CHAPTER 11

Operational Response Tag Elements Common to EX Series, M, MX, and T Series, and QFX Series

This chapter lists the Extensible Markup Language (XML) tag elements in the Junos XML application programming interface (API) that contain operational information. The Junos XML protocol and NETCONF servers return them in response to requests from client applications.

The tags listed in this chapter are common to devices belonging to the following platforms:

- EX Series
- M Series
- MX Series
- T Series
- QFX Series

The tags are divided into the following sections and listed in alphabetical order within each section.

- Summary of IPSec Response Tags on page 5577

CHAPTER 12

Operational Response Tag Elements Common to J Series, M, MX, and T Series, and SRX Series

This chapter lists the Extensible Markup Language (XML) tag elements in the Junos XML application programming interface (API) that contain operational information. The Junos XML protocol and NETCONF servers return them in response to requests from client applications.

The tags listed in this chapter are common to devices belonging to the following platforms:

- J Series
- M Series
- MX Series
- T Series
- SRX Series

The tags are divided into the following sections and listed in alphabetical order within each section.

- Summary of Connectivity Fault Management Response Tags on page 5661
- Summary of Chassis Response Tags on page 5880
- Summary of Layer 2 Control Protocol Response Tags on page 6096
