-sip-call-drain-information>
```

Description Remove established SIP calls from the flow table

<service-sfw-sip-call-information>

Usage

```
<service-sfw-sip-call-information>
  <sfw-per-service-set-sip-calls>....</sfw-per-service-set-sip-calls>
</service-sfw-sip-call-information>
```

Description SIP call information

<service-sfw-sip-registration-count>

Usage

```
<service-sfw-sip-registration-count-information>
  <service-sfw-sip-registration-count>
    <interface-name>
      interface-name
    </interface-name>
    <service-set-name>
      service-set-name
    </service-set-name>
    <sip-registration-count>
      sip-registration-count
    </sip-registration-count>
  </service-sfw-sip-registration-count>
</service-sfw-sip-registration-count-information>
```

Description SIP registration count

<service-sfw-sip-registration-count-information>

Usage

```
<service-sfw-sip-registration-count-information>
  <service-sfw-sip-registration-count>....</service-sfw-sip-registration-count>
</service-sfw-sip-registration-count-information>
```

Description Display a count of the matching SIP registrations

<service-sfw-sip-registration-drain>**Usage**

```

<service-sfw-sip-registration-drain-information>
  <service-sfw-sip-registration-drain>
    <interface-name>
      interface-name
    </interface-name>
    <service-set-name>
      service-set-name
    </service-set-name>
    <sip-registration-removed>
      sip-registration-removed
    </sip-registration-removed>
  </service-sfw-sip-registration-drain>
</service-sfw-sip-registration-drain-information>

```

Description SIP registration removed

<service-sfw-sip-registration-drain-information>**Usage**

```

<service-sfw-sip-registration-drain-information>
  <service-sfw-sip-registration-drain>....</service-sfw-sip-registration-drain>
</service-sfw-sip-registration-drain-information>

```

Description Remove established SIP registrations from the flow table

<service-sfw-sip-registration-information>**Usage**

```

<service-sfw-sip-registration-information>
  <sfw-per-service-set-sip-registrations>....</sfw-per-service-set-sip-registrations>

</service-sfw-sip-registration-information>

```

Description SIP registration information

<service-sfw-statistics-entry>**Usage**

```

<service-sfw-statistics-information>
  <service-sfw-statistics-entry>
    <interface-name>
      interface-name
    </interface-name>
    <sfw-stats-service-set-entry>....</sfw-stats-service-set-entry>
  </service-sfw-statistics-entry>
</service-sfw-statistics-information>

```

Description Stateful firewall statistics entry

<service-sfw-statistics-information>

Usage

```
<service-sfw-statistics-information>
  <service-sfw-statistics-entry>....</service-sfw-statistics-entry>
</service-sfw-statistics-information>
```

Description Stateful firewall statistics information

<service-softwire-6rd-statistics-entry>

Usage

```
<service-softwire-6rd-statistics-entry>
  <softwire-created>
    softwire-created
  </softwire-created>
  <softwire-deleted>
    softwire-deleted

    </service-software-table>
  </software-per-service-set-flow-table>
</service-software-table-information>
```

Description Flow brief information

<software-per-service-set-flow-table>

Usage

```
<software-per-service-set-flow-table>
  <service-set-name>
    service-set-name
  </service-set-name>
  <interface-name>
    interface-name
  </interface-name>
  <service-software-table>....</service-software-table>
</software-per-service-set-flow-table>
```

Description Flows sorted by service set

<software-per-service-set-flow-table>

Usage

```
<service-software-table-information>
  <software-per-service-set-flow-table>
    <service-set-name>
      service-set-name
    </service-set-name>
```

```

    <interface-name>
      interface-name
    </interface-name>
    <service-softwire-table>....</service-softwire-table>
    </software-per-service-set-flow-table>
  </service-softwire-table-information>

```

Description Flows sorted by service set

<tcp-error-counters>

Usage

```

<sfw-stats-service-set-entry>
  <tcp-error-counters>
    <tcp-header-length-error>
      tcp-header-length-error
    </tcp-header-length-error>

          </call-segments>
        </total-counters>
      </sip-alg-counters>
    </sfw-stats-service-set-entry>
  </service-sfw-statistics-entry>
</service-sfw-statistics-information>

```

Description Total statistics

<udp-error-counters>**Usage**

```

<sfw-stats-service-set-entry>
  <udp-error-counters>
    <udp-header-length-error>
      udp-header-length-error
    </udp-header-length-error>
    <udp-zero-port>
      udp-zero-port
    </udp-zero-port>
    <udp-port-scan>
      udp-port-scan
    </udp-port-scan>
  </udp-error-counters>
</sfw-stats-service-set-entry>

```

Description Extensive output of UDP processing errors

<udp-error-counters>**Usage**

```

<service-sfw-statistics-information>
  <service-sfw-statistics-entry>
    <sfw-stats-service-set-entry>
      <udp-error-counters>
        <udp-header-length-error>
          udp-header-length-error
        </udp-header-length-error>
        <udp-zero-port>

```

```
    udp-zero-port
  </udp-zero-port>
  <udp-port-scan>
    udp-port-scan
  </udp-port-scan>
</udp-error-counters>
</sfw-stats-service-set-entry>
</service-sfw-statistics-entry>
</service-sfw-statistics-information>
```

Description Extensive output of UDP processing errors

<uri-redirect-set-statistics>

Usage

```
<uri-redirect-set-statistics>
  <uri-redirect-set-name>
    uri-redirect-set-name
  </uri-redirect-set-name>
  <cause-roaming>
    cause-roaming
  </cause-roaming>

```

Description

Summary of Alarm Response Tags

This section lists Junos XML tags that contain operational information about alarms. To review the DTD for the tags, see “Junos XML Document Type Definitions” on page 5955.

<alarm-detail>

Usage

```
<alarm-information>
  <alarm-detail>
    <alarm-time>
      alarm-time
    </alarm-time>
    <alarm-class>
      alarm-class
    </alarm-class>
    <alarm-description>
      alarm-description
    </alarm-description>
    <alarm-short-description>
      alarm-short-description
    </alarm-short-description>
    <alarm-type>
      alarm-type
    </alarm-type>
```

```

</alarm-detail>
</alarm-information>

```

Description Detailed information about an active alarm

<alarm-detail>

Usage

```

<multi-routing-engine-results>
  <multi-routing-engine-item>
    <alarm-information>
      <alarm-detail>
        <alarm-time>
          alarm-time
        </alarm-time>
        <alarm-class>
          alarm-class
        </alarm-class>
        <alarm-description>
          alarm-description
        </alarm-description>
        <alarm-short-description>
          alarm-short-description
        </alarm-short-description>
        <alarm-type>
          alarm-type
        </alarm-type>
      </alarm-detail>
    </alarm-information>
  </multi-routing-engine-item>
</multi-routing-engine-results>

```

Description Detailed information about an active alarm

<alarm-id-information>

Usage

```

<alarm-id-information>
  <alarm-id>
    alarm-id
  </alarm-id>
</alarm-id-information>

```

Description Alarm identification information

<alarm-information>

Usage

```

<alarm-information>
  <alarm-summary>.....</alarm-summary>
  <alarm-detail>.....</alarm-detail>

```

</alarm-information>

Description Information about all active alarms

<alarm-information>**Usage**

```

<multi-routing-engine-results>
  <multi-routing-engine-item>
    <alarm-information>
      <alarm-summary>....</alarm-summary>
      <alarm-detail>....</alarm-detail>
    </alarm-information>
  </multi-routing-engine-item>
</multi-routing-engine-results>

```

Description Information about all active alarms

<alarm-summary>**Usage**

```

<alarm-information>
  <alarm-summary>
    <active-alarm-count>
      active-alarm-count
    </active-alarm-count>
    <no-active-alarms>
      no-active-alarms
    </no-active-alarms>
  </alarm-summary>
</alarm-information>

```

Description Number of alarms currently active

<alarm-summary>**Usage**

```

<multi-routing-engine-results>
  <multi-routing-engine-item>
    <alarm-information>
      <alarm-summary>
        <active-alarm-count>
          active-alarm-count
        </active-alarm-count>
        <no-active-alarms>
          no-active-alarms
        </no-active-alarms>
      </alarm-summary>
    </alarm-information>
  </multi-routing-engine-item>

```

</multi-routing-engine-results>

Description Number of alarms currently active

<multi-routing-engine-item>

Usage

```
<multi-routing-engine-results>
  <multi-routing-engine-item>
    <re-name>
      re-name
    </re-name>
    <alarm-information>....</alarm-information>
  </multi-routing-engine-item>
</multi-routing-engine-results>
```

Description Information about the active alarms on one Routing Engine on a platform with multiple Routing Engines

<multi-routing-engine-results>

Usage

```
<multi-routing-engine-results>
  <multi-routing-engine-item>....</multi-routing-engine-item>
</multi-routing-engine-results>
```

Description Information about alarms on one or more Routing Engines on a platform with multiple Routing Engines

Summary of ALG Response Tags

This section lists Junos XML tags that contain operational information about Application Layer Gateways (ALG). To review the DTD for the tags, see “Junos XML Document Type Definitions” on page 5955.

<alg-configuration>

Usage

```
<alg-configuration>
  <alg-configuration-activate-dns>
    alg-configuration-activate-dns
  </alg-configuration-activate-dns>
  <alg-configuration-activate-ftp>
    alg-configuration-activate-ftp
  </alg-configuration-activate-ftp>
  <alg-configuration-activate-h323>
    alg-configuration-activate-h323
  </alg-configuration-activate-h323>
  <alg-configuration-activate-mgcp>
    alg-configuration-activate-mgcp
```

```
</alg-configuration-activate-mgcp>
<alg-configuration-activate-msrpc>

Description Information about one or more Automatic Protection Switching interfaces

Summary of ARP Response Tags

This section lists Junos XML tags that contain operational information about Address Resolution Protocol (ARP). To review the DTD for the tags, see “Junos XML Document Type Definitions” on page 5955.

<arp-table-entry>**Usage**

```

<arp-table-entry>
  <mac-address>
    mac-address
  </mac-address>
  <ip-address>
    ip-address
  </ip-address>
  <hostname>
    hostname
  </hostname>
  <interface-name>
    interface-name
  </interface-name>
  <arp-table-entry-flags>....</arp-table-entry-flags>
  <time-to-expire>
    time-to-expire
  </time-to-expire>
</arp-table-entry>

```

Description Information about an entry in the ARP table

<arp-table-entry>**Usage**

```

<arp-table-information>
  <arp-table-entry>
    <mac-address>
      mac-address
    </mac-address>
    <ip-address>
      ip-address
    </ip-address>
    <hostname>

```

```
    hostname
  </hostname>
  <interface-name>
    interface-name
  </interface-name>
  <arp-table-entry-flags>....</arp-table-entry-flags>
  <time-to-expire>
    time-to-expire
  </time-to-expire>
</arp-table-entry>
</arp-table-information>
```

Description Information about an entry in the ARP table

<arp-table-entry-flags>

Usage

```
<arp-table-entry-flags>
  <none>
    none
  </none>
  <permanent>
    permanent
  </permanent>
  <published>
    published
  </published>
  <dead>
    dead
  </dead>
  <free>
    free
  </free>
</arp-table-entry-flags>
```

Description One or more status flags for the ARP entry

<arp-table-entry-flags>

Usage

```
<arp-table-entry>
  <arp-table-entry-flags>
    <none>
      none
    </none>
    <permanent>
      permanent
    </permanent>
    <published>
      published
    </published>
    <dead>
      dead
```

```

    </dead>
    <free>
    free
    </free>
  </arp-table-entry-flags>
</arp-table-entry>

```

Description One or more status flags for the ARP entry

<arp-table-entry-flags>

Usage

```

<arp-table-information>
  <arp-table-entry>
    <arp-table-entry-flags>
      <none>
      none
      </none>
      <permanent>
      permanent
      </permanent>
      <published>
      published
      </published>
      <dead>
      dead
      </dead>
      <free>
      free
      </free>
    </arp-table-entry-flags>
  </arp-table-entry>
</arp-table-information>

```

Description One or more status flags for the ARP entry

<arp-table-information>

Usage

```

<arp-table-information>
  <arp-table-entry>....</arp-table-entry>
  <arp-entry-count>
  arp-entry-count
  </arp-entry-count>
</arp-table-information>

```

Description Information about one or more entries in the ARP table

<clear-arp-table-result>

Usage

```
<clear-arp-table-result>
  <ip-address>
    ip-address
  </ip-address>
  <clear-success>
    clear-success
  </clear-success>
</clear-arp-table-result>
```

Description Results of a clear ARP command

<clear-arp-table-result>

Usage

```
<clear-arp-table-results>
  <clear-arp-table-result>
    <ip-address>
      ip-address
    </ip-address>
    <clear-success>
      clear-success
    </clear-success>
  </clear-arp-table-result>
</clear-arp-table-results>
```

Description Results of a clear ARP command

<clear-arp-table-results>

Usage

```
<clear-arp-table-results>
  <clear-arp-table-result>....</clear-arp-table-result>
</clear-arp-table-results>
```

Description Clear ARP table entry results

Summary of Authentication Response Tags

This section lists Junos XML tags that contain operational information about authentication. To review the DTD for the tags, see "Junos XML Document Type Definitions" on page 5955.

<aaa-module-accounting-statistics>

Usage

```
<aaa-module-statistics>
  <aaa-module-accounting-statistics>
```

```

    <requests>
      requests
    </requests>
    <accounting-response-failures>
      accounting-response-failures
    </accounting-response-failures>
    <accounting-response-success>
      accounting-response-success
    </accounting-response-success>
    <timeouts>
      timeouts
    </timeouts>
  </aaa-module-accounting-statistics>
</aaa-module-statistics>

```

Description

<aaa-module-address-assignment-client-statistics>

Usage

```

<aaa-module-statistics>
  <aaa-module-address-assignment-client-statistics>
    <client-name>
      client-name
    </client-name>
    <out-of-memory>
      out-of-memory
    </out-of-memory>
    <no-matches>
      no-matches
    </no-matches>
  </aaa-module-address-assignment-client-statistics>
</aaa-module-statistics>

```

Description

<aaa-module-address-assignment-pool-statistics>

Usage

```

<aaa-module-statistics>
  <aaa-module-address-assignment-pool-statistics>
    <pool-name>
      pool-name
    </pool-name>
    <link-name>
      link-name
    </link-name>
    <out-of-memory>
      out-of-memory
    </out-of-memory>
    <out-of-addresses>
      out-of-addresses
    </out-of-addresses>
    <total-addresses>

```

```
    total-addresses
  </total-addresses>

</avt-counters>
```

Description

Summary of Bidirectional Forwarding Direction Response Tags

This section lists Junos XML tags that contain operational information about bidirectional forwarding detection (BFD) protocol. To review the DTD for the tags, see “Junos XML Document Type Definitions” on page 5955.

<bfd-client>

Usage

```
<bfd-session>
  <bfd-client>
    <client-name>
      client-name
    </client-name>
    <client-transmission-interval>
      client-transmission-interval
    </client-transmission-interval>
    <client-reception-interval>
      client-reception-interval
    </client-reception-interval>
    <client-multiplier>
      client-multiplier
    </client-multiplier>
    <client-holddown-interval>
      client-holddown-interval
    </client-holddown-interval>
    <client-state>
      client-state
    </client-state>
    <client-authentication>
      client-authentication
    </client-authentication>
    <client-keychain>
      client-keychain
    </client-keychain>
    <client-algorithm>
      client-algorithm
    </client-algorithm>
    <client-authentication-loose>
      client-authentication-loose
```

```
        </client-authentication-loose>
    </bfd-client>
</bfd-session>
```

Description Information about the clients

<bfd-client>

Usage

```
<bfd-session-information>
  <bfd-session>
    <bfd-client>
      <client-name>
        client-name
      </client-name>
      <client-transmission-interval>
        client-transmission-interval
      </client-transmission-interval>
      <client-reception-interval>
        client-reception-interval
      </client-reception-interval>
      <client-multiplier>
        client-multiplier
      </client-multiplier>
      <client-holddown-interval>
        client-holddown-interval
      </client-holddown-interval>
      <client-state>
        client-state
      </client-state>
      <client-authentication>
        client-authentication
      </client-authentication>
      <client-keychain>
        client-keychain
      </client-keychain>
      <client-algorithm>
        client-algorithm
      </client-algorithm>
      <client-authentication-loose>
        client-authentication-loose
      </client-authentication-loose>
    </bfd-client>
  </bfd-session>
</bfd-session-information>
```

Description Information about the clients

<bfd-replication>

Usage

```
<bfd-replication>
  <bfd-replication-session-entry>....</bfd-replication-session-entry>
```

</bfd-replication>

Description Information about bidirectional forwarding detection replication state

<bfd-replication-session-entry>**Usage**

Description

Summary of Chassis Response Tags

This section lists Junos XML tags that contain operational information about the chassis. To review the DTD for the tags, see “Junos XML Document Type Definitions” on page 5955.

<ac-input-detail>

Usage

```
<power-usage-information>
  <power-usage-item>
    <ac-input-detail>
      <ac-input>
        ac-input
      </ac-input>
      <ac-expect-feed>
        ac-expect-feed
      </ac-expect-feed>
      <ac-actual-feed>
        ac-actual-feed
      </ac-actual-feed>
    </ac-input-detail>
  </power-usage-item>
</power-usage-information>
```

Description

<airflow-direction>

Usage

```
<environment-component-information>
  <environment-component-item>
    <airflow-direction>
      <airflow>
        airflow
      </airflow>
      <direction>
        direction
      </direction>
    </airflow-direction>
  </environment-component-item>
</environment-component-information>
```

Description

<alarm-indicators>

Usage

```
<alarm-indicators>
  <red-led>
    red-led
  </red-led>
  <yellow-led>
    yellow-led
  </yellow-led>
```

```
</yellow-led>
<major-alarm-relay>
  major-alarm-relay
</major-alarm-relay>
<minor-alarm-relay>
  minor-alarm-relay
</minor-alarm-relay>
</alarm-indicators>
```

Description Information about alarms from the craft interface

<alarm-indicators>

Usage

```
<front-panel>
  <alarm-indicators>
    <red-led>
      red-led
    </red-led>
    <yellow-led>
      yellow-led
    </yellow-led>
    <major-alarm-relay>
      major-alarm-relay
    </major-alarm-relay>
    <minor-alarm-relay>
      minor-alarm-relay
    </minor-alarm-relay>
  </alarm-indicators>
</front-panel>
```

Description Information about alarms from the craft interface

<alarm-indicators>

Usage

```
<craft-information>
  <front-panel>
    <alarm-indicators>
      <red-led>
        red-led
      </red-led>
      <yellow-led>
        yellow-led
      </yellow-led>
      <major-alarm-relay>
        major-alarm-relay
      </major-alarm-relay>
      <minor-alarm-relay>
        minor-alarm-relay
      </minor-alarm-relay>
    </alarm-indicators>
  </front-panel>
```

```
</craft-information>
```

Description Information about alarms from the craft interface

<cb>

Usage

```
<cb-panel>
  <cb>
